

# LAMB COUNTY LEADER

LITTLEFIELD, LAMB COUNTY, TEXAS, THURSDAY, DECEMBER 21, 1950

NO. 86

### Children Giving Urges

TAYLOR MARKE Education Writer

ipients of gifts that we forget they should also learn how to give graciously. Parents can help junior develop this attribute at Christmas.

Not only should we teach junior that to give is as blessed as to receive, but we should never discourage a child from doing a kindly act, advises the National Kindergarten Association.

Kindness is one of the qualities that we admire most in our friends. It must, however, be cultivated in childhood if it is to flourish in adult life. By repeatedly performing little acts of kindness, the good habit is established and becomes a part of character, just as undesirable behavior—lying or stealing—by repetition becomes a habit, says the association.

**Boys' Examples Cited**  
The association cites the example of the little boy who returned from kindergarten his face alight with enthusiasm, as he made a special request of his mother.

"May I pick some flowers and take them to Mrs. Evans? She's not well, and I am sure they will make her feel better," he asked. The lad's mother hesitated, thinking of the beautiful array of hothouse flowers this lady's many friends must have sent her. To soften the disappointment, she said, "I'm glad you thought of taking her some flowers; but ours are not very pretty."

"Mother, you just think that because you see them every day, I think they are beautiful, and I am sure she will love them," he urged.

"Very well," the mother replied. "I'm going to pick all the happy looking ones," he said.

Junior's selection brought together a curious assortment of flowers, but as he went through the garden, choosing some of the gaudiest flowers, he remarked, "These are so bright and cheerful that I am sure they will make her feel glad, even though she must stay in her room."

**Put in Prominent Place**  
In a very short time he had gathered and arranged his offering to his liking and had left for his friend's house, happy and proud of his gift.

The next day junior's mother called to see the old lady, and when she entered her bedroom, she was surprised to see her son's offering held a prominent place among the display of hothouse blooms.

Observing that she was looking with admiration at her beautiful flowers, the old lady remarked, "I have had many lovely bouquets sent me, but none have given me so much pleasure as the one brought by your small boy. A gift from a child is so definitely a gift of love, for there is no pretense with children. His flowers have made me very happy."

The mother explained her hesitance about allowing him to take

## REA Co-Ops Teaching Electricity To Farmers

By **TEX EASLEY**  
**(AP) Special Washington Service**  
WASHINGTON — (AP) — Texas farmers are learning that they need to know a lot more about electricity than simply flicking a switch.

So reports O. B. Bryan of Stanton, who is in charge of a power-house educational program in the rural areas of the state. He has been here for conferences on the subject at Rural Electrification Administration headquarters.

"Sometimes a farmer buys a lot of electric appliances in town," says Bryan, "and when he gets home with them he finds they won't work at all on the type of current on his place."

"It may sound a little technical, but put as simply as possible, our rural electric co-op lines are single phase designed to operate up to 10 horsepower motors. Most of your city lines are set up to handle up to three-phase motors."

**Must Know Machines**  
He cited the example of the farmer who bought a feed grinding

her such ordinary flowers. "There's where you made a mistake," counseled the old lady gently. "Had he brought me some of the choicest beauties of the hothouse they would not have given me nearly so much pleasure. His bouquet was a gift prompted by pure affection—a gift of that sort money cannot buy."

machine and sorrowfully discovered after he had it installed that it wouldn't operate on his circuit. And, Bryan continued, occasionally farmers pick up what they think to be good second hand bargains, or buy from a none-too-scrupulous dealer, and find they can't return equipment that they can't use.

"Texas cooperatives are taking the lead in an educational program to reduce these unnappy occurrences to a minimum," Bryan said. "But that is only part of our program."

"Once a farmer has electricity, he may be surprised to learn a lot of new ways he can make use of it and make it pay dividends in dollars."

**Proper Use Important**  
"Proper use of equipment also is important. A brooder that is regulated correctly, for instance, might be operated at just half the cost of one which hasn't been checked and adjusted."

Bryan is manager of the Cap Rock Electric Cooperative, as well as chairman of the power use and education committee of the Texas Power Reserve Electric Cooperative.

The Reserve cooperative is managed by Elmo Osborne of Austin and is composed of about 80 cooperatives throughout Texas. Osborne and Mrs. George H. Robbins of Perryton were here with Bryan attending the poweruse conference.

### AROUND THE CAPITAL

Mayor Carrol Shiffer of Texarkana, here for a meeting of the American Municipal Association, took time out for a tour of the Capitol. His hometown congressman, Wright Patman, took him into the House chamber where

workmen are finishing a \$3,000,000 remodeling job.

Miss Diana Sandefur of Abilene, daughter of Mr. and Mrs. Gib Sandefur, was chosen "Sweetheart of A. and M." for the big Texas A. (Continued on Back Page)

# Tradition Flavors Yule Pie

A wealth of tradition is covered by the crust of the Yuletide mince-meat pie.

Although few people today know it, the pie represents the cradle of the Christ Child surrounded by the gifts of the Magi. It was originally in oval form, to symbolize the cradle, and the varied ingredients were the gifts.

At one time mince-meat pie was banned, and at still another time in its history, it was the cause of Christmas itself being abolished for a brief period.

For many years in England during the time of Oliver Cromwell, the custom of feasting and drinking at Christmas was regarded as worldly and sensual, and the more strict Puritans refused to eat mince-meat pie during the holiday season. This prejudice was finally overcome after the Restoration.

In the New World, during the first half century after the Pilgrims' arrival at Plymouth, similar troubles caused the banning of mince-meat pies and Christmas. In 1659, and for several years thereafter, there was no Christmas in New England as a result of an argument over the shape and meaning of mince-meat pies. Eventually the indignation spent itself, and the ban was lifted.

A pie which no other can approach in the intricacies of its creation, mince-meat pies originally were made almost entirely of meat seasoned with spices. Fruit, chiefly currants, was added, and probably because the dish was regarded as a sweet, the fruit content was gradually increased until

mince-meat became a mixture of fruit and spices, with or without the addition of meat.

The whole world has a part in the making of a mince-meat pie, according to the American Bakers Association. There are lemons, citron, and oranges from Florida and California; apples from a half a dozen states; currants from Greece; raisins from the Pacific Coast; sugar and syrups from Louisiana and Cuba; suet from the Middle West; spices from far-away Ceylon; and other ingredients from far and near.

By and large, mince-meat pies have not changed noticeably since those early days when New England cooks began preparations for making the mince-meat weeks in advance of the actual pie baking.

The greatest difference occurs not in the ingredients, but in the preparation. The American housewife now depends on the baker to perform all the labor of preparation. The American Bakers Association says that American bakers use tons of the same high quality ingredients as are used in the home in taking care of the demand for this traditional part of the Christmas dinner.

History, tradition, and its own merits have made mince-meat pie one of the most interesting of all food products—rightfully occupying its place of honor at the Yuletide feast.

As Samuel Pepys stated in his famous diary about his 1662 Christmas dinner:  
"We had, besides a good chine of beef and other good cheer, eighteen mince-meat pies."

# A Sudsier World Emerges

Detergents—the household hint columns are full of 'em. But just what is a detergent, anyhow? Webster says the word comes from the Latin, "de-tergere," meaning to rub or wipe off. So actually it means a cleansing agent. Soap—just any old soap—or even plain water is a detergent according to the dictionary.

Then why all this midcentury fuss about it? Because, says a national patent council report, the "wizards of wash powder chemistry have given it a special new meaning. "Detergent" now means a synthetic cleansing agent, not a natural dirt chaser such as soap.

The history of soap, as Charlie McCarthy would say, is a long story and a dirty one. Pliny, the Roman scribe, described the old country method of making soap. For centuries it remained the same. Many folk still remember how grandma boiled smelly fat scraps in lye leached from wood ashes, winding up with maybe a year's supply of soft soap.

Bar soap was but a refinement of this Pliny method. But then came the washing machine and

mother started whittling chips off the old laundry bar with a sharp knife, to coax the new gadget into whipping up faster suds. In 1918, soap factories took the hint and ready-whittled "flakes" hit the market for the first time. What suds they raised in a dirty world! Research laboratories blew a sea of bubbles seeking quickie-sudsy formulas and the first synthetic detergents appeared in the middle '30s.

Chemists describe the modern detergent as a cleanser composed of two-headed molecules. One head seeks dirt, the other is a hydrophile—it loves water. Put a molecule like that to work on a dirty shirt and here's what happens. One head grabs a bit of grime. The other grips the water, and tattle-tale gray is swished away.

Production of these patented detergents has grown up into a new industry creating thousands of new jobs. Soap was once a luxury of the rich, but now it is within the reach of all. If cleanliness is indeed next to godliness, the world has moved much closer to heaven, just since the end of World war II.

# New Interscholastic League Setup Held Boon To State's Smaller Cities

By WILBUR MARTIN  
Associated Press Staff

The Interscholastic League had to do something to equalize competition, but the real beneficiaries of the new high school sports program are the little schools of Texas.

Under the new plan, most schools now classed as Class B will be in Class A next year and will play to their own state football championship.

What the new classifications—AAAA, AAA, AA, A, B and Six-Man—do is give every school a chance to compete with others its size.

Class B schools now play only to regional titles as do six-man teams. Class AA and A play to state championships and so does the City Conference.

"A" Schools Advance  
Most schools will advance one or two notches in classifications. For instance of the 16 teams in the playoff of Class A this year, only four will be classed as A schools next season. The remainder will be in Class AA.

The top bracket of course matches the really big schools—those with 850 enrollment or more. Teams like Amarillo, Wichita Falls, Austin, and Lubbock.

There's not much doubt that a championship play off will be voted between AAAA and AAA. The winner of this can rightly lay claim to the title "State High School Champion."

Shaking up its classification was not the only changes the Interscholastic League decided to make for next year.

At its spring meeting, the League

decided to raise the eligibility age to 19 years, with certain provisions.

Restrictions Still Remain  
These says a boy or girl will be allowed to compete if they have not reached their 19th birthday on the first day of September before a contest and they have not finished the tenth consecutive semester after first enrollment in the eighth grade.

There's also a new rule that says

# Artesian Well Supplies Texas Town Its Water

NORTH PLEASANTON, Texas—One of the simplest and cheapest water supply systems known is claimed by this Atascosa county town.

There is no storage tank, and no pump. But there is good water pressure at every faucet in town, and the state has pronounced the water good. Moreover, it tastes good.

The water is from an artesian well on a hill to the east of town. It gushes at the rate of 800 gallons a minute from a depth of 1-

no individual shall be eligible who takes part in a college athletic try-out to show his ability in any sport.

Also barred is an player who enters an out-of-tate athletic contest that is not approved by the League's state executive committee.

There is no provision for a play-off between AAAA and AAA basketball champions. Each of the four "A" classes and Class B will determine titlists in tournaments run at the same time in Austin.

688 feet. Mayor C. A. Arrington said engineers have figured the water temperature at the bottom of the well is 102 degrees. But it cools down to 88 degrees by the time it reaches the surface.

For years, North Pleasanton had been getting its water from an old railroad well, also artesian. But that well tapped the Carrizo sand and rose right off the top of a bed of shale. The new well has been sealed off and punched below the shale to eliminate objectionable lime, sulphur and some of the iron.

Iron content is just above the minimum required by the state health board.

The town drilled the well last summer. Water mains have been laid at a cost of \$21,000. In all, some \$60,000 has gone into the system. Revenue to the town comes in the form of a \$2.25 flat monthly rate for water.

When the town voted the bond issue for the system, the city had some trouble selling the bonds. But then the bond-buyers were brought here to see first-hand the unique "no-pump, no-tank" water system is practical. The bonds sold.

There are many ways to serve nutritious sweet potatoes—candied, baked, in pudding or pie, or mashed with lots of butter and seasoned with salt and pepper.

Delicious baked apples result when you fill each apple cavity with 2 tablespoons of sugar, a teaspoon of butter or margarine and some small round cinnamon candies. Bake the apples by your usual method, adding a little hot water to the bottom of the pan and basting often.

When ready-bought pound cake is left over, toast the slices and serve for dessert with a chocolate or butterscotch sauce.

# Come in and see the New Silver Anniversary Pontiac

① A look at the Car proves its Quality  
② A look at the Price proves its Value!

## Double Proof

that **Dollar for Dollar** you can't beat a **Pontiac!**

In the short time since it was presented, thousands of people have flocked to see the great new Silver Anniversary Pontiac—few cars have ever had a reception to equal this. Most people came to admire, which is natural enough. But a great many people do more than admire, they start *figuring*—they begin to compare this wonderfully beautiful and desirable car with the modest price tag it bears. The conclusion is obvious—no car, at any price, offers more for every new car dollar you invest than a great new Pontiac! Drop in any time and look at the car—then look at the price—you'll be doubly sure that dollar for dollar, you can't beat a Pontiac!

## Bull Lake Philosopher, As Is His Annual Custom, Takes Pen in Hand, Wishes Us a Merry Christmas

Editor's note: The Philosopher on his Johnson grass farm on Bull Lake seems to have the Christmas spirit, as best we can tell from his letter this week.

Dear editor:

It may be true that I depend on my keepin posted on the world situation on newspapers that turn up out here in one helter-skelter way or another, includin a little friendly borrowin out of my neighbor's mail box in order to enable him to share a little in the spirit of sharin, but I don't have to depend on a calendar to turn up to know that another

Christmas is about here. I recognize that the world is in pretty bad shape, but I ain't never let that stand in the way of Christmas. As I recall, there ain't never been a time when things was just right, and I learned long ago a man was crazy to let bad times stand in the way of good times.

Therefore, I would like to take advantage of your good nature to use your space to say I have enjoyed writin for The Lamb County Leader the past year and admire your generosity, if not your judgment, in printin my letters just like I wrote em. However, I notice your linotype operator sets up your articles just like you write em so I guess everything comes out about even in the long run, and you and me both are in the

## Olton C of C Elects Officers; Talk New Plans

Election of new officers for the Olton Chamber of Commerce and consideration of possible employment of a C of C manager, occupied a special meeting called by President Harold Wilson.

Howard Hall, of Franks-Hall Insurance Agency, was named president succeeding Wilson.

Other officers elected include Carroll Cox, vice president; Eldon Franks, 2nd vice president; Robert Edwards, secretary; Henry Cowart, treasurer, and I. B. Holt, parliamentarian.

Ezra Whittington, Howard Buchanan and F. L. Burrow were elected as directors.

The idea of a full time or part time Chamber of Commerce manager gained support of members present as they discussed means revitalizing the organization.

Wilson flatly presented the proposition that something had to be done if the chamber was to be expected to achieve any measure of success.

He pointed out that hiring of a manager might be a partial answer to the problem but stressed that the chamber would still have to count on giving the manager solid and substantial support in programs outlined.

## New Deal Couple Celebrate Their Golden Wedding

Mr. and Mrs. J. P. Nix of New Deal celebrated their Golden Wedding anniversary with open house Sunday from 2 until 5 o'clock at New Deal club house.

Mr. Nix was born near Benton, Tenn., and moved as a small child to Texas with his parents, living near Trenton.

Mrs. Nix the former Florence Bullock, was born at Little Rock, Ark., and when three months old, moved to Texas, where she and her family lived near Leonard.

In 1900 the couple was married and lived in the vicinity of Leonard for 20 years. On Feb. 3, 1920, they moved to Lubbock county, and now make their home at New Deal.

They have five children, C. R. Nix, Fred I. Nix and Mrs. R. A. Surfurd of Lubbock; Ray A. Nix of Great Falls, Mont.; and James Nix of Gardena, Calif.; seven grandchildren and one great-grandchild.

Mrs. J. F. Kelley of Earth was among the hundreds of visitors who called on the couple. Mrs. Kelley also attended the dinner held for the immediate Nix family Saturday night.

habit of running on and on.

I don't expect to get much for Christmas, imagine if I had a store I wouldn't charge to me either, but just livin in America with the privilege of bein as lazy as a man pleases and havin farmin quotas that sometimes limit the maximum you can produce but never the minimum and bein free to romp on the President dont make no difference if you couldnt do no better yourself and havin the right to sit on a piece of land and run it like you please or open a store in town and not havin to ask anybody if it's all right, is Christmas present enough for me.

But of course if you want to throw in a subscription to your paper as a extra bonus, that's all right too. Winter ain't over yet. Merry Christmas.

Yours faithfully,  
J. A.

## Amherst Couple Honored on Golden Wedding Event

Mr. and Mrs. Will Mastin were honored with an open house Sunday afternoon, celebrating their golden wedding anniversary.

Mrs. Jerry Clark and her daughter, Miss Elouise Clark, entertained at the open house in the Clark home on Henderson street in Amherst.

Friends were invited to call between 2:30 and 6 p.m. hours designated for the open house.

## Sudan Man's Nephew Is Killed in Korea

Word was received Sunday by three Sudan men, that their nephew, Pvt. Floyd Thompson, was killed in action in Korea.

He is the son of Mr. Jack Thompson, now of Lamesa. Pvt. Thompson was the nephew of Pete, Cliff and Will Thompson, all of Sudan.

## Dr. E. B. Knollhoff Opens Sudan Office

Dr. E. B. Knollhoff, physician and surgeon, has established his offices in the Park building in Sudan. He was associated with a hospital in Silverton before coming to Sudan.

At present, Dr. and Mrs. Knollhoff are making their home in Francis Smith's apartment house until one of the new Shannon houses, which they have rented, is completed.

In 31 games, Army has beaten Harvard 17 times, with 12 games going to the Crimson and two ties.

## Sudan Soldier Now Stationed at Ft. Sill

Pvt. Ralph E. May, who was inducted into the Army from Sudan on Dec. 6, is now stationed at Ft. Sill Oklahoma. He expects

to be there for six or more weeks. Pvt. May is the son of Mrs. J. O. May of Sudan. He graduated from Sudan High School in 1947 and had two years at Texas Tech. Ralph's new address is U. S. 54028677; 357 Ordnance, Heavy Maintenance Co., Ft. Sill, Okla.

## Kitchen Efficiency Helps Wives Save Steps and Nerves

STATION (Special) is a very important part of the family home. It is the heart of the home, and it is the place where the wife spends most of her time. Mrs. Bernice Henson, a specialist in home management, says that the kitchen is the center of the family's welfare—and it is largely dependent on how well it is planned.

"In these days don't get into the kitchen and hurry to work," Mrs. Henson says, "because they have found that they can work with more efficiency if proper arrangement has been made as to the kind of work and where it can be done best."

Preparing the food, cooking, serving, and cleaning and washing dishes are the four phases of activity in the kitchen outlined by the specialist.

Mrs. Claytor suggests that the kitchen sink, for example, be well lighted, preferably with a window in the wall which is at right angles to the sink. Dishes stored in the kitchen should be above the working surface at the left of the sink or within easy reach of it. The range may be at right angles to the sink or directly opposite. Working surface is needed on both sides of the range. As for the refrigerator, the specialist thinks that it should be given a central location and easily accessible.

Light and ventilation are two items planners of future kitchens should keep in mind, Mrs. Claytor points out. Windows should be placed on two sides of the kitchen and light fixtures should be located so that the light will fall on the work areas. For the average-size kitchen, Mrs. Claytor advocates a 12-inch globe equipped with a 150-watt bulb.

A rectangular kitchen is recommended because it provides more wall space than a square one. The working portion, the specialist says, should be kept free from doorways to avoid traffic.

A correct height for various working centers in the kitchen enables one to maintain good posture and thus lessen fatigue. Mrs. Claytor suggests that each home-maker experiment with different surface heights until the most comfortable one for dishwashing, rolling beating and stirring is found.

Cabinet space should be arranged with reference to the activities of the kitchen and equipment to be stored. Shelves should be removable and adjustable to the distance apart. Mrs. Claytor believes that metal shelf stripping is one of the best devices for adjustable shelves.

A correct height for various working centers in the kitchen enables one to maintain good posture and thus lessen fatigue. Mrs. Claytor suggests that each home-maker experiment with different surface heights until the most comfortable one for dishwashing, rolling beating and stirring is found.

Cabinet space should be arranged with reference to the activities of the kitchen and equipment to be stored. Shelves should be removable and adjustable to the distance apart. Mrs. Claytor believes that metal shelf stripping is one of the best devices for adjustable shelves.

# Texas Farmer Still Brews Own Molasses

PARIS, Tex. — (AP) — When you pour that sorghum molasses in those hot pancakes these cold mornings, give thanks to men like H. E. Hall, who is one of a vanishing clan of Texans who know how to make the succulent syrup.

Hall lives in the Maxey community of Lamar county. For nigh on to 30 years now, he's been growing his own sorghum, pressing it and cooking it into molasses.

For 15 years he's been using the same mill to press the juice out of the stalks. He built it himself. "That old mill just keeps rolling," says Hall, "and the molasses just keep pouring."

But, says Hall, the secret of good sorghum molasses is in the cooking.

**Juice Must Be Sweet**

Hall tests his sorghum when the leaves start turning brown. "That juice has gotta be sweet," he said.

"Then you strip it in the field," he says. It is allowed to lay in the field a day or two "the longer the better. Makes the cane sweeter."

Then it is run through the mill and the juice is carried by pipe to a barrel. Then with a bucket, Hall transfers the juice to another barrel atop the cooking vat.

"That's where the real syrup making starts," says Hall. The juice is turned into the cooking pan with a spigot. It takes about 55 gallons of juice to make seven gallons of syrup.

### Ready For Hot Cakes

The pan contains a series of 14 troughs that open into each other. Hall stands guard to strain out all impurities. The juice travels through the troughs, cooking more and more as it goes. By the time it reaches the last trough, it is a golden brown ready to go on those hot cakes.

"Boy," just take a whiff of the aroma," Hall bragged this fall as he looked through a cloud of steam from the pan. He explained that it took two hours to cook the juice properly.

He says the handling of the syrup in the pan is the real secret of success. He had his pan made to his own specifications.

His cane crop was a little short this summer. He made about 100 gallons from his two and a half acres. Last year he produced about 150 to 160 gallons from the same acreage.

**Makes Sorghum For Others**

After making his own run, Hall cooks molasses for friends up and down the Red River valley.

Last year, Hall produced about 500 gallons for himself and friends. This year, he ran off 600 or 700 gallons.

Syrup making isn't as big a business as it once was. "Hall recalled. "Back in 1942 and '43, we'd put out 2,000 gallons a season. Folks just don't grow much sorghum nowadays."

Hall comes from a molasses making family. His father, the late E. D. Hall, was famed for his skill in making syrup.

About the only modern touch in this manufacturing process is the power for the mill. A long wooden pole horizontally atop the mill is turned to grind the sorghum. For years, a horse walked around and around the mill, pulling the pole. Hall has substituted a tractor for the animal.

# Plastics Add New Glitter To Christmas

### (AP) Newsfeature

Ever wish you could capture the perfection of a snowflake?

Well, now you can.

Brightest idea to be turned out by the busy plastic manufacturers for Yuletide decorations is a collection of giant snowflakes made of clear bakelite styrene that sparkles like diamonds.

These super-snowflakes may be used in any number of ways to add to the general Christmas festivity. Simplest way is to stick them to window panes or on mirrors which may be garlanded with evergreens. This can be done with rubber cement, which is easy to remove after the holiday season is over merely by rubbing it off the glass.

The snowflakes also are assembled to make a sparkling 18-inch Christmas tree, for a holiday centerpiece, set in a clear plastic candy dish, miniature Gothic window, composed of three panels, to be used as the background for a creche or as a window decoration.

A giant window, designed to frame the traditional mistletoe sprig, also is available, composed of two snowflake rings, each 14 inches in diameter, intersecting at a 90 degree angle.

Individual snowflakes come in sizes 5 1/2 or 9 inches in diameter, to be used in varied decorative effects.

Don't wait until the Christmas rush to bring the season's decorations out of hiding. Perk up wreaths, ribbons and tree ornaments now and save yourself from a chore later. Even tarnished tinsel should sparkle again after a soap and water bath. Swish it in a basin of lively warm suds, rinse and spread on a towel to dry.

Liver, heart, and kidney have high value as food because they supply us with iron and vitamins. The mother of a family is wise if she serves one of these foods at least once every week.

Persons who want to gain weight should be on a regular regime. They should eat at regular hours, have enough rest and recreation and some mild outdoor activity. Mealtimes should be as relaxed as possible, with no worrisome subjects brought up during them.

If your family doesn't like kale served as a vegetable to accompany the main dish, try making a potato and kale soup. Seasoned well, this soup is often accepted with the plain vegetable is rejected.

When you buy ready-to-cook poultry, you can afford to pay more a pound than for "dressed" poultry which includes removable waste such as head, feet and inedible organs, advises the Department of Agriculture.

# You bet there's a Santa Claus!

YOU may not see any fluffy white beards or gay red jackets in our showrooms—but we're playing Santa nevertheless.

We're playing Santa when we offer these gay and gorgeous Buicks at the prices offered today.

Where else can you find so much power and comfort and style and size and fun at comparable figures?

Where else can you find high-compression Fireball power—Dynaflow Drive\*—and the ever-level ride that you get in a Buick?

What you pay for a SPECIAL buys an eight—not a six—but the price tags are less than many a six will cost.

What you pay for a ROADMASTER buys the standout performer in the fine-car field—at

the lowest price per pound of any car near its size—and at hundreds of dollars less than you'll pay for others which match ROADMASTER's reputation.

These are facts you can check in any Buick dealer's showroom—but the thrill of getting a bargain is nothing compared to the thrill you'll get out on the road.

You have to feel for yourself the eager take-off—the willing rush of power on the straightaway.

You have to feel the supreme command is yours with Dynaflow Drive—and level-gaited stride of this bonnie beauty.

So come in—and take out one of these performers.

Just a few miles with a Buick and we know what you'll say:

"Christmas! What a marvel!"

\*Standard on ROADMASTER, optional on SPECIAL and on SUPER.

ONLY BUICK HAS Dynaflow— AND WITH IT GOES!

HIGHER-COMPRESSION Fireball power • NEW-PATTERN STYLING MULTI-GUARD front-end

TRAFFIC-HANDY SIZE for easier parking, garaging • EXTRA-WIDE SEATS cradled between the axles

SOFT BUICK RIDE, from all-coil springing, Safety-Ride rims, low-pressure tires, ride-steady torque-tube

be filled with joy and fun ...  
And may the coming New Year,  
be your very nicest one!

## Earl Johnson's Garage

Mr. and Mrs. Earl Johnson

that I'm a youngster. Not by 50 years. But by having worn "that thing" in my left ear for some 15 years. I've unintentionally caused many a kid to get rough treatment from his mother.

I'll be waiting for an elevator. The door will open and a little fellow about to get out, will stop short. His blue eyes open as wide as Eddie Cantor's ever did. His jaw drops in frank amazement. His mother, behind him, gives a push.

He stumbles past me without taking his eyes off "that thing." Staggering backward and still looking, he trips and sits down. Yanking him to his feet, his mother gives him a smart cuff on the stern.

**A Sure Danger Sign**  
On a bus or in a restaurant it is common for a little one to start whispering urgently to a parent, while staring bug-eyed at me. I know what is being whispered without using any lip reading. And I hate to see it start, because I know the parental rough stuff that is to follow.

One time while I was dusting my jalopy at the curb, two pre-kindergartners spied me. They dropped their toys and went into a huddle. Soon one apparently delegated as spokesman, came forward and asked:

"Are you a doctor?"  
When I told him I was not—that the doctor's office was across the street—he challenged me:  
"Well then, what are you wearing that thing in your ear for?"

I patiently explained that I was deaf and that this contrivance was like a little telephone.  
"Does it go?" he asked.  
And they don't have to be old enough to talk to notice a hearing aid. One tiny girl merely put a finger in her ear, tipped her head to one side, squinted and gave me a quizzical grimace. I nodded my head affirmatively and she smiled satisfied.

**Oldsters Curious, Too**  
The curiosity seems to carry over into second childhood, too. A doddering old gent, offering profuse apologies, asked me if I were deaf in only one ear. After I told him no, both ears, he wanted to know why I didn't wear one in both ears!

A nice thing about it is the way pretty girls notice it. Before I wore one of these instruments, they never gave me a second look. When I'd pass a pretty girl on the street I did all the looking. Now they look at me. They look, then look away from modest habit, and then look right back again to make sure of what they saw.

The thing almost got me pinched, though. Because of the parking problem, taxicabs were permitted to stand in front of fire-

plugs. The theory was that it was safe as long as the driver was at the wheel. So I thought I'd try it—very foolishly, of course, because I was waiting for my wife, who promised as usual that she would be "right out."

I fell asleep waiting, and was awakened by a cop who walked up from the traffic side.  
"What's the matter, Buddy?" he asked. "Been drinking?"  
Mumbling "no," I started to get out of the car to prove it and explain.

"That's all right, that's all right. Stay where you are," he said. "I just wanted to find out if that thing in your ear worked."  
He didn't see the fire plug on the other side of the car.

**Some Work, Some Don't**  
One of the uses of an ear phone (some people want us to call them audicales) is to hear with. If you get one to fit your deficiency properly, it works wonderfully. Otherwise it can be a screeching device of the devil.

Before I ever wore one, no one would speak up. Now when some people see it, they start hollering, even though I can hear whispers. I was hard of hearing for so many years that I had forgotten what music sounded like. First the violins faded from an orchestra and then, as the years rolled by, the entire melody vanished. The first hearing aids I wore fitted so poorly that music was only another noise to turn off. I finally got a new device that was perfect for my case.

It was Christmas time and my wife wanted me to take her to church. We went to a carol service on Christmas eve. I hadn't heard those songs since I was a kid, and frankly I cried like a kid.

**The Sound and The Fury**  
But it had been fun wearing that first wierd distortion device, too.

I thought a horse was clomping along behind me on the sidewalk. I turned around and it was a young woman. I hadn't heard a woman's heels for so long.

Before the electronics wizards started putting tiny radio tubes in these instruments, they worked on the old fashioned carbon telephone principle. They distorted various pitches far beyond normal. A tinkling little rattle in an automobile was a trial for your nerves.

After having paid a service station to get rid of a very annoying rattle in my car, I drove around the block and still heard it. Returning immediately, I spoke to the boss in choice old Army terms. He put his mechanic right back to work on the car.

The mechanic, shaking his head, muttered something to his boss. The boss laughed and then told me:  
"He wants to know what you wear that thing in your ear for. He says you can hear things that we can't."

**Anton Dedicates New Gymnasium**  
ANTON (Special)—The Wayland Pioneers, fighting an uphill battle all of the second half, finally edged the Midwestern University Indians, 51-49 in an overtime battle here Thursday night.

The game was the dedicatory game of Anton's new gymnasium, and a fine crowd of 2,000 witnessed the contest.  
In the preliminary games, the Levelland girls edged the Anton girls team 32-26 with Clarkson and McDermott roping 14 and 12 points each. Billings got 21 for the losers.

and M. Georgia U. Presidential Cup football game sponsored by the American Legion.

Local Aggie exes rooted for their old Alma Mater, with J. Arnold Shaw of Dallas and Maj. Fred A. (Bodie) Pierce, Jr. of Luling directing. Both are of the class of '40 and were yell leaders at the college.

State Department administration of the Fulbright scholarship program has come in for lambasting by Waco's Congressman W. R. (Bob) Poage.

Vice President W. T. Gooch of Baylor University had called Poage's attention to reports that an unusually large percentage of scholarship awards to study abroad had gone to New Yorkers and others in the East.

Checking, Poage said he learned that in 1949-50 school year, New York with a total population of approximately 14,000,000 had received 201 scholarships, while 15 southern states with a total population of 45,000,000 had received only 109 awards. Texas received 13.

Describing the administration of the program "an outrage," Poage said those in charge told him that any inequities probably were due to the fact that many more applications for scholarships were filed by New Yorkers.

"It also was pointed out that the New York students filed applications for study in many smaller countries, while Texans usually sought to study in either England or France.

"I suggest that if the quantity of applications is to be a factor, then Texas students should shower them with requests. And it would be a good idea to select smaller countries where possible."

To make window panes extra shiny, add a liberal pinch of bluing and couple of drops of kerosene to a pail of hot soapsuds.

## Thinks of Likes of Individual Man in Selecting Gifts

NEW YORK — (AP) — It's important when buying a Christmas present for the man to remember that it is not a present for men in general but for one man with individual likes and dislikes.

Don't buy something simply because it is on a counter marked "gift suggestions." Some of the "suggestions" may not apply at all to the man in mind.

Try to find something that the man receiving it will enjoy and use.

Think about the man that the gift is to please.

Is he a conservative dresser?

Has he adopted the Tartan plaid fashions so popular nowadays?

Does a particular sport interest him?

Does he like tricky gadgets or does he prefer bottle openers that look like bottle openers instead of miniature Eiffel Towers?

Notice the ties that he wears and try to buy something on the same order. If he wears solid colors or plain stripes, don't buy one with a splashy floral print. Notice the color he likes best in suits and buy a tie that will go well with that color.

And remember that some men resent having their ties picked for them.

If the man is an ardent golfer, buy him something that he can use on the golf course. Ask a golf pro about which gadgets are really useful and which are just excess impediments.

For many men masculine cosmetics are welcome gifts — but remember there are men who don't like sweet-smelling aftershave lotion and who never use it.

The same theory applies to gifts such as electric shavers—if he's wed to a straight edge razor like his daddy used, there's not much point in presenting him with the

new-fangled variety. Give some thought to the gift buying and select a special gift for the special man.
