

# Olton Overpowers 'Cats, 26-0

The Olton Mustangs left little doubt in the minds of the fans in the jam-packed Wildcat Stadium Friday night as to the power of their football team, as they completely dominated the game in defeating the Littlefield Wildcats, 26-0.

"T" and "T" spelled the Wildcats' doom in the form of Time and Turnovers as Olton controlled the ball throughout the entire game. They ran 68 plays as opposed to the 'Cats 33 and at one time, Olton had the ball for eight minutes and one second without giving up the pigskin.

Turnovers in the form of fumbles and interceptions prevented any sustained Wildcat drive and the tone of the game was set on only the second play of the game as Littlefield coughed up the ball via the fumble on their own 30-yard line and Olton went in for the initial score three minutes later.

For the night, the 'Cats had four passes intercepted and they lost three fumbles. In winning, Olton now has a 8-1 mark for the year and they have one regular season game remaining Friday against Dimmitt.

This game was the first loss for the Wildcats and their season is now over. The 'Cats finished with an excellent record of 8 wins, one loss and one tie.

Olton was led by their fine tailback Glen Johnson, who rushed 28 times for 128 yards and their all-around quarterback, Jimmy Parker, who threw 15 passes and completed 8 for 114 yards, plus turning in an outstanding defensive game.

The Wildcats' rushing attack was stymied by the Olton defense as the 'Cats managed only 86 net yards on the ground and another 34 in the air.

Quarterback Ronald Parmer rushed four times for 37 yards to lead the 'Cat

ground attack and Littlefield's premier running back, Bill Turner, was held to 27

yards on 11 attempts. Steve Cruz and 11 yards on five carries and Blake Wood had 10 yards on four attempts.

Steve Cruz bobbled the opening kickoff and had to chase the pigskin back to his own 10. He picked his way back upfield, however, to the 'Cats' 25 to set the Wildcat offensive team in motion.

Turner rolled right on his first play for five yards and then the first big break of the game occurred and Olton was on the receiving end.

The ball squirted loose on handoff between Parmer and Rick Hopping and with 11:12 left, Olton had the ball on the 'Cat 30-yard line.

Olton's Johnson gained six yards on two runs, then Parker kept for the initial first down of the game for Olton to the 19 of Littlefield and the first penetration.

Johnson then picked up five yards but the 'Cats' Reginal Payton then dropped Parker for a five-yard loss as he blasted through from his linebacking slot.

A Parker pass was incomplete and Olton was faced with the first fourth down situation.

Olton elected to go for the first down and Parker lofted a floating pass to Stroebel on the one-yard line before being brought down by Lonnie Twitty.

Johnson then burst through for the Mustangs' first TD with 8:03 left in the first quarter.

Olton elected to go for two, but as Parker was looking for an open receiver, David Jones sacked him and Olton's lead remained at 6-0.

The 'Cats started their second possession on their own 34 with 7:56 left. Hopping gained one yard on the first play, Turner picked up three around right end, Olton's Ray Rodriguez dropped Cruz for a three-yard loss and the 'Cats had to punt.

Turner boomed a 53-yard punt and Olton was 90 yards from the 'Cat goal line with 5:59 left.

Olton steadily moved up field as they picked up their third first down of the night and then the 'Cat defense held and Olton was faced with a fourth and one situation on their own 35.

Parker once again elected to gamble and kept over the middle and Olton continued to move as he made the necessary yardage for the first down.

Three plays found the Mustangs short as Cruz had a tremendous defense play to drop Parker for a loss to set up Olton in their first punting situation.

Before they could get the kick off however, they were tagged for a five-yard penalty for delay and they got off a short punt of 24 yards to set the Cats up on their own 33.

The 'Cats ran one play and the first quarter ended.

On the 'Cats' next play, a bit of trickery in the 'Cat backfield saw Turner end up with the ball on an attempted pass play, but he was swarmed before he could get the ball off.

Parmer picked up the 'Cats' initial first down of the game as he ran a sweep around left end that saw him move into Olton territory for the first time as he moved up to the Mustang 49.

Two running plays and a pass to Martinez saw the 'Cat one-yard from a first down at the Olton 40.

The 'Cat punting unit came out of the field but head coach Jerry Blakely signaled for a time out and sent his offensive unit back onto the field.

The strategy paid off as Turner moved around right end with good blocking to gain the necessary yardage for the first down and the 'Cat drive was still in motion.

A running play went for naught then Parmer was on the button with his passing again as he hit Martinez on the 30 to come up one yard short of the first.

Blake Wood then moved for the first down and the 'Cats were smelling paydirt.

Cruz carried for the 'Cats' initial penetration with 5:40 left in the first half.

The 'Cats again had a fourth down situation staring them in the face, but this time Olton's defense held as Turner

OLTON'S MARK STROEBEL hauls in a Jimmy Parker pass early in the Friday night ball game to set up the first touchdown of the game for Olton. Littlefield's Lonnie Twitty was on the defensive but Stroebel had a big edge in the height department. Olton defeated the 'Cats 26-0. Olton has one more game Friday night against Dimmitt. An Olton loss would throw the league into a three-way tie between Littlefield, Olton and Dimmitt and a coin toss would be needed to decide the league's playoff representative. ## Bands Earn First Ratings In UIL Marching Contests

Both Littlefield bands earned first division ratings this past week during their UIL Marching Contests in Lubbock and both brought back trophies for their efforts.

The Littlefield Junior High School Band marched Tuesday before a panel of three judges: Dub Crain, the band director from Dumas High School; Harris Brunson, Angelo State University; and Bill Bradley, Big Spring High School. "All were very complimentary of the band," said Band Director Richard Hayden.

Dub Crain's comments included, "Entrance quite impressive, good uniform stride; sound is full." Also included were, "Alignment generally quite good." His final statement was, "Band appears to have good discipline and is well rehearsed."

Bill Bradley stated, "Nice knee lift on opening, nice sounds on 'Small World'." Harris Brunson said, "You have a well planned show with beautiful drills. Well done show. Nice looking band."

"This marks the third time in the

history of Littlefield Junior High that this band has received a one in marching. The last time was four years ago, and only three junior highs received ones. Those included Plainview and Seminole, besides us," Hayden concluded.

The Wildcat band marched and played a first division performance in a difficult contest in Lubbock Wednesday.

Sixty-one South Plains bands com-

peted and 20 were awarded the highest rating. In class AA, Littlefield, Dimmitt and Floydada, were the only winners out of a field of 16 bands.

Only three schools in West Texas had both Junior High and High School Bands to make first divisions. They were Plainview, Seminole, and Littlefield.

"There was a good crowd from Littlefield present to see the band march. Many parents, ex-members, and supporters cheered for the band," stated Band Director Tom SoRelle.

Earning a first division in marching qualifies the band to try for the coveted sweepstakes award. It is presented to

those bands that can make first in marching, concert playing, and sight-reading. "This is the goal of the Wildcat and Junior High Bands," SoRelle said.

All three judges were complimentary of the sound and color of the band; however all did offer criticisms for improvement.

"The directors are very pleased with both bands, both have made great improvements. We also recognize that the tremendous support and backing from the community and school was the key to igniting their spirit and desire to win," he continued.

Band Boosters To Meet Monday

Band Boosters will meet Monday night at 7:30 in the Junior High School Auditorium. The Beginner Band will play for their first concert, and no admission will be charged to those who wish to attend.

## City Buys Radar Unit, Plans Water-Sewer Policy

In their relatively brief session Thursday night, Littlefield's City Council awarded a radar unit to the low bidder, CMI Inc.; voted to release utility easements on lots 16 and 17 of block 19 and lots 32 and 33 in block 18 of the Crescent Park Addition; decided to formulate a written water and sewer extension policy in the form of a subdivision ordinance; and went into executive session to discuss city-owned property.

The new radar unit is to be purchased from Revenue Sharing Funds, and the low net price from CMI Inc. was \$1,195, compared to a net price of \$1,485 as submitted by Kustom Signals.

Pat Downs opposed the purchase of the radar unit, while the other three councilmen voted to accept the low bid for the purchase. When asked the reason for his opposition, Downs stated he felt the unit "is a nuisance," and that he felt the police department could get along without it.

In discussing the release of utility easements in the Crescent Park Addition, councilmen felt the easements would be of no use to the city in the future, and that the release could be granted.

City Manager Jim Blagg explained to the mayor and members of the city council, "During the last few months the city has been experiencing some growth in both the residential and commercial areas. The growth naturally causes some stress on our water and sewer facilities and new demands for extending these facilities. It is my feeling that this growth trend will continue and more demands will be made for water and sewer services. In the past such requests were handled with an informal policy which, due to the low number of requests, worked fairly well. As the requests begin to increase in number and complexity it becomes more dif-

## Alpha Lambda Zeta Conducts Business Meeting

The Alpha Lambda Zeta Chapter of Beta Sigma Phi, met Monday, Nov. 3, in the XIT Room of Security State Bank with President Brenda Denton presiding.

A "thank-you" note was read to the chapter concerning the state project of Beta Sigma Phi, Jana Tinsley.

City Council President, Deanna Friday, announced that the annual Thanksgiving Dinner held for the three chapters of Littlefield, will be Nov. 20, in the Willy Room.

Linda Jones reviewed article IV of the Book of Beta Sigma Phi.

The door prize was won by Stella Randerman.

The cultural program, entitled, "of House and Home," was presented by Janice Sebring. Janice compared the home life of yesteryear to that of today's. Janice explained that the Bible was used for both entertainment and learning and could be found in almost every early American's home.

Another form of entertainment was quilting parties and cooking.

Janice pointed out that cooking was not quite the same

years ago, as she passed around a recipe book printed in 1924. In conclusion, Janice stated that it made little difference if you were a pioneer woman of yesterday or a modern woman of today, a woman shouldn't be caught without her needle and thread. To impress her point, Janice presented each member with a needle and thread packet and thimble.

Following the program, the pledge ritual was held for the newest members of Alpha Lambda Zeta.

Cherlyn Perkins, Stella Randerman, Sharon Adams, Kay Powers, Judie Huddleston and Linda Duncan received their pledge pins.

Hostesses, Ruan Richardson and Charla Rountree served refreshments consisting of party sandwiches, various pickles and olives, deviled eggs, cheesecake, hot spiced tea and Cokes to: Janice Sebring, Darlene Maxfield, Judie Huddleston, Deanna Friday, Linda Duncan, Sharon Adams, Linda Jones, Kay Powers, Stella Randerman, Linda Charlton, Cherlyn Perkins, Janice Appleton and Brenda Denton.

A Homecoming dance in the SUB and a reception for SPC alumni in the Sundown Room, both set for 10 p.m., will wind up the festivities.

## A Banker's Viewpoint....

Credit is the fuel that makes our American economy go.

Everybody borrows - individuals, businesses, and government at all levels. Last year the total of debt, public and private, added up to \$2.7 trillion, an amount equal to about \$12,700 for every man, woman and child in the United States.

Debt in itself is not bad. It is the distribution of debt that counts. Its distribution makes the difference between prosperity or want, that makes jobs or destroys jobs. Here's how it works:

Suppose a business needs money for expansion. It will borrow the money, either from a bank or, as big corporations do, through issuance of securities - stocks or bonds.

This borrowed money creates wealth, by making new jobs and producing more goods. It pours new life into the nation's economic bloodstream.

But you get no such happy result when the government borrows excessive amounts of money. Government does not produce goods or create wealth. Instead, government borrowing takes that much out of productivity and thus dries up wealth.

This does not mean, of course, that government should borrow no money at all. Government must carry out its necessary functions, and in extreme situations it even must borrow money to stimulate the private economy.

But profligate spending by the government drains money away from productive enterprise and consequently, over the long pull, does damage to the national economy. It generates inflation and is self-defeating.

True wealth consists of goods produced, as compared with dollars invested and man hours worked. Anything - especially government spending - that interferes with efficient production of goods is harmful to the nation and all its people.

We believe in this country and its people. Like the writers of our Constitution, we believe that the strength and the real intelligence of government originates with the people. So we urge all our citizens, here and elsewhere, to do our part—keep up with public issues and send our opinions about them to our elected representatives.

The Oklahoma Avenue Home Demonstration Club met Thursday night, Nov. 6, in the Flame Room, with Thelma Griffin as hostess. Doris Waters gave a devotional thought and the program on glass inking was given by the County Extension Agent, Mrs. Dorothy Powell. Members made and completed their pictures, and planned their annual Thanksgiving supper for Friday, Nov. 21, at 7 p.m. in the Flame Room. Refreshments were served to members: Ruth Miller, Oats Solesbee, Jerry Cook, Doris Waters, Zeld Helms, Vena Maner, Clem Dubose, Ila Helms, Mary Feagley, Minnie Davis, Fern Bitner, Shirley Hardin, Pebble Roberts, Beverly Trimmer, Celesta Myers, and one new member, Maxine Hutto; and visitors, Marilyn Parker and five children.

MARY HELEN HOLGUIN of Earth, a patient at Medical Arts Hospital, celebrated her second birthday Thursday, and employees of the hospital presented her a birthday party—with cake, punch, gifts and songs. Here, nurse Kay Kendall and Dr. H. M. Hinckley Jr. present the cake to the tot, who has been hospitalized since Oct. 21 when she received second and third-degree burns on her feet, lower legs and bottom when she sat in a bathtub of scalding water at her home. She is the daughter of Mrs. Esperanza Holguin. (Staff Photo)

## The Key To Courage

There is an old fashioned word my grandmother used that I haven't heard for a long time. The word is "mettle." It means courage and even more than courage. It is an ingrained capacity to bear up under strain after the fashion of a finely tempered sword blade. To be on one's mettle is to be roused or prepared to do one's best with spirit, courage, ardor.

Life is not an everlasting picnic in perfect weather. On the contrary, it is a matter of struggle, a mixture of triumph and failure, joy and sorrow. It takes mettle to keep on going when circumstances conspire to thwart our hopes and aspirations, to meet strain in the heat of battle and then to wait for the final verdict...

Waiting is an art which our impatient days have forgotten, so when our progress is slow we begin to wonder if it makes sense to go on trying. It is the capacity to go on and on, however, giving one's best, thru the long days and months and years of waiting that is the mark of character and mettle.

The triumphant spirits of the world are those who, as Bacon noted, honorably accept the challenges laid down to them. They refuse to be stopped by difficulties. They possess the kind of courage which Emerson defined in his essay, "Circles," as the power of self-recovery, "so that a man cannot have his flank turned, cannot be

outgeneraled, but put him where you will, he stands."

When a man has mettle like that, obstacles become stepping-stones. Even his defects are made useful to him, and he draws strength from his weakness, and "like the wounded oyster, mends his shell with pearl." In fact, ease is inimical to growth, while struggle thru hardship and discouragement leads to maturity of mind and spirit...

Nathaniel Hawthorne, who traveled a difficult road before he found the key to triumph, wrote a sentence significant for all whose dreams are temporarily at bay. He was writing for the benefit of artist, and Herman Melville underlined the words in his copy of "The Artist of the Beautiful." Of the artist Hawthorne wrote, "He must keep his faith in himself while the incredulous world assails him with its utter disbelief."

That, I suspect, is where all of us have to begin when our hopes are thwarted. Faith in ourselves is one thing we never can afford to surrender. It is the key to mettle, the courage to keep on going when we feel drained. When we cease to believe in ourselves and our God-given powers and possibilities, we are finished. It is the man who can go on believing in himself while the incredulous world assails him with its utter unbelief who comes thru undefeated.

These are times to test the mettle of us all.

## Registration Up In Air After Restraining Order

Voter registration in Lamb County is at a standstill following the granting of a temporary restraining order on Nov. 3 for an injunction against persons having to re-register to vote.

Re-registering was supposed to have started here and across the state on Nov. 5.

"Now we can't do anything until further orders," Herbert Dunn, tax assessor-collector said. "We don't know what we're going to have to do. We're not even taking applications for voter registration. And we don't have any voter registration receipts."

All tax assessor-collectors have been named as defendants in class action to bind them in the injunction.

The suit was brought about by two blacks and an Anglo versus the Grayson County tax assessor-collector and other tax assessor-collectors in Texas and Mark White as Secretary of the State of Texas and John Hill as Attorney General of Texas.

Like most tax assessor-collectors, Herbert Dunn said he was hoping we would have a new registration list. "It would be much easier to keep an up to date correct list with a new registration and the re-registration every two years than trying to change and correct the one we've had for four years."

Secretary White estimates that there are probably one and one-half million registered voters who should be re-registered in another county or precinct.

Lamb County presently has 8,800 voters registered, which is probably far more than should be, according to Dunn. "No telling how many people are on the list who don't live here," Dunn said. "If we had a new registration, we could get

people registered in the proper precincts."

Since annual registration stopped, precinct lines have been changed and a new voting precinct has been added.

This year, registered voters who hadn't voted in the last year were supposed to be purged from the voter lists. "But we didn't purge any names except those we knew had died or where we'd been informed people had moved," Dunn said. "There were many names we couldn't read."

Dunn termed the registration list a general mess and said other offices feel the same way if there are an estimated million and half registered wrong. "But it isn't up to us, any more," he added.

Tax offices can't do anything about re-registering as long as the injunction is in effect. No steps can be taken toward re-registration until and unless the suit is cleared under the terms of the Voting Rights Act as not to have the effect of denying or abridging the right to vote on account of race, color, or membership in a language minority group.

Under the proposed legislation, each tax office was to mail a notice to each duly registered voter as of Nov. 5 informing him that his current registration will expire on March 1, 1975, and that he must complete an application for new registration and return it to the tax assessor-collector by Jan. 31, 1976, in order to remain registered to vote. All persons who do not complete this process of re-registration were to be purged or stricken from the voter registration list.

Now voter registration is up in the air again, and will stay that way until the injunction is removed and the question is settled in a U.S. District Court.

## International Parks, Highway Association Meeting Set Here

## STAR-SPANGLED HISTORY

HISTORICAL DRAWINGS BY JOSEPH BOGGS BEALE (1841-1920)

"MAYFLOWER"

The Mayflower brought to America the first Pilgrims seeking religious freedom. Years earlier, to escape persecution by English officials, the Pilgrims had fled to Holland. Unhappy in Holland, they arranged to have some London merchants finance their trip to the New World, hoping finally to find a place where they could worship as they chose. The Mayflower sailed from Plymouth, England, on September 16, 1620. After 65 days, the ship reached Cape Cod, where the Pilgrims founded their colony at what is now Plymouth, Massachusetts.

## A Woman's View

By PEARL BRANDON

THERE IS MUCH talk now on angels, since Billy Graham came out with his book called "Angels, God's Secret Agents."

He also has an article in "Decision" his monthly magazine, on angels which is very interesting.

MOST OF US every day human beings try to find a logical reason for everything and we are inclined to look upon the supernatural as superstition, but I think most of us have had some experiences that we cannot explain with ordinary reasoning.

Billy Graham quoted a McCandish Phillips, who was a former reporter for the New York Times, as saying, "The initiative in scientific discovery lies wholly with men. The initiative in spiritual revelation lies wholly with God. Men know only what God elects to reveal to them about the spiritual and supernatural... we can know nothing about angels... apart from revelation."

WHY DO WE find it so hard to believe in the supernatural? It is an unseen power, but so are many other things, such as electricity and atoms—we can feel the wind that blows but we can't see it.

Man has harnessed electricity, the atoms and solar power.

HE BUILT the telephone which we all take for granted, but isn't it miraculous that we can pick up the phone and talk with someone clear across the world?

The radio and television pluck sounds and pictures from the air. To me this is miraculous. This week we sat in our living room and watched and heard the president's press conference. He was

nearly 2,000 miles away, but we could see and hear him clearly.

SURELY IF WE can do all that, it is not unreasonable to think we can communicate with God, who created us. We have within ourselves the ability to think and to feel the power of God.

In John 16, Jesus says, "Howbeit when the Spirit of truth, is come, He will guide you into all truth; for he will not speak of himself; but whatsoever he shall hear, that shall he speak: and he will show you things to come." He was speaking of the Holy Spirit which we all have access to.

Billy Graham says the angels are God's messengers whose chief business is to carry out His orders in the world, that when we pray our wants are made known to the Lord as quick as a flash. He says there are millions of these "secret agents" all over the world and they carry on His work everywhere.

IT IS COMFORTING to think that when I am worried over loved ones far away He will send His messengers to care for them and that it will happen "quick as a flash."

Anyway we do know we have direct contact with God and He surely has a supernatural network to carry on His plans for this world that He created—and we have a part in it.

WE KNOW we can turn our hearts to Him and feel that warm fellowship immediately.

This is wonderful whether it is supernatural power, or angels, or messengers, or secret agents that puts us in contact with Him.

## OBITUARIES

### DIXIE ESTES

## THE ABUNDANT LIFE

### Turn Back

WHEN WE REALIZE that we are moving along the wrong road, we are sensible enough to "turn back". We may be just a little slow in fully admitting that we have made a mistake, but we do what has to be done.

If we drive up a dead-end street, we "turn back" to the point where we made the wrong choice. If there are warning signs along the way informing us of danger ahead, we know what to do. We "turn back".

IN HUMAN BEHAVIOR, there are wrong roads, and dead-end streets, and ways that lead to danger. These may not be as easily recognized, but they can be. The indicated action for correction may not be as easy to take, but it can be done.

Unfortunately, it is not as easy to "turn back"; when we are wrong in some way of human action, as it is on a dead-end street. We can, however, make these corrections.

IT IS NOT EASY, not always, for any of us to "turn back"; when we are moving in the wrong direction of Personal behavior. Nevertheless, in one way or another, turning back is the solution.

We may have to "turn back" to a principle we once knew and lived by, but, for one reason or another, we left behind. Now, we know that we were wrong in our departure; and we know what to do. If we are wise, we will "turn back".

WE MUST NOT BE STUBBORN. We realize that we have made a mistake, but it is a firmity of character to adhere to a course discovered. —Bovee.

FALSE PRIDE must not be taken in our way, when we "turn back". After all, when taken the wrong way; we are fortunate to realize that we have made the wrong move.

IF WE ADMIT this fact; and wise enough and courageous make the indicated corrections demonstrate one of the most and most commendable things.

WE MUST NOT PERMIT ourselves to be convinced that this is what we want. Everybody who makes progress in living must "turn back" and then; in order to correct direction of movement.

## HONNY GRITS

By CORNBALL BLEVINS

PERHAPS OUR STATE Legislators won't feel too hurt about our turning down the new proposed constitution for the state. Guess we're just a little suspicious, by nature, and then, when you stop to think about it, it's hard to improve on "Good". Which is what we already have.

Plus the fact that the thing didn't come with a "Money-Back" guarantee. Had it not have worked, how long before we'd have had the opportunity to get our trade-in back? Yep, the longer I think about the outcome of the deal, the more I'm satisfied with it.

I'M MISSING TURN ROW, somehow. It looks like he's havin' difficulty, of late, even bein' able to come up with "canned" stuff.

THOUGHT DR. BILL Armistead's letter to George Mahon was real good, and to the point (or points). He even bothered to send me a personal copy. A pretty good lesson in how plain gripping can become constructive.

ONE OF THE fellows down at the mill was quite elated about our mayor proclaimin' last Friday, "BEAT OLTON" day. He was a little disappointed, tho, when he learned that it wasn't a legal holiday!

TIME WAS WHEN some of us got together and started swapping baloney it was called a "Ball Seem" now that the US and Russia it on a very serious note.

Of course all the baloney does come from Russia, either. Those who be authorities on the situation, assure us that these transacted NOT cause any increases in prices.—Shish!

I HAVE NOTHING against mers. In fact I wish them well. They are the ones who keep our wheels rollin', ain't they? And, on a hand, I doubt that I'd like to and watch even a commie die.

My question is, why try to wool over our eyes, when the truth be just as acceptable? Or, "authorities" think the citizenry bunch of dummies?

IT'S DOWNRIGHT insulting intelligence!

STILL CAN'T believe the weather we're havin'! I'm hopin' we'll just get by this year rollin', ain't it? It would be a spoil it with cold weather. But, guess we'd better long-johns handy, just in case.

## Turn Row COMMENTS

By EMIL MANN

HERE'S AN IMPORTANT item which comes from the Texas Medical Association, and all hunters are reminded of taking safety measures at this time of the year.

CONSIDERING the thousands of men and women who are roaming the fields and woods with high-powered rifles during hunting season in Texas, it is not too surprising that a few hunters fail to return home alive each year. Others return with a serious gun shot wound that requires extensive medical treatment.

The primary cause of hunting accidents is carelessness. The hunter who blazes away at anything that moves runs a big risk of bagging a fellow hunter. The professional hunter will know what he or she is firing at before pulling the trigger. The hunter must never forget that any weapon capable of killing birds and animals also can kill humans.

TO AVOID BEING MISTAKEN for wild game, the Texas Medical Association urges every hunter to wear "daylight fluorescent orange" clothing. Extensive scientific research proves that "hunter orange", while it sends a glowing signal to other hunters, does not hamper the sportsman stalking a deer. A hunter's chances of bagging a deer are just as good in fluorescent or blaze orange clothing as any other color, since the skittish white-tail deer is color blind and will only be alarmed when it distinguishes motion, sound, or scent.

When getting your hunting gear together, be sure to include a "hunter orange" jacket or vest. Even that distinctive color provides protection.

HERE ARE SOME suggestions for safe hunt:

Never cross over or through a tree with a loaded gun. Fall and discharge. Unload and reload after crossing. Don't shoot hard, flat surface. Ricocheting can carry long distances with power.

Even a small bore rifle has considerable range. Know where your bullet will stop before pulling trigger.

Keep guns away from children. Leave a weapon unattended and unloading it. Store guns and ammo beyond reach of youngsters. Put under lock and key.

Always carry a gun so that you can control the direction of the muzzle. Keep the safety catch ready to shoot. Always be sure barrel is clear of obstructions. Clogged with mud or snow may cause a nip around camp. Wait until through hunting for the day. Weapons are unloaded and cleaned.

Treat guns with respect at all times. They may be loaded, but never point at something unless you plan to shoot. HUNTING IS ESTABLISHED as a safe sport. That is, if people follow the rules. Be a safe hunter!

BULA NEWS

OUR SCHOOL children enjoyed a long weekend. Teachers attended the District 17 teachers meeting in Lubbock, Friday, then Monday Three Way School was host to this area Texas Association of Community Schools, where 10 schools were represented. The Sundown school stage band provided entertainment for the morning group session, with coffee and donuts being served by the school, before teachers broke into group sessions.

OUR SYMPATHY is extended to Rev. Harvey Whittenburg and wife of Hartley, in the accidental death of his son, George Whittenburg. # ... WILDCATS

Continued From Page 1

was swarmed when he moved around right end and came up two yards short.

Olton moved steadily downfield with the running of Johnson and Parker, and Parker then broke through the 'Cats' defense for a 23-yard gain to the 'Cats' 32.

Less than a minute remained as Olton's Buster Lloyd lofted a pass to end Michael Franks who was all alone in the 'Cat end zone for Olton's second touchdown to set them ahead 12 to 0. Parker then hit Franks for the two extra points and Olton had it 14-0 with 46 seconds left.

Littlefield took the ensuing kickoff on their own 20.

Parker hit Turner for a 10-yard gain in the air for the 'Cats' fourth first down. Once again the 'Cats tried some trickery in the backfield, but Turner's long pass intended for Jimmy Durham was intercepted by Olton's Mark Stroebel on the Mustang 25-yard line and that was where the first half came to a close.

## SECOND HALF

Turner's kick to Olton went into the end zone but the Wildcats were ruled offside on the kickoff and the 'Cats had to kick from their own 35.

Lloyd took the second kick on the goal line and returned it to the 18. They moved it up to the 27 and on a fourth and one situation deep into their own territory, Olton gambled, and once again it paid off, as Johnson moved for the necessary yardage to maintain possession on their own 30.

Johnson carried again and he broke through to his own 46 for a 16-yard gain.

The 'Cats got a break here as Durham stopped Johnson for a two-yard loss and also Olton was tagged for a 15 penalty for holding to move them back to their own 33.

A Parker pass to Stroebel at midfield was deflected by Littlefield's Lonnie Twitty. Parker, on the next play, threw a bullet to Stroebel who caught the ball despite being hit hard by Turner.

Olton then faced a fourth and 10 situation and out of punt formation, Franks passed to Leslie Gary on a screen pass for a big first down for the Mustangs and they were in 'Cat territory at the 32.

The Mustangs moved steadily toward the 'Cat goal line and with 3:59 left in the third quarter, Parker hit Stroebel for a three-yard pass which gave the Mustangs

their third TD of the night and a 20-0 lead. The PAT attempt was no good.

On this drive, Olton consumed eight minutes and one second of the clock.

Twitty took the kickoff and after a good runback, the 'Cats had possession on their own 30. Parker then kept for 15 yards on the 'Cats' first offensive play of the half. Runs by Turner and Wood moved the ball down to the Olton Mustangs' 45.

A Parker pass intended for Jay Lee was intercepted by Parker on the 33 and the 'Cats' offensive drive stalled with 1:30 left in the third quarter.

Olton failed to move also and it appeared Littlefield would get the ball for the second time of the half with 23 seconds left. However, Frank's punt went in and out of the arms of Turner and Olton recovered the fumble in Littlefield territory at the 47.

Olton completely dominated the third quarter as their scoring drive took over eight minutes. Littlefield managed to run only six offensive plays the third quarter.

Olton moved to the 'Cat 38 before being forced to punt. Frank's punt was killed on the Wildcat two-yard line and the 'Cats had the ball for the first time the fourth quarter with 9:44 left in this game.

The 'Cats were unable to move for the necessary first down yardage and the 'Cats went into punt formation.

Turner got off a short punt but Olton was called for roughing the kicker and the 'Cats moved up to their own 23 for their seventh first down of the game.

Littlefield got another break as Olton was charged with pass interference and the 'Cats moved up to their 41.

Parker then attempted a pass to Martinez, but on a tremendous play by Parker, in intercepting the pass, Olton took over on their own 32 with 7:17 left.

Olton, faced with a fourth and one situation, lined up in scrimmage formation but then shifted into punt formation. The shift drew the 'Cats offside and they maintained possession.

Parker then pitched out to Johnson and he broke for his longest run of the night as he was stopped by Ayala on the Wildcat five-yard line.

Three plays later, Johnson went into the end zone, but Olton was penalized five yards for a motion penalty.

Olton lost five more yards on one of the 'Cats' best defensive efforts of the game, when Cruz exploded through to drop Parker to set up a fourth down situation.

Olton then tried a field goal that was off

target and the 'Cats took over with two and a half minutes left in the game.

Littlefield didn't maintain possession long as on the first play, the ball was fumbled on the snap and Olton had the ball at the Littlefield 20-yard line.

Parker passed to Stroebel with 1:43 left and Stroebel carried the ball to the Cat one-yard line.

Johnson then carried in for the Olton touchdown with 1:25 left to make the score 26-0 in favor of Olton.

The kick for the PAT was no good and the score remained 26-0.

Littlefield had one more chance, but a Parker pass was intercepted by Kevin Workman with 30 seconds left.

Olton then let the clock run out.

**DIMMITT 7 FRIONA 6**  
The Friona Chiefs went for broke on a last minute two-point conversion attempt Friday night and came up about a yard short as Dimmitt managed to hang on to a hard fought 7-6 District 3-AA win.  
After battling to a scoreless tie in the first half, Dimmitt broke on top late in the third quarter when freshman halfback Larry Bossett swept right end for 19-yards and a touchdown. David Espinoza kicked the conversion for a 7-0 lead.  
It looked like that was all they needed until late in the final period when Friona recovered a Dimmitt fumble at the 4-yard line. From there it took just two plays for the Chiefs to score with Glen London getting the score from one yard out with just 1:39 to play. Friona went for two and the win but came up short.

**SUDAN 19 MOTLEY CO. 0**  
The Sudan Hornets trounced the Motley County Matadors 19-0 Friday, then began sharpening their stingers for a showdown next week with Sundown for the District 2-B playoffs.  
Undefeated 2-B north champ, Sudan finished the regular season 7-3 and 6-0 in district, while Motley County is 6-4 and 3-3.  
Sudan's all-around playmaker was halfback Kyle Martin who literally rolled up every Hornet score in the game.  
Early in the first quarter, Martin scored from 13 yards out then kicked the extra. With 4:08 left in the period, Martin exploded again, this time for 30 yards and a score, that score set up by a 40-yard Martin punt return.  
Sudan showed its domination in the third quarter, and Martin showed he could score again. On a 97-yard drive that ate up all but 1:50 of the third quarter, the Hornets moved to the 12, Martin took it in from there.

**Springlake-Earth Wolves**  
Springlake-Earth Wolves capitalized on three crucial errors to blank the hosts 17-0 Friday night in district 3-A contest.  
Springlake-Earth's scoring came from two Kress fumbles and one interception—all in the first quarter.  
Springlake-Earth intercepted a pass and ran it to the line of the Kangaroos. There halfback Randy Monrela kicked the extra for a 7-0 lead.  
Kress fumbled in its own zone and Springlake-Earth recovered for a two-point conversion.  
Wolverines' final TD was by a Kress fumble on Kangaroo 5. Three plays later Mark Barton plunged for the score. Barton's pass, passed to Larry Barton, passed to Larry Barton, passed to Larry Barton.  
Springlake-Earth upped its mark to 6-3 with the win. Kress fell to 2-7.

**George Ann Walden** enjoy a 66-24 tally.  
Roy Jackson Jr., Jamie Lee, Gaylene Rogers and Scott Yarbrough are tied at 65-25.  
Brenda Davis, Arthur Duggan, Rodney Hampton and Dick Hopping have 64-26 marks.  
Those tied at 63-27 include Lilburn Bales, Michael Blevins, Connie Comer, Jack Hall, William Holland Jr., Tommy Hood, Loyd Hood, N.C. Horn and Dennis Jackson.

**Three Way Tie For First Football Contest**

There is a three-way tie for first place in the Leader-News football contest this week as Hall, Rickye Parker and Rollard all have a 68-22 mark. There are two remaining in the contest, this issue and the one to appear in the Nov. 16th issue.  
Clayton is close with a 67-23 mark while Fry, Ed McCanlies, and

**CANCER Answerline**  
American Cancer Society

... follows us through life, increasing with age. But, cancer safeguards follow us through life as well. The same advice that was useful when you were 40 holds true now: have a regular physical checkup including cancer tests. Indeed, a "procto", the test for possible bowel cancer, might be especially important for you now because this form of cancer is more prevalent in your age group. It's more curable when detected early.

**A reader is convinced:**  
"Viruses cause so many illnesses, do they cause cancer too?"  
**ANSWERline:** We know some of the causes of cancer: cigarette smoking can lead to lung cancer; over-exposure to the sun might cause skin cancer. Excess radiation and some chemicals are also involved in the onset of a number of animal and human cancers. At present we know that some viruses cause cancer in animals. While there has been no firm scientific proof as yet of a virus causing human cancer, there is a great deal of research going on about the whole question.

## Texas Boy's Ranch Build New Home

A meeting was held Nov. 3, by the Lubbock Club and Texas Boy's Board of Directors to plan the construction of the cottage at Texas Boy's Ranch. The cottage is the home for ten youngsters from the South Plains area.

"There is a tremendous demand for our facility as more and more agencies and organizations are recognizing Texas Boy's Ranch as a possible placement for their children," stated Roger V. Engels, executive director for Texas Boy's Ranch. "We need support from communities and interest throughout West Texas to keep our Boy's Ranch growing to meet the needs of the South Plains."

## Brucellosis Pact Would Be Jeopardized

An intensified federal-state effort to protect both human and animal health from brucellosis disease has not been accepted by Texas, the leading cattle-raising state may suffer consequences.

According to Buddy C. county agent for the Agricultural Extension, the Texas Animal Commission recently certain proposed rules which would branding of cattle infected animals and a brucellosis test of moving into Certified Free areas in the rules changes were pending by industry representatives and veterinary of all 50 states and by the U.S. Department of Agriculture.

One of the state's refusal to tighten brucellosis laws, the USDA has in the Texas Animal Commission that federal to fight brucellosis in may be withdrawn. In Texas cattle may be under federal quarantine to prevent the spread of the to other states.

Counties also would lose Certified and Certified Free status. Additional testing would be in order to ship cattle, points out Logsdon, to remove federal

## Grape Variety Evaluation Given By Experimenters

A 5- to 10-ton range with quality, sugars, acids and pH set at highly respectable ratings.

Lipe, who heads TAES grape research efforts for Lubbock and the surrounding area, says information accumulated over the past three years from Lubbock and Abernathy research vineyards indicates fresh market varieties most suitable to the home garden vineyards indicates fresh market varieties most suitable to the home garden vineyard are Siebel 9110, Golden Muscat, Himrod seedless and Niagara.

"The more commonly known Thompson seedless variety and a new variety, Black Monaka seedless, are excellent in quality, but are somewhat susceptible to winter kill here on the South Plains," he explains. "Marvelli de Maleiga, Meyers 39-3 and G-255-10 appear to be the best adapted 'Tokay' types."

Lipe says less information is available on wine types, although such dual purpose grapes as Siebel 9110 and Niagara are well adapted and very productive. Several other varieties are showing promise, but it is too early to predict which varieties will make the best wine, he adds.

## Economic Recovery Brightens Cotton Outlook

While good weather is improving the prospects for the final outturn of the 1975 cotton crop, signs of continued economic recovery are pointing to a substantial improvement in domestic cotton consumption.

Economists at Cotton Incorporated in Raleigh, N. C. now think domestic consumption of cotton may reach 7.4 million bales in the 1975-76 crop year, an increase over their previous expectations of 7.0 million bales.

At the same time, because of a month of good weather throughout much of the cotton belt, they are increasing their estimate of the final outturn of the 1975 crop from 8.5 million to 8.7 million bales.

"The economic recovery has been far more robust than most observers considered possible," says David Cox, Cotton Incorporated vice president for economic research and development.

The Gross National Product increased 11.2 per cent in the third quarter of 1975, and industrial production increased in September at its highest monthly rate in 11 years, Cox points out.

"Both the textile industry in general and cotton in particular have been sharing in those advances," he adds.

August retail sales of cotton goods increased nine per cent over sales in August 1974 and three per cent over sales in August 1973, a period of strong sales, Cox's figures show.

"Over the past year cotton has shown more market strength at the retail level than the synthetic fibers," he observes. "Synthetic fibers posted gains of only 1.5 and 2.0 per cent over sales in August 1974 and August 1973."

In September the seasonally adjusted daily mill use of U.S. upland cotton was 27.5 thousand bales, according to Cotton Incorporated economists. "That figures out to an annual rate of 7.2 million bales," Cox points out.

Cox says that the synthetic fiber recently announced price of polyester is as still strengthening believes.

As the U.S. economy brisks ahead, foreign nations emerging from the Cox reports.

Improvements in economies, coupled with a decrease in export cotton production, stronger export sales in crop year, he speculates.

"The United States enviable position to be a worldwide economic next year," Cox declares.

He warns, however, economy must still be considered fragile.

A fully recovered economy, Cox believes, depend on increased confidence, sustained sales, and a tolerable rate.

## Check Your Rooftops Before Problems Occur

Plaster Flaking? Wallpaper spotting? Shingles flapping? Don't wait for these drastic signs to appear before checking condition of the roof, Mrs. Dorothy Powell, County Extension Agent, warns. Although modern roofing materials have an "expected lifetime" or about 20 years, roofs can be damaged or wear out faster, and inspecting the roof annually can help avoid expensive repairs, she said. First check the underlayment. This is the covering of asphalt-saturated felt laid over the sheathing to protect it and the roof structure from moisture. Be sure there are no obvious holes beneath the shingles. Another trouble spot may be in the flashing, those metal or tar-like strips located where roof planes intersect—such as where a dormer meets the main roof, along the eaves, or at vent stacks or chimneys. Flashing strips would be anchored securely to help keep the roof watertight. Also, routine maintenance procedures would include making any immediate repairs—replace damaged shingles, for example, she noted. Clean fallen leaves, twigs and other debris from gutters, downspouts and roof surfaces so water can drain freely. Trim nearby trees to prevent the branches from rubbing against the roof. Prune climbing rose and vines well below the eaves. Although a homeowner can make simple repairs and maintenance, major jobs require a professional roofer. When hiring a roofer, get at least three estimates of the total cost for comparable materials and installation. Ask for references and check them. Beware of the roofing salesman who will restore the roof with a "special magical coating," because coatings often damage roof materials.

**Gin Incinerators Provide Alternative Energy**

Two new cotton gin incinerators that use their own gin trash as an energy source for drying seed cotton were demonstrated to the public at Monette, Ark. and in nearby Schugtown Thursday, Nov. 6.

Opened for inspection were the incinerators at the Kiech-Shaiver gin and at the Schugtown Co-op gin.

Managers at both gins praise their recently installed incinerators. Kiech-Shaiver manager Raymond Miller describes his as better than he really expected it to be.

Miller believes that with the gas situation like it is, the incinerator is a real advantage to the Kiech-Shaiver gin. "This way we know we can gin, even if our natural gas is cut off," he explains.

"With more and more modulating of cotton, our gin season gets stretched out into the winter months, when normally there wouldn't be enough natural gas to operate. Now we can gin at our own convenience without having to worry about whether we will have natural gas," Miller points out.

The Schugtown Co-op gin first investigated incinerators as a possible solution to the mounting problem of disposing of gin trash, which accumulates at the rate of about 150 to 180 pounds per bale of cotton.

The Schugtown facility had previously burned its trash, but state pollution regulations were threatening to end that practice. Faced with that ultimatum, the gin directors made a decision.

"We were either going to have to install the heat-recovering incinerator or buy cyclones to collect the trash, get two wagons and a tractor, and hire an extra man to haul the trash off," Cox says.

"We couldn't see putting the money into hauling off the trash," he says. "We'd still be faced with the same problem each year. So we decided we could get the incinerator, solve our trash disposal problems and dry our cotton, to boot."

Cox believes the incinerator will cut his liquid propane bill at least in half. "And we hope up to 95 per cent," he adds.

annual output of 10,000 bales. The Schugtown Co-op gin, which uses liquid propane for drying, has an annual output of about 2,000 bales.

Miller believes that with the gas situation like it is, the incinerator is a real advantage to the Kiech-Shaiver gin. "This way we know we can gin, even if our natural gas is cut off," he explains.

In addition to being uneasy about its dependence on natural gas, the Monette gin also faced a problem of complying with state pollution rules in disposing of gin trash. It, too, had been burning its trash.

The Monette incinerator was installed in late August. Miller has already ginned over 7,000 bales of cotton with it. The Schugtown incinerator has been in operation since the middle of September. Cox has ginned over 900 bales of cotton.

The Kiech-Shaiver gin incinerator was designed by Ecology Enterprises of Dadeville, Ala. The Schugtown Co-op gin incinerator was designed by J. C. Meyer Incinerator Co. of Pine Bluff, Ark.

Cotton Incorporated has installed measuring instruments in the Monette gin to monitor the performance of the incinerator to determine its effectiveness in recovering heat from gin trash.

There are some indications that drying seed cotton with the incinerator preserves fiber quality better than drying with natural gas, Lalor reports.

The Monette gin is operating at about four to eight per cent of its normal level of natural gas consumption, Lalor says. He

explains that the gin is using the natural gas briefly in the mornings for starting up.

Lalor says the incinerator is a practical investment for gins which have an annual output of 4,000 bales or more and which are now paying a combined cost of over \$2.50 a bale for drying and disposal of trash.

"This is calculated on a five-year payoff with 10 per cent interest on the investment," he says. But he adds that the actual life of the equipment is well over

five years. "Therefore, after five years, the gin is home free—and profits begin to accrue."

Not included in those calculations, Lalor points out, are the benefits to be gained by not being dependent on natural gas.

"A gin with a heat-recovering incinerator won't be stopped if the flow of natural gas is shut off. Uninterrupted ginning means uninterrupted harvesting—and higher profits for ginner and producer," he says.

Ed Jennings 385-4489

Southern Farm Bureau Life Ins. Co.

My wife and I have been married for less than a year. How much life insurance do we need?

There is no set answer... depending on your needs, responsibilities and lifestyle. If you are childless, both working with well-paying jobs, your need for protection is less than a family with children, a non-working wife and probably a smaller savings account. Think of life insurance in terms of income. Income... to meet medical expenses in case of disability, to help cover the cost of your children's education, income to help support a family. With all these variables, you should discuss your personal circumstances with your agent. He will help advise you as to your needs and what is practical.

## Crime Prevention Program Being Offered At SPG

The months of November and December signal the holiday season for most folks, but to law enforcement officials, they are "high crime" months, providing prime opportunities for shoplifting, vandalism, burglary, theft and other crimes. What can a person do to protect his home or business from such crimes? A crime prevention program now being instituted by the South Plains Association of Governments may provide some answers. "We plan to offer eight to 10-hour courses for the 15-county SPAG area on crime prevention to make the general public, business and industry aware of what they can do to prevent crime," said H. K. Henegar, SPAG crime prevention coordinator. "The program is being funded by a federal grant administered by the Criminal Justice Division of the nor's office," he added. Henegar and other law enforcement officials will serve as instructors. Those who received training in the Texas Crime Prevention Institute, which is offered at Southwest State University in San Marcos, nearly 20 crime prevention schools conducted there each year. SPAG is offering basic and specialized prevention programs in cooperation with South College, which will provide teaching facilities and public information on the program. If any firm or organization such as the Chamber of Commerce, is interested in sponsoring these prevention programs, should contact the office of Yarbrough, dean of education at SPG, at the 4921, ext. 253. "These courses are designed to reduce crimes of property, such as burglary, theft," Henegar noted. "Furthermore, this year's world coffee crop is down about 8 per cent from that of last year." Buyers in the United States generally have small inventories and were anticipating a large coffee crop for the 1975-76 crop year, which would have meant lower prices. But, they must now build their stocks in the wake of the disastrous freeze losses in Brazil. "Following the July freeze, the New York cash price for green coffee jumped about 20 cents per pound from June average of 55 to 65 cents for Arabica coffees. Retail coffee prices may increase 25 to 75 cents per pound during the next three to nine months," speculates McDonald. Despite the lowered production forecast for the coming crop year, there will be enough coffee to go around, notes the Texas A&M University System economist. However, reserve stocks will be down sharply.

## Coffee Prices To Jump

It's going to cost more to wake up in the morning, at least if you depend on coffee as an eye-opener. Coffee prices are expected to jump sharply in the coming months due to a July freeze in the top coffee producing states of Brazil, which annually produces about a third of the world coffee crop. "The freeze is expected to cut in half next year's harvest of coffee beans in Brazil" points

out Dr. Russell McDonald, economist in marketing with the Texas Agricultural Extension Service. "Furthermore, this year's world coffee crop is down about 8 per cent from that of last year." Buyers in the United States generally have small inventories and were anticipating a large coffee crop for the 1975-76 crop year, which would have meant lower prices. But, they must now build their stocks in the wake of the disastrous freeze losses in Brazil. "Following the July freeze, the New York cash price for green coffee jumped about 20 cents per pound from June average of 55 to 65 cents for Arabica coffees. ## Religious Education Meeting Set

The West Texas Education Convention is scheduled Nov. 14 through the Inn of the Golden Isles in Odessa, is expected to attract approximately 500 teachers, parents and education officials from various denominations throughout the West Texas area.

## Nutrition Seminar Set

A nutrition education seminar is scheduled to be held in Plainview Saturday, Nov. 15, in the High School Auditorium. The seminar, titled "Nutrition Education—The Next 200 Years" is sponsored by Texas School Food Service Association, District XVII in cooperation with the Texas State Nutrition Council, and the Dairy Council, Inc. Registration will be between 8 and 9 a.m. and the program will conclude following lunch at 1:30 p.m. Invitations to some 500 area school administrators, curriculum coordinators, classroom teachers, dietitians, nurses, nutritionists, coaches, parents, and school food services directors have been sent out, says Mrs. Anita Sisemore, director of cafeterias of Plainview. Mrs. Sisemore said that the seminar is designed to promote a further awareness for the need of nutrition education in the classroom and the community. The registration fee of \$1.50 will include a roast beef or chicken fried steak luncheon complete with two vegetables, salad, hot bread and dessert. **METRICS LEGALIZED** Congress legalized the metric system in the States as long ago as 1893.
