302 STORM PROOF COTTON

New Vigor - Yield - Quality

Here's a strain-cross developed especially for areas where a definite storm proof boll is desired. Medium height, erect plants have short branches and great uniformity. Hybrid vigor makes 302 somewhat earlier than standard storm proof varieties. DeKalb tests show substantial increases in lint yield over most popular varieties, under both irrigation and favorable dryland conditions.

On The Farm In Parmer County

By JOE VANZANDT
County Agent

1965 official crop estimates have been released by the Texas Crop Reporting Service recently. Parmer County is still the top grain producing county in the state and probably in the nation also.

For wheat we were first in total production with 4,529,000 bushels and first in yield per acre with an average of 52.4 bushels per acre.

In grain sorghum, we were also first in total production with 1,046,276,000 pounds and first in yield per acre with an average of 5,734 pounds.

These are all big achievements on crop production and something we can all be proud of.

RESULT DEMONSTRATIONS

We are in the process of setting up several demonstrations, on crop and livestock production for this year. We will have some demonstration with cotton fungicides, grain sorghum varieties, possibly some cotton varieties, and vegetables as well as some fertilizer research trials. Farmers can help themselves and their neighbors by putting in check plots or plots that compare a different way of doing a practice. Demonstrations help tell each farmer the value, benefit, profit or loss to be had by each production

proactive if it is fairly compared with another method. We think demonstrations can serve as a good means for farmers to continually check to see year by year if a practice is profitable.

There are any number of production practices farmers can benefit from by having a little demonstration plot. You might want to check on a method of land preparation; varieties, fertilization, irrigation, seeding rate, weed control to name just a few broad areas. As your County Agent, I am always interested in knowing about demonstrations that farmers have. I would certainly like to hear of any you already have planned. Also, if you would like to co-operate on some kind of demonstration drop me a card or come by the office. I know many farmers have good demonstrations every year that I do not hear about. You can help us all by letting me know of your demonstration plans and results. Here's hoping we hear from several of you. Remember, the end result is really how much net profit did you derive from one method as compared to another way. Farmers must be good managers to stay in business. Farmers need to know that a particular

practice returns more net profit, so put in some demonstration plots.

sorghum varieties. We have just received some copies of the latest Progress Report on Performance of Grain Sorghum Hybrids in the High Plains of Texas run by the Texas Agricultural Experiment Station.

We have finished all of our District Contests now. There were several teams that represented Parmer County this year in our District Contests. Some of these teams did not win but yet the 4-H'ers learned a lot and benefited from their participation. The Junior Soil Evaluation team placed first and team members were Sam Morton, Barry Williams and Darwin Green all from Farwell.

The Senior Horse Judging team members were Mike Doshier, Farwell; Raymond Quintana, Bovina; Bill Buchanan and Shirley Smith from Friona. The Junior Horse team members were Rusty Lindeman, who was 4th high individual in the contest; Dwayne Bauer and Bill Buchanan all from Friona. These members were selected after four judging practice sessions were held.

Members of the Junior Rifle team were: Zane McVey, Coy Jamison, Larry Johnston and Dwayne Bauer from Friona. The Junior Livestock Judging team members were: Loy Dale Clark, Rickie Seaton, Mark Ramage and Wesley Barnes, Jr. all from Lazbuddie.

We were real proud of all of these members and the showing they made and feel that they all learned something.

attractively and most of all, what different foods do for the body. It's true that not all girls can be top winners but after all, competition encourages greater effort. If a child makes a low grade in school he does not drop out, but parents put forth greater effort to encourage him and see that he puts forth more effort. So it should be in 4-H project work. Of course it takes some time on the part of the parents, but what better way of spending time than in training children in worthwhile project work. It does pay off in their development.

LEADERS NEEDED-SOS
Some 4-H girls are going to be very disappointed when they find they will not be able to participate in clothing project work this summer because they do not have an adult leader. So far, Bovina has one adult leader and there are fourteen 4-H girls who want to take clothing. A leader can only work with four or five girls in a group. This means that about nine girls in Bovina will not be able to take a clothing project unless other leaders volunteer before May 1st. Training for leaders will be held in May and work will start immediately after this.

What is there about traveling salesmen?

Well, one thing about a traveling salesman is that he gives his car hard usage. Business calls require a lot of start and stop driving. And that's when corrosive engine wear can cause serious damage.

Actually, start and stop driving is the kind of driving most of us do most of the time. So, to protect your motor under these severe conditions, your Phillips 66 Dealer recommends Trop-Artic All-Season Motor Oil. Trop-Artic starts protecting at low temperatures, and keeps on protecting at high operating temperatures. It's a light oil, a medium oil and a heavy oil, all in one!

To keep your car running better longer, get Trop-Artic Motor Oil at any station where you see the Phillips 66 Shield.
