## Pair Arrives Here After 700 Mile Horseback Ride

If you don't have an automobile, can't afford bus, plane or train tickets, and still want to take that vacation, there may be a way. At any rate that seems to have been the opinion of Flavious Adkins and Fred Frerer, both 18, of Rt. 1, Joplin, Missouri, who rode horseback all the way from their native city to Littlefield. After jogging 700 miles in 35 days, never sleeping indoors, never eating a restaurant meal, the two youths arrived at the home of F. H. Hodge, Flavious' grandfather, in Littlefield.

Determined to make the entire trip in true pioneer style Flavious and Fred slept 45 nights on the ground, cooked their own meals. They cantered up to Hodge's home Thursday afternoon and swung out of the saddle, both weary but happy. Their arrival was a complete surprise for their host.

Unshaven and with more than 45 days' growth of hair the young men said women "back up the trail" had pointed to them and said, "Look! Real cowboys."

They led a packhorse which belongs to the one-year-old son of Don Hodge of Littlefield. Another friend, their dog, trotted along the entire 700 miles.

Flavious, son of Mrs. Gladys Woods, formerly of Littlefield, said they had forsaken highways and heavily-traveled roads. They stuck to the open spaces, cutting across

country, seeing it the way early pioneers first saw it.

The horses were pastured soon after their arrival. The two youths said they would stay here an indefinite number of days.

"We landed here nearly broke, of course," one of them said. They worked a few days this week in Lubbock to earn spending money for the return trip, which they said they "dreaded in a way."

Before leaving Joplin they had saved a few dollars to buy beans, bacon and other supplies on the road.

The trip so far has cost very little money, the two reported. That's not hard to believe.

Besides seeing more of the United States in one trip than most people see in their entire lives, the two young men tallied up other advantages of their kind of touring: no traffic hazards, no hotel bills and no sassy waitresses.

HIS TWENTIETH BIRTHDAY was one of the most pleasant he ever spent, thanks to a surprise party given him by relatives and friends while he lay paralyzed from the waist down in a Payne-Shotwell hospital bed. ## Listeners Express Thanks For Leader Election Party

The Leader office this week received a large number of favorable reports from persons who either attended the election party held at the newspaper office, or heard the Leader-sponsored broadcast of the returns.

The broadcast, sponsored by the newspaper for the convenience of persons who wished to learn the latest reports over their radios without having to drive all the way to town, began shortly after closing of the polls and continued until almost all boxes had been reported.

## It Pays To Advertise

In a recent issue of the Leader it was reported that information has reached this office to the effect that a dog carrying the tag Littlefield Dog Tag 99, had strayed to the home of Mrs. Russell Hulseley at Ladonia, Texas, and suggesting that anyone knowing the whereabouts of the owner, E. C. Jaco, obtain by this newspaper through

the courtesy of the City Secretary here, notify him of the whereabouts of his dog.

Soon after the Leader was distributed to its many readers, a copy of a letter by E. L. Winston of the Winston Insurance Company, Littlefield, to Mr. Jaco at his street number in Ladonia, was received by the Leader, enclosing a clipping from the Lamb County Leader, notifying Mr. Jaco of the whereabouts of his dog.

Mr. Jaco had spent several months here last fall assisting in the gathering of the cotton crop, and purchasing a car here had the Winston Insurance Company finance the transaction . . . hence the Winston Insurance Company had his address.

## Public Response Is Lagging In Jaycee Anti-Polio Campaign

Response of the public to the anti-polio campaign being sponsored by the Junior Chamber of Commerce was reported this week to be definitely lagging, and the Jaycees are going ahead with plans for a house-to-house canvass for funds. Several new cases of polio have broken out in the county and area, according to still unconfirmed reports.

The recent deluge of rains have left swamps and quagmires in many spots over the county and it is feared mosquitos and flies will bring even more chance for infection to citizens of the area.

The house-to-house canvass will get underway as soon as it can be properly organized. Jaycee officials reported. All citizens were urged to contribute generously to the campaign so that danger of polio spreading may be checked.

## Population Of United States Estimated At 150,520,298 Persons

The population of the United States for 1950 has been estimated at a record breaking total of 150,520,298 and revealed a definite migration to the West coast.

These figures were announced by the Census bureau which said that the number of persons in America on April 1, 1950, showed an increase of approximately 19 million persons during the past 10 years.

The census figures indicate there will be a switch of 14 congressional seats as a result of changing state populations with 18 states affected.

The three Far Western states gain 10 of the 14 seats in the U. S. House of Representatives. Eight will be picked up by California

and one each by Oregon and Washington at the expense of Eastern states.

Florida, Indiana, Michigan and Texas gain one each. The losses are: three by New York, two by Pennsylvania and one each by Arkansas, Georgia, Illinois, Kentucky, Mississippi, Missouri, North Carolina, Oklahoma and Tennessee.

California's gain of eight seats is the largest since the same state picked up nine new seats as a result of the 1936 census. It will tie with Pennsylvania in the future, each having 31 seats while New York leads both with 42 seats. Illinois drops to fourth place with only 25 seats.

Congress is required to pass a

new reapportionment act the changes in House seats effect. Under normal conditions it would become effective in 1952 campaign.

In addition to changing seats the reapportionment will change the states' voting electoral college and in conventions, thus California have an equal voice with Pennsylvania for the first time in history.

While both New York and sylvania gain slightly in population, they will lose congressional seats because of California's tremendous gain. Other states North Carolina went up one per cent while Washington lost one per cent in population. That North Carolina lost one Washington gained one.

### NOT NICE (A Short Story) By RICHARD HILL WILKINSON

JERRY wasn't a fatalist, but when he arrived at the ranch and found that Jim, his older brother, had gone to Denver on an emergency business trip and would be away almost a week, he decided that something beyond human control was directing his destiny. Jim had left a note "Dear Jerry. Sorry this had to happen, but it couldn't be avoided. I'll be back on Monday, and on Tuesday we'll hold the wedding. Please be nice to Judy and her friends and family."

Ordinarily Jerry would have found it no chore at all to be nice to Judy. She was one of those girls

Julia was to be one of Judy's bridesmaids. She wasn't bad looking, either. Jerry began promoting her.

It might have worked out, save for one thing. Julia didn't welcome Jerry's attentions. Either she guessed at his purpose, or she didn't like the idea of playing second fiddle. Still, Jerry didn't give up. He was desperate. This was his only opportunity of bringing about an enmity between himself and Judy.

In a sense it was a cowardly thing to do, for it rather put Judy on the spot. It would have to be she who would find cause for avoiding him, and this would give Jerry an advantage. He didn't want an advantage over Judy. He wanted things to be on an even footing.

The scheme worked, despite Julia's cold indifference to Jerry's flirting. A hurt look came into Judy's eyes. Not scorn, nor anger nor contempt. Rather the wounded look of a dog who had trusted its master and the master had turned traitor. It nearly broke Jerry's heart. He felt like a cad. The torture to his soul was trebled. He might have yielded to his instincts and betrayed his brother if the brother hadn't appeared on the scene a day before he was expected.

"I want to see you," Jim said shortly, after the greetings were over. And when they were alone: "I cut my trip a day short because of a letter I had from Julia."

"Julia?"

"She wrote that you were making advances to her."

"Well? Is there anything wrong in that? How else would a man indicate his fondness for a woman?"

Jim's lips pressed together tightly. "Jerry, if you weren't my brother, I'd smash your face in!"

"What the devil are you talking about?"

"What do you think I'm talking about? What would any man talk

The scheme worked, despite Julia's cold indifference to Jerry's flirting. A hurt look came into Judy's eyes.

you read about; the moment he laid eyes on her he decided it was going to be hard not being nice to her. Before the first day had passed he wholeheartedly cursed Jim for insisting that he come down for the wedding.

"Lord!" he thought, "after they're married I'll have to get out of the country. I wouldn't have a moment's peace, knowing she was available as a sister-in-law."

Jerry's annoyance at Jim presently gave way to self-pity. He had promised himself during the first hour of conversation with

Judy that he would remain immune to her charms. This resolution vanished at about the same time the sun dissipated the dew next morning. It was then that he decided Fate had taken a hand, was giving him a rotten deal. For Jerry suddenly knew that he loved Judy, that she was the only girl in the world who could ever make him happy.

It was torture being with her, trying to be nice as per Jim's request, and yet at the same time maintain his equilibrium. Judy didn't help. She didn't exactly flirt, but on the other hand she didn't act like a girl who in a week's time would be Mrs. Somebody else.

An alarming thought flashed across Jerry's mind. Suppose she felt toward him as he felt toward her? Suppose Fate was handing her a rotten deal, too? Suppose she had believed, sincerely, that she loved Jim, but now that she had met Jerry—well, it might be one of those things, you know.

In this case, Jerry decided, she would look to him for deliverance. Whatever happened he would have to assume the responsibility. He was the man. He must be masterful.

Jerry could only think of one way of being masterful. It was an old gag, but it usually worked. He must profess interest in another. What? Julia Walters, of course.

about when he found his brother making love to his future sister-in-law?"

"Sister-in-law! Hold on here. I'm probably dull, but I don't get it. Just who is it you're going to marry?"

"Julia, of course."

"But—your letter said to be nice to Judy—"

"Of course. She's here alone; not used to the west. I thought you might at least be decent enough—"

"Jim," cried Jerry wildly, "do you mind my saying you're the swellest brother any man ever had on earth!"

Judy was sitting in a hammock under a palm tree in the patio when Jerry found her. She looked up coldly.

"Listen, Judy," Jerry said. "I love you. I've always loved you. I always will love you. I only pretended to love Julia, because I thought you loved Jim, but Jim says he loves Julia and she wanted me to love you, but I thought you loved Jim, who loves Julia, who doesn't love me. Do you see?"

Judy carefully put aside the book she was reading.

"Jerry," she said, "you're crazy."

"Ain't I though?" declared Jerry. And he took her in his arms and Judy confessed a fondness for insane lovers—

### Oil Reserves Hit New Peak; Exceed 28 Billion Barrels

Proved reserves of crude oil and natural gas liquids reached new highs during 1949, thanks to intensive discovery efforts of the oil industry. By the end of the year, crude reserves showed a net gain of 1,369,945,000 barrels and totaled 24,649,489,000 barrels. Natural gas liquid reserves rose 188,229,000 barrels to reach 3,729,012,000 barrels. This gives the country a proved reserve of liquid hydrocarbons totaling 28,378,501,000 barrels. The oil industry's record in building up the nation's proved oil reserves spikes all rumors that our oil reserves are running out.

Judy that he would remain immune to her charms. This resolution vanished at about the same time the sun dissipated the dew next morning. It was then that he decided Fate had taken a hand, was giving him a rotten deal. For Jerry suddenly knew that he loved Judy, that she was the only girl in the world who could ever make him happy.

### In Elected President of Lions International At Chicago Thursday

AGO (Special to Leader)—C. Petry, Jr., Carlizzo, Texas, is the new president of the International Association of Lions Clubs, (Lions International). He was elected by unanimous vote at the 33rd annual convention of the Association which was held at the Chicago Stadium Monday. Petry succeeds Walter C. Kewenawson, Ontario, Canada. The convention concluded one of the most successful years in the history of Lions International, according to the report made by Melvin, Chicago, Illinois. See

retary-General and founder of the Association. He reported the addition of 806 new Lions Clubs and 21,415 men to the roster of the Association during the twelve-months period ended June 30, 1950, for a total of 8,955 clubs and 492,841 members. He stated also that during the fiscal year Lions Clubs were established in two additional countries: England and Denmark. Lions International, he added, is the largest, strongest and most active service club organization in the world, with Lions Clubs in 28 countries on five continents.

Petry, in accepting the presidency, said: "My home is down near the border of two great nations, and those of us who live so close to the people of another country know that there are no great differences between the people of Mexico and those of the United States. We learn their language and their customs; they learn our language and our customs, and together we are learning to live with each other. This is equally true of the northern border. The Lions of the northern states are carrying along identical work with the wonderful Canadian Lions across the border, at all times maintaining an aggressive movement to make friends with their neighbors. The Canadian Lions are likewise maintaining this aggressive movement to make friends with us. And why shouldn't this be the object of all Lions in our twenty-eight nations throughout the world?"

Petry continued that as he visits the Lions Clubs throughout the world during the coming year, he intends to urge the furtherance of this spirit of friendship and cooperation among the nations of the world.

Petry is a successful attorney and business man. He is the head of the law firm of Petry & Dean, in Carrizo Springs, Texas, and is President of the Dimmit County Bar Association. He is also a director of the Union State Bank of Carrizo Springs.

Born in Carrizo Springs, Petry is a graduate of Westmoorland College of San Antonio, Texas. He received his LL. B. Degree from the University of Texas at Austin. He is a member of the Delta Theta Phi Law fraternity.

In electing him their new President, the Lion delegates elevated Petry from the office of International First Vice-President, in which office he had served during the 1949-50 fiscal year. He had previously served as Second Vice-President and as Third Vice-President. From 1945 to 1947, he was a Director of Lions International. President Petry speaks Spanish fluently, and for four consecutive years he has served as Chairman, and as the delegate from the United States, on the Lions Board of International Relations.

Lion Petry has also served his own Lions Club at Carrizo Springs in many capacities, including President, Secretary and Director. Also, he served as Zone Chairman, Deputy District Governor and District Governor of District 2-A. He is a Charter Member and a Key Member of his club and has received a 10-year perfect attendance award.

President Petry is married and has two sons. He is a steward in the Methodist Church and is very active in civic, church and community affairs.

T. H. Keating, general manager, smiles happily as he takes the wheel of the 24,000,000th Chevrolet. The milestone model came only six months after the 23,000,000th in a production run that set new industrial records.

**Attend Funeral of Wreck Victim**

Mrs. Ernest Brock and son, Stephen, Miss Patsy Phillips of Littlefield, and Mr. and Mrs. Celton Farley of Lubbock, attended the funeral of Mrs. Maryland Fern Brown, 17, wife of Jack (Pinky) Brown of Borger, at 2 p. m. Wednesday at the Fellowship Baptist church in that city.

Mrs. Brown was killed in an automobile accident early Sunday morning near Borger. In the car at the time of the accident were her husband and four other teenagers, two of whom were injured critically, one seriously, and two others slightly.

The driver of the automobile, a 1950 Hudson, was believed to have lost control of the car, which hit a bridge abutment, and was totally wrecked.

Mrs. Brown was a dear friend of Mrs. Celton Farley, the former Ernestine Brock, with whom she attended school at Spring Creek, near Borger. She was a former football queen of Borger High school. Burial took place in their old home place, Wilson, Okla.

**"I REMEMBER" BY THE OLD TIMERS**

From Mrs. E. E. Volk of Omaha, Neb.: "I remember when I was a kid back in the 1890's, my folks made a unique cereal for us. They ground the 'old maids' left from popped corn, put cream and sugar on them and served them for breakfast."

From S. J. Benson of DeKalb Tex.: "I remember when just a child, the cold winter nights by the big fireplace, with Father on one side, reading the Bible, Mother on the other, knitting, and us kids in between. At bedtime Mother would pull the little trundle bedstead

from under the big bed. She would then tuck us kids away for the night. Some families had one-poster beds in the corner of the bedroom, with the other posts attached to the walls."

From Lee James of Mesongah, W. Va.: "I remember when women would shear sheep. I don't know that the fair sex generally ever engaged in this occupation, but when I was a lad, I remember seeing my father tie the legs of our sheep and Aunt Drue Tucker, who lived near us, would shear them."

From Mrs. Bryan Thompson of Granger, Wash.: "I remember when I went to a one-room country school, the teacher would appoint two pupils to bring a pail of water from a nearby well and pass it with a dipper, so each pupil could have a drink of fresh water. Each pupil usually took a dipper full and poured back into the pail what he did not drink."

Littlefield City Park now boasts a large new swimming pool, a partially completed building which will serve as a youth center, a deep carpet of rich green grass, a Legion Hut, and other buildings.

When all improvements are completed the sum total will provide residents of the city with a recreational and social gathering place which would make any community proud of it.

The Chamber of Commerce Beautification committee and all other civic groups responsible for the

improvements made in the park are in line for special commendation.

Of course, there are many steps still to be taken in other projects for the betterment of the city. No community—or no individual, for that matter—can stop without rolling back downhill.

But the improvements in the park and other projects started indicate that the citizens of Littlefield know where they are going and know how to get there.

## NEAR HOME

The story is circulated now and then about the man who found an ad in a magazine extolling the benefits of a finishing school for backward children. He sent his son there and told him to stay no matter what happened. He was very much surprised when a letter from Son arrived explaining that he was following instructions, staying there, but that he was having difficulty living in closets and hiding under beds. The matrons, he said, kept trying to tell him it was a school for girls and that little boys weren't allowed.

Something similar happened to Near Home last week, when it appeared by mistake on the News-of-Women page. Such an accident was tough on near home, of course. But think what it did to the society page!

\*\*\*

The rains came. And stayed. Well, gentlemen they plant rice in China, Japan and (ugh!) Korea. It does well in swampy country. Farmers here may find it just the crop they need for those fields still under water. Anyway, it would provide excellent terrain for bayonet practise.

Besides delaying plowing, the rains have washed away many young crops. Hail in one small area of the county caused considerable damage to cotton, it was reported.

\*\*\*

A very significant coincidence took place Wednesday night. The stage for it was rather large, of course, (all the territory from Littlefield to North Korea) but that only added to the significance.

Public officials in North Korea ORDERED the mobilization of every able-bodied man in the country to fight against freedom and the rights of man.

Public servants in Littlefield ASKED the citizens of the county to hire them to represent the wishes of the majority.

There was a world between the two incidents. And there was a world of difference.

The candidates' rally, which was sponsored by the Littlefield Junior Chamber of Commerce began shortly after dark when citizens began gathering between the First National bank and the Yellowhouse building.

Twenty-two candidates for public office at the rally—which was broadcast—told listeners both on the street and over the radio why they felt qualified to hold the various positions they were seeking. More than 400 persons gathered to hear the speeches. The number who heard the rally over the air was, of course, much larger.

As long as this sort of thing continues in Littlefield and the rest of the U. S. the sort of thing going on in Korea, Russia and other slave nations will have less chance to make progress.

John Nail expressed it pretty well the other day. He said the

**RETREAT TACTICS . . .** A guard of the South Korean army is shown standing at the south end of a bridge, vital to the defense of South Korea, with several packages of dynamite lying about on the ground near his feet.

present war is his fault and your fault and mine. If we hadn't been so lazy after the last one we would have finished this one in much less time than will now be required.

## TO ENLIST NAVAL RESERVISTS

Waves belonging to organized or volunteer units are asked to apply for active duty through their

commanding officers. Others should apply by letter directly to the district commandant, district headquarters announced.

Volunteers must have at least one year's obligated service remaining in their enlistments. Accepted volunteers will be ordered to one of three Texas examining activities or to the naval station at New Orleans.

Qualified applicants will then be sent to Corpus Christi for outfitting and to await permanent assignment by the Bureau of Naval Personnel.

## Information For Veterans

**Q—Would an American serviceman, paralyzed from the waist down because of action in Korea, be entitled to the special VA benefits of an automobile and a grant for buying or building a home designed for "wheelchair living?"**

**A—He could not get the car, for the law limits motor vehicles at Government expense to World War II veterans only. But he might be eligible for the housing grant, if he meets the other requirements of the law authorizing special housing.**

**Q—I want to take a GI Bill course in automobile mechanics. Where can I get a list of nearby schools approved to give this training?**

**A—The VA regional office nearest your home maintains up-to-date lists of all schools, located within its jurisdictional area, approved by State Approving Agencies to offer GI Bill training.**

**Q—If I apply for GI Bill training before the July 25, 1951, cut-off date, will I be able to start my course sometime after that date?**

**A—No. Under the law, you actually must be in training on that date. The exceptions are interruptions of training beyond your control, such as summer vacations, illness and the like.**

**Q—Some years ago, I served on active training duty in the National Guard for 15 days. During that period I suffered a disease that resulted in a disability. Am I eligible for disability compensation?**

**A—No. Public Law 108 states**

that you must serve for periods "in excess of 30 days" in order to be eligible for compensation for disability resulting from disease. On the other hand, there is no minimum time limit in the case of disability resulting from injury while on active training duty with the National Guard.

All kinds of reports are received these days regarding the amount of moisture which has fallen in various parts of the Littlefield area.

In an interview with a Leader representative Monday, G. S. Armstrong of eight miles north of Earth, stated that that area had received 22 inches of rain since the first moisture fell this summer. He said that section got 8 inches Monday night of last week.

Mr. Armstrong stated that he had to go all around by Dimmitt to get to Littlefield Saturday. He is one and one-half miles off the pavement — the Earth-Amherst paved highway, and stated that in the 26 years he had lived in this area, he had never seen so much water. ## BULL LAKE PHILOSOPHER FINALLY FINDS OUT ABOUT THE WAR, EXPLAINS EXACTLY HOW IT GOT STARTED

Editor's note: The Bull Lake Philosopher on his Johnson grass farm on Bull Lake has found out about the Korean war, his letter this week reveals. It just shows how far behind a person can get without depending on chance to turn up his newspaper for him.

Dear editor:

I been through two wars already without finding this news and am writing to a newspaper, not to mention buying up sheets and pillow cases and shirts and night gowns and paper and automobile tires and I figure I can get through the present one the same way. I am frankly to say I was a little late finding out the Korean conflict had started, but yesterday afternoon I found a stack of newspapers a couple of weeks old which the wind had blown against some weeds which had been blown against a fence earlier, maybe last year for all I know, and I took them home and read up on the war.

As I now understand it, the Russians are claiming the North Korean fields with plenty of tanks and guns and airplanes, was first attacked by the South Korean Democrats who didn't have a hand to their name and 50 airplanes but to planes.

I know exactly how it was. My neighbor's pasture is always attacked by cows.

That's the time my neighbor has come over and accused my cows of breaking in his pasture, but he's at that-headed he can't understand this modern world. It's his pasture that's clearly to blame. You don't see no cows breaking in my pasture. If he'd keep his in the shape I keep mine, he wouldn't be bothered with my cows. If there isn't no better politics across the fence that there is at home, very few cows will take the trouble of leaving home.

Now this may not make any sense at all, in which case you clearly ain't got no international mind.

However, since I found out about this new war, I been keeping up with it pretty close and I ain't very excited. It's gonna take time, if
