Around We Go

WELL, HERE WE GO AGAIN! You know those expensive catalytic convertors required on all 1975 cars were supposed to eliminate harmful exhaust emissions.

Now federal Environmental Protection Agency (EPA) scientists fear the convertors may be causing more air pollution problems than they cure.

The new exhaust systems apparently emit a mist of sulfuric acid in quantities sufficient to cause a possible health hazard in cities where there is hightraffic density. The problem, it is expected, will show up in from two to six

NOW THE EPA is spending more money conducting accelerated research to determine possible health hazards posed by the new pollutants put out by the muffler system which it requires. The head of EPA's Human Studies

Division points out that sulfuric acid contamination in the air could aggravate heart and lung diseases and be very tough on older persons and children with allergenic problems, such as asthma.

IT LOOKS LIKE the environmental protectors are going back to the drawing board, while the driving public pays the bill once again.

CRIMESCOPE

By LEE SIMMONS Littlefield Police Dept.

AUTO THEFT victims often face the same problem as burglary victims, in that they can't accurately identify what was stolen, according to a National Automobile Theft Bureau (NATB) of

"Burglary victims many times can't give the police a complete list of what was taken from their property, while car owners too often can't even supply basic information, such as the stolen auto's license or vehicle identification num ber," said C. C. Benson of Dallas, manager of the Southwestern Division of

Benson urged all motorists to keep a record of their vehicle numbers in their billfold or purse.

"The sooner they can provide this information to the police for entry into the computers, the sooner all law en forcement authorities will have an opportunity to recover the car," he said.

To prevent the car from being stolen in the first place, motorists should (1) always remove keys from the ignition and lock all doors when parking it, (2) be wary of parking it in secluded, out-ofthe-way areas, and (3) carefully check the security of public parking areas.

Mr. Wade Warren Lamb Co. Leader-News 313 W. 4th Littlefield, Texas

Dear Mr. Warren:

I would like to call your attention to a series of programs on KTXT television, channel 5, on each Wednesday at 7 p.m. and repeated the following Sunday at 4:30 p.m. These programs relate to problems concerning alcohol. The title of the series of programs is "Feeling Good." If you have already made mention of the series in your newspaper I am happy to hear that.

If not, perhaps you would consider making some mention of the series and the dates of the showings. The following is a schedule and brief explanation of the programs on alcohol which shall be aired in the next 16 weeks:

Feb. 19 and 23- Motivate viewers to provide nonalcoholic beverages and THE ABUNDANT LIFE
