

Nearly All Buyers And Sellers Of Merchandise Or Service Are Reported Covered By New OPS Regulations

Smoldering West Texas business... date concerning the... program of the Office of... Stabilization. C. J. Taylor, price executive, said that... buyer and seller of goods or... with "very few excep... is covered by regulations... by OPS. Taylor heads the... division of the Lubbock dis... which includes merchant-... County.

from the general freeze. "There are certain records which every business must keep" Taylor said, "so that they are available to OPS representatives; and there are filings which many should make with their district office." The district office for merchants of this town and county is in the Broadway Building, 1202 Texas Avenue, Lubbock, Tex. "By May 14," the price executive continued, "retail grocery stores should be in full compliance with the regulations. They are covered, in the main, by Regulations 15 and 16. They should have already filed with the district office OPS form 5 placing them in a certain cate-

gory based on 1950 gross sales volume. Full compliance should begin Monday, May 14. Grocery stores operate under a tailored margin-type price program." Restaurants, cafes, soda fountains and other eating and drinking establishments should have already filed with the District office their base period food costs per dollar of sales, Taylor explained. Their deadline, too, was April 30. Briefly, the eating establishments are, by regulation 11, obligated to keep their food costs in proportion to their total sales. Another large segment of business, large and small, comes under the tailored, margin-type Ceiling

Price Regulation 7 and its amendments. The regulation governs firms handling so-called consumer goods, including soft goods and durables. "Department stores, variety stores, all kinds of wearing apparel firms, and furniture stores are among the operations falling under CPR 7," Taylor pointed out. There are record requirements for this type firm to maintain, and they, too, have a filing to do with the district office. The regulation requires that retailers of these type goods file pricing charts by categories with the district office. However, the deadline for filing these charts has been extended to

May 30. The former deadline, which no longer holds, was April 30. Ceiling Price Regulation 13 sets out the pricing procedures for gasoline service stations and retailers of petroleum products. New and used car dealers have definite pricing patterns, too. Questions concerning all pricing regulations, records keeping, and filing procedures should be directed to the pricing division of the district OPS office if they cannot be answered by local chambers of commerce. Adequate supplies of applicable regulations also are available from the district office and will be mailed on request to those desiring them.

Tons of Feed at Sudan Livestock Feeding Plant Damaged By Fire

Smoldering fire in 150 tons of feed at the Sudan Livestock Feeding Company, about one mile east of Sudan, was discovered Tuesday morning of last week by night watchman Alvin Company employee. The fire, which brought Sudan Volunteer Fireman out of their beds at approximately 5:30 a. m. did little damage to the building but an unestimated amount of the feed will be lost with a large part being lost because of water damage. Trucks from Amherst and others were summoned to help in the smoldering blaze which Fireman had difficulty in extinguishing. Billows of smoke were coming from the building and it was difficult to locate the blaze. Fireman reported that had been one of the high winds

which swept the area later in the day, it would have been impossible to have saved much of the feed or structure. **Teurmen Injured** Paul Teurmen, one of the local Sudan fighters received a serious gash on his left hand when the nozzle of the hose which he and Calvin Wiseman were raising was dropped by other fireman. Several stitches were required for Teurmen's hand. A. M. MacAdams, manager of the Feeding Company said that it would be several days before the loss would be in the feed and exact damage could be determined, but that the greater part of that little damage was done to building. MacAdams expressed his sincere appreciation to the Sudan, Amherst and Earth Fire Departments for the wonderful assistance given.

May 10 Is Visitation Day At Olton Schools

May 10 in the Olton schools is visitation day for children who will be six years old by September 1, 1951 and who will enter school for the first time. Please have them at the Primary School building by 9:00 and come after them at 1:00. Also, arrange for their lunch at the lunch room. Children will not be assigned to rooms until September 1. Children who are now enrolled in the first grade will not come to school May 10. We will need the following information: a list of the contagious diseases the child has had; a list of vaccinations the child has had; mother's full name, father's full name; where you were living on April 1, 1951; and be sure to bring the child's birth certificate.

PLANS UNDER WAY FOR PAINTING POSTOFFICE

As announced by Postmaster, W. D. T. Storey, plans are under way for the painting of the Postoffice building, and bids are being taken from those desiring to place a bid on this work. These bids, according to Postmaster Storey, should be in writing and sealed, and all specifications must be returned to the Chief of Engineering Division, General Services Administration, 1114 Commerce Street, Dallas, 2, Texas. Mr. Storey stated this is a complete new job of repainting the postoffice and that the bids will be opened in Dallas on May 15, according to information received by him. **Whitharral Sixth Grade Enjoy Skating Party** Sponsored by their teacher and parents the Whitharral Sixth Grade children's skating party at Littlefield recently turned out a big success. Eats at the Star Cafe concluded an evening of fun and sport for the group. Miss Sue Blackburn is teacher of the class and the following parents took part in sponsorship: Mr. and Mrs. N. B. Embrey, Mr. and Mrs. J. E. Gravit, Mr. and Mrs. W. C. Tipton and Mesdames R. L. Heard, E. L. Bryant, D. H. Montgomery and J. E. Phillips.

RECENT BIRTHS

Births at Littlefield Hospital reported the past ten days are as follows: A son, Rufus Wade was born April 15th, to Mr. and Mrs. Wade Polk. He weighed seven pounds,

10 ounces. He is their third child and first son. Mrs. Polk is the former Miss Erlene Smith. Mr. and Mrs. Glen Gaston are parents of a daughter Tommy Ann, born April 16, weighing six pounds 14 ounces. A daughter Karla Lorraine was born April 16, weighing 7 pounds to Mr. and Mrs. Guy Kennedy. Ruth Ann was born April 17, to Mr. and Mrs. Omer John Rogers. She weighed 7 pounds, 8 ounces.

Mr. and Mrs. Lewis Thomas of Morton are the parents of a daughter, Bonnie Lou born April 21. She weighed 7 pounds 8 ounces. Mr. and Mrs. Cecil Harp are the parents of a daughter, born April 28. She weighed 5 pounds, 7 ounces. She is their second child. They have another daughter Sharron Kim age 20 months. Some Koreans call an helicopter an "infuriated palm tree."

INVITATION

TO FOOD FRESHNESS

Food looks and tastes fresh in a modern electric refrigerator. Vegetables stay crisp . . . make salads things of delight. Nourishing milk takes on added value because its coolness tastes oh-so-good. The modern electric refrigerator is a thing of beauty, too . . . fits into any kitchen decorative scheme. There's many makes and models . . . one to fit your kitchen budget.

"I got the story on
50,000 Miles-No Wear
and changed to New Conoco Super Motor Oil"

says Arnold B. Bangerter, Jr.
Owner, Radio Cab Company
Salt Lake City, Utah

"Since I changed my 14 cabs over to Conoco Super, I've cut oil consumption almost 50 per cent. With at least 85,000 miles on each, there's no sign of needing new engines yet!"

"50,000 Miles-No Wear!" Proved Here:

After a 50,000-mile road test, with proper crankcase drains and regular care, engines lubricated with new Conoco Super Motor Oil showed no wear of any consequence; in fact, an average of less than one one-thousandth inch on cylinders and crankshafts. AND gasoline mileage for the last 5,000 miles was actually 99.77% as good as for the first 5,000! This test proved that Conoco Super can keep your new car new.

NEW CAR DEALER

"It's a pleasure to have satisfied customers, thanks to Conoco Super," says Walt Winters, Chrysler-Plymouth Dealer, Westside, Iowa. "My customers depend on my judgment about the oil to use in their cars, and Conoco Super is the one I recommend."

TRAVELING SALESMAN

"When I purchased my new Pontiac, I put in Conoco Super," says Melvin L. Beyer, Traveling Salesman, Pampa, Texas. "I average about 4,000 miles a month and Conoco Super has given me the best of service—even helped to increase the miles per gallon of gasoline."

Soil Judging A Teaching Aid

Soil judging was brought into demonstrational teaching of the soil and water conservation specialist of the Texas A and M College Extension Service in 1938. Non-traditional teaching practices which have long proved effective against waste and exhaustion of soils of Texas farms and rangelands also was pursued systematically, the Extension specialist assisted the State Soil Conservation Board in establishing six new soil conservation districts and eight annexations.

The specialist, F. G. Harper, characterizes the introduction of soil judging "an achievement" which should stimulate "getting soil and water conservation practices on the ground." Judging was conducted in the form of contests in six counties and at College Station during the year. Determinations then are made of texture, permeability and depth of the soil and the slope, degree of wind and water erosion, drainage and land capability class of the field. At the same time, recommended

treatments for stabilizing, rebuilding and increasing the productivity of the soil are determined.

In order to bring soil judging into the widest and most flexible use, county agricultural agents and representatives of other agencies are being trained to conduct schools. The specialist quotes the "consensus" of those who went through the schools that soil judging "is the greatest teaching device employed in soil and water conservation, and that persons who participate will be inclined to carry out conservation practices on their lands."

Field reports show that conservation work was conducted in 3,451 communities over the state, and 2,632 voluntary local leaders or committeemen assisted. Meanwhile, 6,358 farmers were assigned in work based on definite farm conservation plans; 6,378 in constructing terraces, 6,882 in contour farming of cropland, and 4,600 in grassing waterways or otherwise preventing or controlling gullies.

"Official Dog" For State Suggested

Should Texas have an official state dog? If so, what breed of dog should it be?

These questions have come to the fore as the result of a proposal made by the Texas Dog Research Center, New York, that dogs be recognized officially by each of the states because of the confidence of faithful owners they have given as mankind's closest animal companion.

In formulating this plan, the Center is urging the public of this state to write to their legislators asking them to take action now on making an official state dog. Such letters should give the writer's choice for a particular breed.

To prevent the possibility of two or more states selecting the same breed of dog for official designation, the Gaines Dog Research Center is setting up a research house for such data by maintaining an up-to-date list of the breeds of dogs which the other 49 states may have adopted or are considering.

Harry Miller, director of the Center, points out that practically every state in the Union has its official flower, bird, song, insect, etc., and he sees no reason why "man's best friend" should not be similarly honored. Adoption of an official state dog can be accomplished either by action of the Legislature, by a proclamation of the governor, or by popular vote.

Socialism No Place In Public Health

Socialization has no place in either public health or the private practice of medicine, State Health Officer George Cox has said in a statement aligning himself with the medical profession against socialized medicine.

Public health is a separate, distinct field from private medicine, Dr. Cox said. Both professions have their separate objectives, and distinctive methods of accomplishing them.

He declared public health's objectives to be:

1. Public education as to how to avoid disease by such means as vaccination against smallpox and typhoid fever and immunization against diphtheria.
2. Investigation of disease outbreaks.
3. Quarantine and isolation of communicable disease cases, thus preventing its spread.
4. Inspection of water supplies, and control over the safe production and sale of milk, drugs and food products.

"But," the health officer added, "people get sick

and accidents happen, and the job of curing and patching up is the business of the private practitioner of medicine—the family doctor and the specialist."

Doctors in private practice advocate public health principals when they urge mothers to have children protected against diphtheria and smallpox, and public health officials "need their help in the vital work of maintaining a high level of well being of all Texans," Dr. Cox asserted.

"We aren't in competition with doctors in private practice. Public health people deplore the idea of socialized medicine as unworkable, cumbersome, and totally inefficient.

"There is no place on earth that has a better system of medical administration than the United States. Private doctors deserve the credit.

"And there is no place on earth with a higher standard of public health. Public health people deserve credit for that," the doctor concluded emphatically.

Colorful Attempt to Raise Dead Flops

RANGOON—(AP)—An Indian fakir (holy man) plunged a dagger repeatedly into his body without ill-effects to prove he was no fake after failing to raise a man from the dead. The attempt to bring the dead to life was made at Pegu, 50 miles from here, when snake charmer Maung Tin was bitten fatally by one of his performing cobras.

It took place in a weird after dusk ceremony at the Pegu cemetery after local officials permitted exhumation of the body. Flames of kerosene torches lit the graveyard and the dead snake charmer was lifted from his coffin. The fakir produced herbs from his voluminous robes and brewed a foul-smelling concoction.

Then he slowly circled the body muttering incantations. Suddenly he threw himself flat upon the dead man and blew into his nostrils. Mumbling guttural prayers, he forced open the snake charmer's mouth and poured the mixture down his throat. More than 200 people tensed as the fakir commanded the dead to rise.

Nothing happened.

rickest period of the measles. After the whole body is broken out, the fever and the sickness set up until they both fade out.

In all, measles runs about a 14-day course and one case is supposed to make you immune though it evidently doesn't always do so.

The German measles is the three-day variety and is much less serious than the 14-day brand as far as possible complications are concerned. It would seem that the three-day measles is just a minor disease were it not for the evidence that it can harm an expected baby when the mother catches the disease during the first three months of pregnancy.

Because of that one possibility of disaster with German measles, doctors firmly state that all girls should have the German measles before they reach the age of child-bearing. One case of German measles nearly always keeps you from getting it again; so it is one disease from which it is best not to shield a healthy little girl.

Health Talks

Prepared by the State Medical Association of Texas

"I guess I've got a virus" seems to be the by-word these days for any degree of ailment from an intestinal upset to complete prostration. Your guess on viruses isn't as good as your doctor's, where viruses are concerned, he does sometimes have to guess but he knows more about what he's guessing at, even as elusive as viruses are.

These viruses that seem to be pinned down aren't guessing matter, however. The virus that causes dengue fever is carried by mosquitoes in warm climates and can be traced in its spread. The mosquito picks it up by biting someone who is going through the first three days of the fever; eight days later the mosquito is capable of injecting the dengue fever virus into whomever he bites.

Dengue fever is also known as breakbone fever, which term aptly describes the aching muscles and feeling of breaking bones when you have it. The germ incubates after the mosquito bite for three to 12 days before those bad aches start up along with headaches and eye pains. You do feel very sick and you usually need no encouragement to go to bed, particularly since the fever may shoot up as high as 106 degrees and you break out with a rash over the neck, shoulders, face and body.

If you don't go to bed at that point, one of the peculiarities of the disease is the stiff, rigid walk you affect like putting on a cast; in fact, that has led to one of the popular names of the disease, dandy fever, walking like a dandy. After that first bout of fever suddenly drops, you may feel somewhat better until five or six days later when the fever shoots up again and the rash breaks out this time on the hands, arms, and legs.

About the only good thing that can be said for dengue fever is that even as bad as the disease makes you feel and as long as it takes to get to feeling good again after the disease is over, dengue

fever seldom ever leads to the development of some other disease, some complication.

Now the flu is entirely different. It can get awfully complicated. Everything about the flu is complicated, in fact. If all the viruses got together and conducted a roll on which one of their numbers is the one most likely to succeed in creating disturbances in human beings, there's no doubt that the flu would win by many noses.

The flu isn't just one brand of disease but many different kinds, some of which are known and some of which aren't. It can change itself into all kinds of different manifestations, all of which are guaranteed to make you sick.

Bedrest and liquids to drink should be the first actions when you think you've got the flu. For the headache that may accompany the flu, the cough that's frequently a part of the picture, and the general feeling of meanness that's nearly always present, your doctor can prescribe medications that will make you more comfortable and easier to get along with until the virus runs its course.

Without rest in bed you are running a risk of complications with the flu, not to mention the fact that you are spreading it to others.

The measles is also one of the "to bed, to bed" virus diseases because of the danger of complications. The real measles, known as the 14-day variety, opens the way to other infections because it lowers the resistance of the body.

Measles spreads fast. The virus is coughed around and about 10 days later the symptoms of a cold start up, followed in a day or two by white spots surrounded by red rings along the inside of the cheeks next to the jaw teeth.

There's usually fever and hurting eyes about that time, both of which get worse until in three or four more days the eruption breaks out. The eruption starts around the head, there at the hairline and behind the ears, and then moves down the body. That's the

Death Claims Mrs. Pearl Franks, Sudan Pioneer

Word has been received of the death of Mrs. Pearl Franks on April 9 in Wichita Falls, Texas, as a result of a stroke which she suffered on February 3.

Mrs. Franks and her family were pioneers of Sudan. At one time they published the local newspaper. They moved from Sudan in 1932.

Mrs. Franks was a charter member of the Methodist Church in Sudan and was active in her church work, serving as president of the missionary society for several terms.

Burial services were held in Duncan, Oklahoma. She is survived by a son, Fisher Franks of Duncan, Oklahoma and Mrs. Eva Jones of Lubbock.

Cathey Resigns As Sudan School Principal

Rodney Cathey submitted his resignation Tuesday as principal of the Sudan grade school, according to an announcement released by A. Dooley, superintendent of the Sudan schools.

In making the announcement, Mr. Dooley expressed his regrets at losing Mr. Cathey, as he is a very capable man, said Dooley.

Mr. Cathey will leave his post at the end of the school term and will work on his Doctor's degree at the University of Texas.

When Nasty Colds Leave You WEAK AND RUNDOWN HADACOL CAN HELP

If Your System Lacks Vitamins B₁, B₂, Niacin and Iron, Which HADACOL Contains

When a nasty cold leaves you in a weakened and run-down condition, HADACOL can help build you up if your system is lacking in Vitamins B₁, B₂, Niacin and Iron, important elements contained in HADACOL. Many folks have found that this fine family formula helps overcome these deficiencies and soon they feel good.

Mrs. A. Jimenez, 141 East 25th St., Port Arthur, Texas, gave HADACOL to her young son, Floyd, after he had recovered from a bad cold when she heard how HADACOL was helping folks suffering from deficiencies of Vitamins B₁, B₂, Niacin and Iron. It helped him so much in regaining his strength and energy that Mrs. Jimenez says she is always going to have HADACOL on hand for Floyd.

Here is Mrs. Jimenez's statement: "My son Floyd was very subject to colds. He's eleven years old, and he was run-down, didn't seem to have an appetite at all, and just simply lacked energy. I heard about HADACOL on the radio, and it was about this time that Floyd was just recovering from a siege of a bad cold. He was very run-down, lacked an appetite, and I started giving him HADACOL. After about a bottle and a half I could notice an improvement. His appetite picked up and he had increased strength. I think HADACOL has done wonders for Floyd, and can't praise it enough. I have continued to give him HADACOL and intend to always have it on hand for Floyd."

Men, women and children of all ages are praising HADACOL for supplying Vitamins B₁, B₂, Niacin and Iron which their systems need. Don't let that "After-Cold Run-down Feeling" drag you down—HADACOL can help you, too, if you suffer such deficiencies. Sold on a strict money-back guarantee. You'll feel great after the first few bottles you take or your money back. Trial size, \$1.25; family economy size, \$3.50.

Who said You can't Afford a Fine Car?

WHEN you look at everything a ROADMASTER has to offer, it's natural to conclude that it's priced with the rest of the fine-car field.

Sweeping proudly past you, it has a distinction that few cars can equal.

Stepping nimbly away from a stop light, it has the willing surge of power that the very exclusive combination of a 152-horsepower Fireball engine and Dynaflo Drive* delivers.

It rides the road with majestic smoothness, and comes to a smooth and gentle halt, in response to the finest brakes that Buick engineers ever developed.

Inside, it has spacious room, from side to side and front to back and seat to roof—plus a softness of cushions and a richness of fabrics which bespeak the custom standards to which it is built.

All you could want in a fine car is here in abundance.

But don't let that mislead you into deciding "it's too rich for me."

If you've looked into 1951 car prices generally, you'll discover this: You can own a ROADMASTER for just a shade more than an ordinary car will cost—and for several hundred dollars less than the price tags usually found in "the fine-car field."

Why not look into this today?

Equipment, accessories, trim and models are subject to change without notice.

Mr. and Mrs. E. C. Miller were Sunday dinner guests of Mr. and Mrs. Cliff Hoover and family.

SHALLOWATER GUESTS

Mr. and Mrs. A. A. Greer of Shallowater spent Sunday visiting with her parents, Mr. and Mrs. J. A. Greer.

SUNDAY VISITORS

Jimmie Mouser spent Sunday evening visiting in the home of Ray Charles Dodson.

TRAIN RIDE

Friday several of the students in grade school went to Shallowater and rode a train from there to Littlefield. Some of the mothers accompanied the children.

VISIT IN LITTLEFIELD

Joe Don Nix spent the weekend visiting with Delbert Timmons in Littlefield.

SOLDIERS HOME

Leroy Wallace stationed at Fort Sill, Oklahoma and Gwyn Beard of Sheppard Field Air Base and Bennon Napier stationed at Fort Hood visited their parents over the weekend.

Pfc. Z. T. Byers Is Stationed At Denver

Pfc. Z. T. Byers, son of Mr. and Mrs. Roy Byers, E. 4th Street, visited his parents here two days last week enroute to Denver enroute, where he will be stationed at Lowery Field, for a 16 weeks, where he will take a clerk-typist course. Upon completion of the course he will get a 32 day furlough and then report back to Selma, Alabama, where he will be stationed.

Pfc. Byers entered the Air Force January 2 and received basic training at San Antonio.

Gail Borden Scholarship Is Established

The University of Texas has established a Gail Borden Scholarship in Journalism. A \$200 scholarship will be given annually to the University's highest-ranking journalism student.

The Borden Company Foundation, Inc., was up the award in remembrance of Gail Borden, influential early Texas writer and publisher who founded the Borden Company.

The first recipient will be selected this summer and will be given the award for his or her senior year. The award will go to

the journalism student who achieves the highest grades in his first three years of college work. Each student honored by a Gail Borden scholarship will have his name placed on a metal plaque, to be displayed in the Journalism Building.

Gail Borden founded the Telegraph and Texas Register, the first Texas newspaper to achieve stability, at San Felipe de Austin in 1835. The newspaper was also published in three other Texas communities—Harrisburg, Columbia, and Houston—and was the first newspaper in all three.

Borden was also an inventor. He experimented with milk condensation and in 1856 established his famous Borden Company.

If a living body were above 55,000 feet altitude and protection, the water vapor would boil.

Division Plants Complete Without Fatality

In a comparison of 100 local plants made by the Detroit Industrial Safety Council, the average severity rate for 1950 was found to be .485 and the frequency rate 6.35. Thus the Chrysler plants were nearly four times as good in severity and more than five times as good in frequency as the average. And in this group of 100 plants were some that worked as few as 33,000 man-hours in the year, as against over 32,000,000 for Chrysler. The plants surveyed were divided into two groups of plus or minus 1,000 employees. The Kercheval plant led the group of those with more than 1,000 on the payroll in the excellence of both its frequency and severity figures.

In figuring frequency, the total number of injuries is multiplied by 1,000,000 and divided by the number of hours of employee exposure. To determine severity, the formula is to multiply the number of days lost by 1,000 and divide by the number of hours of employee exposure. Statistics on industrial accidents are compiled by the American Standards Association method, a uniform system that permits a fair comparison of one plant, or a group of plants under one management, with all others.

Miss Mary Eva Roe, daughter of Mrs. C. L. Campbell of Anton was named as the Anton Lions club's queen candidate for the district 27-1 Lions convention at Hereford, April 29 to May 1. She is a graduate of Texas Tech and was a member of the Las Chaparritas social club there. Miss Roe is now a member of the Anton teacher's staff.

Miss Mary Eva Roe Named Anton Lions Queen Candidate

Figures for all industries combined and for the automotive industry alone in 1949, the last year for which complete returns are available, emphasize Chrysler's record. The frequency rate for that year for all industries was 10.14 and the severity rate was 1.020. The automotive industry had a much better record than all industries, with a severity of .570 and a frequency of 6.35.

Revival Meeting Is Underway At First Church of God

A revival is underway at the First Church of God, 909 East Eight Street, Littlefield, which opened Monday night and will continue for two weeks, with Rev. R. Heatherington of Big Spring doing the preaching. Services are being held each evening at 7:30 o'clock. The public are cordially invited.

ON THE LOSING SIDE

LITTLE ROCK, Ark.—(AP)—The Southern Association record for consecutive defeats was broken in 1950 when Little Rock lost 21 straight games. The former league mark of 20 losses on a row was held by Mobile which compiled that record in 1917. The Little Rock nine lost 24 of its first 25 games last season.

PARENTS OF A DAUGHTER

Mr. and Mrs. Charley Vidar of Anton are the parents of a girl born to them at Payne-Shotwell Foundation Saturday afternoon, April 23. She has been named Nelda Elonne. She weighed six pounds six ounces and is their second child, both daughters.

Attends Funeral Services For Tech Student

Mr. and Mrs. R. T. Roden of Littlefield, accompanied by Mr. and Mrs. Gilbert Boatman, attended the funeral services at Shallowater Monday afternoon for Clayton J. McMillan, 24 year old Tech student, who was killed instantly when struck by an automobile as he was reportedly walking east on the Idalou highway about 4 miles east of Lubbock about 2 a. m. Sunday.

McMillan was a cousin of Mrs. Roden. Funeral services were conducted at the Methodist Church, Shallowater, at 2:30 p. m. Monday, with Rev. W. C. Hinds of Abilene officiating, assisted by Dr. J. O. Haynes and Rev. L. N. Lipscomb.

Anne Birdsong to Be in Stock Theater Production

Dr. and Mrs. Birdsong has received word that their daughter, Ann, who attends Stephens College in Columbia, Missouri, has been chosen along with nine other girls to star in Stephens this summer and be in summer stock theater productions.

SUSTAINS BROKEN LEG

J. D. Gipson, 9-year-old son of Mr. and Mrs. Charlie Gipson of Whitharral sustained a broken leg just below the hip Sunday afternoon while playing on a dump near the Farmer's Co-op gin. He is in the Payne-Shotwell Foundation at Littlefield.

of Lubbock. Burial took place in Tech Memorial park.

* A COUPON WITH EVERY POUND THE WHOLE YEAR 'ROUND

tion of Farms Materially eed For Manuel Labor

moved into the 20th Century clearly defined Extension Division, mechanization mounted to reduce labor in preparing staple small grains

by headquarters and field personnel of the A. and M. College Extension Service. Cotton was an outstanding example of cooperation between grower and Extension. In a season of unfavorable weather which increased insect infestation and made control difficult, the yield averaged 205 pounds of lint an acre, or 35 pounds more than the previous 10 year average. This result was obtained through systematic promotion of the national Seven-Step Cotton Program by Extension county agricultural agents and the cotton work specialist together with application of a record amount of insecticide to five and a quarter million acres of growing cotton. Insect and parasite control directed by the Extension Service saved Texas farmers and ranchmen an estimated \$10,000,000 in 1950.

Trends create changes, but around the farm home there is a basic routine which occupies the hands and affects household expenditures. Since there is a hard and an easy way to do housework, the Extension headquarters home economic specialists and county home demonstration agents trained approximately 2,500 adult women and girls as leaders in demonstrating methods of work simplifications. In turn these leaders trained more than 29,000 club women in simpler ways of making a bed, washing dishes, laundering, ironing and other home duties.

Meanwhile, home economic specialists trained other groups in sewing arts, and aided still others in home landscaping and producing home gardens. As a consequence of this help rural women made thousands of adult dresses and children's garments, representing a money saving of more than \$16,000 over retail costs.

In summarizing, Gibson says life for Texas rural families was more complete in 1950 than in any preceding year. Since more than 80 per cent of the occupied farms now have central station electric service, families have the benefits of conveniences and equipment which were very distant a decade ago.

MELLOW WITH AGE

SAN ANTONIO, Tex.—At the age of 67 and after more than a half century on the links, Mrs. Edna Lapham is seeking another Women's Texas Golf Association championship.

She plays in the senior division and will be defending champion in that class May 21-26 at Lubbock.

One thing she likes about playing in the senior division is that she finds out how many of her friends admit to 50 years or more. Those under 50 must play in the regular championship class.

Mrs. Lapham has lost count of the exact number of times she has played in the women's tournament and isn't sure whether she has won five or six state titles. But she knows she won her first in 1916 and her last in 1928.

During her 53 years of golf, Mrs. Lapham has seen the game develop from something only for the country club set to a sport for everybody. And she figures the game is 10 strokes better than when she entered state championship play.

Mrs. Lapham still plays in the 18-hole flights at the San Antonio Country Club and her scores average in the middle 80s. Her only concession to age is the use of one of those "Arthritis Special" scooters used to carry her around the

INTRODUCTION—Sharkey, the seal, wanted to be pals, but Freddie and Ernie Zink, 3-year-old identical twins, took a dim view of the introduction. When Sharkey reached out a cordial flipper, both tots recoiled in terror. The boys met Sharkey at a sportsman's show in Dallas. (AP Photo)

ANNOUNCING— SHAMROCK'S GREAT NEW Triple-Action HI-OCTANE GASOLINES

3 WAYS BETTER!

So Fast... So Smooth... So Powerful!

Now Shamrock brings you new, improved, higher octane gasolines with TRIPLE-ACTION qualities that set new standards for performance.

These super gasolines give you not just one or two, but ALL THREE of the important things you want in a motor fuel: high potency for fast warm-up... clean burning for smooth, quiet operation... and dynamic power at the touch of your accelerator!

Such outstanding performance qualities are possible because of engineering advancements at the Shamrock refinery pictured below. Three new refining processes now provide an abundance of high-octane stocks for blending gasolines that are ideal for today's high-compression motors as well as older model cars.

Accept your Shamrock dealer's invitation to stop in today for a thrilling, new driving experience. See for yourself how Shamrock's new TRIPLE-ACTION Hi-Octane gasolines are three ways better!

Get New TRIPLE-ACTION Performance with

- SHAMROCK TRAIL MASTER (REGULAR GASOLINE)
- SHAMROCK CLOUD MASTER (ETHYL GASOLINE)

THE SHAMROCK OIL AND GAS CORPORATION
AMARILLO, TEXAS

Shamrock's vast refinery expansion program just completed includes a Cat Cracker (left), a Polymerization Unit (center), and a Cyclization Unit (right). Shamrock now has all three of these important facilities for making high-octane gasolines.

Health Talks

BY STATE MEDICAL ASSN.

Many of the virus diseases seem to be "city slickers" creating epidemics in heavily-populated areas and spreading slowly if at all in rural communities. Sometimes that is good and sometimes it isn't; it wasn't good during the last war when so many young men from small towns and farming country got the mumps because they had never been exposed to them before.

The mumps, like most of the childhood diseases, usually are a minor affair in healthy children. In adults, however, they become more serious and created a lot of suffering among the servicemen in camps during World War II.

The mumps cause a swelling in those gland that feed the saliva to the mouth, mainly those parotid glands right in front of the ear. Anything that makes the mouth water causes more congestion in those sore glands and any movement of the jaws seems to make them hurt worse. It's more of a hurting disease than a real sick disease in children; but in adults when it spreads to the sex organs it is a real sickness in addition to a lot of pain from the swelling.

You need rest in bed with the

mumps and lots of liquids to drink. Hot or cold packs to the swollen areas will make the pain seem less; sometimes hot packs do the trick and sometimes cold packs seem to give most relief.

One case of mumps, even if only on one side, usually makes you immune to the disease. There are other diseases of the salivary glands that may cause swelling quite similar to mumps; sometimes people who think they are getting the mumps a second time may be mistaking another kind of swelling of those glands for the mumps.

Poliovirus is another virus disease that seems to attack more often in cities than in country areas. How polio spreads and how you can develop immunity to it are two of the biggest research problems under study now.

Much has been learned about polio from such research studies in the past. It is now known that many people get polio without even knowing they have it. Since there are different kinds of polio, however getting one kind doesn't mean you are immune to polio.

Polio is considered as contagious as the measles, but it doesn't show up as definitely as a sickness like the measles does. Many people may have an upset stomach or a passing illness of some sort without realizing they did have polio.

Others become ill enough with the disease that it is recognized,

but they have no crippling effects. Those who become crippled are a small percentage of the total number of persons who do get the disease, knowingly or unknowingly during an outbreak.

There are two main types of polio, called spinal and bulbar. The bulbar kind affects the breathing and swallowing system largely and is the cause of nearly all deaths from polio. Bulbar polio rarely causes crippling, however. The spinal type of polio is the crippling kind and rarely causes death; this kind is much more common than the bulbar type.

Many sources of spread of the polio germs are suspected but no one definite thing has been established as the cause. Poliovirus, however, another serious virus disease is known to spread from birds and can spread to persons who breathe the virus into the lungs. It is believed that one person can give the germ to another, also, so that isolation of a person suffering from the disease must be part of the treatment.

Poliovirus is very much like virus pneumonia, also called primary atypical pneumonia. In fact, laboratory tests are frequently necessary to tell the difference between the two diseases, they have so much the same effect upon you.

A virus is known to cause poliovirus but the virus is a strong suspect in atypical pneumonia. It is called atypical because the "X" stands for "not", meaning it is not the typical pneumonia. Your chest makes funny sounds in the doctor's stethoscope when you have lobar pneumonia but with atypical pneumonia the sounds are pretty normal. It takes X-ray pictures usually to tell for sure whether or not the sickness you feel is atypical pneumonia.

Though poliovirus and atypical pneumonia may frequently make you feel about the same way, there is a big difference in the diseases. Atypical pneumonia rarely causes death while poliovirus may be fatal, especially in those over 40 years of age.

The symptoms of both these diseases are just about the same symptoms of general sickness that a great many other illnesses have. They both make you sick enough for you to want to call the doctor and by tests he can tell the difference in the diseases and treat them accordingly.

Alvin Crews New President of Anton Lions Club

The Anton Lions Club went into the election of club officers at last week's meeting, the following being elected: Alvin Crews, president; Jerry Duffie, first vice-president; Walter Black, second vice-president; Carl Rushing, third vice-president; J. C. Fowler, secretary-treasurer (re-elected); Zede Mooner, Lab-Tanner, Howard Cuthbert, Tappewater, Donald Love and V. L. Bridges were elected as directors. K.W. Wells and Craig Darden are carry over directors.

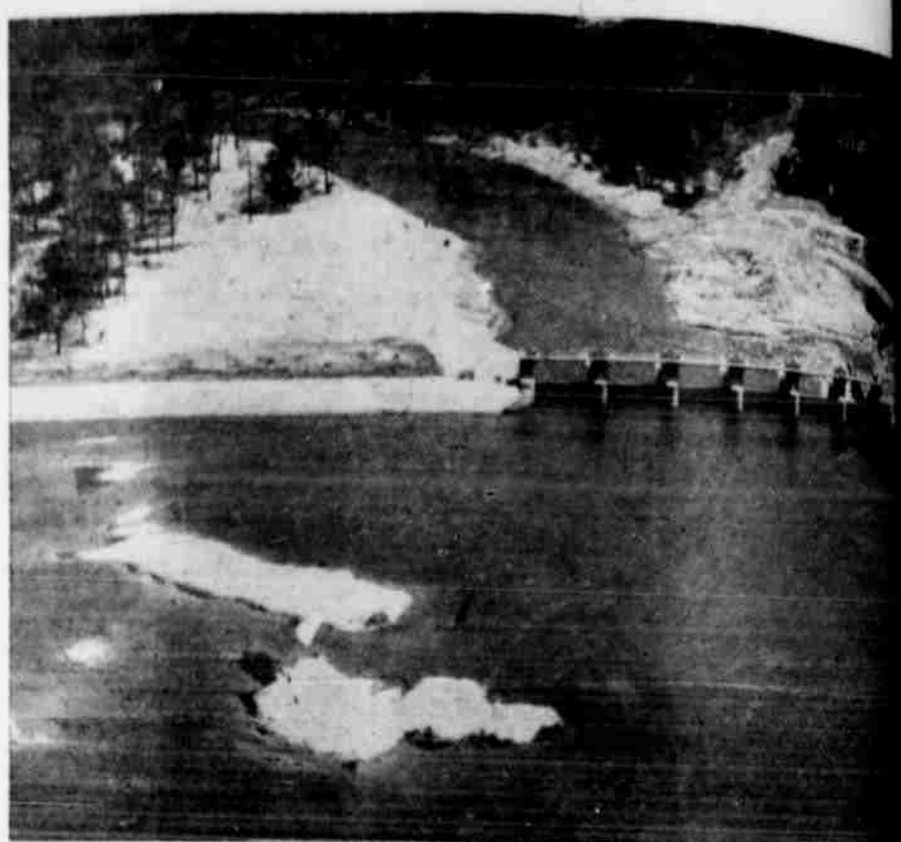

The lions are going in a bunch to the district convention at Hereford, Sunday, Monday and Tuesday.

Don Williams to Be Amherst Band Director Next Year

Announcement has been made of the re-employment of Don Williams by the Sudan School Board, as band director for next year. It is sonably sure to make sufficient project to carry on some other operations in school.

Billy Ray Cook, another F. F. A. member attended the meeting.

Several of the local Lions club members and their wives plan on attending the district Lions club convention in Hereford next week.

REFEREE'S DELIGHT

DE VER—(L)—Winger Jack Giesbrecht of the Denver Falcons in the U. S. Hockey League played 58 of his team's 64 games before a penalty was called against him.

is reported Williams has been offered several other positions, but has made definite arrangements last week to remain as instructor of hand in the Sudan schools.

TOWN BLUFF DAM—The Town Bluff dam on the Neches River 50 miles north of Beaumont will be opened officially in a public celebration (May 5). The dam impounds the largest fresh water lake in East Texas. It is 14 miles long and five miles wide. This aerial photo shows the reservoir filling behind the six-gate spillway.

(AP Photo)

HOME DESTROYED—Ivan Saldier of had the misfortune home destroyed by day afternoon. All goods were destroyed is a brother-in-law Couch.

In the 18th Century these made killing try a man.

Oak wilt, a fungus disease, has killed oak trees in 11 U. S. states.

NOTICE TO VOTERS OF SPADE INDEPENDENT SCHOOL DISTRICT

The Bond Election, which was scheduled to be held Saturday, May 5, has been postponed because consolidation petitions have been presented by Hart Camp and Spade School Districts, and a consolidation election, which will be held later, would make the bond election of no effect.

SPADE SCHOOL BOARD

Amherst FFA Lions Club Meeting

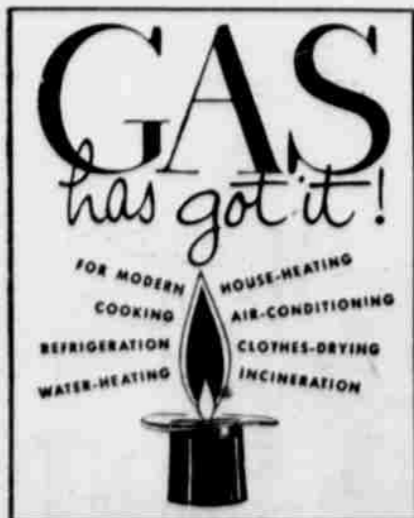

Harvie Patterson and Gary Bearden represented the Amherst Chapter of Future Farmers of America and made talks at the Lion Club meeting held at the Amherst Hotel Thursday night.

Harvey Patterson gave the introductory remarks and Gary Bearden, chapter president outlined the plan where the boys with assistance of adults could put into operation a feeding co-operative, starting with hogs and going into other livestock. Opportunity would be provided for the boys who could not have home projects and would become self-sustaining re-
