### Cotton Crops, Victory Gardens Are Laid Waste

Area From City To  
12 Miles Northeast  
Suffers Most From Hail

Cotton crops, Victory and Flower  
gardens were laid waste over the  
Littlefield area Sunday afternoon  
when hail, which accompanied a  
heavy rain and a high wind, fell for  
about 40 minutes starting about  
3:50 o'clock.

The moisture measured 2.66 inches  
here, according to the gauge at the  
West Texas Cotton Mill.

The hail is reported to have cir-  
cled Littlefield, extending west as  
far as the cemetery, south a short  
distance, and northeast, though  
somewhat spotted, to as far as Dim-  
mitt. Spade and Fieldton suffered  
the heaviest of this area from hail.  
Rain fell from Littlefield east to  
beyond Anton, but no hail is re-  
ported. The Littlefield area was com-  
pletely covered by a good rain, with  
the exception of a short distance  
southeast and southwest of here. No  
rain was reported at Yellowhouse  
Switch, but this area was visited by  
a high wind and sand storm, which  
blew down electric poles. With har-  
al reports 1 1/2 inches of rain, but  
no hail.

Included in the farms to be hailed  
out were: Clint Griffin of four miles  
north; E. F. Durham of 12 miles

his roofs damaged; C. H. Singer of

### Decision Reached At Co. Committee Meeting Tuesday

Crops Ruined By Storm  
Said To Cover Between  
5 And 6 Thousand Acres

It will be necessary for the pro-  
ducers to replant cotton covered by  
any Government Insurance policy  
before they will be eligible for cot-  
ton crop insurance. This decision was  
reached at a County Committee  
meeting Tuesday morning at 10 a.  
m. at the County Agent's office,  
Amherst, at which members of the  
County Committee were present.

The County Committee consists of  
E. C. Clayton of Spring Lake, Chair-  
man, and B. A. Ball, Fieldton, and  
H. M. Gilbert, Sudan.

In furnishing this information to  
the Leader Tuesday, L. F. Bain,  
County Administrative Officer, said  
that the decision was reached at  
the meeting Tuesday that producers  
will be obliged to replant cotton  
where it is dry enough to plant, up  
to Saturday night, June 12; and  
that producers will have to replant  
on any farms that have been hailed  
or washed out in order to collect on  
cotton crop insurance.

Mr. Bain stated that in his esti-  
mation about 250 producers lost  
their crops through hail and rain;  
and that he would say between five  
and six thousand acres in crops were  
a total loss through the recent  
storm.

### County Bond Quota For June \$58,200

Pat Boone, Chairman of the  
County War Bond Committee, has  
announced the June quota at \$58,-  
200.

Joe Wells started another, and  
his third, one-man drive Thursday  
last for the sale of bonds, checks  
for which will be sent about the  
first of next week to Bob Burling-  
ame of WHO, Des Moines, to be  
broadcast over that station at a  
later date.

C. O. Stone, County War Bond  
Committeeman, stated Wednesday  
that good response was being made  
on the sale of bonds this month,  
but that a report on the amount of  
bonds sold so far this month would  
not be available until next week.

This is the third drive staged by  
Mr. Wells. His first campaign in  
March netted \$14,000 in War Bonds,  
and a second drive in April raised  
\$30,000.

### Roy Hutson Named Pres. School Board

the Littlefield School Board Monday  
night, Roy Hutson was elected presi-

year to succeed Ben Lyman. Mr.

five and one-half miles out of  
town and has served as Vice Presi-  
dent for the past year. L. C. Hewitt,  
local Chevrolet dealer, was elected  
Vice President.

The board attended to general  
routine business interviewing teach-  
er applicants and making ready for  
the vacancies which will occur this  
summer.

Miss Tommie Lou Matthews left  
Monday for Farwell to visit her  
aunts, Mrs. John Porter, and Mrs.  
Dale McCuen.

### Workers Needed Badly At Red Cross Sewing Room

Material to make 72 soldier kit-  
bags was received at the local Red  
Cross Sewing Room Thursday last,  
according to Miss Lula Hubbard,  
Supervisor.

In an interview Saturday, Miss  
Hubbard said:  
"We would like to get these kits  
made as soon as possible. Mrs. Sim-  
on Hay, County Production Chair-  
man, said they were badly needed,  
and that they would like to have  
them completed as soon as possible."  
Miss Hubbard said they needed  
more workers at the Red Cross  
room, and she urged all those who  
can to assist in the making of the

above kit bags.  
Two convalescent robes, which  
were made of scrap material, were  
completed last week.

War Salvage Meeting

War Salvage committee members, public officials and other community leaders, both men and women, from 23 counties surrounding Lubbock are being invited and requested by E. E. Kirkpatrick, Brownwood, Chairman of the Texas Salvage Committee, to attend an Area Rally in Lubbock Tuesday, June 15.

William A. Becker, Washington, D. C., Field Deputy for the General Salvage section of the War Production Board, will be the principal speaker at the rally.

Purpose of the June 15 gathering will be to stimulate renewal and intensification of salvage collection programs in the counties of the area, according to Mr. McAdams, who is working with the Lubbock War Salvage Committee and the Lubbock Chamber of Commerce in arranging for the affair.

Importance of the affair is indicated by the fact that the Lubbock OPA District Office has issued a special letter to all County War Price and Rationing Boards in the area authorizing the issuance of supplemental gasoline rations to officially designated salvage committee members sufficient to enable them to use their automobiles to come to the meeting, when it is not practical for them to use other means of transportation.

An attendance of around 300 is expected.

Counties to be represented at the rally include: Parmer, Castro, Swisher, Brisco, Bailey, Lamb, Hale, Floyd, Motley, Cochran, Hockley, Lubbock, Crosby, Dickens, Yoakum, Terry, Lynn, Garza, Kent, Gaines, Dawson, Borden and Scurry.

There is a very imperative need for

the immediate collection of all used tin cans, silk and nylon hose and other garments made of those materials, waste fats and all salvage copper, brass and bronze. In addition there is still a pressing need for all scrap or discarded iron and steel materials, he added.

Full explanation of the procedure followed by the Army in cooperating with civilian salvage programs will be Major Alfred R. Teter, Dallas, Salvage coordinator for the Eighth Service Command of the U. S. Army.

Eminently Correct!

On June 21, 1942, Tobruk, in Libya, was recaptured by German and Italian soldiers in North Africa.

At the time, Prime Minister Churchill was in Washington, conferring with President Roosevelt. As a result of their consideration of war strategy decisions were made which resulted in the occupation of North Africa in November.

At the same time, despite appeals from China and Australia for greater assistance, plans were set in motion to reinforce the British Eighth Army, which was rapidly falling back upon the Egyptian border.

In view of what has happened in Tunisia this past month, it is self-evident that the decision made by the President and Prime Minister, in conjunction with their military advisers, was eminently correct.

The test of a policy, in war or anywhere else, is the fruit thereof.

Quiet people aren't the only ones who don't say much.

A POWERFUL Norwegian Air Force has been mustered and trained in Canada and awaits the day of revenge. In spite of the fact that Norway was one of the first countries to come under the German heel it has now built an air force equipped and trained in Canada more powerful than it possessed before the war. The new air force is supported

largely by revenue from the Norwegian Merchant Marine which escaped the clutches of the Nazis. Camp Little Norway has been established in Ontario and here, amid rustic cabins that remind them of their home land, the traditional life of Norway is carried on by the young men and women who are training and working to wrest their country from the Nazis.

**Heart Attack Fatal To James T. Dick**

James Tolbert Dick, 53, farmer of the Pep Community, passed away at a local hospital Tuesday night about 11:30 o'clock, where he was admitted about 30 minutes earlier suffering from a heart attack. Mr. Dick had been a resident of Pep for the past seven years. At the time of going to press funeral arrangements were not quite completed. However, services are scheduled to take place at Morton Friday afternoon at 5 o'clock, with interment in the Morton Cemetery. Mr. Dick was born February 14, 1890. He is survived by his wife and six children, five sons and one daughter.

**Ration Books No. 3 Will Be Issued To Service Men**

Assurance that service men would be issued War Ration Book III has been made by Howard Gholson, district director of OPA. Numerous service men from the air fields in West Texas have been appearing before local boards to find out why they are not to make out applications for the books at this time. Applications of service men will be taken at a later date and final details for taking the applications are being worked out now, the OPA announced. Military personnel eating in their own homes were previously issued Book I and II. Book III is merely a replacement book and probably will not be put into use until August. Members of service men's families file applications for the book in the same manner of other civilians and must send in their applications before June 10. Filling station operators must comply with OPA regulations or risk suspension, the district office

of OPA warned today, in revealing that several operators in West Texas had been suspended from doing business on various violations of the program. Pointing out that a motorist may bring suspension upon a filling station operator by failing to endorse his gasoline rationing coupons, the OPA called upon the motorist to cooperate. No coupons should be leased to the operator without endorsing them on the back with auto license number and the date of registration. The OPA said the endorsement was the motorist's chief weapon against traffic in mileage rationing.

**PORE MONEY INTO BONDS**  
The average American family should and must be investing 25 percent of its income in war bonds by the end of 1943, Secretary of Treasury Henry Morgenthau, Jr., recently announced in a new "examined" bond campaign. "Of 45 billion dollars still necessary to complete our war financing needs in 1943," Morgenthau said, "at least 18 billion dollars, or almost 40 percent of the national income for the remainder of the year should be from purchases of bonds by individuals. From those workers earning \$1,000 to \$5,000 net, who have seven-eighths of all the cur-rently available individual savings, 25 percent of each dollar is not too much to invest. In fact, they should and must invest more if our goal is to win."

**STILL REDUCE POINTS**  
Retailers may lower the point value of rationed meats and fats which are in danger of spoiling until July 1, OPA has decided. These emergency reductions must be accompanied by a cut of at least 25 percent in the established ceiling price of the item. If the point value is reduced more than 25 percent, the price must be reduced proportionately, but never more than 50 percent below the ceiling.

**ICE BOXES FOR CIVILIANS**  
A total of 239,575 ice boxes are to be produced in the next three months for civilian use, according to the order of WPB. Despite limited factory capacities and scarcity of materials, the production rate is expected to reach about 75,000 units a month.

**HOW TO GET FARM SUPPLIES**  
According to a new WPB priority regulation, a dealer must furnish supplies if the farmer signs a certificate stating: "I certify to the Production Board that I am a farmer and that the supplies covered by this order are needed now and will be used for the operation of a farm." A total of 140 items are authorized by this order. Such certificates will enable the farmer to buy up to \$25 worth of any of the items on the list, and more if the certificate is approved by his local farm rationing committee.

**BUTTER PRICE REDUCED**  
A reduction of five to six cents a pound in the retail price of butter will go into effect Thursday, June 10. The OPA intends to effect the reduction with a minimum of financial loss to the dairy industry, from farm through the retailer. With a subsidy paid to them by the government, buyers of butterfat will pay as much for their butter as before and will be expected to continue to pay going prices to the farmer. "Butter shall include butter manufactured by a farmer on his own farm from milk produced on his own farm," according to an amendment to the maximum price regulation No. 1, under which maximum prices were established for creamery but-

**PROSECUTES VIOLATORS**  
In the four months ended April 30, the courts handed down decisions in 1,495 civil and criminal cases involving 1,676 defendants accused of violating the price and rationing regulations, according to OPA. Of the total, 1,437 cases involving 1,613 defendants were decided in favor of OPA. Only 58 cases involving 63 defendants, or 4 per cent of the total, were dismissed.

**ADDED TO RATION LIST**  
Evaporated and condensed milk are now on the list of rationed commodities with a value of one point to be made available to consumers for purchases. The rationing is intended to conserve limited supplies of infant feeding, special diets, and persons unable to obtain adequate supplies of fresh milk.

**WHEAT PRODUCTION GOOD**  
Wheat production in the United States for the first quarter of 1943 is estimated at 7,141,109,000 bushels, close to the first-quarter production needed to meet military and civilian requirements of 32 billion bushels for 1943.

**JUST AAA CROP PAYMENTS**  
Farmers who fail to plant 90 percent of their war crop goals will not receive the regular agricultural production deductions if the weather interfered with their crop plans. The War Food Administration has established the provisions in all areas where hay and pasture goals have been established. The action is designed to offset the effect of recent favorable weather conditions.

**SHOE PRICES REGULATED**  
New shoes, chiefly women's models, are made with such sole materials as plastic, felt, wood, combinations of wool and cotton, cord and synthetic substances, are under ceiling prices. Fabrics for the uppers include linen, cotton, silk, imitation leather and other types of cloth. Prices of shoes range from around \$1.25 to \$4.00 a pair.

## Mothers Of Sons In Service Entertained

A tea for Mothers of Sons in Service was served in the home of Mrs. George Wallace Friday afternoon with Miss Eloise Clark of Amherst co-hostess. Aldridge read "God's Pathway," Miss McCurdy sang "Over There," and "My Buddie," then the group sang "God Bless America." Mrs. Bill Clayton read Eddie Guest's 1943 "In Flanders Field."

Patriotic motifs and decorations were carried out in the service. Mrs. Cecil Parrish and Mrs. Charles Jones poured at the candle-light tea table. Some forty guests were registered by Miss Marie Ross, who prepared an interesting guest book, which registered the address of the boy in the service according to their types of services.

JUNE 13 MacArthur Day

GENERAL MacARTHUR

In recognition of General Douglas MacArthur's gallant stand in the Philippines, the Congress of the United States passed a resolution last year designating June 13 as MacArthur Day, for this date marks the forty-fourth anniversary of MacArthur's appointment to the United States Military Academy at West Point. MacArthur's works speak so highly themselves that there is little tribute we, ourselves, can express. We feel humbly thankful that there are men like him to lead our battle against the Axis.

**"Won't Be Fingerprinted"**

Americans by the million have been fingerprinted since the war began. Yet here are two of a group of war plant workers who strive diligently to avoid leaving their fingerprints. They are inspectors in a plant producing intricate parts for the Pratt & Whitney aircraft engines Chevrolet is building in volume for the air arms of the United Nations. So finely machined are the surfaces of these oil pump gears that the slight acid exudation in fingerprints would etch imperfections into the metal, so these men, giving the final visual and physical inspection, use hand lotion to avoid fingerprints. The gears shown above, limited to .0005-inch tolerance, are excellent examples of the precision manufacture necessitated by the war program. Twelve distinct inspections are made on these units.

Ford Community. The area from Littlefield to Spring Lake is said to have suffered severely from the hail and heavy rain. Earth reported a good rain but no hail. The rain extended about eight miles west of town and three miles south of town only a shower is reported, but no hail. Sunnydale Community had a good rain, but no hail.

Considerable chickens were reported lost in the Littlefield area.

Plainview reported some rain and a light hail near that city late in the afternoon. Hale County generally reported light showers, with little damage at any place, although there were strong wind and electrical displays at Abernathy and Hale Center. About an inch of rain is reported in the Anton area. Levelland reported an inch of rain, which fell late Sunday afternoon following a severe sandstorm.

From Morton came reports of a light rain, the first moisture Cochran county has had this year. Farmers in that general vicinity have not been able to plant because of drouth, and for several days sand had been blowing ahead of strong winds which have done extensive damage over a wide territory.

It is expected that considerable cotton over the area will have to be replanted.

# Miss Groves Predicts Bloody War With Japs

Miss Blanche Groves, returned missionary from China spoke at the First Baptist Church Friday night painting a picture of war-torn China as "the land that I love more than I love my own life," as she described it.

Miss Groves went to China in 1920 just at the time when the country had begun to recuperate from its long sleep within its walls. There she worked in a mission school in Soochow only 80 miles from Shanghai for 22 years. She held first hand knowledge of the condition of the Chinese, and as she was leaving China after a six month imprisonment under the Japanese Government she saw what she described as one of the mightiest Navies that a country could possess on the Japanese Seas.

"We have not even heard from Japan yet. The European enemies will be relatively easy to conquer, but one of the bloodiest battles ever to be fought is yet to come with Japan. They have a right to boast

of their Navy. They do have a strong one," she said.

Some of the prices on food and clothing which Miss Groves gave as existing in China today were: chickens, \$64 each; eggs, \$1.25 each; rice, \$300 a pickful (100 lbs.); overcoats from \$600 to \$1000; leather shoes, \$400 a pair; \$120 for a pound of coffee; \$60 for a pound of butter; \$10 per quart of milk.

## H. D. Club Members Help Labor Shortage

Home Demonstration Club members of the Brown Club, Martin County, have found a way to help the labor shortage and at the same time swell the club treasury. They have become expert paper hangers and have had so many calls for work that they could paper indefinitely if their home work and farm jobs did not claim first attention, according to Fern Hodge, County Home Demonstration Agent.

The Brown Club first started paper hanging when members of the club needed help in papering rooms in their own homes. In 1942, the club was short of funds and Mrs. R. C. Stocks, president, suggested that the club bid on the job of papering the school teacherage. The group got the job and has been busy every since.

Early this year the women learned of an apartment in Big Spring that needed papering. When the job was completed, word of the club's work spread and the women received other jobs, including the papering of a six-room house. The treasury boasts \$60 as a result.

The women, who guarantee their work, go about the task systematically, dividing the group into trimmers and cutters, "pasters," and hangers. One member puts on all the final touches. They are so expert now that the six-room house was papered in nine hours and the ceiling paper was hung in the last two rooms in 35 minutes per room.

Right now, with food preservation work in full swing, Brown Club members have discontinued their pa-

pering except in their own homes, but as soon as canning season is over they probably will be ready to gather their paste buckets, ladders and scissors for more paper hanging jobs.

## SINCLAIR TO INSTALL POWER TAKE-OFF ON DELIVERY TRUCK

Oscar Wilemon, wholesale agent for the Sinclair Refining Company, has ordered and will install soon on the Sinclair delivery truck a power take-off, which he states has the same principle as an electric pump. This will facilitate greatly the delivery of gas, and will enable the Sinclair Refining Company to deliver a much larger volume of gas, as it is electrically pumped.

### AVOIDS FIRE

When the belt on the motor of the meat case cooling unit at the Aldridge Grocery & Market began slipping Monday night after the business concern closed for the night, it caused considerable smoke, which would have, no doubt, caused fire if it had not been detected and remedied. Lawrence Walraven, night watchman, noticed the smoke, and called Mr. Aldridge, and he and Mr. Walraven quickly fixed the belt.

**So You're Going To Buy A New Roof?**

"Well, if you don't mind a little advice, based on experience, let us suggest two important points. First: have Wm. Cameron & Co. apply it. They have 75 years experience behind them and they will give you a guarantee that means something. Second: get a FLINT-KOTE roof. It will add beauty and color to your home and, in addition, earn you a low insurance rate because it is fire resistant. And something else; if you're like Ma and me you'll be interested in Cameron's easy payment plan."

## That's True....

... even though the electric light and power industry in America was called on to produce, in 1942, the greatest amount of electric power in history—189 BILLION Kilowatt Hours!

## And At The Same Time The AVERAGE COST PER KILOWATT HOUR TO THE CONSUMER IS LOWER THAN EVER BEFORE!

Not only were all the demands of war plants, military camps, naval stations, and arsenals met—but there remained 27 billion kilowatt hours of electrical energy to take care of the needs of shops and stores, 30 billion for homes, 13 billion for public transportation, street lighting, and other uses.

These are some of the accomplishments of the electric light and power industry, which makes it UNNECESSARY for you to stand in line for electric current.

## No second chance... no other choice!

For those who fall and freeze on the lime-covered doors of the cattle cars that carry them to German labor camps—there is no other choice.

For the little children of Tepelini and Salonika and Athens who wait with swollen stomachs for the food ship that never arrives, there is nothing else to do—but wait.

For the Russian peasant with no choice but to leave his home before the Nazis reached it; for the Chinese of Nanking who suffered the terrorism of the Jap; for all of those in nameless graves and lumberless cells—for all of them—there was no second chance, no other choice.

But for you—a choice still remains. For you—among all the peoples of the world, the road to freedom is still clear.

Never before have we been able to measure the price of freedom for ourselves and our children in such tangible terms. Will you help to keep the road to freedom open? Will you invest—all you can—in War Bonds?

It's not so much to ask. Many of us are making more money than we have for years. The things we'd like to buy with that money are scarce—or unavailable. So, we're asked to loan money at good interest—\$4 for every \$3 when the Bonds mature. Money to help pay for the war—keep prices down—provide peacetime jobs and peacetime goods and a generally decent world for all of us when the war is won.

Chances are you're already buying War Bonds—doing your bit. But don't stop there. Raise your sights—do your best!
