

The standability and threshability of my P. A. G. was real good. I liked it growing and it wasn't too tall. It was good clean seed with very few off-types. It looked good in the field and weighed good at the elevator. I had a test weight of 60 pounds per bushel on my P. A. G. 665. My P. A. G. produced an average of 9,100 pounds per acre where planted on cotton ground. On all the P. A. G. 665 I planted this year I had an average of 8,392 pounds per acre, which is the best yield I have ever produced."

Plan Community Easter Service

The Texico-Farwell Ministerial Fellowship will sponsor a community Easter service Friday, April 20, 8 p.m. at Farwell Baptist church. Rev. Robert O. Tomlinson of the Methodist church will be speaker for the occasion with the choir to be made up of the combined choirs of all participating churches. A program will appear in next week's paper.

Sherri Roberts To Represent County

Miss Sherri Roberts, Farwell seventh grader, will be in Amarillo on April 28 to represent Parmer County at the annual Amarillo Daily News-Globe Times spelling bee. Sherri earned the right to represent the entire county by winning the county bee held last week in Bovina.

Entered as second class matter at Farwell, Texas, under the act of March 3rd, 1879. Published every Friday. SUBSCRIPTION RATES -- Farmer and adjoining counties, \$3.00 per year; elsewhere, \$4.00 per year. Payable in advance. The Tribune is a member of: NATIONAL EDITORIAL ASSOCIATION TEXAS PRESS ASSOCIATION WEST TEXAS PRESS ASSOCIATION PANHANDLE PRESS ASSOCIATION

Future Nurses Club Tours Two Hospitals

Future Nurses Club of Farwell high school were in Amarillo Saturday where they were taken on guided tours of St. Anthony and Northwest Texas hospitals. At St. Anthony's, the girls were guests at a tea and shown a movie "What To Expect If I Become A Nurse." Mrs. Clarke, nurse recruiter for St. Anthony, was in charge of the tea and tour. The girls had lunch at Northwest Texas hospital after which they toured the hospital and were given a chance to ask questions they would like to have answered, in connection with nursing. The girls were surprised to learn that money is not one of the main factors in becoming a nurse but a desire to be able to help others is one factor in becoming a good nurse. Girls going on the trip were Patricia Durham, Paula Winegeart, Janice Meeks, Darlene Whitehead, Reba Lesly, Rita Turner, Viane Lesly, Donna Mills and Judy Gast.

"Hopper" Takes Second Place

"From The Hopper," column penned by W. H. Graham, publisher of The Tribune received second place in Panhandle Press Association contests for 1961. The award was made at the annual convention in Amarillo over the weekend. First place went to "Just Cast-in" by Travis Harrell of the Friona Star. Graham was also named as a director of the association. Attending the convention were Mr. and Mrs. Graham and Mr. and Mrs. John Getz of The Tribune, and Richard Hapke, former editor who is now with the Lovington Leader.

Texico Baptists Schedule Guest

Rev. Orval Brantley, pastor of Texico Baptist church reports that nine persons were received into the fellowship of that church at the close of services Sunday night April 8. In the absence of Delbert Brock, music director, Bro. Willie Wall was in charge of the music. April 15, in the absence of the pastor, who will be away at a revival meeting in Ft. Worth, Dr. Robert Clarke, from the Bible chair at ENMU, will fill the pulpit at both morning and evening services.

FARWELL SCHOOL MENU

MONDAY--baked ham, raisin sauce, blackeyed peas, buttered asparagus, apple cobbler, bread and butter, milk. TUESDAY--baked turkey, giblet gravy, buttered potato, butter peas, Jell-O fruit salad, hot rolls with butter, milk. Mr. and Mrs. John R. Hadley of Texico are announcing the engagement and approaching marriage of their daughter, Lavena Jean, to Eddie Brian Smith, son of Mr. and Mrs. A. H. Smith of Farwell. The wedding is planned for June 16, 8 p. m. (CST) in the First Baptist Church, Texico. No invitations are being sent, but all friends and relatives are invited to attend the wedding and reception.

Janice Adams Shower Honoree

Miss Janice Adams, bride-elect of Donald Calliouet, was honored with a gift-teea at the Texico Woman's Club building Friday evening. Guests were registered by Mrs. Larry Roubison, sister of the honoree. Pink floating punch, individual white cake squares iced in pink, nuts and mints were served as the guests arrived. Using pink and white, the bride's chosen colors, the refreshment table was laid with a

white cut-work cloth over pink and centered with an arrangement of pink and white roses in a white milk glass epergne. Appointments of milk glass with pink tapers flanked the arrangement. A miniature bride and groom under an archway of white lace completed table arrangements.

Mrs. Les Means and Mrs. Judge Stone presided at the serving table. Mrs. Ruth Reid played soft

background music, and Miss Gale Hadley sang "Always," accompanied by Mrs. Reid. Mrs. Tena Roth was in charge of several quiz games.

Assisting the honoree in opening her gifts was her mother, Mrs. John Adams. Gifts were recorded by Mrs. Roubison and the bows were placed in a pillow of white net and ruffles by Mrs. C. D. Houghtling, grandmother of the prospective groom.

Hostesses for the affair were Mesdames Judge Stone, Les Means, Ray Tharp, Claude Dyer, Russell Johnson, Fred Danforth, Avis Patterson, Elmer Teel, Homer Dykes, F. S. Thigpen, Tena Roth and Ruth Reid.

Mrs. Loyd Eulogized At Delta Xi Meeting

Mrs. Claude Coffer and Mrs. John Boling, Delta Xi members of Delta Kappa Gamma, attended the public relations buffet supper in Dimmitt Saturday night.

Mrs. Melton Richardson, president of Delta Xi was master of ceremonies. Rev. Blalock, Methodist pastor at Dimmitt, gave the invocation, after which special guests were introduced. Administrators and their wives from

Shower Honors Miss Hudnall

Miss Sue Hudnall, bride-elect of Robert Harmon of House, was honored with a miscellaneous shower Tuesday night at the Texico Baptist Church with members of Golden Circle Sunday school class as hostesses.

The bride's chosen colors of blue and white were used in all decorations. Guests were registered in the bride's book by Miss Jean Hadley at a table laid with white lace over blue.

The refreshment table was laid with a white lace cloth over blue and was centered with a bouquet of blue and white flowers. White cake, nuts, mints, and blue punch were served by Mesdames John Hadley and B. A. Kelley.

Gifts were displayed on a table laid with white over blue and centered with a bride doll atop a decorated cake.

Miss Hudnall, her mother, Mrs. Harvey Hudnall, and her fiances mother, Mrs. Russell Harmon, were presented corsages made from foam rubber. Games were directed by Mrs. Buddy Pearce and Mrs. Murray White.

Mrs. Jones Is Program Leader

WMU of First Baptist Church, Farwell, met Tuesday night at the Church for a royal service program with Mrs. Lavon Jones in charge.

Mrs. Ralph Franse was in charge of the business meeting with Mrs. Joe McWilliams giving the opening prayer.

Misses Peggy and Shirlene Martin, accompanied by Vicki Moss, sang a special number. The program "Missionaries Are Needed" was presented by Misses Vicki Moss, Shirlene Martin and Mesdames Yvonne Hardage, Beulah McWilliams, J. L. Bass, S. O. Billington, Bruce Blair and Lavon Jones.

Mrs. Bruce Blair closed the meeting with prayer. A short social hour was enjoyed with refreshments of pie, punch and coffee being served.

Farwell Study Club To Meet April 16

The Farwell Study Club will meet in regular session Monday, April 16, 8 p. m. in the Home Ec. cottage with Mrs. Clyde Dial as chairman of the hostess committee.

The program will be on "Cuba" with Mrs. John Aldridge presenting a talk on "Our Threat From Cuba" and Mrs. Joe Crume speaking on "Fidel Castro."

Thornton Family Has Reunion

All the children of Mr. and Mrs. Roy Thornton were here for a family reunion over the weekend with the first arrivals coming on Thursday.

On Sunday a dinner was held with all family members present.

School Board Meets Monday

Farwell school board met in regular session Monday night and officers were re-elected to their posts for this term. A. H. Haseloff is president; Walter Kaltwasser is vice-president; and Jesse F. Landrum is secretary.

The board voted to requisition a new 48-passenger school bus for the 1962-1963 school term. It will be purchased through the State Board of Control.

The senior trip plans were approved and the board also approved a proposal by the student council which stated that "married students will be given academic privileges only and will not be allowed to participate in any extra-curricular activities sponsored by the school; and that seniors who do not graduate will not be allowed to accompany the class on the senior trip."

Hospital Notes

Mrs. Mabel Reynolds, county treasurer, was dismissed from Clovis Memorial Hospital Saturday after having been hospitalized for several days. She is able to be in her office a part of each day.

Mrs. Dora McKinney was admitted to Clovis Memorial Hospital Saturday for medical aid and for a series of tests. Mrs. E. E. Autrey will be taken to Madison, Wis., this week where she will enter the University hospital. She has been receiving treatment in an Albuquerque hospital since last Friday.

Jana Beth, small daughter of Mr. and Mrs. Paul Crooks, has the measles this week.

Lions Tourney In Full Swing

In full swing at Farwell gymnasium is the Lions-sponsored volleyball tournament which began Thursday at 5:30 with games in the ladies bracket starting off the action.

Scheduled to play the opener in the 30-team bracket were the ESA girls vs. the Lady Laners and the Hopeless Wonders vs. the Volleyettes. (The two latter teams are in the school age bracket). Playing the second games were the Hurricanes vs. the Twisters and the Cracker Jacks vs. the All Stars.

Two games are being played at the same time because of the large number of teams entered, says Cecil Dykes, who is in charge of entries.

The public is invited to see the remainder of the tournament which will continue through Saturday evening.

Admission is 50 cents per person.

Lazbuddie--

Discus, 4th--Joe Tarter; Pole Vault, 1st--David Koelzer; 2nd--Don Smith; High Jump, 1st--Mike Bean; 2nd--(tie) Jimmie Dale Seaton; 6th--Ricky Hassell; Shot Put, 2nd--David Smith; 6th--Joe Tarter.

Boys winning first and second places will enter the regional track and field events in Lubbock April 13 and 14.

Total team points for other District 3-B track entries were Happy, 96 1/2; Bovina, 146; and Hart, 61.

Also advancing to the regional interscholastic meet at Lubbock are members of the golf team: Paul Wilbanks, Dale Vise, Steve Young, Fred Owens and Richard Chitwood. Clark King will compete in tennis at the regional events.

In the literary events Don Smith will represent Lazbuddie in the ready writing contest and Sharon Parham and Cooper Young will enter the extemporaneous speaking contest. They both won first place in the district contest. Don Smith placed second in the district ready writing contest and Clark King placed fourth in the high school division. Toni Smith placed in the elementary division.

Ham Supper Fetes Fireboys

Texico Firemans Auxillary entertained their husbands and special guests with a buffet supper Wednesday night at the fire station.

Menu consisted of baked ham, beans, potato salad, tossed salad, hot rolls, butter, pie and coffee.

Attending were Messers and Mesdames F. S. Thigpen, Perry Winkles, Russell Johnson, Fred Danforth, John Adams, Jim Pierce, C. H. Webb, Bill Thigpen, Sam Lewis, Rip Snodgrass, Otis Huggins, Elmer Teel, F. E. Autrey, Mrs. Ruby Doran, Red Prather, Kenneth Murdick, Donald Callouet, Janice Adams and Hap Danforth.

Tickets On Sale For Scout Display

Local Cub and Boy Scouts are selling tickets to their Scout-o-Rama planned for this Saturday at the fairgrounds in Clovis.

The event will feature displays and exhibits by area scout groups and will be open from 2 to 4:30 p.m. and 7 to 9 p.m. Tickets are 50 cents each.

The local Cubs will use "Islands of the World" as the theme of their display. They have studied this topic during March and will show some of the material they made during the study.

Highway Dept. Accepts Bids For U. S. 60 Seal Coating

Bids for the application of seal coating on Highway 60 from New Mexico State line to Deaf Smith County line are being accepted by the Texas Highway Department this month.

Application of the tar and gravel seal coat is expected to begin this summer but the exact date will not be known until bids are opened April 25 in Austin and the contract is awarded.

The seal coat will complete the construction of the highway according to the original specifications. The final coat was postponed at the time of construction because of a shortage

of funds, according to reports. Funds for the application of the seal coat and construction of a four-lane, divided highway from Farwell to the Farmer County line on U.S. 84-70 were provided by the state this year. Construction of pavement between Lazbuddie and Hart is now underway and is expected to be completed in the near future. The contract for the 14.6 miles of pavement called for completion in 160 working days but construction personnel report that the road may be finished in approximately 90 days. Work on the road began during the first week in March.

THE HIGH PLAINS FARM AND HOME

Cotton Blight Poses Serious State Problem

Bacterial blight occurs throughout the world wherever cotton is grown. It is one of the most damaging plant diseases in Texas, and during recent years has caused an estimated \$37 million yearly loss to Texas growers.

Bacterial blight can be controlled by a combination of four practices: rotating cotton with other crops, planting disease-free seed, growing resistant varieties and fertilizing with nitrogen.

No chemical control for bacterial blight is now known, so cultural practices are very important to the grower. For more information on this disease and on preventive cultural practices, ask your county agent for a copy of MP-534, "Bacterial Blight of Cotton."

Several races and varieties of this pathogen are known, but only two are widely distributed. The organism enters the plant through open stomata and wounds in the leaves, bolls and stems. The bacteria breakdown the cell wall of the spongy tissues, releasing cellular juices.

Infected leaves soon turn yellow and are shed, and excessive leaf shedding reduces the yielding ability of the plant. Boll lesions provide ports of entry for boll-rotting fungi, thus bacterial blight is one of the principal causes of boll rots.

The blight organism may overwinter in the soil on undecomposed plant debris, but more commonly is carried from season to season within and on planting seed. Once in a field the disease is spread from plant to plant and from old to new tissues by wind-driven, splashing rains. The disease may also be disseminated from field to field by whirlwinds, running water, equipment and gin trash.

Plastic plow covers, which have been found to be effective in turning sticky, difficult-to-plow clay soil.

Later tests of the plastic-covered plows were conducted at Plains, Ga. A rye cover crop was completely turned under with six inches or more of soil by a Teflon-covered moldboard. In an adjacent field, an uncovered moldboard failed to shed the soil, which was merely broken loose and pushed over. The soil in these fields was a very sticky clay.

The plow coverings are not yet commercially available. Manufacturers will have to determine, on the basis of potential demand, whether production of these items is economically feasible.

Dirty, defective stoves and heaters cause the deadliest dwelling fires. They take about 2,000 lives yearly. National Fire Protection Association figures show.

Put your home heating and cooking equipment at the top of your Spring Clean-Up list for thorough cleaning and servicing.

Finishing touches are being applied to a 10 foot fill in the Farmer County end of the paving addition to FM 145 between Lazbuddie and Castro County. Work on the extension of the

pavement began during the first week in March and is expected to be completed before the September deadline. Most of the grading and filling has been completed in Farmer County.

Flaming Increases Onion Production

Tests in weed control with transplanted onions was conducted in 1961 by the staff of the High Plains Research Foundation. The highest yield was 176 fifty-pound bags per acre. This was obtained where parallel burners were used for each double row of ammonia. Transplanted onions with no weed control produced only 40 fifty-pound bags.

Eighteen and one-half hours of hoeing per acre was necessary to remove weeds where no flaming was used. This method produced 160 fifty-pound bags per acre.

The report issued to Foundation supporters stated that additional flaming can be made

if necessary after the onions are 10 to 12 inches high with 3 or 4 burners per row set parallel without damaging the plants or slowing growth. Tractor speed is determined by the size of the weeds. For example, one and one-half to two miles per hour when the weeds are 3 to 4 inches high; three and one-half miles per hour when

the weeds are small. The report also emphasizes the importance of flaming when the weeds are small. The one-half inch weeds can be easily killed by operating the flame cultivator at speeds of 5 to 6 miles per hour. At these speeds the flame is not on the onion plants long enough to harm the onions.

Several races and varieties of this pathogen are known, but only two are widely distributed. The organism enters the plant through open stomata and wounds in the leaves, bolls and stems. The bacteria breakdown the cell wall of the spongy tissues, releasing cellular juices.

Large Crowd Attends PCA Annual Meet

Martell LeVeque and Mrs. Thelma Watkins of Friona were among the more than 1,200 farmers and ranchers from across an eight-county area of the High Plains attended the 27th annual stockholders' meeting of the Plainview Production Credit Association, March 31, in the Plainview High School Auditorium and cafeteria.

Guest speaker at the home-owned and operated agricultural credit organization's meeting was W. H. Calkins, vice president of the Federal Intermediate Credit Bank of Houston. Calkins urged all people engaged in agriculture to "be proud of your ability and capacity to produce as you do."

Calkins said any nation on earth would be thankful to be able to provide sufficient food and fiber with only 10 per cent of its population engaged in agriculture, as does the United States.

In other business meeting activities, L. R. Durham of Plainview was reelected to the association's board of directors for a three-year term. Stockholders elected Durham over John Norfleet of Hart.

In a board reorganizational meeting, held following the stockholders' meeting, Durham was reelected president, Henry Hayes of Plainview reelected vice president, Olan Alexander of Plainview reelected general manager and secretary-treasurer and Fred Conner of Plainview reelected assistant gen-

eral manager. Holdover directors are Hayes, D. S. Anderson of Muleshoe, Grady Shepard of Hale Center and Don Garrison of Silverton.

Seedsman Meeting Is Friday

The USDA proposes to compensate to some extent producers and processors of hybrid corn and grain sorghum seed for the loss of sales incurred as a result of the 1961 feed grain program.

"We expect to receive complete information concerning this program within the next few days," says Prentice Mills of the ASC. A meeting will be held in the district courtroom in Farwell at 7:30 p.m. Friday, April 13 at which time the program, payments, eligibility,

requirements etc. will be explained. All persons interested in producing, processing and marketing hybrid corn or grain sorghum seed in 1959-60-61 are urged to attend, says Mills.

PHOSPHORUS RESULT DEMONSTRATION ON GRAIN SORGHUM

CONDUCTED BY: Harold Carpenter--Oklahoma Lane

1. Variety and planting date - Asgrow Coastal planted May 10 and Texas 601 planted June 2.
2. Irrigations - one preplant irrigation and three irrigations during the growing season
3. Fertilizer - all plots had 125 pounds of anhydrous ammonia applied with two plots having 104 pounds of phosphoric acid applied. Phosphoric acid was figured at 7¢ per pound.
4. Soil type - Sandy loam
5. Remarks - plots one and two were planted to Asgrow Coastal and plot three and four were planted to Texas 601. Harold said he did not know why plot two paid and plot four did not pay. It could be due to land variation.

Protect Windbreak Trees

Protection of young windbreak trees is essential. Winds, sandstorms, and animals can cause serious injury to the young trees for the first five years.

According to Extension Agents, Miss Ertle Musil, shingles, stakes wrapped with sacks, old license plates, boards, nail kegs, buckets with bottoms out will provide wind protection for the small trees in their permanent rows. Wind protection during the late fall, winter, and early spring should be provided at least two years.

Even though red cedars, ponderosa pine, and Austrian pine are adapted for this area

of the state, they do need to be cared for. For best results in good growth of small seedlings ordered from the Texas Forest Service each winter they should be planted in gallon cans in a tree bed for the first year.

One gallon cans confine the root system in one small area making it easy to transplant in permanent locations later. Punch small holes in the bottom of the cans before planting for drainage. Fill cans with fertile soil. When filled make a hole in the center of the soil with a stick. Plant the seedlings in the hole and pack the soil around the plant. Make sure to avoid exposing the roots

directly to the air for even one minute. Water only when the soil is dry.

These containers can then be set side by side in the ground on the south side of a building for a year. The tree will then appear to be growing out of the ground.

Growing trees in a protected bed such as this the first year makes care of the seedling much easier. Watering once every week or ten days is easier and is not forgotten. It takes up little space and it is easier to protect the trees from the wind. Most important reason for the tree bed is that it insures you a live healthy tree that will live when set out.

Many red cedars and ponderosa pine were started last year that will be ready to set in their permanent locations. Trees grow just as fast if not faster in containers the first year as in the tree row. For the tree bed dig a bed the depth of the cans. Set the cans side by side, then cover between the cans with soil until the bed is the same level as the ground.

In planning windbreaks be sure to leave room between the house or barns for any remodeling or additions that will be made later. It usually takes at least two rows of trees to make a good windbreak. First row should be 75 to 100 feet from the house. Windbreaks give the greatest protection to the house and barns on the north, northwest, and west sides.

Windbreak rows should be spaced wide enough apart to provide for convenient cultivation with farm equipment. Rows should seldom be less than ten feet apart. Sixteen to twenty feet apart for the rows

SOIL CONSERVATION DISTRICT NEWS

The Farmer County Soil Conservation District will again sponsor a Land Judging contest for the High Schools in the County.

The team from each High School in the County will meet at the County Courthouse for a short session and from there go to the field and judge four sites in the Farwell area. After judging each site the teams will turn in their score cards and then the correct answers will be given so that the contestants may ask questions.

We feel that this type of contest will be more instructional for the boys here in the District rather than an invitational meet.

Anyone that would like to come along and watch the contest may do so.

Irrigating Bermuda grass on a floodwater retarding structure by use of a sprinkler system pumping water from the lake area. This is the type of structures that are proposed for the Running Water Draw project. Note the draw-down tube to maintain a

safe water level and also an emergency spillway at the other end. This particular structure is near Muenster, Texas in the Elm Creek Watershed, a tributary of the Trinity River.

Farm Facts

Fish farming is getting to be a profitable venture, especially in the South. The Alabama Experiment Station has been one of the pioneers in this development.

H. R. Swingle, fish culturist at the station, stocked a pond in February with 2,587 red catfish and 500 golden shiners. The pond was fertilized four times during the spring and summer and the fish were fed a special feed developed at the station.

The pond was opened to public fishing in August and permits were sold for \$1 apiece. When the pond was drained in December, it yielded 500 pounds of catfish which sold for 50c a pound locally. Demand for dressed

Many farmers now raise fish.

fish exceeded the supply. Net income from fishing permits, shiners, and dressed catfish amounted to \$321 per acre.

Rice growers in Arkansas have been rotating their crops with fish for a number of years. They flood their fields and grow channel catfish and buffalo for three or four years. Then the fields are drained and rice is planted. Most of the fish are sold locally but a cooperative has been formed to sell to fish merchants in big cities.

PACKSADDLE MOUNTAIN BATTLE
Packsaddle Mountain, southeast of Llano, in Central Texas, was the site of the last Indian battle in that region.

A highway marker nearby reads, "In a battle fought August 4, 1873, Captain J. R. Moss, Stephen B. Moss, William B. Moss, Eli Lloyd, Arch Martin, Pink Ayers, E. D. Harrington and Robert Brown routed a band of Indians thrice their number."

HD Agent's Notes

BY MISS ETTIE MUSIL

How well do you manage your bank account? You might say, "Just fine, as far as I know." Then let's just review a few points.

During the past two weeks I have been visiting family economics demonstrators in the county. Many of the demonstrators have a very good start in organizing farm and home record keeping. I was amazed how well several farm records were kept in a definite location in the home, with a definite time to keep the farm and home expenses up to date.

Maybe you would like to check your bank account to see how well you are using it. The checking account in a bank can be of greater use to your family if it is carried in the name of both husband and wife, or any other two people. With a joint account, either person can use the money when needed. Either will have access to the funds in the case of death to the other.

The joint checking account signature card should be signed to read, "Mary Smith Brown or John Brown, either or the survivor to draw." A joint account should be managed by working together. One person should be in charge of it. Each person who checks on the account needs to report to the one in charge when a check is written. Check books with stubs are a big help in remembering the exact amount of the check that was written.

A check should always be written in ink for your safety. Always date each check and number checks consecutively carrying numbers from one check book to the next. Begin writing at the extreme left of each line. If the entire line is not used, draw a bold line in the blank space. No additional writing can be used without your knowledge.

Do not make corrections on checks. Simply destroy the check and make a new one. Be sure that the amount written in words is the same as the amount written in figures. If these differ, the amount in words is the one considered legal by the bank.

How many times have you signed a blank check? If it were

lost, the finder could fill in any amount, and the signer would be liable. In other words never sign a blank check. But do sign each check exactly as you signed your original signature card.

For more information do ask us for the free bulletin, "Managing Your Bank Account." There are several drawings in the bulletin explaining deposit slips, writing checks, and endorsing checks.

Recently I discussed studies that had been made recently concerning the life time expected income of people with different levels of education. Now, have you wondered how much it would cost to finance your son or daughter in college?

Before high school graduation students and parents become concerned in a decision of which college or university would provide the best education for a particular major or career.

Parents become concerned about cost differences of living conditions. On an average it costs \$1,000 to pay for a student who lives at home and commutes back and forth to college. It would almost be almost impossible for students in Farmer County to commute to Texas colleges.

On the average a college student will need \$1,350 to live in a college dormitory. If students plan to live in fraternities or sororities the cost will be an average of \$1,650. Living expenses usually are the most costly of all expenditures.

However, there are many factors that influence the cost of obtaining a higher education. Spending habits the boy and girl form at home before going to college are important. Of course, the pressures of campus customs and mores will vary with the different colleges and locations.

Many times the size of the family income will influence the choice of college that is made. In a study made in 1960 by the Bureau of Labor it was found that total expenditures of college costs in public institutions was \$1,300 in comparison with private colleges costs of \$2,100 per year.

Home Freezer Value Determined By Use

A home freezer can be a great boon, that is if you need it and use it right. The freezer that you need is one that can be used to capacity. A freezer that is not used to capacity, or that is used inefficiently, may not be a good investment.

"Whether or not a freezer can save you money will depend entirely on how you use it," notes Miss Ettie Musil, County Home Demonstration Agent. "We are told that the family that uses the freezer extensively is usually the one that gains the highest financial return on the investment." The best practice, as cost figures indicate, is for a rapid turn-over of food in the freezer.

In other words, the more you use a freezer, the less is the cost per pound of storing frozen foods. Also, the more you use the freezer the more you offset the fixed costs of depreciation electricity and repairs.

A study was made recently that showed how the cost per pound of storing frozen food decreases and the use of the freezer increases. The study was made using a 360 pound capacity freezer at a cost of \$360.

On a 12-year expected life of the freezer the depreciation per year was \$30.00. The annual return on investment of the freezer at 3 percent interest was \$12.88. Repairs were figured at 2 percent of the purchase price which was \$7.20, for an average annual cost for repairs. Fuel or electricity cost for maintaining the freezer at 0 degrees Fahrenheit for a year was \$27.38. Total cost of operating, repairing, depreciation, and investment return was \$77.46, for the 360-pound capacity freezer.

Now in figuring the operating cost with no turn-over of frozen food or only 360 pounds of food stored annually, the cost per pound of the food would be twenty-one and a half cents.

Then if you used and replaced one-half of the frozen food, or

had a 50 percent annual turn-over, the cost per pound would be reduced. With a 50 percent turn-over of the 360 pound capacity freezer the cost per pound of food stored would be only 14 cents. This is on the basis of 540 pounds of food stored.

But if the freezer is used and frozen food restored for future use more often, the cost becomes still lower. If 900 pounds of food are stored annually the cost per pound would decrease to a low of eight and one-half cents. This cost is figured on a 150 percent annual turn-over. That is, that the freezer supply was consumed and more food restored three times during the year.

This study was prepared by using the figures for storage costs only. The total cost of foods that you prepare and freeze at home would also have to include the expense of wrapping supplies and cost of food if grown at home or purchased from truck gardeners or wholesale outlets.

From this study of storage costs of frozen foods in a home freezer the homemaker can determine the kind of investment she has in her home. The more you use the home freezer the lower the storage cost of operating.

Other costs include freezing food supplies as paper, containers, bags, jars, lids, rings, freezer or masking tape, cost of food, and time or convenience in freezing foods. Of course, good, recommended methods of freezing should be followed to avoid spoilage of food.

For recommended methods of freezing according to trials and errors of research, a bulletin "Frozen Foods - How to Freeze, How to Cook" is available free in the office of the home demonstration agent in the Courthouse in Farwell. For freezer meals recipes and hints get a copy of "Quick Meals" for much help to make the most of your freezer.
