8 chosen for Career Ladder

Eight Farwell school personnel have been selected for the Career Ladder, which will mean extra pay for them.

Picked were: Dorris White, Billie Carlyle, Nelle Craig, Pat Owen, Kay Ray, Nancy Burch, Martha White and Frances Boling.

Criteria used included years of experience, type of college degree, extra training, evaluations by school administrators and using state regulations. According to the law setting up the Career Ladder, school administrations were only able to evaluate the school personnel using prior years; they could not use the current year.

Farwell School Supt. John Grigsby pointed out that many personnel have been eligible to start on the Career Ladder, but Farwell was limited by the amount of funds received from the state.

"We were very limited by what we could do," he said. "We would have like to put more people in. Our committee had an extremely difficult time in narrowing the field to eight persons. It was very tough picking the finalists, but the state had put financial limits on us."

Queen

"We use out-of-town judges so that in no way will partiality be shown to any girl or to either town in selecting our new queen," Mrs. Getz explained.

The only other requirements to be eligible to be a BTD candidate, in addition to attending either of the local high schools the next school year, are that they must not be over 18 years of age, must never have

Movie star sends funds to Farwell

The Celebrity Auction which was held last month as a fund-raiser for the Farwell Community Center apparently hasn't finished its work yet.

Since the auction was held, half a dozen more movie and TV stars have sent autographed photos to Farwell, although the letters that had solicited donations had been sent May 1. Also, an autographed script book from "The Jeffersons" arrived.

But the most surprising gift arrived in Saturday's mail. Movie star Marsha Mason, whose husband is playwright Neil Simon, sent a check for \$100 to the Farwell Community Center. Ms. Mason has starred in several movies based on her husband's plays.

The check from Ms. Mason brings the overall total of funds raised by the auction to about \$7,100.

been married, and have a sponsor who will provide a \$10 entry fee.

Several area organizations and businesses are seeking a contestant to sponsor. "We urge each contestant to obtain her own sponsor, but if she does not have one, we will get one for her," said Mrs. Getz.

The contestants will be introduced in the gazebo at Farwell City Park during the activities Saturday afternoon, July 27. Then the new BTD Queen will be revealed and crowned a short time later, and she will reign over the remainder of the afternoon activities.

In addition to naming the 1985-86 Queen, a first, second and third runnerup will be named.

If for any reason the queen should not be able to serve the entire year, or if she should get married, in which case she must relinquish her title, then the first runnerup would take over the reign, or if necessary, then the second or third runnerup in that order.

"Not only is it an honor to represent the Twin Cities as Border Town Days Queen throughout the year, but we want it to be a fun time too," the chairman said.

BTD Queens in past years have appeared and ridden in area parades, and they have been invited to special functions in Texico and Farwell during the year.

To enter the contest, just fill out an entry blank which has appeared in the Tribune and bring it along with a picture of yourself and the \$10 entry fee to Mrs. Getz at 608 First St. in Farwell or to the State Line Tribune.

Assisting in coordinating this year's contest are Peggy Jones and Pam Smith.

For further information, contact Mrs. Getz at 481-9123.

Texico flooding discussed

The Texico City Council discussed a flooding problem at College and Hereford streets without coming to a solution Tuesday night.

Douglas Ditto, of the state highway department, appeared and said the options were: raise the state road, which would mean more flooding on the city's streets; lower the pond, from where the flooding starts, which isn't feasible; build a storm sewer, which isn't feasible because the city doesn't have the money, or leave it the way it is.

Ditto will return to a future council meeting with more specifications of the area.

In other business, the council talked about cleaning and deepening the ditches along Lamar Street.

The council will open bids July 26 on using a private contractor for picking up the city's trash and hauling it to the Clovis landfill.

The council approved allowing

city vehicles to be used in the city cleanup day July 20.

Texico cleanup planned

A second Texico Cleanup Day has been set for July 20 starting at 8 a.m. (MDT) at the Citizens Bank.

The main emphasis will be on Main Street and the park.

"Also, they will try to finish what was left last time as we did not have the manpower or tools," said Chamber Secretary Ann Cooper. "This will be done before our visitors and the BTD Parade."

If you want to help, have tools, or need trash picked up, call Ann Cooper or City Hall.

All bills are created equal.

At least they are if you sign up for Southern Union Gas' Equal Payment Plan. Then your gas bill will be the same each month—whether it's hot or cold outside.

The Equal Payment Plan works like this: If you have lived in the same place for at least one year, your total charges are calculated for the next year based on your past gas usage. The total charge is divided into 12 equal payments that you make each month. If your gas consumption changes drastically, your equal payment may be recalculated, but you will be notified first.

After 11 months we check your total gas usage. If it is more or less than anticipated, your monthly bill will be adjusted and the difference will be spread out over the next year. To remain eligible for the Plan, payments must be made monthly or your account will be payable in full.

If you want all of your bills created equal, send in the coupon below within two weeks after receiving your July gas bill. The Equal Payment Plan will start in August.

Yes, I would like to get the same residential gas bill every month of the year. Sign me up for the Equal Payment Plan to begin with my August bill.
I understand that if payments are not made monthly as billed, I will be removed from the Plan and the full balance will be due and payable.

MRS. LONNIE MCMILLAN

Booth, McMillan vows repeated

Sharon Booth was united in holy matrimony with Lonnie T. McMillan, May 25 at the First Methodist Church of Seminole. Officiating was Rev. Danny Whitehead. The maid of honor was Kathy Booth of Levelland, sister of the bride. Serving as best man was Mo Morrow of Alpine. Sharon is the daughter of Mr. and

Mrs. Robert Booth of Lazbuddie and granddaughter of Mrs. Bess W. Booth of Clovis. Lonnie is the son of Mr. and Mrs. Elmer A. McMillan and grandson of Mr. Guy Crawford all of Alpine. The couple went to Hawaii for their honeymoon. They will be at home in Saginaw, Texas. Both are employed by the Eagle Mountain-Saginaw Independent School District.

Study shows hay weathering losses

With the hay making season in full swing, producers need to give serious thought about storing bales properly. Failure to do so can result in sizeable losses to weathering. A hay storage demonstration on the Cannonade Ranch at Gonzales last year showed various effects of weathering on baled hay. The demonstration was conducted by Dr. David Bade, forage specialist with the Texas Agricultural Extension Service, and Orval Wright, Gonzales County Extension agent, as part of the Extension Service's Integrated Livestock Management Program.

The hay was stored from July until January during which time about 20 inches of rain fell. Weathered parts were removed and weighed to determine losses, and samples of both weathered and unweathered hay were checked for quality. Bales averaged 1575 pounds at harvest and 1400 pounds at feeding.

According to Bade, the storage method greatly influenced the amount of hay weathered. "Largest losses were in bales stored on top of the ground because the hay acted as a wick and soaked up moisture from the ground," he points out. "Uncovered bales on the ground lost 220 pounds on the average (16 percent of their weight) while covered bales

on the ground lost 110 pounds. Those that were uncovered but stored on pallets off the ground lost 80 pounds on the average while covered bales on pallets lost only 35 pounds."

Although the interior of outside-stored bales was comparable in quality to hay stored indoors, feed value of hay that was weathered on the top, sides and particularly bottom of the bales was reduced sharply, notes Bade. Energy content of this weathered hay was reduced by 50 percent of the energy in the unweathered hay. These losses will be greater in loosely baled hay. "The biggest savings comes from storing hay off the ground," emphasizes Bade.

County renews

The Parmer County Commissioners Monday renewed its hospitalization coverage with Blue Cross/Blue Shield of Texas under their new proposal, which is more liberal than the past program for county employees.

Symcoxes visited

Visiting over the Fourth of July in the home of Vernon and Julia Symcox of Oklahoma Lane were their children and grandchildren. They had a weiner roast and homemade ice cream. After a slight rain the grandchildren set off fireworks. Those present were Mr. and Mrs. Lee Hutchins, Carl, Daniel and Geretta; Mr. and Mrs. Steven Hillock, Cherie, Terri, Kevin and Mitchell; Mr. and Mrs. Jimmy Franse, Jarrod, Paul and Julie all of Farwell; Janice Snell, Jimmy, Rebecca, Katrina, Jesse and Douglas of Muleshoe.

It's a boy

Mr. and Mrs. Larry Gregory of Farwell are parents of a baby boy born July 5 at 3:21 a.m. at Methodist Hospital in Lubbock. His name is Grant Lee. He weighs in at eight pounds and ten ounces. Grant has one brother, Gage. Grandparents are Buck Gregory of Farwell and Cleo Gregory of Farwell; and Mr. and Mrs. Bud Nelson of Woodward, Okla. Great-grandparents are Othelia Wommack of Farwell and Ethel Nelson of Buffalo, Okla.

Nuclear waste repository proposal to be topic

Residents of the Farwell area are invited to a meeting July 23, in Amarillo, to learn more about the high-level nuclear waste repository that may be located in Deaf Smith County. The program is scheduled from 4 to 9:30 p.m. in Exhibit Hall of Amarillo Civic Center, with the first

part of the session devoted to giving the public an opportunity to visit with and question persons present to explain aspects of the project. Speakers will make formal presentations beginning at 6:30 p.m. The Department of Energy is sponsoring the meeting.

WATCH

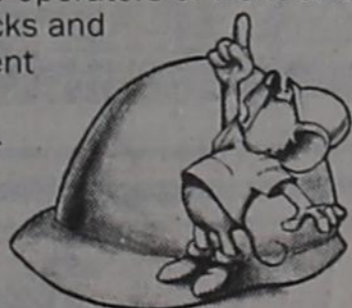

UP

FOR

POWER LINES

Out on the job, power lines bring needed electricity to the site. But they can be dangerous... if you don't watch up! You need to be especially careful when you are handling re-bar, pipes, scaffolding, or tools that are long enough to contact overhead lines. Contact with power lines is also a potential danger to operators of front-end loaders, dump trucks and any other equipment of unusual height.

Keep an eye up for power lines. Watch up, for safety's sake.

Control white grubs in lawns

White grub control in lawns is important during the summer season.

May or June beetles are emerging from the soil and starting to swarm in late evenings. Females are laying eggs and white grub worms that hatch will soon be feeding on roots of bermudagrass and St. Augustine-grass in home lawns. Once grubs begin feeding, control measures should be taken says Gary Patterson, Parmer County Extension Agent.

Treatment time varies with the particular area of the state and ranges from early July in South Texas to mid-August in the Panhandle. Homeowners in Parmer county will need to treat between now and mid-August. Timing of application is critical for adequate control.

White grubs in excessive numbers can heavily damage lawns. Check for white grubs by cutting a square foot section of sod with a shovel and examining the roots and soil to a depth of 4 inches. Examine at least one square foot of sod for 1,000 square feet of lawn area. Chemical treatment is needed if there are more than four grubs per square foot of sod.

Diazinon, Dursban or Dylox provide adequate control and should be used at recommended rates given on the chemical container label. The granular form is easier to apply and to wash into the soil than liquid or spray formulations. After using granules, drag the grass with a tow

sack or waterhose to knock them down to the soil. Then apply enough water to soak the granules into the soil.

Apply diazinon sprays at the rate of 25 gallons of water, including the insecticide, per 1,000 square feet to wash the insecticide into the soil. Wetting the lawn before spraying also helps. Always keep children and pets off the treated lawn until the grass is dry.

The key to white grub control in home lawns is proper timing of chemical applications and getting the insecticide through the grass to the root zone where grubs are feeding.

Further information is provided in the publication, "White Grubs in Texas Turfgrass," available at the county Extension office.
