Farmers Certifying Crops

32 Persons Attend Highway Meeting Here

Thirty-two persons from the six states in the U.S. as well as Canada and Mexico which are located on Highway 385, were registered for the International Parks Highway 385 Association Convention in Littlefield this past weekend.

Bill Payne, Littlefield's Chamber of Commerce manager, was re-elected to the state presidency of the organization.

International president will be Ray David of Williston, N. Dak.

Other state officers are Harley Dodd of Dimmitt, first vice president, Tony Aguilar of Marathon, second vice president, and Suzanne Hunsinger of Littlefield, secretary-treasurer.

Other international officers are Guy Lawrence of Hereford, first vice president; Diego De LaGarza of Muzquiz, Coahuila, Mexico, second vice president; Tony Consbruck of Burlington, Colo., third vice president; and Suzanne Hunsinger of Littlefield, secretary.

Next year's international convention will be held in Spearfish, S. Dak., sometime in June.

Tentative plans call for state conventions to be held at Crane in September, and another in Hereford in January.

Several businesses donated items for the welcome packages which were given to the convention guests, and members of "We, The Women" hosted wives of the guests at a coffee.

Speaker for the noon meal Friday was Oscar L. Crain, district engineer of the Texas Highway Department at Lubbock.

ABOUT 50 Littlefield young people cleaned up the park area near Bull Lake Tuesday, during National Clean-up Day. By noon, when the project was complete, they had gathered enough debris to fill a two-ton truck. Cokes were served during the morning to those who participated.

With the majority of Lamb County farm land planted, and many crops up, ASCS county executive director Richard Newman reminds farmers that the earlier their crops and setaside acreages are certified, the earlier their farm payment checks will begin coming in.

Certification will remain open until Aug. 1, however. As of Tuesday afternoon, about 80 Lamb County farmers had certified their acreage this season and more were expected within the next few weeks.

Final planting date for cotton was Monday, and final planting date for feed grain is June 20 under the current farm program.

Newman said cotton lost due to abnormal weather may be replanted to

another crop, but there must be a signed application plus an inspection fee.

If the fields have been maintained in a workman like manner and the loss of a crop is the result of a natural disaster, such as weather, the farmer can still receive the farm program benefits he was otherwise entitled to.

If a cotton crop was lost, the loss will affect next year's production yield, although what will be allowable for this year's crop has not yet been determined by the secretary of agriculture.

Last year, 90 per cent of the previous year's payment rate was utilized to offset the crop loss. The year before, the figure was 80 per cent.

The same rules apply for feed grain except for the June 20 planting deadline.

Beautification Breakfast Termed 'A Great Success'

Nearly 140 Littlefield residents fought the sandmen and attended the "Beautification Breakfast" Tuesday morning in the Community Center.

that the effort should be a continued project the year around.

The early morning breakfast, sponsored by the Community Improvement Committee of the Littlefield Chamber of Commerce and Agriculture, was a report session of the committee to inform Littlefield citizens of what has been done in the current clean-up campaign and what the plans are for the future.

He stated that \$1,500 in commitments to aid the project have been made by individuals and businesses in the city, and that approximately another \$1,000 will be needed before the year is up.

The cooking committee, composed of women from First United Methodist Church, began work at 5 a.m. and dished out ham, eggs, sausage and homemade cinnamon rolls to those who arrived between 6:30 and 7.

Keeping the program moving was Master of Ceremonies Bob Wear, who introduced a representative from the different committees of the overall committee.

Jean Parkman played organ music during the breakfast and prior to the program.

C-C Manager Bill Payne showed colored slides of several "before" and "after" shots of improved areas in the city.

Andy Rogers represented the young people, and made a report on their planned clean-up effort at Bull Lake that day.

Mrs. Wylie Roberts, flower chairman for the committee, gave a slide presentation on the different varieties of daylilies, and presented a generalized statement on daylilies and their care.

James Lee, chairman of the Approaches To City Committee, introduced Buck Ross who made a report of improvements which have been made on the approaches. He stated that 75 semi-truckloads of junk were hauled away from the Stuart property, and that 20 lots and houses have been cleaned up.

Judge G. T. Sides, chairman of the Abandoned Property Committee, introduced Chester Harvey who made a report on abandoned auto removal and lot clearing. He reported that 12 cars have been removed and that seven more are under processing for removal. Twenty lots have been cleaned up and seven more are in the planning stage.

Pat Downs presented plans for improvement of the business area and Bettye Smith related problems involved in organizing the residential area.

Brenda Wilkinson, reported that work has already begun on the school grounds near the Primary Building, and that work is planned for other areas on the school campus.

In summing up the committee's work, Dr. Bill Armistead, co-chairman of the committee, encouraged citizens to keep a continued interest in making Littlefield an attractive place to live —

Ford Recuperates

Jim Ford, city tax assessor-collector and city secretary, is recuperating in Methodist Hospital where he underwent stomach surgery Friday morning.

According to his aunt, Jean Smith, he is doing fine and hopes to come home sometime this weekend.

A RARE TWIN ROSE bloomed last week on the Dallas McCurry farm east of Littlefield. The red roses came from the same bud on the stem, and Denise McCurry admires the oddity.

Lifesaving Course Begins Monday

Keith's Knowledgeable On Cornea Transplants

By NILAH RODGERS
Leader-News Staff Writer

Red haired, freckle faced Keith Collins knows all about baseball, astronauts and all the hammers and nails and puppy dog tails sort of stuff that's common knowledge to most 10-year-old boys.

Keith also knows about cornea transplants, glaucoma and internal hemorrhage, something out of the realm of most about to become fifth graders.

Keith, the 10-year-old son of Mr. and Mrs. Jerry Collins, lost the vision of his right eye six years ago when he was hit in the eye with a B-B gun. Soon after the accident that blinded him, he was running and a wire in a fence hit him in the eye and caused a hemorrhage behind the blind eye. Keith has had eye surgery six times in the six years between his fourth and tenth birthdays.

The last two operations were cornea transplants. On Sept. 5, 1970, half a cornea thickness was transplanted. During the Thanksgiving holiday last year the cornea transplant was completed.

Keith still can't see anything but light through the cornea transplant because the blood veins are trying to grow up, the thing that causes a cornea reject. He is receiving medication four times a day for this form of glaucoma.

The Amarillo doctors who performed the cornea transplant say Keith's sight will come later when the glaucoma is

under control. Keith sure hopes so. "The doctors say Keith won't be home free for two years," Mrs. Collins said. Since the first transplant the Collins have been aware of the 25 to 50 per cent chance of rejection.

Because of the glaucoma problem, doctors won't fit the cornea with a contact lens yet, because a contact could cause irritation and rejection. But when all the pressure is gone, a colored corrective lens will improve his sight and make his eyes the same color. Then once again Keith will see the world with two blue eyes, one his own and the other made possible by donors who willed their eyes to the High Plains eye bank.

Meantime Keith doesn't mind talking about cornea transplants. Amarillo Lions who sponsor an eye bank invited Keith to be on television and talk about his transplant. He has been on two radio programs, and he doesn't mind posing for newspaper photos.

Mr. and Mrs. Collins paid all the surgical costs the first time, but insurance from the State Commission for the Blind and insurance Collins has through the county as a deputy sheriff have helped pay expenses since then.

Mr. and Mrs. Collins are so grateful for the corneas made possible through the eye bank sponsored by the Lions Clubs that they plan to will their eyes. Eyes can't be bought or sold, they must be donated. Transplants must take place within 48 hours after the donor's death, and transplants within 12 hours are much better.

KEITH COLLINS

FLAVOR SEZ: "You can criticize the President. You can criticize the Vice President. You can criticize the President. But, you've got to hand it to the Internal Revenue Service."

AS A GOOD DAY Tuesday, approximately 140 people attended the Beautification Breakfast early Tuesday morning. Around 50 youths spent till noon in the area around Bull Lake. It started getting to a 6:30 a.m. start, but it didn't seem nearly so late when one considers what time the breakfast must be prepared.

Started cooking at 5 a.m. so you imagine what time their alarm went off. The cooking committee composed of ladies from the First United Methodist Church and the city owes them a big thanks for their part in this project.

Food was good, the remarks were good to the point, and everyone enjoyed themselves. It was very well planned and our congratulations to those who were instrumental in the project's success.

YOU CAN, you might drive down to Littlefield this afternoon and cheer for the Little Drabbler All-Stars as they play the big time. Playing in that new dome is going to be quite an experience for the young girls. Those always look a little higher and a little smaller when playing in facilities like those.

IT WAS a surprise to me that the bond for a new elementary school and the renovation of some existing buildings. While I certainly don't know the details of the issue, I do know that their existing buildings are in need of repair.

Littlefield is a very progressive city and a progressive city realizes the importance that a prospective industry can bring to the school system as a

REASONER from back east was surprised by a mail delivery. A batch of the family left on a corner of an rancher's property was shipped and collected by the understandably rancher.

Bill was for \$33 which made quite expensive.

According to a story in a Soil Conservation magazine, the uninvited guests left the scenic ranch spot with newspapers, cans, bottles, plates and napkins, plastic spoons, forks, cardboard boxes, milk and comic books. The rancher through the mess and found an envelope with the name and address of invited guests.

He asked the campers to explain they had some "personal belongings" and advised that he would pay for them if they would pay the charges. They accepted, and they got hanged with a \$33 bill. Sort of a long-range fine."

Peel Harvests County Wheat

Wheat brought in Lamb County's first load of wheat to Littlefield Farmers Elevator Saturday morning.

The 140 load tested 9.81 moisture. The load the same day tested 13.13.

Littlefield farmers brought in Saturday. E. C. Hill who lives in Littlefield brought in wheat with 10.51 moisture content, and E. J. Hill who lives south of town brought in a load testing 7.35.

The first load of wheat is two weeks earlier than the first load brought in last year.

FHA Girls Present Skit

The Littlefield Jr. Chapter of FHA met Monday, May 15, in the junior high auditorium for the last meeting of the 1971-72 year.

Hostesses for the meeting were Cindy Purdy, Sharla Grant, Margaret Martinez and Tonie Gardner. Refreshments were punch and cookies.

The program consisted of a report of the Texas State Meeting of FHA and a skit. The three girls attending the state meeting were Sheila Dangerfield, Janice Johnson, and Tonie Gardner. The meeting was held in Fort Worth from April 21-22.

The girls and their advisor, Miss Massengill, left by car April 19. Thursday, they registered and went sightseeing and shopping; Friday, they attended the meeting all day. The theme of the meeting was, "We can, if I will."; and Friday night, a special program for entertainment was held. The title of it was, "FHA Hope Chest - Gift of Love."

Areas I - IV of Texas were each represented by various talent groups who had been elected to go to state. Each area contributed something to the hope chest such as

understanding, friendship, love of country, hope, faith, joy, laughter, truth, and loyalty.

Saturday morning, the last meeting was held. The House of Delegates met and voted on some changes to the constitution. Installation of the new state officers was held.

The skit of the Monday meeting was presented by Sheila Dangerfield, Kay Wesley and Tonie Gardner. The skit was written by the girls and was primarily a discussion of the advantages of joining FHA.

Also, at this meeting, Girl of the Year was voted on. The four candidates were the four girls who had earned the most points this year. They are Janice Johnson, Kay Wesley, Sheila Dangerfield and Tonie Gardner.

STATE CAPITAL Highlights AND Sidelights

Forecast for the State Democratic Convention at San Antonio June 13 grows steadily stormier.

Agriculture Commissioner John C. White, who already had announced as a candidate for convention chairman against Roy Orr of De Soto, the state Democratic executive committee chairman, received backing of National Committeewoman Mrs. Carrin Patman, Ganado.

Mrs. Patman accused Orr of "wrecking the party" and predicted a "disastrous blood-letting" at San Antonio if he presides. She said Orr won't abide by the party rules he helped write himself, and that giving him the convention gavel would "sabotage chances of the Texas delegation's being seated at the July 10 national convention."

Supporters of Sen. George McGovern for president agreed Orr should not be chairman and that White is a "fair man." However, they contended, an endorsement on their part would be "premature."

Also under fire is makeup of the convention credentials committee named by Orr. Critics claim it isn't representative of presidential preferences and age and ethnic groups.

Orr earlier fired back that "liberals" are trying to take over and run the show, and he isn't going to permit it if he can help it.

Some observers have calculated the convention delegate spread is actually pretty close, with backers of McGovern, Gov. George Wallace and Sen. Hubert Humphreys all claiming a sizeable chunk of the votes. To gain as much strength as McGovern and Wallace on the 130-vote Texas delegation to the national convention, Humphrey would have to pick up most of the uncommitted delegates.

Republicans see only harbony for their state convention in Galveston June 13. They are even scheduling beach parties.

AUTO RATE CUT SEEN

The State Board of Insurance will meet July 24 for its annual hearing on auto insurance rates, and Chairman Larry Teaver thinks a reduction is in order.

A 2.8 per cent increase approved last year was blocked by a presidential wage-price freeze. Rates have been in effect since Jan. 1, 1971, when a 14 per cent boost was approved. There has been no reduction since a fractional cut in 1967.

Teaver said profits from underwriting nationally are at an all-time high, as are investment profits of auto insurance companies. He plans to submit a "personal injury protection" proposal to the Board as a substitute for no-fault auto insurance. The Teaver recommendation includes liberalized medical benefits on a no-fault basis, income replacement and life insurance instead of uninsured motorists and medical payments coverage.

DRAFT PLANS TOLD

About 400 men from Texas are expected to be inducted into military service during the month of July, although no quota yet has been assigned the state.

State Selective Service Headquarters

has announced that young men with lottery numbers of 50 or lower in the year's first priority selection group will get their induction orders next month. Those with numbers of 90 or lower may get pre-induction physical examinations during July.

Col. Melvin Glantz, state director of Selective Service, said 30 days' notice is planned for all induction orders.

COURTS SPEAK

Farmers can sue cattle feedlot operators for damages due to offensive odors even if they don't live on their land, the State Supreme Court held.

To properly assess whether movies are obscene, judges and juries must see the entire films, the Court of Criminal Appeals ruled.

A 300-year prison sentence assessed a Wichita County man for selling heroin was reversed because he didn't get a court-appointed attorney until the day of trial.

A federal district court ordered the State to make payments to Wichita County for aid to families with dependent children, even though it lacks control over welfare personnel employment there.

SMITH SEEKS FUNDS

Gov. Preston Smith went to Washington in search of federal matching funds for social services to welfare beneficiaries.

He said the federal government now pays states \$3 for every \$1 they spend on social services, but the White House's proposed new rules would prevent Texas and other states from considering work by some agencies.

An aide to the governor said the state is not getting federal matching money for counseling, family planning and homemaking assistance to the needy.

COLLEGE FUNDS AVAILABLE

More than \$13.2 million is now available on a formula basis for 17 universities to construct buildings, Comptroller Robert S. Calvert announced.

Calvert said these sums are available to the following institutions: University of Texas at Arlington, \$635,198; Texas Southern \$233,087; University of Houston, \$1.15 million; Texas Woman's University, \$225,596; Texas A&I, \$803,969; Texas Tech, \$723,226; Lamar, \$1 million; Midwestern \$205,822; Pan American, \$586,169; East Texas State, \$614,673; North Texas State, \$1.1 million; Stephen F. Austin, \$1.6 million; West Texas State, \$289,710; Angelo State, \$396,203; Sam Houston State, \$1.3 million; Southwest Texas State, \$2 million and Sul Ross, \$109,952.

ETHICS BILL PLANNED

A House committee on rules reform scheduled a June 8 meeting to write an ethics bill requiring full financial disclosure by members of the legislature, the governor and lieutenant governor.

Rep. Guy Floyd of San Antonio said the committee will offer reform rules to the special session. Floyd said he envisions an ethics bill requiring reporting of stock and land transactions annually as well as all income sources.

Why The Shooting?

The assassination attempt on the life of Governor Wallace was just one of 55 that day. The other 54 were killed, if it was an average day.

It is not so much that guns are available—they always will be for those who really want them. The law against carrying concealed weapons is clear enough, if we let the police enforce it.

You cannot coddle the criminal and escape violence in the land. You cannot protect the innocent more than you protect innocent people and expect to have a safe community.

You cannot insult the police and call them "pig" without losing what it takes to keep your neighborhood safe for you and your family.

You cannot teach that every person has the right to decide for himself what is right and wrong without ending up with anarchy and lawlessness.

BRENDA, BRIDGETTE, and Mike Hewitt are shown silhouetted against the century plant blooming in the front yard of the Dale Hewitt home three miles east of Whitharral. Hewitt dug up a couple of the plants at Fort Davis a few years ago while on a fishing trip. The plant blooms only once in a 20 to 30-year period, then dies. Before blooming, the plant has sudden spurts of growth. This plant is still growing prior to blooming. Hewitt said it has grown 7' 8" in the last four weeks.

THE ABUNDANT LIFE

Live Friendly

IN ORDER to live friendly, we must feel friendly. This is admitted to be one of our greatest needs, and it is a reasonable goal for us.

The fact that many people do live friendly is proof that all of us can live friendly.

Of course, there must first be a desire to do so. With the desire, there must be constant and diligent effort.

A FRIENDLY ATTITUDE of mind can be developed and maintained, if this is really what we want.

From this condition of mind, we will live friendly as a natural transfer of thought into action. When the many benefits of such thinking and living are considered, we will surely be friendly.

THE HOSTILE MIND and life constitute a life style that has nothing to recommend it; however, it seems that some folk feel that hostility is the only workable approach to life.

Their thinking is generally hostile, their manner of speech is hostile, and many or most of their actions are hostile. In many instances, they are victimized by their own hostility.

IF WE ARE ANTAGONISTIC and unfriendly, we place ourselves under an unreasonable handicap and stir up the maximum of hostility against ourselves.

It is so much better for us and everybody else, when our behavior is controlled by kindly interest and goodwill. We will be at our best in all situations, and we will usually receive the best from others.

HOSTILITY IN THOUGHT and everything it touches. It causes trouble where there is no trouble.

It generates strife where there is peace and goodwill. It destroys intentions and good impulses. When it rules human action, it causes disorder and discouragement will large.

WHEN WE LIVE FRIENDLY everything we do is going to be and helpful. All of our influence will be for positive good. The things we do will be constructive.

Our sense of accomplishment is to be a source of strength to us. People will be glad to work with us. We will be glad to work with others. We will be a welcome addition to all worthy endeavor.

OUR CONTRIBUTION to the well-being of other people will be the best of which we are capable, when we live friendly.

This is what we will expect of ourselves, if we understand what all about. This action is no less than even when it is gain for others. We help others, we help ourselves.

"IT IS ONE of the best compensations of life that no man sincerely try to help another, is helping himself." — Anon.

LET US LIVE FRIENDLY and living a little better for ourselves and for all of the people whose lives we touch along the way.

OBITUARIES

ERNEST PENNINGTON

Services for Ernest Pennington, 68, a longtime Sudan resident and cafe operator who died Saturday morning at South Plains Hospital in Amherst, were conducted Monday afternoon in Hammons Funeral Chapel in Littlefield.

Pennington had been a patient in the hospital six days.

Rev. Wayne O. Perry, retired Baptist minister of Lubbock, officiated and burial was in Littlefield Memorial Park.

Pennington had lived in the Sudan area 40 years and had operated a cafe there.

Surviving are his wife, Opal; three daughters, Mrs. S. R. White of San Antonio, Mrs. Joe Williamson of Las Cruces, N. M. and Mrs. Billy Gerik of Pep; a brother, Bill Pennington of

Irving; a sister, Mrs. Gladys Strickland of Oklahoma City, Okla.; six grandchildren, and two great-grandchildren.

Funeral services were held Saturday, June 3, in Central Plains General Hospital in Plainview, where he was admitted Monday afternoon in Hopewell Baptist Church near Otton.

Officiating were Rev. Ronnie Travis, pastor, and Rev. Curtis Jackson.

MINNIE GRAY

Funeral services for Mrs. Minnie Odum Gray, 88, longtime resident of Otton who died Saturday, June 3, in Central Plains General Hospital in Plainview, were conducted Monday afternoon in Hopewell Baptist Church near Otton.

Officiating were Rev. Ronnie Travis, pastor, and Rev. Curtis Jackson.

Burial was in the Otton Cemetery with Parsons Funeral Home of Otton in charge of arrangements.

Mrs. Gray was a native of Milam County, and had lived in the Otton area 46 years. She was a member of the Hopewell Baptist Church.

Surviving are six sons, Elmer Gray, Floyd Gray and Virgil Gray, all of Otton, Back Gray of Dallas, Falcon Gray of Los Angeles and H. N. Gray of Midwest City, Okla.; a daughter, Mrs. Otie King of San Leandro, Calif.; 23 grandchildren and several great-grandchildren.

Family Pet Lost

Has anyone seen a stray black and brown Alaskan Huskie?

Five of Mrs. A. J. Wallace's niece's children have lost their dog "Benjie", and an all-out plea has been made to help find the pet.

"Benjie" jumped from the family vehicle while they were visiting in Littlefield recently. The Billy Mitchell family resides in Shallowater, and the children are anxious to find their pet.

If you see the dog, call Mrs. Wallace at 385-5546, and she will take the animal to its owners.

DEAR ABBY: I am a young, single career girl who lives alone. I use "Ms." before my name as a form of protection. With the present high crime rate I am not about to advertise the fact that I am unmarried and therefore am alone during the night. There are just too many kooks running around.

I realize that using "Ms." isn't foolproof, but every little bit helps. I don't want to be equal. I only want to be SAFE!

Ms. L. J.

DEAR MS. L. J.: I'll say it's not foolproof. Some married women spend more time alone at night than the unmarried ones.

DEAR ABBY: Four of us married women are planning to drive to Florida for a week's vacation. We will share the gas and motel expenses.

One of the girls has her husband's permission to use their new car for the trip. He said that we three girls should pay 30 per cent each for the gas and his wife will pay 10 per cent, and if the car should have trouble on the trip, his wife will pay for all the repairs.

I think we should all pay equally for the gas, no matter who owns the car, and the owner still should pay for any repairs.

Who do you think is right? Thank you. ONE OF THE

DEAR ONE: I see nothing wrong with the proposition. But if you do, I advise you to speak to me before you leave. A disgruntled passenger is a very poor traveling companion.

DEAR ABBY: My husband and I have three girls, ages 15, 13 and 10. We live down the street from my mother and when the girls have stopped to see their grandmother they have been greeted with such remarks as, "You sure have a lot of pimples," and "My, but you're fat!"

Last time the 13-year-old was there my mother (right in front of some other relatives), "Gracious, you're developing quite a bust!"

Now the girls don't want to go there any more. Can't say as I blame them.

I told my mother the reason the girls stopped to see her, and she said, "It's a darned shame they are so sensitive. They had better outgrow that."

Are my daughters, in your opinion, "overly sensitive" or is there something wrong with my mother?

TICKED OFF IN TEXAS

DEAR TICKED: It's your mother. She sounds like she'd try to educate her.

DEAR ABBY: Since I am 78 years old, my eyes may be valuable to the 74-year-old college-educated man who found himself "ON THE FENCE" concerning a lady friend who had only a sixth grade education. Like "ON THE FENCE," I had a good education. (I am also conversant with eight languages. None of them necessary in my love life.)

Literature is very nice, but chemistry is more important. Consider the case of Benjamin Franklin who still a bachelor, saw a pretty girl on the street, and introduced her, married her, and discovered she was an EX ETYMOLOGIST: NORWALD

COTTON TALKS

FROM PLAINS COTTON GROWERS, INC.

An exceptionally large and potentially damaging number of boll weevils are emerging from hibernation this spring in Cottle, King, Stonewall and other counties just East of the area covered by the High Plains Boll Weevil Control Program, according to Dr. Don Rummel, research entomologist at the Texas Agricultural Experiment Station, Lubbock.

"There is every indication now that these weevils will require intensive and costly control efforts later in the season," Rummel says.

Inside the control zone of the High Plains program, weevil numbers also appear higher than in recent years, but are only 3 per cent or less as great as in areas not subjected to programmed control measures, TAES reports.

And, according to Ed Dean, Field Service Director of Plains Cotton Growers, Inc., the coordinating organization for the control program, "There is no reason to believe weevils this year will pose more of a problem in PGC counties than in previous years."

The High Plains program, initiated in 1964, consists of insecticide applications in the fall each year on all weevil infested acreage along the Eastern Plains border.

This breaks the weevil's reproductive cycle in September, helping to control population buildups, then kills a high percentage of remaining weevils in October and November before they attain "diapause," the state in which they are able to live through the winter in surrounding hibernation sites. Thus the number of weevils invading crops the following spring is greatly reduced.

The increased incidence of weevil emergence this spring, program officials note, is not the result of an ineffective program last year, but a consequence of an abnormally high rate of winter survival both inside and outside the control zone.

"This year's program

operations are progressing as planned," Dean notes, "and we are again confident that the vast acreage of cotton on the Plains will be protected as it has been since 1964."

Early season emphasis this year is being placed on an innovative part of the program aimed at killing a high percentage of overwintered weevils as they emerge.

"Trap crops" of early-fruiting cotton, a few acres each, have been planted in about 80 fields adjacent to known weevil hibernation sites, and the cotton there is treated with "TEMIK," a systemic insecticide. Pheromone, or sex lures, are placed in these plots to entice weevils into the treated cotton as they emerge from hibernation.

Research studies in 1971 indicated that in this way up to 85 per cent of the weevils can be lured into as little as 10 per cent of the field's total acreage. Officials hope this technique will reduce the size of the area requiring insecticide applications this fall, thereby reducing the cost of the program.

In 1971, an aggregate of only about 400,000 acres received insecticide treatment, as compared to almost 2 million acres in the first year of the program. "If a further reduction can be achieved through using trap crops and sex lures without reducing the effectiveness of the program," Dean said, "we certainly don't want to miss that opportunity."

Camping Can Be Fun If You Know The Ropes

A few common household items can mean the difference between success and failure on a camping trip, according to Texas Parks and Wildlife Department officials.

Aluminum foil, for example, can make the camper's life easier. A large piece can be transported in the hip pocket, and it can be as versatile as the user's imagination.

Campers have found that by wrapping a piece of dry ice in foil and placing it in the bottom of their ice box, they can increase the life expectancy of their regular ice.

A piece of foil wrapped around one side of a lantern will almost double the intensity of the light.

Silver spoons, or anything chrome, can be polished with a wad of foil. The foil on a bait bucket or canteen will reflect the sun's heat and keep the water cooler.

Petroleum jelly is almost as versatile as foil. It can be used on chapped lips, or it can be

used on reels, gun parts, pocket knives and axes to prevent rust.

If burrs on a dog's coat are smeared with the jelly, they can be removed easily. And the jelly is good for temporarily waterproofing boots and shoes as well as those last few feet of fly line.

Here are a few more tips which will make life easier on a camping trip:

Freeze water in muffin pans. The ice will last longer in your ice box because the chunks are larger than the ones you buy.

If you puncture your oil pan on a sharp rock, patch it temporarily with candle wax. This will at least get you to town.

If you are unsure about the sources of water at your destination, take along a little laundry bleach. One drop will purify about eight ounces of water.

And if your car gets zapped by sap, rinse the finish with your favorite cola drink. But be sure

Texas Screwworm Cases Set New Weekly Record

A record-breaking 1,563 screwworm cases were confirmed in Texas for the week ending Saturday, May 27. This compares to 780 cases the previous week and 600 two weeks earlier.

According to officials of the Mission Screwworm Eradication Program, the outbreak spread to 16 new counties during the past week, upping the infestation area to 100 Texas counties.

Newest counties hit by the flesh-eating livestock pest include Concho, Lampasas, Nolan, Stonewall, Howard, Jack, Knox, Comanche, Runnels, Brown, Coke, Grimes, San Saba, Wilbarger, Young and Reeves.

Dr. M. E. (Cotton) Meadows Jr., eradication program director, said Arizona also recorded nine new cases,

pushing the tally for the week to 1,574 cases in the United States. Large numbers of new cases also were reported in many portions of Mexico near the U.S. border.

Total case count for the year thus far is 4,447, compared to 444 for all of last year. Texas thus far had recorded 4,382 cases: Arizona, 57; New Mexico, 5; California, 2; and Oklahoma, 1.

"All areas where cases are confirmed are being treated with sterile flies," points out Meadows. This involves "hot-spotting" or dropping about 100,000 sterile flies at each location. In addition, 1,600 flies are dropped per square mile each week in the southern part of the state that has heavy infestations. Certain other areas receive sterile fly drops at the rate of 500 to 800 per square mile each week. When cases are confirmed in scattered western and northern counties, routine fly drops are made along rivers and streams in addition to the "hot-spotting."

Meadows urges all producers to check their animals frequently, collect any worm samples from wounds and treat the wounds with a recommended product. Worm samples should be sent to the Screwworm Laboratory, Box 969, Mission, Texas for identification.

The program director also cautioned producers to delay such operations as docking, branding, dehorning and castrating. "These operations leave a wound and that's an

Proposed Cost Alarming

Grain sorghum farmers are concerned over increased labor costs that will be forthcoming if a proposed bill passed recently by the Senate Labor Committee becomes law. The bill would raise current \$1.60 minimum wages per hour to \$2.00 in 60 days, and \$2.20 in one year.

Elbert Harp, Executive Director, Grain Sorghum Producers Association, expressed this concern in a letter sent to each U. S. Senator last week. Harp stated in his letters that, "This proposed

legislation would accelerate the bankruptcies of farmers by a staggering number. Unless action is taken at the same time to guarantee an increase in prices for farm products, farmers will be forced out of business."

Cost of labor is a significant part of the total cost of production of grain sorghum. The proposed wage hike, if passed by Congress, would increase grain sorghum production costs considerably.

Posse Riders Win District

Several members of the Lamb County Sheriffs Posse won first place in District One of the American Association of Sheriff's Posses and Riding Clubs in the fourth Play Day of the season at the Lubbock arena Sunday.

Scott Hopping and Nelda Blackwell won first place in their respective divisions in the "keyhole" competition.

Michelle Phillips, Nelda Blackwell and David Jones won first place in the flag race.

Michelle Phillips and Monica Phillips won first in the ring race.

Terry Stone, Michelle Phillips, Coke Hopping, and Scott Hopping were first place ribbon race winners.

In the baton relay, Terry Stone, Michelle Phillips, Monica Phillips, James Blackwell, Bill Stone and David Jones were all first place winners.

In the pole bending, Michelle Phillips and Cory Hopping won blue ribbons.

Terry Stone won first in the potato race, and Michelle Phillips won first in the barrel race.

There will be a Play Day at the Littlefield arena Sunday. The following Sunday the final district Play Day will be held at Lubbock. The top three places in the district events will be eligible to compete in the National Play Day in Waco in July.

...and the food has an exciting outdoor aroma and flavor, found nowhere else in the World!

A GAS outdoor grill gives food a tangy outdoor flavor without the time and bother of charcoal fire. Char-broiled flavor comes from the smoke of meat juices dripping on hot briquets. Charcoal itself provides no flavor. Permanent ceramic briquets in the gas grill reach cooking heat in a few minutes, and there is no long wait to start cooking. The heat is regulated manually so there is no need to move a grill up or down.

A Weekly Report Of Agri-Business News

Farmcast

Compiled From Sources Of The Texas Department of Agriculture
John C. White, Commissioner

About 22,000 Texas farmers are to receive crop acre survey questionnaires from the Texas Crop and Livestock Reporting Service. If you are one of those, please fill out the form as accurately as possible and return it as soon as possible.

Such questionnaires form the basis of statistical reports on agriculture for the state of Texas. The report will be only as accurate as are the replies, and it will be only as conclusive as the number of replies. Accurate information is needed since many of the federal government farm programs are based on these reports.

Texas also provides county-by-county statistics on agriculture production. You can receive a copy for your county or for the entire state by writing to the Texas Department of Agriculture, Box 12847, Austin, Texas 78711.

RURAL DEVELOPMENT on a state level is rapidly gaining momentum. State committees on rural development are formed and will begin work relating to actual rural development programs. In the national Congress, a conference committee is still working on federal rural development. Conferees have made substantial progress, but final action won't be taken until after the upcoming congressional recess. A final conference report is expected soon after Congress reconvenes for final approval for the House and Senate and then to the President for his signature.

INCREASES in broiler chicks and turkey poult hatched in Texas are reported. Broiler placements were 13 per cent above the corresponding week last year but one per cent below the previous week.

An increase of 12 per cent in heavy turkey breed poult hatched was reported

compared to the same week of 1971 but 12 per cent under the previous week. Hatchings are for week ending May 13.

THREE CROP reporting districts of Texas planting more than 1,000,000 acres of grain sorghum each last year. District 1-N (the Panhandle area) led the state in acreage with 1,964,000 acres; district 1-S (the High Plains area) was second with 1,330,000 acres. The Blacklands of the state were third with 1,005,000 acres planted. Lowest acreage in the state was district 6 (far west Texas) with 29,000 acres.

The total acres planted to grain sorghum in Texas 1971 was 7,641,000. Of that amount, 5,827,000 was harvested with an average of 52 bushels per acre.

Man Is Injured In Pickup Wreck

A two vehicle accident three miles south of Anton about 8:20 Tuesday morning sent one person to the hospital with injuries.

Garriaga Martinez was driving a 1969 Chevrolet pickup on farm road 168.

The pickup of Anton was driving a 1971 Ford pickup.

The pickup ran the yield sign and ran into the path of the Martinez vehicle, according to R.C. Cheek, highway patrolman from Levelland who investigated the accident.

Martinez was brought to the Medical Arts Hospital by private car.

GAYLE BURRUS models a little girl smock, left, and strikes a pose in the blue and white uniform she wears as a Texette at the Texas Stadium in the photo on the right. Gayle is the daughter of Mr. and Mrs. Tom Burrus of Whitharral.

Pregnant Look, Pants In Vogue

By NILAI RODGERS
Pregnant women are in style. For the unfortunate majority

who aren't currently pregnant, there's inflatable pillows to give the expectant look.

"Honestly!" exclaimed Gayle Burrus of Whitharral, "and those inflatable pillow manufacturers are making a killing!" The pregnant look is just one of the latest women's clothing styles according to Miss Burrus who modeled at the Apparel Mart for buyers at the Dallas market last week.

A 1970 Whitharral High School graduate, Gayle or rather "Liz" Burrus is in her second semester in the Dallas fashion merchandising college where she is learning about every aspect of fashion.

"If they don't like something about you, they change it," Gayle said. "They said 'Gayle' didn't fit me," the pretty blonde said. "They tried to call me Elizabeth. I sure wasn't going in for that, so they changed my name to Liz."

What else did they change? "Well, don't tell anybody," she said, "but they bleached my eyebrows. You know, they were always so dark."

Twenty-year-old Gayle doesn't remember the 1940's, of course, but she said some of the Forties fashions are returning.

"Hip huggers are definitely out," she said. "There are a lot of pants, but they are high waisted with pleats in the front and real full legs with cuffs. Nearly everything is pants. What few dresses there are are high waisted and belted, except for the little girl smocked look."

The smocked look fits under the bust, then is loose. The fashion minded can add inflatable pillows for the on-the-grow dimension.

Dress lengths are either very short or long. The long dresses are called maxi-mini or "MM" and are about six inches above the ankle, looking like a floor

length dress that shrank. Hot pants are still in, and so is the layered look and the short skirt.

Bright red fingernail polish and lipstick, wedge heels and ankle straps, and hair parted on the side and pompadours are reminiscent of the styles in the 40's.

Gayle plans to be a buyer some day. Meantime she's studying modeling, retailing, dress designing, textiles, sketching, fashion coordinating, pattern making, interior design and public relations in the intensive school of fashion known as Miss Wade's.

There are many opportunities for the students to model, host conventions, and other part time work. Gayle's first job as hostess was for a state coin show recently.

She is a Texette at Texas Stadium the \$31 million dollar home of the Dallas Cowboys. Each weekend she conducts tours, showing off the Cowboy dressing room, the \$50,000 suites where some have spent as much as \$46,000 decorating, and the elaborate press facilities. This fall she will be working in the press section at all the home games.

What does she do with the money she earns on her part-time jobs? "I spend every cent I make for clothes," she confessed. When you're around the fashion-conscious all the time, you want to look the part. That's what I like about modeling during market.

Sometimes the manufacturers give you what you model for them. We can buy everything at cost just like the merchants who come to market to buy for their stores. I bought some shoes that retail for \$30 for \$13.

Gayle is at Whitharral this week, getting ready for a class trip to Europe where she will visit all the famous designers and salons in England, France and Italy.

"This is what I've always wanted," she said expansively, indicating the modeling, schooling and the trip. "I just love it."
