10,000 Lumen Lights To Turn Night Into Day

For years, growing, booming Littlefield, has forged ahead, despite one glaring shortcoming—adequate street lighting. In a few more weeks, all of that will be changed, the shortcoming overcome—and at the press of an electric switch, night will veritably be turned into day, because Littlefield has purchased and installation started this week, on a complete new street lighting system, which will be the pride of Littlefield, the envy of other South Plains cities, not so fortunate.

Littlefield, the best business town on the South Plains, is going to advertise the fact, tell the world about it, in one of the most persuasive, eye-appealing manners—with good lights—with the main arteries a veritable white-way, and the suburban streets, not overlooked.

Installation of the tall light fixture ornamental poles started this week on bases built several weeks ago.

Total cost of the installation will be between \$17,000 and \$18,000, and not only will new lights be placed where the old ones formerly functioned, but on at least 24 new locations.

Each light fixture will flash forth with 10,000 lumen of electricity, more than four times the incandescent power of the former lights, yet with air of the additional light provided, and the 28 installations, the cost of electric power to the city will be only approximately \$100 per month more than in the past.

Highway 84, long neglected with lighting will greet the tourist, with a blaze from 24 new 10,000 lumen lights, strung from the intersection of Highways 51 and 84, near McCormick's service station, to the water tower. In addition, 6 of the big lights will be placed surrounding the several school buildings.

Many local people, vacation bound traveling toward Denver, have been visibly impressed with the whiteway lighting effect, at the pretty city of Raton, New Mexico, 200 miles north of Amarillo. But Raton will have nothing on Littlefield a few weeks hence. That goes too, for almost any town, anywhere.

Or if you want to visualize new what the new lights will look like, here, you can go to Brownfield, Lamesa, Hereford, Levelland, [continued on back page]

ALUMA Seal

our new "hinged" milk bottle

seals the entire pouring lip

more sanitary...easier to use... made of clean, lustrous aluminum

AlumaSEAL has earned its popularity in thousands of homes . . . through actual use by many families such as yours. Here's why. The paper-lined aluminum foil covers the entire pouring lip of the bottle. This makes it unnecessary to wash the top of the bottle before using. It means added health protection to your family.

Notice how easy it is to open the AlumaSEAL. It's "hinged". To open, peel back hinged section, as indicated on the hood, then pour milk with removing hood from the bottle. This means your milk is kept pure at all times—even while it is being poured from the bottle. To reclose, simply push hinged section back down over the pouring lip. Here's continued sanitary protection and real convenience, as well.

Drink more pure, wholesome milk—milk that's protected by AlumaSEAL.

The new system will do away with local "hello" girls, as all local calls will be handled automatically; while long distance calls will be carried through an area telephone office located in Levelland.

Leader Expands

[continued from page one] and expand. You have told us in countless ways, your appreciation of our efforts. We want to reciprocate that appreciation, by building your Lamb County Leader, both bigger and better.

The first step in our program was to enlarge our building. A 40 foot addition was built on at the rear, to make our building a full block in length. The interior of the composing room was entirely re-modeled, and room provided for ten tons of print paper. New fluorescent lighting was installed, a new floor was laid, and then a few weeks ago, a new all plate glass front was installed [which is not yet quite completed] and to give an idea of its cost, we can only say that the plate glass door alone cost \$500, and to insure that bit of plate glass for even one short year, brings an insurance bill of \$70.00 more.

But Littlefield had decided that the "new look" in business building fronts was a must. We not only agreed, but we co-operated in that movement, which has done so much to improve the appearance of our city.

Only one building change remains to be finished. That, an all glass partition to be installed, dividing the editorial and business office from the composing room.

Even as this is being written, workmen are busy installing a modern new air conditioning system, and the orders are ready for a complete new heating system.

We could go on and tell you in detail of the improvements and changes that have been, and are now in the process of being made also in the mechanical department of the plant. Heading these was the installation of the new Kluge automatic press at a cost approaching \$4,000, which is pictured in an advertisement on another page. Only this week a new font of Intertype mats which have been ordered for weeks, arrived, and were bought with you the reader, in mind. It is a letter face easily read, with a minimum of eye strain, a letter that was designed after consultation with dozens of eye specialists throughout the country.

This week, for the first time, the page of your Lamb County Leader is larger, carrying seven columns on each page instead of six, as formerly.

New head letter type, new advertising type, new streamlining throughout the newspaper throughout the job department, throughout the entire plant, is underway—will be a completed fact in the immediate weeks ahead.

We're a bit proud of it all, and we hope you'll be proud with us.

And just one more thing, not to be overlooked when the improvements are completed, the office supply department will have been doubled in size, and will be the largest, most modern and complete, of any on the South Plains, barring only the bigger cities.

Spotlight on Sports

by BACON JONES

Remember The Long Count? Do you remember the second Dempsey-Tunney bout in September, 1927? Sure you do, and all the discussion about the so-called "long count!"

In the seventh round, Dempsey floored Tunney, and many claimed they clocked Tunney on the mat for 15 seconds more than the required 10 for a knock-out. And Dempsey stood over Tunney, and failed to go to his corner... which held up the count. Many blamed Dempsey for the boner of his career.

But then there was Tunney's side of the story. Being on the floor was a new experience to him. He ran into some of Dempsey's loose punches, especially a left-right-left sequence that dazed him. He went to the floor to recover, and Dempsey stood over him... hence the long count. Tunney won the decision, and showed no marks of injury from the battle.

Recollecting perhaps Dempsey didn't pull a boner. He may have sensed that he hadn't hurt Tunney, and that Gene had gone to the floor just for the rest. Perhaps this made Dempsey angry, and he stood over Tunney, ready to carry the battle further. After all, Tunney couldn't stay on the floor all night... and when he did get up, he got some pretty rough treatment from the great Dempsey.

Joe, who missed the first 65 games the Yankees played this season on account of a heel ailment, returned to the lineup and snacked five home runs in four days to lead the Yanks in a winning streak. To top it all, he was named for the all-star game.

JEWS DEAD COME HOME . . . A longing experienced all through life was realized by 120,000 Jewish victims of Nazi atrocities after death when their ashes arrived in Israel, their promised land, for burial. The ashes, taken from the common graves of Austrian Jews cremated in various concentration camps, were flown to Israel in 30 urns. Here is a view of the urns, contained in a casket, after arrival at Lydda airport, Jerusalem. Religious Jews from all over the city greeted the cortege and attended the burial.

Anti-Polio Cleanup Drive Continues

The anti-polio cleanup drive, sponsored by the Littlefield Junior Chamber of Commerce, underway for the past month, continues its good work.

Nice Response Received

The Jaycees report a nice response in their canvass, and up to Saturday night a total of \$1086.38 had been contributed to the cause of which \$882.26 had been paid out, and according to Clarence Davis, treasurer for the drive, other items owing would about balance the account.

BULL LAKE PHILOSOPHER SAYS HE DOESN'T NEED EXPERTS TO TELL HIM HE'S IN A DEPRESSION

Editor's note: The Bull Lake Philosopher on his Johnson grass farm near Bull Lake, is amazed that anybody needs an expert to let him know when a depression is on, he says in the following letter this week.

Dear Editor: Most of the time I don't have much trouble understandin' what I read in the newspapers that turn up out here on Bull Lake, especially yours, and ordinarily even the Denver Post ain't exactly what you'd call beyond comprehension, but the other day while I was lookin' over a paper which I brought along with me as I figured it would be handy to clean my skillet with, I noticed another article on the argument over whether we're in a depression or not.

As I understand it, the experts can't make up their minds whether we're in a depression, and the arguments have gotten so mixed up even President Truman came out with a statement sayin' we aren't in one,

adding: "If we were in a depression, I would be the first person to tell you."

I guess times is changin' and things don't mean what they used to, but up to now I ain't never had to depend on the President of the United States to let me know whether I was in a depression. Always managed to figure it out for myself. I don't know what kind of depressions the experts are devisin' now, but up to the present it was about as hard to tell if you was in a depression as it was to know if you was hungry, and to require the President of the United States to get on the radio and let us in on whether we was in one or not would be about like him tellin' a Eskimo there was snow on the ground, or a man with a naggin' wife that he was married.

I guess the country's gettin soft. Why even as late as 1932, it was the hardest thing on earth to find a man who didn't know whether he was in a depression or not. Didn't none of 'em live out here and I don't think any of them lived in Littlefield.

Personally, I don't care what the experts say, we ain't in a depression.

Any time I can still find a store left that'll sell me bacon on credit, times is boom-in', and as far as I'm concerned the experts have about run out of somethin' to argue about. Now it may be true we're headin' for a depression, as it's been my observation that most boom times was followed by a depression, but we ain't got there yet and when we do it won't take the President of the United States to let us in on it. I suggest the President take up his time worryin' with Congress and the atomic bomb and leave me in charge of discoverin' when we're in the middle of a depression.

Yours faithfully, J. A.

One hundred and fifty of Texas' 254 counties have no public library and 3 1-2 million Texans are not getting adequate library service.

Almost any grass that is palatable and nutritious to cattle will make good silage if it is properly handled. In most sections of the state at the present time, there is an abundance of good grass. It should be saved and a silo filled with good silage is mighty good insurance for next winter's feeding operations.

Sanitation is the number one item in any successful fly control program. Insecticidal treatment is of little or no value unless a thorough clean-up job is done. There is no substitute for cleanliness.

When picking up broken glass, dampen a piece of cotton and tap it over the surface where the small pieces of glass are lying. The cotton will pick up the tiny particles, and there will be less danger of cutting yourself.

To prevent frayed ends on rugs, stitch across each end on the sewing machine; the stitching will not show.

A light over the sink and another over the range furnish better light and guarantee better sight.

BAYLOR TO BUILD NEW STADIUM

WACO, July 18—Special—A goal of \$500,000 has been accepted by business leaders of this city toward the \$1,500,000 cost of the new Baylor University stadium and a city-wide campaign to raise the money is taking shape rapidly.

Waco Chamber of Commerce has endorsed the local drive on behalf of the stadium. Walter G. Lacy, Jr., president of the chamber, is general state chairman of the Baylor stadium campaign.

"Waco's stake in this project is naturally largest of any city in Texas," said Lacy. "It is heartening indeed to see the enthusiasm of Waco's leading business men behind the move to provide Baylor's colorful football team an adequate and suitable home field."

Now... Chrysler Offers

1—Safer Driving! Through the years, the
most advances in safety come to you first from
Chrysler. Now there's a new advance in steering
with Chrysler's "center control" steering! Your
hands fighting a wheel are over. There's a greater
stability, easier handling, less road shock.
The leather covered foam rubber Safety-
dash, and the new "Bulls-Eye" headlight
are designed to give you extra protection.

2—Safer Design! Now the engineers
who pioneered the first all-steel car
bodies have developed a still safer body
and frame design—23% more rigid.
You have full control of your automatic
gear shifting car. With Prestomatic
Fluid Drive Transmission, the Safety
Clutch enables you to take over in
emergencies, select the gear you need.

3—Safer Vision! When Chrysler engineers
introduced the first 4-wheel hydraulic brakes 25
years ago—they brought to the automobile indus-
try a new idea. It is the idea of car design that
begins with safety, then builds beauty, comfort,
performance! You can't possibly appreciate the
difference until you drive this car. Find out how
much more confident you feel in this Chrysler
with its mighty High Compression Spitfire engine.

Last of 11 Cook Children Graduate from Tech College

LUBBOCK—Since the opening of Texas Technological College in 1925, O. R. Cook, Post farmer and rancher has been sending his children here. Only during one summer session in the history of the college has there failed to be a Cook on the campus. Josh, the last in the line of 11 Cook children, completed her physical education work last week and will receive her degree in the August commencement.

O. R. Cook is a brother of C. L. Cook of Littlefield.

The first two Cook children received degrees in Tech's first grad-

uation class, majoring in agriculture and home economics respectively.

Gordon, next in line, received a BBA degree, but now practices dentistry. Adrian studied pre-med, but now farms near Roswell, N. M. Paul and James, following in their father's footsteps, studied agriculture, but their hopes were cut short by the recent war and both were killed in action.

O. R. Jr., majored in agriculture also. Kathryn and Johnnie both majored in home economics. In order not to let the boys outdo them, the two girls, ranked as lieutenants, serving as naval inspectors during the war. Eight of the children were in the service at the same time and six were overseas at once.

Mrs. Cook, not to go without recognition, was elected allstate mother of 1948 and was one of the twelve national mothers in a contest sponsored by the Saturday Evening Post

Congratulations To

That Nagging Backache

May Warn of Disordered Kidney Action

Modern life with its hurry and worry, irregular habits, improper eating and drinking—its lack of exposure and infection—throws heavy strain on the work of the kidneys. They are apt to become over-taxed and fail to filter excess acid and other impurities from the life-giving blood.

You may suffer nagging backache, headache, dizziness, getting up nights, leg pains, swelling—feel constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

Try Doan's Pills. Doan's help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!

BEAUTY — IN THE MAKING . . . This awkward, ill-graced baby filly gives no indications of the sleek, graceful beauty which will be hers when she comes to full equine estate. However, within herself and her food and shelter are combined all the factors that make for beautiful horseflesh. Here she munches grass in a New York race-horse-farm meadow, her ears now attuned only to the normal noises.

For Greater Fraternity

Woodcraft's semi-military Uniform Rank companies and degree teams do much to promote fraternalism.

At many adult and Boys of Woodcraft encampments this summer, scores of these companies will practice to achieve perfection in color drills and ritualistic ceremonies.

Membership in the Uniform Rank with its interesting, healthful activities and fellowship is one of many benefits Woodmen receive. Ask the local Woodmen representative to explain the protection and fraternal pleasures you can enjoy as a Woodman.

Hail Damages 1000 Acres of Cotton West of Olton

Thunderstorms roamed far and wide over the South Plains Friday, dropping hail that wiped out an estimated 1000 acres of cotton west of Olton, deluging Hale Center and Olton with near two-inch rains, and dumping showers over other scattered points.

Littlefield received no moisture, but a good shower fell here Saturday evening.

Hail which stripped cotton between Olton and Springlake Friday, came with an estimated one-inch rain in that area between 2:40 and 3:40 p. m. Heaviest damage was reported by Leslie Kennedy and John Adams, farmers in the area, and on the George and Brown farms.

The same thunderstorm dumped an estimated two inches of rain on Olton within an hour, accompanied by heavy thunder, lightning and strong winds. Water flooded Olton streets and helped to fill lakes in the area. The storm area apparently was small, although water temporarily covered roads in the vicinity.

A second rain hit Olton at 9 p. m., but it was smaller and more tame, although heavy rains were again reported west of there. Several electrical lines were reported down after being hit by lightning.

A strip one mile wide and 6 to 8 miles long was the hardest hit with losses ranging from 40 to 100 percent. Among the farmers suffering losses were T. G. Butler, G. H. Estoth and R. M. Stevenson.

Hale Center tried to soak up 1.90 inches of rain in less than 30 minutes, but the lack of storm sewers produced a flooded business district. Water went over the curb, flooding

Should there be no work available these choppers will return to the valley for cotton picking.
