They assisted in planning a 60-page "Red Book formation" for FHA planning the program Area 1 FHA meeting in 1973 in March.

Mrs. Dorothy Keiser, advisor of the Patsy Line Chapter attended the meeting one afternoon and the day.

Cotton became an commodity in England 1640.

See here Uncle!

We respectfully suggest this five-point program for reducing that waste line.

The cost of government is literally eating the country out of house and home. In 1970, Americans spent \$14 billion more for government than for food, shelter, clothing and new cars combined.

Isn't it scary that the cost of government increased by 67% from 1958 to 1971? That's almost twice as much as the cost of consumer items. Uncontrolled Federal spending looms as a continuing threat to the economy. The inevitable results are government deficits, inflation, increased taxes.

What to do? We suggest to the President and Congress—put government on a strict diet. Set up strict spending guidelines. Exercise strict controls on the Federal budget. As a start, we recommend five reforms:

1. Project all major spending over a five-year period.

Show total costs as well as detailed spending. Such projections should list separately both actual spending and spending that has been authorized but not yet spent. Then Congress and the taxpayers will have a yardstick for measuring new and continuing programs. The costs of new programs initiated in the 1960's increased 300% during the first five years. If the taxpayer knows the future costs, he will think twice about the true worth of the program.

2. Evaluate all spending programs at least once every three years.

Determine their need and effectiveness and see what costs can be eliminated. This is zero-based budgeting, which means that an appropriation for a program must be justified from scratch. If needed it should be re-enacted. If not, eliminated. As it stands now, almost \$175 billion of the proposed \$247 billion budget for Fiscal 1973 would be spent automatically—about \$2,650 per family.

3. Pilot test every proposed major Federal program.

See if it will work before full-scale operations are funded. If it works, then and only then should Congress put it into nationwide operation. This procedure will avoid many expensive projects that look good on paper but don't solve the problem. As Senator Abraham Ribicoff said in urging that the proposed Family Assistance Plan be pilot-tested: "Right now we have 168 programs at a cost of \$31 billion to alleviate poverty, and we've got more poverty in this country than we had last year."

4. Designate a joint Congressional Committee to evaluate the Federal budget in terms of priorities.

Today no committee is responsible for the total budget picture. The Federal budget is a thing of bits and pieces—a scrambled multibillion dollar jigsaw puzzle. Each committee has a favorite piece and tries to squeeze it in somehow. No committee evaluates the budget in terms of balancing tax receipts and expenditures. Excess costs are simply added to the national debt. A total review by one committee, to be made public, could help balance the budget.

5. Subject special Federal programs, such as Social Security, Medicare and Highways, to the discipline of controlled spending just as other tax-supported programs are.

There are over 800 trust funds, which do not come under the annual appropriations review. An annual look might change priorities substantially as times change.

These five points can bring the budgetary process under control. Until the American public insists on steps like these, election results will be meaningless. What's needed is millions of Americans talking to their friends, neighbors, colleagues and public officials about ways to bring spending under control.

THE ABUNDANT LIFE

Much Ado

By BOB WEAR

LIVING IS ACTIVITY, but not all activity is living. Much activity is admittedly "much ado about nothing".

THEY never let themselves calm down long enough to see, to really see what they do have.

IT IS BETTER for us, in all ways, to plan and work to simplify the living experience. Of course, this can be done; and in the doing, we are going to find the basis for a satisfactory living.

"IN CHARACTER, in manners, in style, in all things, the supreme excellence is simplicity." - Longfellow.

WE DRIVE CONTENTMENT farther and farther from our reach in the faulty habit of making "much ado" about so many things.

CONTENTMENT IS NOT in things; not in going and doing just for the sake of going and doing; not in continuous excitement and vain pursuit; not in the waste of time, money and energy; and not in superficial activity.

LIFE BECOMES BURDENSOME, and our general outlook disappointing, in the self-made life climate of excessive activity; activity to no purpose, or to very inferior purposes.

Take Precautions

THE FOURTH OF JULY weekend will bring fun, fireworks, and more than 500 highway fatalities.

THE SMART DRIVER is the one who will concentrate on the estimated 20 driving decisions which must be made each mile.

EXPANDING YOUR look-ahead capacity simply means to watch for potentially dangerous situations developing ahead on the road.

IN SIZING UP the whole scene, a driver evaluates his total environment, as it is constantly changing.

especially when driving at high speeds. If a driver is travelling along at 60 miles per hour and a light rain starts or he sees traffic congested a quarter of a mile ahead, his preparation for the situation developing will help him avoid the need to make a split-second decision.

EVEN THE BEST decision may be of no value if the driver does not communicate with other drivers. In order to safely share the road with other vehicles, a driver should clearly signal his intentions, as early as possible.

Use hand signals to warn of sudden stops or slowdowns, in addition to four-way flashers. Lightly tap your horn before passing, when entering a blind intersection or when backing into traffic.

THE DECISION DRIVER will always leave an "escape route" or way out of trouble, if the unexpected develops. One way to leave a margin of safety is to allow proper following distance, which means at least one car length for each ten miles per hour of travelling speed.

FINALLY, the driver must be ready to take decisive action. If the driver has kept in mind the above four principles, his decision-making should be easy.

Witnesses Set District Meet

"The Watchtower Bible and Tract of New York has finalized plans for 59 district conventions of Jehovah's Witnesses for 1972 in the United States," according to Roberto Torres of the Littlefield congregation.

Convention officials revealed in New York that the Civic Auditorium in Albuquerque, N.M. has been selected as one of the sites, July 6-9. This will be one of nine Spanish speaking conventions.

J. A. Humphrey, convention manager, said 4,000 delegates are expected from Albuquerque and West Texas.

Humphrey said other conventions are scheduled for the Civic Center in Amarillo and Abilene at the Taylor County Coliseum, July 13-16.

L. Sanchez, supervisor of 20 congregations in West Texas, said the four-day convention will stress the importance of spirituality in an age of materialism.

The theme of the convention is "Divine Rulership" and the program's composition of lectures, symposiums, dramas and discussions will center on the need for Divine intervention for man to have peace and life.

About 2,000 delegates will represent West Texas at the Spanish Convention.

Are Your Fan Belts And Hoses Safe?

If it has been more than two years since the rubber hoses and fan belts were replaced on your car pickup you may be taking a chance to drive it so far from home.

By then, very nature, rubber parts will deteriorate and even time will cause them to fail.

They will often appear to be serviceable when in fact they should be replaced.

There are many things that can't be avoided but don't be caught out because of the failure of your fan belts and hoses.

We'll be glad to help you with your service needs.

Dear Abby

By Abigail Van Buren

Next time, serve him baked potato

DEAR ABBY: I recently married a widower with a 13-year-old son. Last night I served roast turkey with mashed potatoes and gravy. There were just the three of us. David (not his name) started to put his fingers in the mashed potatoes, making "road maps, and rivers and valleys" on them. I told him it wasn't good manners to put his fingers in the mashed potatoes or play with it. He didn't talk back to me, but he did talk to his father for support, and his father said, "It's all right, eat however you want at home, as long as you eat your manners when you eat out or have company." David brightened up and continued to make road maps, rivers and valleys on the mashed potatoes with his fingers. I told him I was going to write to you and ask how you would handle this and he said, "Go ahead. I'll bet she says I'm wrong. Well, what do you say?"

ANONYMOUS, PLEASE

DEAR ANON: Your husband loses. First, David is too old to be playing with his mashed potatoes, but it's important he should not be allowed to play the "did you conquer" game, which appears to be what's happening at your house. You and your husband had better get on the same team—fast.

DEAR ABBY: This is my first job and I am ready to go to work. I am in a one-girl office with 18 men. I am being my boss. Everything I do or wear causes comments from the men. If I wear a colorful print, someone says, "Where's the party?" If I wear black, they say, "Where's the funeral?" If I wear a short skirt, I hear, "Look at those gams!" If I wear pants, someone says, "Sam!" The money is good and I have to work, but I get so fed up from all the remarks around here, I'm a wreck. Can you help me?

SENSITIVE

DEAR SENSITIVE: Learn to tune 'em out, or develop a thicker skin. Chances are, they're just being friendly.

DEAR ABBY: Do you know how this new idea of having a four-day week is going over? Several men whose husbands are employed recently went on that four-day week and now my husband is considering going on it. I suppose there are some advantages, but I'm not sure how I would like that setup. It would mean having my

husband around the house an extra day, and in the past some of those long holiday weekends have seemed awfully long to me.

I would like to discourage it in a subtle way, of course, but I don't want him to get the wrong idea. Anything you can tell me about it will be appreciated.

N. Y. POST READER

DEAR READER: If your husband gets the wrong idea, you're in the clear. It's the right idea you don't want him to get. Malcolm S. Forbes [Editor-in-Chief of Forbes magazine] says the men love the four-day workweek, but their wives aren't so crazy about having their husbands home that much. Malcolm must be reading your mind, Lady.

DEAR ABBY: Parents are warned repeatedly to keep cleaning fluids, drugs and poisons locked away where children cannot reach them. But nowhere have I seen a similar warning concerning iron tablets, which can be fatal if taken in large quantities.

Recently a beautiful 19-month-old child crawled up on to a chair and took a bottle of iron tablets out of the cupboard. Thinking they were candies, he screwed off the cap and before he could be stopped, swallowed some 50 tablets. He was rushed to the hospital but died 45 minutes later.

From iron tablets, Abby? But that child is just as dead as if he had swallowed rat poison. Please, please, warn others.

STILL GRIEVING IN HILLSBOROUGH

DEAR STILL GRIEVING: If your letter saves one child, it's well worth printing. Thank you for warning others.

DEAR ABBY: I just boiled when I read the letter from the mother who said, "A man should realize that he doesn't have to stop being a good son in order to be a good husband."

I wonder how many married sons are good to their mothers only because their wives insist upon it?

I've been married for 18 years, and my mother in law lives only a few blocks up the street, and I have to beg my husband to drop in and visit her. And he would never call her up and ask her how she is or if she needs anything if I didn't dial the number for him.

When it snows, I'm the one who makes him go to his mother's and shovel her sidewalk. And I'm the one who sends him to take off her storm windows and put on the screens even before he does our own. And I'm the one who always suggests we invite his mother to go out to dinner with us, or for a movie, or a ride. If it were up to my husband, he'd see her Christmas and Mother's Day.

I suppose all mothers want to think their sons are perfect. Well, I have news for them. In many cases, the daughter in law deserves the credit.

If you print this, no name or town, please. My mother in law thinks her son is perfect, and I wouldn't want to disillusion her.

ONLY A DAUGHTER IN LAW

DEAR ABBY: A woman wrote in saying she didn't want to have anything to do with her husband at night because he came to bed smelling like a brewery. You sure didn't give her much help. You should have told that woman to put a glass of mouthwash by the side of his bed, and also a spittoon. The reason this world is so messed up is because we can't meet each other half way.

TURN ROW COMMENTS

EMIL MACHA

THOUSANDS of towns and small cities across the country could not exist if deprived of the trade that farmers provide. Together, farmers spend over \$40 billion a year for goods and service to produce crops and livestock.

They also spend another \$13 billion a year for the same things that city dwellers buy such as food, clothing, medicine, furniture and other products and services.

According to Wes Ritchie, managing editor of "Farm

Profit", farmer's purchases include: \$5 billion in new equipment, machinery and motor vehicles. Some 119,000 employees can thank farmers for buying this farm equipment and creating their jobs.

\$4.2 billion for fuel, lubricants, and maintenance of machinery and motor vehicles. Farmers use more petroleum than any other single industry. \$7.9 billion for seed and feed. \$2.1 billion for fertilizer and lime.

About 7 percent of all the rubber used in the United States is purchased by farmers enough to put tires on nearly 7 1/2 million autos. Farmers also use 6 1/2 million tons of steel each year in the form of farm machinery, trucks, cars, fencing and building materials. That's one-third as much steel as the auto industry uses.

KERNER REPORT
On Feb. 29, 1968, the Kerner Commission report blamed white racism as the main cause of Negro violence and riots.

Some 300,000 cotton farms provide full employment for an estimated 500,000 operators and workers.

ENOUGH SAID about statistics. Back to area problems. Many

farmers are having to because of the extreme weather conditions. Some replanting cotton. agronomist Earnest stated that early varieties of cotton could make, providing that fertilizer or irrigation was used. Looks like we can still 175,000 acres of Lamb cotton.

IF YOU were away Thursday night about with your home quarantining, you were not the ones. Several Little residents, especially northwestern part of the experienced the same. According to reports, this disturbance about three minutes unofficial reports by awoken state that they see a white funnel from eastward.

Friday morning, mud plastered on the cars and of these residents.

SAY, DAD AND MOM, few minutes each day and spend it with your daughter. Teach something new. These people are eager to learn them bake a cake or help work out of doors.

Relatively Speaking Beef Is Cheap

Prices, particularly beef, are not as "out-of-focus" as they may seem. William Vastine, food extension specialist with the Agricultural Extension Service, says that food prices are relatively stable. "Nearly everything has gone up in price increase. Consumers are paying more for beef from cars and going to services and restaurants. In many cases food prices increased due to higher standards, increased quality and more built-in value," notes the specialist. "Price increases have been due to short supplies and the demand for the meat."

A good beef roast that is sliced and served cold may be much cheaper per pound and per serving. Besides being less expensive, the beef would probably contribute more to the family's nutritional needs.

"So, relatively speaking, the cost of eating is different from the cost of food," says Vastine.

Meet The Minister

The A. J. Kennemer Family

Rev. A. J. Kennemer Jr. began his second year as pastor of the First Baptist Church of Littlefield June 18, and members of the church celebrated this anniversary along with the Kennemer's 25th wedding anniversary at the close of the mid-week prayer service Wednesday night.

More than 200 members and guests ate homemade ice cream and cake, and the young couples of the church provided entertainment. A silver chafing dish was presented to the pastor and his family as a token for remembrance of the anniversary.

Rev. Kennemer is a native of San Angelo, where he graduated from high school. His parents are still there and are active in the Harris Avenue Baptist Church.

Following graduation from high school, Kennemer studied a semester at Texas Tech with the Army's specialized training program, and then was sent to Europe with the 28th Infantry Division. He served as squad leader in the infantry with the rank of Staff Sergeant. When the war was over, he entered Hardin-Simmons University at Abilene, where he met his future bride, Joan Smith of Oklahoma.

After graduation with a BS degree in English, Rev. Kennemer graduated from Southwestern Baptist Theological Seminary in Fort Worth.

Mrs. Kennemer, Joan (pronounced Jo Ann), will be affiliated with Littlefield Public Schools this fall in the counselling program.

She received her BA degree in education and psychology at H-SU and is presently pursuing her study in counselling at Texas Tech graduate school in Lubbock this summer.

She is a graduate of Pasadena College in California, and has taught in the Glendale Public Schools in California. She is daughter of Dr. and Mrs. P. Boyd Smith, the founder and first president of the California Baptist College in Riverside, Calif. Her mother still resides in California, after the death of Dr. Smith last year.

Rev. and Mrs. Kennemer have two children, Mrs. Melody Bullock, 18, who resides in Lubbock with her husband, Larry, a student at Texas Tech; and Jeff, their 7 1/2-year-old third grader.

Included in the pastorates Rev. Kennemer has held since

his graduation are the Harris Avenue Baptist Church in San Angelo, the First Baptist Church of Seminole, Tex., two terms at the First Southern Baptist Church in Glendale, Calif. (first for four years and the second time for eight years) and the Grandview Baptist Church in El Paso.

The Kennemers came to Littlefield from the El Paso church.

Littlefield's First Baptist Church is one of the "leading Baptist Churches on the South Plains, with a membership of 1,709," states Rev. Kennemer, "and has an active Bible teaching and music ministry for every age group—from the youngest to the oldest."

He continued, "It is affiliated with the Baptist General Convention of Texas and the Southern Baptist Convention, and supports their mission endeavors. The church also helps support the First Baptist Church in Kearns, Utah, and the Calvary Baptist Mission (Spanish-speaking) in Littlefield."

Rev. Kennemer has served on the Executive Board of the Baptist General Convention of Texas and was invited by the convention to be one of the evangelists for the Japanese New Life Movement. While pastoring in California, he studied preaching and counselling at Fuller Seminary in Pasadena, Calif.

"People and books" are Rev. Kennemer's hobbies, and he has filled his library with several unusual, out-of-print, rare books that have been purchased from England and Scotland, and others he found in used book stores in California.

Other hobbies he includes are swimming and water skiing when the time and place allow it.

He says he particularly enjoys preaching, and "believes that the Gospel is the good news of God unto salvation to them who believe." He likes to study books by preachers of other years along with the Bible.

Mrs. Kennemer's hobbies are cooking, entertaining and playing musical instruments, piano, organ and the marimba. She serves as the church pianist and is the Sunday school director of the high school age group.

Her family takes up most of her time, but she loves to read when she has the time.

PEACHES BY THE BUSHEL are a burden to this three-year-old tree in the backyard of the O. H. Grusendorf residence in Littlefield. He gathered several bushels of the peaches for freezing. The fruit was so heavy, it tilted the tree to one side and pulled roots upward. The tree came up volunteer from a seed from another tree which grew nearby several years ago.

LARRY CATE
Larry S. Cate, son of Mr. and Mrs. Warren G. Cate of Anton, is participating in a U.S. Air Force Reserve Officers Training Corps (AFROTC) field training encampment at Dyess AFB, Tex.

Other highlights include survival training, aircraft and aircrew indoctrination, small arms training and visits to other Air Force bases.

Cadet Cate is a member of the AFROTC unit at Texas Technological University at Lubbock.

He is a 1967 graduate of Anton High School. His wife, Cynthia, is the daughter of Henry W. Jacoby of Eden.
