Cattle Backgrounding And Futures Trading Topics --

Beef Cattle Meeting Set

County Agricultural Agent Ronny McNutt announces that the livestock sub-committee of Farmer County is sponsoring a beef cattle educational meeting at Bovina bank building on January 11, 1:30 p.m.

Backgrounding or pre-conditioning cattle will be the first subject discussed, Dr. Lowell Schake, Area Extension Livestock Specialist from Lubbock, will discuss the topic. He is a native of Missouri and has been in the livestock business.

The term, backgrounding or pre-conditioning, is used and now recognized by cattlemen throughout the industry. It has

been estimated that the loss from shrinking, feed utilization, and efficiency, plus a one to two percent death loss, due to prevailing management practices and disease manifestations, will amount to approximately \$10-\$20 per animal.

Dr. Schake will also discuss crossbreeding. One authority has said, "No longer is there any doubt regarding the benefits of crossbreeding in beef cattle production—the only question is how long can the industry afford to by-pass a solid 25 percent potential advantage."

Cattle Futures Trading will be discussed by John Womach,

an account executive for Merrill-Lynch-Pierce-Fenner and Smith, Inc. of Amarillo. Futures Trading is a handy and worthwhile tool that can and is being used by the livestock industry, especially the cattle feeder. Womach will discuss

how this cattle futures market functions.

Members of the livestock and sub-committee are Bob Wilson and Jack Woltman of Bovina, Joe Jones of Farwell, Frank Hinkson of Lazbuddie, and N.E. Wood of Friona.

URELY PERSONAL

By John

The last weekend of the football extravaganza is over, and most people must have oval-shaped spots in front of their tired eyeballs. As a true devotee of the game, we spent some ten hours in front of our one-eyed monster New Year's Day and came away with eye-strain, a dull headache, and about five extra pounds picked up from nibbling on high calorie snacks. We do not plan to do this until at least next year.

The Bowl games in the main came out to our liking. We are sure that many hearts in this area were gladdened by the magnificent game played by the inspired Aggies and also that the Sooners won their Orange Bowl squabble from Tennessee. Probably the biggest disappointment to some of our local fans was Green Bay's last second push to edge the Cowboys, but in 13 degrees below, it was a miracle they even got on the field, let alone play as well as they did. As a matter of course we will watch the remaining pro games and the Super Bowl, but we will not have any great interest from a personal standpoint.

So with these words, we say a fond farewell to football as it fades into the setting sun. We will return to the land of thump and bump again when cool crisp of autumn again nudges the balmy breezes of summer to announce another fall of madness.

Well it's tax time looking at us eyeball to eyeball. This is a good time for us to take stock of our various government pleas for more tax revenue and remember that we the taxpayers are the ultimate source of all government largess. We have been in opposition to further increases in federal taxation; we will continue to oppose such tax increases, but having said this, we will also say that we would be in favor of a local municipal one per cent sales tax. Probably the best analysis of our feeling on taxes can be put this way. We are in favor of as much money collected and spent locally as possible and as little collected and spent by higher government levels. The higher the level of government that spends your tax dollar, the less return you will receive. Administration, or if you prefer, bureaucracy, eats it up. Conversely, the closer to home your tax dollar can be spent, the more value for it you will receive.

For this general reason we support local taxation and resist increased state and federal tax incursions. We believe that the one per cent local sales tax now available to municipalities is a necessity and that thought and discussion on this subject should be initiated so that a referendum may be called fairly soon. We will be happy to publish letters to the editor on the subject of the local sales tax.

Accidents Keep Patrolmen Busy

A 1961 Chevrolet was a complete loss in an accident one mile east of Lariat on Highway 70 Wednesday morning, according to investigating officer, Wayne Pierce.

Occupants of the vehicle, which turned over on the icy covered road, Mr. and Mrs. James Wynne, students at Eastern New Mexico University, were taken to West Plains Hospital in Muleshoe for treatment following the accident. They were returning to classes at the university at time of the mishap.

On Tuesday night, shortly after an accident east of Farwell in which eight persons were injured and a ninth killed had been investigated, another accident was reported at the railroad crossing in Texico-Farwell.

The crossing accident was investigated by New Mexico State Police; however it is believed that no one was seriously injured in the accident. Lone occupant of the vehicle, a man from Dallas, was taken to Clovis Memorial Hospital for treatment of minor injuries.

NELLA BETH CRAIG

Accident Claims Nella Beth Craig

A tragic accident on Tuesday evening claimed the life of one Farwell School student, Nella Beth Craig, 15, daughter of Mr. and Mrs. James Craig, and sent several other students and driver of the other vehicle involved in the accident to the hospital for treatment. Most of the occupants of the Craig vehicle and the driver of the truck were treated and released. Still hospitalized on Wednesday morning were Jubal Blair, 9, son of Mr. and Mrs. Bobbie Blair, and Jimmy Birchfield, 14, son of Mr. and Mrs. Curtis Birchfield.

Other children involved in the accident were Robbie Blair, 15, and Pamela Blair, 15, children of the Bobby Blairs; Clint Deeds, 14, son of Mr. and Mrs. Gene Deeds; and Robyn, 13, and Jayme Craig, 9, daughters of Mr. and Mrs. James Craig. Driver of the truck which collided with the Craig vehicle was Carl Thomas of Clempool, Okla.

The accident, which was investigated by Robert Shedd and Wayne Pierce, Farmer County highway patrolmen, and officials from the local sheriff's office, allegedly occurred as the Craig vehicle made a left turn off of the Amarillo highway into the road which crosses the railroad tracks, one mile east of Farwell. Driver of the truck, also going west, was apparently unable to avoid the collision.

Funeral services will be held from Hamlin Memorial Methodist Church at 2:30 p.m. Friday with Rev. Hardin Atkins III officiating, assisted by Rev. Bob Tomlinson, former pastor of the local church. Burial will be in Sunset Memorial Terrace directed by Steed-Todd Funeral Home.

Nella Beth was born Oct. 7, 1952 in Amarillo and moved to Farwell in 1960. She had attended Farwell Schools for the past seven years and was a freshman at time of her death. She was a member of the Methodist Church.

Survivors include her parents, Mr. and Mrs. James O. Craig; three sisters, Loyce Anne, Robyn and Jayme; two grandmothers, Mrs. Anne Craig of Plainview and Mrs. Kittle Bea Whitten, Amarillo; and also several aunts, uncles, cousins, and a host of friends.

Active pallbearers listed are Jackie Williams, Joe Jones, Fred Curtis, Pete Rundell, Ray Campbell and Howard Crooks. Honorary pallbearers are Jack Williams, Loyd Smith, Johnny McDonald, Billy Meeks, Bill Strain and Smokey Gast.

VISIT CONGRESSMAN PRICE -- Mr. and Mrs. Frank Hinkson, Lazbuddie, and sons Frank II and Mike, were in Baltimore and Washington, D.C. during the holidays. During the visit they were guests of Panhandle Congressman Bob Price, left, who obviously was pleased with whatever Hinkson was saying when the photo was made.

Entered as second class matter at Farwell, Texas, 79325, under the act of March 3rd, 1879. Published every Thursday.

SUBSCRIPTION RATES -- Farmer and adjoining counties, \$4.00 per year; elsewhere, \$5.00 per year Payable in advance.

Letter To The Editor

DEAR EDITOR, I am writing in regard to the story of the 160-year-old picture found in the Texico hotel. I believe it was a little incorrect.

The hotel, the only one I know of in Texico, has not been torn down nor any plans made to tear it down. We bought the hotel from Fred Cornelius in April of 1961, and operated it until 1965, when we sold it to Millard Long, who disposed of the furniture. I have heard Mr. Bulls bought the stuff.

It was between antique and modern, and not of much value, and as far as the pictures, my brother-in-law and myself put dates on a lot of them, just for the heck of it - not thinking that anyone would really believe they were real and valuable.

The 15th of March 1966 I foreclosed and repossessed the building, which has now been remodeled and up graded and furnished with nice furniture and is again in operation.

I am very sorry to disappoint anyone about the value of the antiques.

Sincerely, Janie Lebow

Office Bonnie Warren, County Clerk.

CREATION... ISN'T IT AMAZING... Scientists say that there are no two snowflakes alike! How many snowflakes do you suppose there have been since the beginning of time? Billions? It staggers the imagination when one thinks of all the things that God has created from nothing. Genesis, the first book in the bible means beginning. It tells of many of God's more major creations, and how He created all these things for the benefit of man. Attend church, study God's word and learn more of God's plan for man.

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

Postage Rates Increase Jan. 7

Increased rates for all classes of mail, except parcel post and international mail, will go into effect January 7, the local postmasters reminded postal customers today. New rates are six cents for first class mail and ten cents for air mail.

New rates for post cards will be five cents and for air mail post cards eight cents.

The added cent in the letter rates is a twenty per cent increase compared to a 24 per cent boost in the rates for mailing newspapers and magazines, and a 34 per cent hike for advertising circulars, "boxholder" mail, and other material in the third-class category.

The new rate of six cents per ounce for first-class mail applies up to 13 ounces and the new rate of 10 cents per ounce for air mail applies up to 7 ounces. Under the new rate structure all first-class mail over 13 ounces and all air mail over 7 ounces will be merged into a single category. These heavier pieces of first class and air mail subject to the single rate schedule will be delivered by the fastest available means of transportation.

A flat rate of 80 cents will be charged for all mail in this category up to one pound. For all mail weighing more than one pound, the present air parcel

post rates will continue to apply, except that the postage on matter weighing between one and five pounds will change at half-pound intervals rather than one-pound intervals. The new rate structure will mean a reduction of postage on some parcels.

Another rate change that will affect the general public is the increase from four to six cents for the first two ounces of individual pieces of third-class mail. Unsealed greeting cards may be sent at this rate, the postmaster said. The new rate on unsealed greeting cards will not go into effect until January 7 and until then, they can be mailed at the old rate of four cents.

Also effective January 7, special handling will be available on third-class parcels weighing between eight and sixteen ounces. Special handling has not been available on these parcels since 1958, when packages weighing between eight and sixteen ounces were transferred from fourth to third-class mail.

There will be no changes in the charges for special delivery, special handling, registered mail, certified mail, cash on delivery or insurance of parcels.

The postmaster stated that they have an ample supply of one-cent stamps on hand for

those people who have five cent stamps and need one-cent stamps to make up the postage required under the new rates.

Higher rates also will go into effect January 7 for all categories of second-class mail, bulk-rate third class mail, controlled circulation mail, and the educational material category of fourth-class mail. Mailers using these classes who need information on the new rates should contact the local Post Office.

COMMON ERRORS DELAY REFUNDS

The good tax folks tell us that simple errors on federal income tax returns delay many refunds and cause taxpayers trouble. The suggest this simple check list: 1) Check arithmetic; 2) Sign your return (both husband and wife); 3) Print or type name and address, including zip code; 4) List your social security number correctly.

Spending a little time checking can save a lot of headaches later.

The program will include subjects pertinent to vegetables production and marketing. The meeting will begin at 9:30 a.m. Keynote speaker for the Conference will be Dr. Frank E. Robinson from the University of California. Dr. Robinson will speak on "Headlines in Vegetable Production."

Five speakers will appear on the program discussing subjects from new developments to research being conducted in vegetables.

deny this thought of age and not let it have any power over us. Some persons think in terms of age. They are always

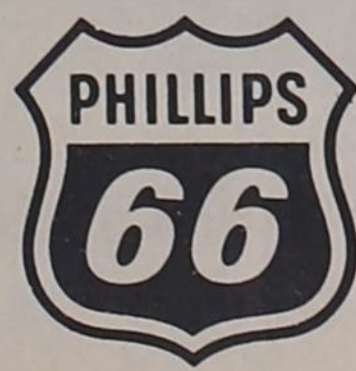

thinking of how old they are or of how old someone else is. Sometimes they preface almost every remark with the phrase at my age.

Railroad Taxes Total \$25,868

Current annual taxes paid to the various government agencies by Texas railroads in Parmer County totaled \$25,868, it is announced by the Texas Railroad Association.

That amount was the county's share of the more than \$10,000,000 the railroads paid in Texas on their own right of way and other property.

The biggest railroad contribution was to the school systems throughout the state. Large sums were also distributed to city, village and county governments and for road and bridge funds.

In addition, of course, was the large total in taxes the rail-

roads' 33,410 Texas employees contributed on their own property. The vast majority of rail workers, many of whom live in Parmer County, own their own homes.

"With the future of our country and state depending to a great extent upon the education of our youth, I am delighted that nearly half of the taxes paid by the railroads go to support the schools," said Walter Caven, general counsel of the Texas Railroad Association. "Recognizing this need for education, many of the railroads operating in Texas also make scholarships available to a large number of students every year."

10 Injured --

Nine Accidents In November

Texas Highway Patrol investigated nine accidents on rural highways in Parmer County during the month of November, according to Sergeant W. E. Wells, Highway Patrol Supervisor of this area.

These crashes resulted in 10 persons injured, and an es-

timated property damage of \$5,845,000.

The rural accident summary for this county during the first 11 months of 1967 shows a total of 112 accidents resulting in five persons killed, 66 persons injured, and an estimated property damage of \$76,476,000.

OUTDOORS IN TEXAS

BY VERN SANFORD

Some people say they do not care for venison. Complaint usually is that they do not like the "gamey taste."

Most people blame the meat itself, rather than the way it is handled or prepared.

When fixed correctly, venison is delicious, and most people find it difficult to tell the difference between it and beefsteak.

Many factors are involved in preparing venison that is delicious. In a booklet titled "Wild Game Care and Cooking," put out by the Texas Agricultural Extension Service of Texas A&M University, it is pointed out that "the success of cooked game depends to a great extent on the treatment the animal received when killed."

Deer should be dressed immediately after the kill. The longer the shot-up innards remain inside the cavity, the more tainted the meat becomes.

Most people simply gut the deer, wash it out thoroughly and hang it in a convenient place until it can be taken home or to a locker plant.

Authors of "Wild Game Care and Cooking" recommend the following things to improve the quality of wild meat:

Cut away all tainted or mutilated portions of meat. Do not wash the carcass. To clean, wipe the carcass with a clean cloth. Remove hair and any debris that adheres to the meat. Skin and quarter the carcass for more rapid cooling, if possible. Otherwise, hang the carcass outside at night and wrap it in a large sack, tarp or game bag in the shade or indoors during the day. Protect the meat from flies and moisture. Many hunters prefer to leave the skin on the carcass to protect the meat from

contamination until it is butchered. When taking the deer carcass home, do not expose the meat to motor heat or exhaust fumes. Wrap the meat loosely and transport it on top of the car, the bed of a pick-up truck or the car trunk.

As for cooking, the authors explain that young and tender game is best cooked by dry heat such as roasting, broiling, pan-broiling and frying. Dry heat preserves flavor and insures tenderness. Basting with additional fat may be necessary if the meat is lean.

Old and less tender game is best when cooked by moist heat such as braising, stewing and simmering. Swiss steaks and pot roasts are cooked by braising. Add a small amount of liquid to the meat which is cooked in a covered container. Stews, fricasses and boiled game are prepared by simmering (not at boiling point) in hot liquid which partially or completely covers the meat. With moisture, the high temperature necessary to soften the connective tissues can be obtained.

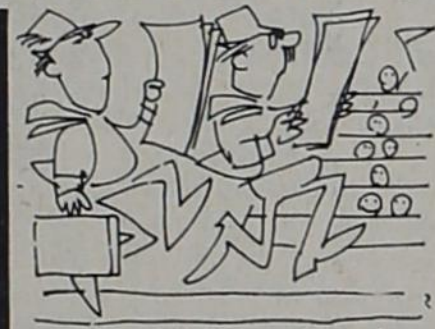

One recipe from the booklet (which, incidentally, can be obtained from your county agent) is for venison swiss steak. To prepare this dish, you'll need 1 1/2 pounds round venison steak, three large onions, one medium stalk celery, one cup tomatoes, two tablespoons Worcestershire sauce, and salt and pepper.

The steak should be about 1 1/2 inches thick. Dredge with flour and season with salt and pepper; brown in fat on both sides. Add the other ingredients. Cover tightly and cook at 350 degrees F. or over low heat on top of range until tender (about 1 1/4 hours). Remove meat to platter and make a gravy from drippings in the pan. Serves four.

SCIENCE SKETCHES

SOAKING HAMS in barrels of brine may have been okay for grandma, but it is too slow for today's production lines. Meat packers use a machine developed by Albright-Nell, Chicago, that injects pickle brine into hams passing through on a conveyor. It can cure up to 15,000 pounds of ham an hour.

WHITE-COLLAR workers from the Portland area jogged the University of Oregon track a half-hour a day, three days a week in a program to reduce the waistline and get physically fit. In 12 weeks, the 265 men who completed the program reduced their waistlines an average of one and a half inches and approximately 180 overweight men lost an average of 7.8 pounds.

BETTER trash-collection breeds more trash, according to Northwestern University. Twice-weekly service gets a greater trash harvest than once-a-week collection. The survey says that increased service encourages more trips to the garbage can with trash instead of burning it, dumping it or simply leaving it around the house.

SPORTS AFIELD

By Ted Kesting

Many and many a good man occasionally finds himself impaled on the cruelly sharp horns of a dilemma when it comes to deciding whether or not he should invest in a four-wheel-drive sportsman's vehicle. He reads titillating tales by gung-ho outdoor writers who, if they know their job, sometimes convey such vicarious pleasure the average guy is momentarily overwhelmed.

Or take the case of a red-blooded suburbanite watching his neighbor pull out of the driveway each weekend, headed toward the beach, desert or high country for many hours of four-wheel-drive adventure. Our hero would not be normal if he didn't feel a pang and say to himself, "Heck, ol' Freddie is not super-human. He has the same number of wives and offspring I do, and he draws within four clams of what I do every two weeks. He has no foolish, rich auntie or secret oil well. If he can own a sportsman's vehicle, so can I,

by gum!

So comes the dilemma. Should I? Or shouldn't I? This is really fingernail-bitin' stuff. "I don't make a practice of advising readers to squander their hard-earned dough," says John Jobson, Camping Editor of Sports Afield Magazine. "But in this case, I will venture that if you can own two cars anyway (that is, if you are what is known as an actual or potential two-car family), and if you genuinely love the out-of-doors, you should seriously consider making that second car a four-wheel-drive."

Four-by-fours are exceedingly versatile. They are great for shopping, herding dairy cattle, hauling the kids to school or 101 other things. But where they really shine and pay handsome dividends is in doing precisely what they are designed to do. And that is to take you and yours, in comfort, into lovely, spectacular country where you cannot go by any other practical, convenient means.

Every hour, 44 1/2 gallons of hot water from a 30-gallon heater!*

But only with gas.

That 44 1/2 gallons of hot water is from a standing start, with 30 gallons of cold water in the tank. But within one hour you can draw 44 1/2 gallons of steamy hot water. And do the same every hour of every day thereafter.

How impressive is a 44 1/2-gallons-per-hour recovery rate for a gas heater?

Well, about the best any electric heater does is 18 gallons per hour.

So, 44 1/2 gallons is pretty good proof that gas heats water almost 2 1/2 times faster than electricity. It means that a 30-gallon gas heater provides

more hot water per hour than an 80-gallon electric heater.

With gas heating the water, you never have to drag out a washday. Or wait for a bath.

In fact, 44 1/2 gallons is enough hot water for you to enjoy a warm, relaxing bath while your automatic washer does a load of clothes.

If you're short on patience, get a new family-size gas water heater. Then you'll always be long on hot water. Southern Union Gas Company

Judy Megill Is Bride Of Jerry Lovett

Judy Kay Megill, granddaughter of Mr. and Mrs. W. F. Gable, became the bride of Terry Lynn Lovett, son of Roy Lovett and the late Mrs. Lovett, in a double ring ceremony at Farwell First Baptist Church Saturday, Dec. 30, at 7:30 p.m.

Grandfather of the groom, Rev. J. L. King, assisted by Rev. Hugh Frazier, officiated at the ceremony. Vows were exchanged before an altar setting of 15 branched candelabra holding white tapers, flanked by palms of emerald greenery. Focal point of altar decorations was a kneeling bench entwined with garlands of ivy.

Mrs. J. B. Sudderth, organist, played appropriate nuptial music preceding the ceremony and the traditional wedding marches. She also accompanied Odus Walsler, soloist, when he sang "More" and "Walk Hand in Hand." Candles were lighted by Tim Lovett, young brother of the groom.

Don Lovett, brother of the groom, served as best man and Irby Range, brother-in-law of the groom, was groomsman. Usher was Rip Walsler.

Jackie Megill was maid of honor for her sister, and Cheryl Fry of Friona, was bridesmaid. Flowergirl was little Miss Kim Lovett, daughter of Mr. and Mrs. Don Lovett. All bridal attendants were attired in floor-length dresses of emerald green velvet. Their headpieces were bands of emerald green velvet ribbon and they each carried long stemmed yellow carnations. The flowergirl carried a white wicker basket filled with miniature white carnations.

The bride, escorted and given in marriage by her grandfather, chose a formal wedding gown of white satin and lace. The

fitted bodice was designed with long lace sleeves terminating in petal points at the wrists, and a round neckline outlined in jewels. The chapel train attached at the shoulders was enhanced with appliques of lace centered with pearls. Her veil of white silk illusion was held by a satin crown. She carried a cascade bouquet of miniature white carnations centered by large white feathered carnations.

Following tradition, for something old and borrowed the bride wore a pearl necklace; blue was the traditional garter, and new was her wedding attire. For luck she carried in her shoes pennies minted in the year of her birth and that of the groom.

Mrs. Gable wore a light blue dress with black accessories for her granddaughter's wedding. Her corsage was of white carnations. Mrs. Range, sister of the groom, chose a blue dress with a white carnation corsage for the wedding.

A reception was held in the fellowship hall immediately following the ceremony. Serving table was laid with floor length white net cloth and centered by an arrangement of yellow roses flanked by emerald green candles in silver holders. Green floating punch, mints, and nuts, were served with the three-tiered wedding cake. The cake was decorated in yellow and white and centered by a bride and groom figurine. Sherri Roberts, Patty Tatum and Janis Billingsley, former classmates of the bride, presided at the serving table and wedding guests were registered by Carolyn Langford.

When the couple left for a wedding trip, the bride wore for travel a yellow long sleeve-

Student council members presented a skit, Bobby Redwine as Panhandle Pete and Connie Harla as his girl Sal, roused the bad men, Two-gun Leon (Bobby Gleason) and his cohorts Frank Hinkson and Steve Foster. There was a sheriff present, and deputies, an a soda jerk; director was Tammy Jennings, and double for Panhandle was Ronald Mayfield (who really got the dirty end of the deal!) Photograph Required On Driver's Licenses

AUSTIN -- Col. Homer Garrison Jr., director of the Texas Department of Public Safety reminded Texans today that a color photograph becomes a standard part of all drivers' license issued after January 1, 1968.

"The change makes it necessary for all drivers to renew licenses in person at one of our Department offices," Garrison said, "and we have been working toward setting up a procedure that will not cause excessive delay when a person comes to us to renew a license." Garrison explained that the change in license was incorporated into law by the last legislature.

"Renewal notices will be mailed to each driver, just as always," Garrison said. "However, under the new procedure, each driver must take the renewal notice to the nearest DPS office. There he will be given a standard vision test, sign the renewal notice and step in front of our camera. The picture will be snapped and a receipt will be issued to enable the person to drive until he receives his new license in the mail."

Garrison explained that about 250 full-time license offices would be in operation over the state to service license renewals. Issuance of new licenses will also be conducted in many of these new offices as well as at offices already established.

There are currently over 5,800,000 licensed drivers in Texas and about 2,500,000 licenses are renewed annually. To facilitate the process all licenses after January 1 will be renewed to expire on the birthday of the licensee. If

the person holds a license ending in an even number, it will be renewed for a four year term; if the license ends in an off number, it will be renewed for two years the first time thereafter. The cost to the driver remains the same per year.

The new license will be approximately 2 1/8 inches wide by 3 3/8 inches long, or about the same size as a standard credit card.

EMERGENCY HAND WARMER—When you're out duck hunting your hands can get mighty cold. An empty shotgun shell provides a quick solution.

Slice a spent shotgun shell lengthwise three or four times down toward the brass. Set the shell down and light.

Coating on the shell will let it burn for at least 60 seconds, which is time enough to warm a couple of chilled hands.

DE-SCUFFING LEATHER JACKET—If you've got a leather hunting jacket that's been scuffed by brush, here's a way to restore it to an almost-new condition.

Apply shoe polish to the scuff marks then buff the way you do your shoes. Scuff marks will disappear.

FOIL WILL PROTECT PANS—There's one chore nobody likes in camp. That's cleaning charred pots and pans.

Here's how to prevent it: Just wrap the bottoms with aluminium foil.

When you're finished cooking, throw away the foil, and the bottoms of your camping utensils will be as clean as before you started cooking.

"Who knows what evil lurks in the hearts of men?"

By Mary Whitman

For small boys you might want to try a Flipper party. The friendly dolphin, well known to television viewers and readers, can set the theme for a lively gathering.

To decorate the room for an indoor party it's simplest to use toy boats, or fins and masks and snorkels, or other water gear such as nets and ropes. A snorkel race can be played using an empty cardboard tube as snorkel to carry a pingpong ball. The cake can fly a nautical flag—a crayon drawn pennant affixed to a paper straw. There can be a treasure hunt.

"For prizes for the games don't neglect the wide variety of Flipper play materials at local variety stores," reminds game planner Mary Hill of Whitman Publishing Company of Racine, Wisconsin, nation's leading producers of children's activity items. Store counters have Flipper crayons, Flipper puzzles, activity books, coloring books, sticker fun books and fiction books that can be given to the lucky winners.

Parents, scout leaders and teachers often find that small boys want to learn more about dolphins and marine life. An outing to an aquarium or other marine exhibit will be popular with the future frogmen of the group. And many fine juvenile books about the sea and its creatures can be found at local stores, libraries and school reference rooms.

Since ancient days the dolphin has been curious about man. Today scientists are returning the compliment, trying experiments to see if man and dolphin can learn each other's language. Students often find the dolphin a good subject of study for extra school credits.

When small boys get together—and a project is needed—try a Flipper theme.

It takes an average of 8-10 years for an olive tree to bear a substantial amount of fruit; 20 years or more before the tree reaches its maximum yield.
