

Phone Rate Increases Given Council

Would Extend All City Rates

General Telephone Company representatives met with the City Council Monday morning and presented a four-pronged rate increase plan for the city that, if accepted, would extend toll-free service to Whitharral, to and from Bula and to approximately 186 rural farm homes surrounding Littlefield plus giving the phone company an increase in rates to cover the added service of dial phones that have been in operation since August 1960.

ASC Ups 141 Grain Indexes

L. D. Aten, County ASC director, said the County ASC Committee Tuesday approved 141 appeal cases concerning the Emergency Feed Grain Program.

Aten said the County Committee, acting as a review board, approved the appeals when producers provided documentary proof of grain production. The highest appeal case heard concerned a 98 acre base which had been set at 3368 pounds per acre. The producer proved his production actually was 8719 pounds per acre. He was therefore given this as his base.

"The committee had knowledge of most of the cases presented for appeals," Aten said. "They were figured too low because of the low county average."

"The majority of the appeal cases are in the 4500 to 5000 pound per acre class and located in the heavy irrigated feed grain land in the northern part of the county," Aten pointed out.

Early Wednesday morning about 300 farmers had signed up for the grain program with approximately \$150,000 paid out in advance payments.

Deadline for signing up for the program is Tuesday, May 30.

At School Board Meeting

Four Members Placed On Equalization Board

Four members were appointed to the Board of Equalization of the Littlefield Independent School District by the Board of Trustees at their meeting Monday night.

John D. Sralin, W. H. "Bill" Carter, David Keithley and Jim Mangum all who served on the Board of Equalization last year were named to serve this year. First meeting of the board was set for Thursday June 29.

Don Williams head coach was appointed to take care of the football stadium this summer. Specifically he will handle maintenance of the facilities and care for the grass on the field. In the past three coaches have been employed on a part time basis to care for the property. The board approved a salary of \$525 for the summer work to be done by Williams.

Harold Gouge assistant coach will be responsible for the summer work.

1961 Grid Slate Has 4A Contest

Don Williams, Littlefield head football coach, has released the 1961 grid schedule for the Wildcats.

Only one team has been dropped from the 1960 schedule. Clovis, N.M. who the Cats beat 18-6 here last season, has been replaced on the new schedule with Plainview, a AAAA team.

The Cats kick open the season with a game against Muleshoe here on Sept. 8. Last year, Littlefield beat Muleshoe in the season's opener, 28-0.

Other games listed on the 1961 schedule and last year's scores, of games were played are: (Littlefield score listed first).

- Sept. 15 at Seminole (20-20)
- 22 Brownfield (6-21)
- 29 at Plainview
- Oct. 6 Andrews (0-14)
- 13 at Colorado City (22-17)
- 20 Phillips (6-22)
- 27 at Dumas (29-16)
- Nov. 3 Open
- 10 at Hereford (15-6)
- 17 Levelland (8-26)

Pupil Transfer Deadline Slated

Transfer of a pupil made on the basis of parental request filed before June 1, 1961 shall qualify the child for all Foundation Program benefits.

This action also provides for transfer of per capita funds. Application on above transfers may be filed in the office of the County School Superintendent through June 1, 1961.

mer driving program. Driving this summer will be done by students who took driver's training during the school months but were not able to spend the required driving during that time.

Proposed changes and additions to next year's budget were presented to the board for consideration. Glenn Reeves superintendent pointed out that many of the changes from last year's budget were caused by a larger enrollment. Two of the changes would lower the proposed spending in the budget but if accepted the results would be a net increase of \$537 over last year.

The Board will not take any action on these changes or additions until late summer when the budget for the coming year is presented.

At the April meeting of the Board a request was made to have a plan presented concerning administrative reorganization. Such a plan was presented at Monday's meeting but was tabled for further study by the Board.

The plan pointed out that the majority of school districts place the utmost emphasis on the assessing and collecting of taxes and consider this as a separate office which is responsible to the Board of Education. The assessor-collector carries out the tax dictates of the Board and represents them in these matters.

The financial secretary is generally responsible to the superintendent. (Continued on Page Four)

National Week

Hospitals Here Are Saluted

A million and a half Americans work in hospitals today. Their jobs, including a wide range of skills from accounting to X-ray technology. The "Many Hands and Many Skills" joined together for patient care are being saluted during National Hospital Week, this week. In Lamb County, there are three hospitals that have combined facilities of 137 beds and rooms. The hospitals - South Plains in Amherst, Littlefield Hospital and Medical-Arts in Littlefield have modern and up-to-date lab facilities and X-ray rooms.

A force of over 80 nurses plus 14 doctors in the hospitals combine to give the county excellent coverage.

In the short-term hospitals which care for most of the people admitted to hospitals each year, the ratio of employees to patient is high. (Continued on Page Four)

FFA AWARD WINNERS—Pictured are the Littlefield FFA members who were cited for outstanding accomplishments at the annual Parent-Son Banquet held Tuesday night. They are from left to right, David Walden, Donnie Brantley, Steve Moss, Richard Reese, Dale Purdy, Thad Minyard and Kenneth Ogerly. See story below for complete details of awards and banquet.

At Parent-Son Banquet

FFA Honors Presented

Awards were presented to seven outstanding Littlefield Future Farmers of America at the annual Parent-Son Banquet Tuesday night. About 175 people attended the affair.

David Walden son of Mr. and Mrs. Gordon Walden received three awards. He won the Soil and Water Conservation medal given for outstanding work in conservation the DeKalb Award given to the outstanding Senior FFA student and the Who's Who in Agriculture Award and will have his picture in the school yearbook.

Others who received awards were: Dale Purdy son of Mr. and Mrs. S. A. Purdy the Farm Safety Award given to the boy who shows the best attitude toward safety both in classroom work and in the farm; Donnie Brantley son of Mr. and Mrs. Maurice Brantley the Farm Mechanics Award given to the youth who has done the most in farm construction and machinery maintenance; Kenneth Ogerly son of Mr. and Mrs. Rufus Ogerly the Farm Electrification Award given for the most work done on the farm in improvement of electrical facilities; Richard Reese son of Peyton Reese, the Star Greenhand Award given to the outstanding freshman FFA student; Thad Minyard son of Mr. and Mrs. J. F. Minyard the Chapter Star Farmer Award given to the boy who has accomplished the most in farming activities; and Steve Moss son of Mr. and Mrs. W. S. Moss Jr. the Outstanding Dairy Farmer Award given to the member who has done the most in dairy farming.

Tommy Thrash was presented with an Honorary Chapter Farmer Degree by local FFA members.

Thrash owner and operator of Littlefield Seed and Delinting Company was praised for his work with the chapter. It was pointed out that he had given enough cotton seed to plant the member's projects.

Those present heard Bill Mote former Littlefield FFA chapter member and president of Area 1 speak of his appreciation to the local chapter the advisers and the FFA work as a whole.

He said he had many pleasant

memories of the Littlefield chapter and through the "influence of W. W. Hall and James Pirkey caused me to decide to major in Agriculture in college." In relating back to his beginning in FFA Mote said "If anyone had told me that I would be making speeches to groups like this when I was a freshman I would have laughed at them but I now look forward to speaking. I know that I couldn't have done this without the

training I received in this chapter." Mote is a freshman at Texas Tech and will close out his year as Area 1 president this summer. He is a 1960 graduate of Littlefield High School.

James Cole, state vice-president of FFA spoke to the group about the challenge of tomorrow as related to the Future Farmers. He said we are now in the midst of a great change and because of this change we are weak and open to wrong thinking. "Communism," he stated, "is the greatest threat to America and it must be met and defeated by the young men of today."

Cole, also a Tech freshman, continued that he felt the FFA is the greatest youth organization in America because it is based on equality with each youth starting out equal to the other. "What a boy gains from this program," he stated, "depends upon just how much of himself he wants to put in." Cole is from Slaton.

The banquet opened with the regular ceremony carried out by officers of FFA Steve Moss served as toastmaster and Glen Miller gave the welcoming address. Elmo Jones, local building contractor, gave the response and said, "This banquet is the parent's opportunity to see the advances the local FFA Chapter has made." "The future of this part of Texas is based on the future of agriculture," he commented.

"There is no greater motto than that of the FFA," Jones concluded, "Learning to do, doing to learn, earning to live, living to serve."

Entertainment was provided by the Night Prowlers with Jerry Lancaster at the piano, Keith

and to be done for hire with county equipment and machinery and after full discussion and deliberation it was decided that some land owners' failure to pay for such work, done on their order, has caused considerable loss and expense to the county.

A motion was made by Commissioner A. J. Spain and seconded by Commissioner Hubert Dykes that effective immediately, soil conservation work to be done with machinery shall be performed under the strict condition of cash payment on completion of work and henceforth no such work shall be done on open account or on any arrangement for deferred payment.

Reports of the County Agent, Assistant County Agent and the Home Demonstration Agent were approved by the Court.

In other action the bills were read and approved for the past month.

WILL PRESENT CONCERT TONIGHT—Members of the Littlefield High School concert band, pictured above, will present their annual spring concert tonight at 8 in the High School auditorium. The band plans a "pop" type concert presenting a lighter music than usually heard in the annual concert. Don Hayes, band director, said the reason for giving this type of concert is to let the public enjoy the music and will include some familiar selections. In addition to the concert band, the Junior High School band and the 20-piece Beginner Band will also perform during the concert.

Planning Of Dream Kitchen Important Facet Of Home

If you're like most U.S. home makers, you've dreamed (or are dreaming) of a kitchen where efficient meal preparation combines with decorative beauty. Experts say a few key ideas can make your dreams a reality if you're looking for a new home or planning to remodel your present kitchen.

Your dream kitchen should start with a step-saving floor layout. Experts suggest special attention in locating the three most used appliances: the range, refrigerator, and sink. Although the distance between them may be only a few steps, a recent survey spends over 50 per cent of her at home waking hours in the kitchen and, in the course of a day, those few steps can add up to quite a hike.

"The work triangle is a good way to check your kitchen floor plan," says Fred Montiel, national kitchen expert. It's the distance from the center of the range to the center of the refrigerator to the center of the sink and back to the center of the range. It can be used in any of the four most popular types of floor layout: U-shaped, L-shaped, corridor or one-wall. Identify no side of the triangle should be shorter than 12 feet nor longer than 27 feet.

Storage space, especially in cabinets, should be carefully planned for your dream kitchen. Experts recommend grouping storage at the three points of the work triangle. Around the sink you'll want room for utensils, china, glassware, and silverware. Near the range allow for storage of the larger cooking utensils. Extra working space on the counter is also important at this point.

At the third angle of the triangle, in addition to the refrigerator itself, plan plenty of space for receiving supplies and for storing non refrigerated foods. In general, the nearer this point is to the outside door, the better.

Preparation, cooking, and cleanup—these are the three basic parts of a homemaker's work in the kitchen. Frozen and ready-to-cook foods have drastically cut the first one, preparation time.

For your dream kitchen select appliances to save time on the other two types of kitchen work. "Potwatching is as old-fashioned as fireplace cooking," says George Myler, Director of Product Planning for Caloric Appliance Corporation. "The homemaker who selects her cooking appliances carefully can enjoy and set it and forget-it cooking. Modern controls start the range at the right time; keep the food cooking at just the right temperature; stop the range at the right time; and keep the food warm without further cooking until it's time to serve it."

Easy cleanup is getting attention for appliance manufacturers, too. Dishwashers and disposers are becoming standard items in modern kitchens, and such features as completely removable oven doors are making cooking appliances easier to clean. You'll want to check these carefully for your dream kitchen.

Efficiency by itself isn't enough for a dream kitchen. You'll want attractive appearance, too. Famous New York stylist, Beatrice West, says color styling is the secret of a beautiful kitchen.

"Color," Miss West says, "can affect our emotions, even though we may hardly be aware of it. A color scheme can set the whole mood for your kitchen whether you want it sophisticated, homey, dramatic, or what have you. Color can also change the apparent size of your kitchen or the things in your kitchen. In general, light colors make things larger and dark colors have the reverse effect. Miss West stresses the importance of a complete kitchen color plan. Appliances, countertops, wallpaper, paint, floor coverings, and accents should all add up to one harmonious blend, she points out. A plan should be prepared before the kitchen is started and actual samples of materials of material should be collected and attached.

because color is such a complex subject, Miss West suggests that you seek expert help through manufacturers, dealers, designers, department stores, kitchen plans, and so forth.

Amherst P-TA Sponsors Tea

AMHERST - The Junior-Senior Tea, an annual courtesy of the held Monday night in the community center.

The combo, Arkansas Ridge Runners, furnished music for the occasion.

Autograph books were favors from the P-TA and the exchange of autographs was enjoyed.

Mrs. Gene Campbell was general chairman. Several committees assisted her.

Guests were seated at four round tables and raspberry punch and assorted cookies were served from the tea table with an arrangement of red carnations for decoration.

Mr. and Mrs. Lamar Kelly, Mr. and Mrs. Ray Blessing and Mr. Kenneth Vales and other P-TA members enjoyed the affair with juniors and seniors.

Good lighting is a must in your dream kitchen. It adds both efficiency and beauty.

Lighting experts suggest good overall lighting for the entire kitchen plus special lighting at each work point.

Don't overlook the effect of natural daylight either. Locating work areas at windows is usually a good idea.

Occasionally a window admits too much light. If you have such a situation you can remedy it with curtains. A dark wall opposite the window will also help by absorbing sunlight.

Mrs. D. K. Boone Feted By Shower

Mrs. Ralph Maurer and Mrs. Ray Keeling honored Betty and May Belle Ayres, daughters of Mr. and Mrs. S. E. Ayres, with a graduation tea, Saturday, in the home of Mrs. Maurer.

Jeanne Garrett Feted At Earth With Shower

EARTH - Honored with a bridal shower at 8 p.m. Friday in the home of Mrs. Robert O'Hair was Jeanne Garrett, bride elect of Norman Clayton.

The approximately 40 guests attending were registered by Peggy Stansell at a table accented with an arrangement of pink roses in a pale pink cut glass vase. Guests were served from a table laid with white, slipper satin and overlaid with tiers of white net. A large brandy snifter inverted over a miniature bride and groom beneath a cascade of pink sweet peas, roses and lily of the valley all on a base of styrofoam trimmed with pink net formed the centerpiece.

Betty Joyce O'Hair served individually iced white cake squares decorated with pink flowers and silver wedding rings while Miss Sharon Hay poured pink sherbet punch from the crystal service. Napkins were white engraved with silver, "Jeanne and Norman."

Spring flowers were used on the piano and elsewhere in the entertaining rooms.

For the program Mrs. E. C. Hudson gave a dialect reading and Anita Sharon O'Hair presented a background music was furnished throughout the evening by Mrs. R. O. Dickson at the piano.

The honoree was presented a pink, carnation corsage.

Co-hostesses with Mrs. O'Hair were Mrs. Perry Martin, Mrs. C. Hudson, Mrs. David Johnson, Mrs. Enos Harper, Mrs. George Kasinger, Mrs. Chubby Dent, Mrs. Marvin Brown, Mrs. Clien Hay, Mrs. Ray Stansell, Mrs. Bill Beasley, Mrs. Roy Gover, Mrs. Albert Taylor, Mrs. Lawrence Sloan, and Mrs. Lewis Faver.

BEHIND THE SIGN

What is the story behind this "For Sale" sign? Is it just a house that's for sale, or is this a tale of happiness or sorrow—of success or defeat?

Let's hope this story has a happy ending! But this isn't a world of make-believe we live in. God made us human beings, not puppets. He has given us minds and bodies, nerves and muscles—and weakness as well as strength.

Maybe the story behind this house is a happy one. Maybe it's a sad one. Regardless, the people who lived here, like all of us, will be able to accept both good fortune and bad if there is yet another house in their lives.

The House of the Lord, the Church, has been built to endure through the ages. Here we will always have a home—during our lives on earth as well as throughout eternity.

THE CHURCH FOR ALL . . . ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

FOR ACHIEVEMENT—Max Don Barnett (second from left), a student at Western Baptist Theological Seminary, Fort Worth, was cited for achievement in the field of Old Testament at the seminary during a special award chapel May 10. Letters To The Editor

Mr. Tooley, Littlefield, Texas: I am writing you regarding your editorial of this morning in which you propose to print a series of articles regarding Communism in this Country and Internationally, may I simply state that such articles can only do our country good, and if strong enough, perhaps will awaken our citizenry to the subtle threat, but deadly threat, thrust upon us by this cancer of Communism.

POINT

As we don't like the idea of a big dose of castor oil. But when we're sick and that seems to be the only remedy that will cure us, we take the castor oil! The State of Texas is confronted with a biennial budget of \$2.5 billion, of which more than \$100 million must be raised from new tax sources. The general fund is already more than \$65 million in the red. For many years now there has been a tendency to ride the same old tax horses harder and harder, but now many of those old horses just can't stand up under the load any longer. The tax tube in Texas has been patched and repatched so long, there apparently isn't room left to put on another patch that will hold. So about the only solution that remains appears to be to throw away the old tube and start with a new one.

The Legislature, despite the personal pledge of many of its members who vowed they would not support new taxes, needs to quickly awaken to the evident fact that the state's finances are in a pretty sad way, and that the only way to mend them is to stand up and start acting like statesmen instead of politicians.

First, they can speak out for economies that can be instituted instead of looking for new ways to spend more money. Second, they can face the issue of fair and equitable taxation squarely and let the chips fall where they may.

If we personally had our "druthers," we would druther not have any new taxes, but that's wishful thinking. We are convinced that any other tax route will merely be a step toward temporarily stalling the inevitable. That inevitable as we see it, is some type of broad-based, general sales tax which will not be so amended with exemptions that it will end up being what we already have—a bunch of selective sales tax on certain items.

Besides raising a whole lot of money, such a tax would make the people conscious of the tax burden they bear every time they spend a dollar. We might get a different outlook on "big government" which could be a real blessing.

None of us as businessmen relish the added responsibility of being a tax collector, for the state, having our hands full already being one for the federal government, search and a facing up to reality, we see little likelihood of solving the problem any other way.

W-K Humbles Queeners 7-1 in PONY Play

Ware-Keeling trounced Dairy Queen 7-1 Monday in the kick League season. WK came up with three scores in the initial frame, enough to wrap up the victory, and then padded its margin one in the fifth, one in the sixth and two in the seventh. Dairy Queen notched its lone tally in run in the sixth. Jerry Cox was the winning pitcher for the W-K'ers while Keith Kinsner absorbed the defeat. Prysol Hodge led the winners at the plate with three hits in four at-bats. Steve Lowe had three for five and Jerry Cox and Terry Hyatt each had two bingles. Burr Heathman led Dairy Queen with two hits while Wendell Brent and Ronald Sitton each had a safety.

Giles Implement Adds New Lines

Giles Equipment Co. 1016 E. 9th in Littlefield, has added two new lines of equipment to its sales inventory. Gleader Baldwin combines and Allis-Chalmers tractors are the new farming lines added. The Gleader Baldwin combine offers to the farmer 12, 14, 16, 18 and 20 foot cuts. These are just part of the 88 features that have made Gleader-Baldwin one of the world's most popular combines in every part, with the farmer in mind. Giles has a complete line of parts and can give the buyer the size combine needed with or without cab. Performance, economy, operating comfort and farmer safety are only a few of the extraordinary features of the Allis-Chalmers tractors now offered by Giles. With A-C farmers have horsepower for drawbar job, power takeoff driven machines and mounted implements.

Mr. Wendell Tooley, Littlefield Press, Inc. Littlefield, Texas. Dear Wendell: I read your article in the paper on Communism and am proud of the fact that you aim to write some more. The Freedom Forum that you attended in Lubbock was one of the finest anti-communist campaigns that these parts have known. Thanks again for bringing the facts before the public. Yours truly, W. H. Carter

Waste for Water? Atomic waste products, which are now expensive to dispose of, may provide future power for desalting sea water, says Dr. A. L. Miller of the Department of the Interior. It is happening here every hour of everyday and Mr. Krushchev, on January 6th, 1961, told the world that "We will take America in 100 months." Will we wait until the Red Flag of the Devil himself is flying over America?

Monday Begins Annual Event

Anton Has Clean-Up

Anton held its first annual Clean-up Campaign Monday morning. The event is being sponsored by the Anton Garden Club with help from the Lions Club, Business Men's Club and the FFA boys.

The campaign starts at 9 a.m. and continues until 10 when all the workers met in the City Ca-

te for free refreshments furnished by one of the local business men. All business houses were closed until 10 so everyone could help in the clean-up.

Garden Club members cleaned the City Park the club project for the past seven years. Business cleaned the fronts and alleys of the places of business.

"The Clean-Up campaign will continue throughout this week," George Broome, mayor, said. "The city will haul off everything that is put in the alleys."

The Garden Club is planning to make the campaign an annual event, Mrs. Bob McQuire served as chairman of the clean-up this year.

Hormones at Work
A new scientific report suggests that tiny differences in hormones may help explain why lung cancer most often strikes men, and why men suffer from some kinds of heart attacks much more often than women.

A Big Drop
Since 1900 the U.S. mortality rate has dropped 45 per cent, largely because medical science has brought contagious diseases under greater control. Health Information Foundation reports the death rate from tuberculosis is only 3 per cent of what it was in 1900; for influenza and pneumonia, the death rate is 14 per cent of the 1900 figure.

SPRINKLER SYSTEMS—Farmers in the Lamb County Soil Conservation District are giving more and more consideration to the sprinkler-type of irrigation system in contrast to the conventional narrow-type flooding method, according to officials at the SCS office in Littlefield.

Conservation Practices Provide Farm Land For Future Generations

our soil. Take away the top soil and the livelihood of the people is gone. Then nature has to spend many years rebuilding the soil to where it will produce again. History shows us what can happen to the land where conservation is not practiced. Take the city of Kish. It was one of the world's most important cities 6000 years ago, but a few years ago archeologists excavated the ruins from the desert sands. The city of Babylon and the surrounding area was a rich irrigated country but misuse of the land silted in and covered the irrigation channels so today only the ruins remain. While at the same time there were areas of the Nile River Valley that were being farmed and remain today as productive lands. In a way those people had the advantage of the people of today. They could move to a new area and start over but we of today have no place to move. Therefore

An awards program will be held when the Outstanding Bandsman of the year will be named and the annual Senior awards will be made.

Guest speaker for the evening will be Dean Killion, band director from Texas Tech.

Mrs. W. H. Lyle was in Lubbock Sunday afternoon to see her grand daughter, Bonnie Bell Aten, perform in a watershow held at the coliseum. Miss Aten performed with a group from Denton where she attends school.

The Sudan Hornet Band was

the only band in its class to receive first division ratings in all events entered by the band at the Tri-State Band Festival in Enid, Okla. last week.

The group received a first division rating in marching, concert playing, sight reading and street marching.

For each rating so many points were given in the four events listed above as well as points in other choirs, stage bands, and individuals and ensembles.

Earning the most points in the Class C group composed of ten bands was the Mooreland, Okla. band.

Students from here who received ones in solos and ensembles included Linda Chapin, on one on the Alto Sax; a Sax quartet composed of Dyanne Curry, Frances Wiseman, Carol Ann Watkins, Jenney Seymour.

Band Director Lee Boyd Montgomery said that he especially wanted to commend the band students on their excellent conduct

Social Security Working Credits Are Explained

"One question we hear a lot of," said John G. Hutton, District Manager of the Lubbock Social Security Office "is how much social security credit is needed for people to qualify for old-age or survivors benefits?" Today, this news

during the four day trip. He said a number of nice compliments on the good behavior of the band students were made by Enid business people and residents.

Rev. Hubert Austin was in Odessa Monday evening to speak at a Brotherhood meeting at the First Baptist church there.

Mr. and Mrs. J. W. Olds returned Friday from a fishing trip to Conchos.

paper offered Mr. Hutton the opportunity to give the answer.

Mr. Hutton not only gave us the answer, but it's news. The Social Security act was changed in 1960 and the amount of work covered by the program needed by workers now reaching or past retirement age, or who have died, is less than it was. Under the old law, the worker needed social security credit equal to one year of work for each two years after 1950 and before he died or reached retirement age.

The new law, however, specifies that this worker now needs social security credit equal to only one year for each three years after 1950 and up to the year he reaches retirement age or dies. Under both the old and the new law, the social security credit needed can be earned anytime after 1936 - no one needs credit for more than 10 years' work and a minimum of a year and a half of work under Social Security is always required.

Because of the new law, many people who have had their claims

rejected because of lack of sufficient work credit, may now be eligible. For instance, all workers who reached retirement age (65 for men and 62 for women) before 1957 need credit for only 1 1/2 years of work under social security to be eligible. Under the old law, only people who reached retirement age before July, 1954, could qualify with credit for only 1 1/2 years of work.

Mr. Hutton urged people who have had an application for benefits turned down, or who have failed to apply or report because of insufficient social security credit, to get in touch again with the social security office. They may now be eligible for benefits.

A representative of the Lubbock Social Security Office will be in Littlefield on each Thursday in a year and a half of work under Social Security is always required.

Because of the new law, many people who have had their claims

Flair simply slides into place of your old electric range—on optional cabinet or your own custom-built cabinet. Every surface and oven cooking feature you've ever wanted in one compact unit—yet cost little or no more than an ordinary top model electric range!

4 stunning models — 40" or 30" widths to fit your kitchen. You'll never believe that anything so beautiful could be so downright practical until you see Flair. Isn't it time you changed your range?

Enjoy new After-Meal Freedom... Do dishes once a day!

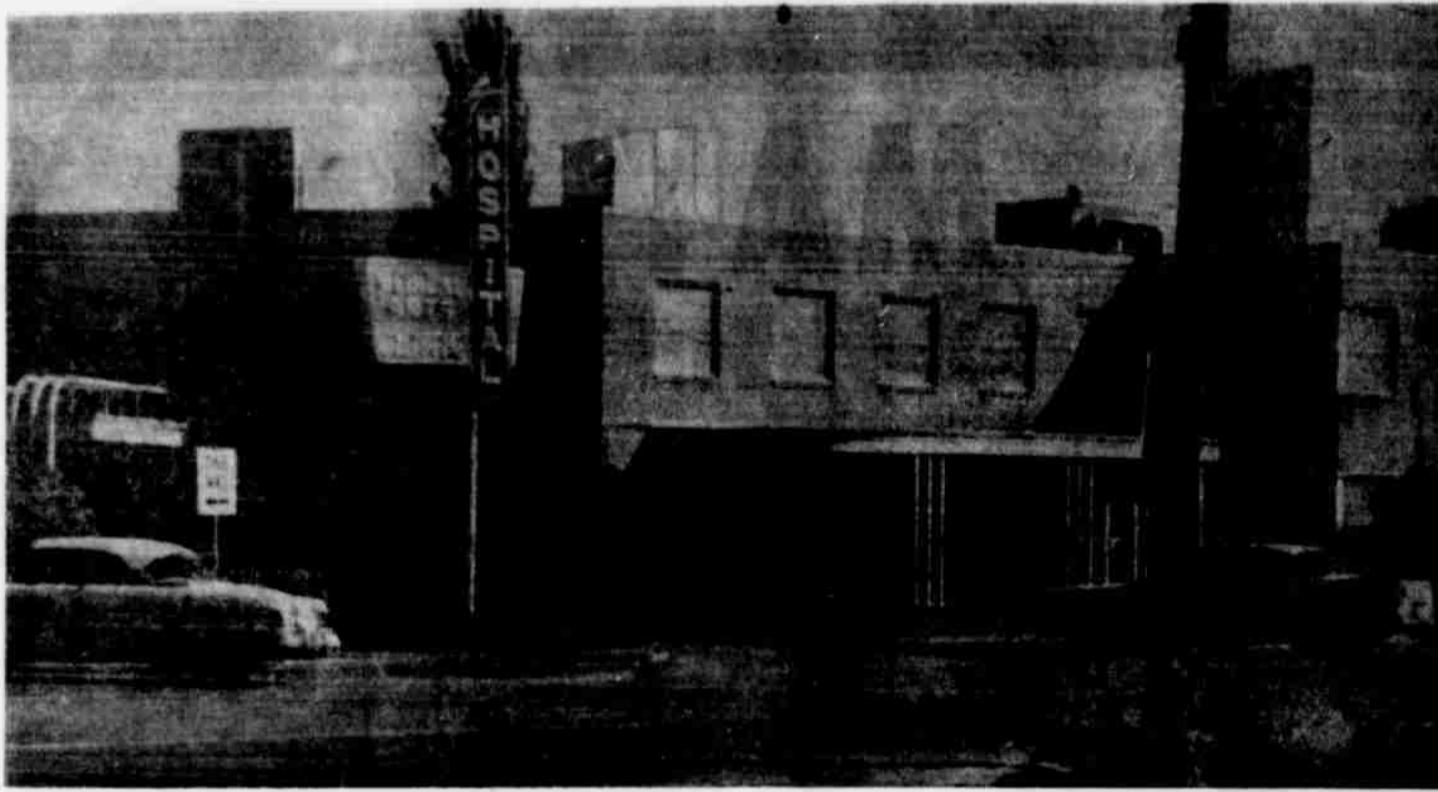

Frigidaire Custom Imperial and Deluxe Under-counter Dishwashers do an average full day's dishes for a family of 4—all at once! Large 12 place setting capacity (NEMA Standards), easy front loading with Roll-To-You-Racks. Exclusive Swirling Water Washing Action scrubs every soiled surface with walls of water, too hot to touch. Tableware is scrubbed, rinsed, and dried to sparkle-bright luster.

Custom Imperial model (left) features automatic Dual Detergent Dispenser and Spots-Away Ejector for peak Dishwashing results. Both models have push-to-close doors; add-a-dish-anytime flexibility; cycle choice; and wide color selection.

NATIONAL HOSPITAL WEEK MAY 8-15

"THE HOSPITAL...
MANY HANDS AND MANY SKILLS"

FOR THE HEALTH PROTECTION
OF OUR COMMUNITY

This hospital has a well trained surgical staff and is equipped to do most major surgical procedures, serving this need for this entire area.

The doors of the Medical Arts Clinic-Hospital have been open continually since its beginning in 1938 ... and besides maintaining around the clock hospital and medical service it has become a definite part of community life and community progress.

In 1948 the second floor addition was completed, affording a total of 40 private rooms ... no two bed rooms. Today it is modern in all respects ... modern air conditioning, spacious dining room and kitchen, walk-in food freezer compartments, hospital on the quiet second floor, clinic and business offices on the first floor.

With the expansion of the physical facilities have come more modern X-ray equipment, a large delivery room complete with all of the latest medical advancements. And most of all, has been the continual addition of more medical doctors who have the technical skill so necessary for the patient's recovery.

The management and staff of this hospital are proud to be of service to this community and area hour after hour and year after year.

ACIDIZING WATER WELLS. Helping to improve the GPM flow of irrigation by acidizing wells can be a big boon to county farmers. Here, Jack Carrigan, an acidizing company representative, left, watches a test flow from a well belonging to Norman Emfinger, center, that has been acidized. Watching them, right, is B. T. Kisner, SCS official. Acidizing helped to improve Emfingers well by over 60 GPM.

From Your Chamber Office

By Gene Garrison
The Littlefield Board of City Development has taken hold of the problem of Industrial Development in businesslike fashion. Their work at present consists of an intense study of factual data. The board has gradually and diligently assumed this tedious task on behalf of all of the people of the Littlefield area. Before Industrial Development can be realized the Board of City Development will need the support of the residents of Littlefield as a whole. This support is vital because the "attitudes" of the community are so vital to a potential incoming industry. We hope each one of you will give serious consideration to this important aspect of Littlefield development in the month ahead.

Keep in mind that any quantity of industrial development may not come for an extended period of time. We still have to start immediately to be ready at that future date. This future development depends on dove-tailing a lot of work done by the Board of City Development, City Council, Master Planning Commission, Chamber of Commerce and the Chamber of Commerce have already indicated that they are anxious to participate in a long-range well-planned program of City Development. The Board of City Development hopes that the general program can be presented to all of our local organizations for their consideration and adoption. Any group desiring presentation on Industrial Development may obtain a program by contacting the Chamber of Commerce Office. We believe you will share our enthusiasm for considering the factual data relating to industrial development.

If you perchance are thinking that Littlefield does not need to industrialize because we are in a farm area; I would appreciate your consideration of the following factors. (1) The farm population is diminishing. Mechanization has made it possible for one farmer to work more land. This cuts down on the number of farmers and the number of employees a farmer hires. It should be readily apparent what this factor alone will eventually do to Littlefield business. When we think of business we must consider the county population as well as the urban population. (2) Industrial development would help our farmer because any reasonable industrial aspirations we have would do one of two things; Produce or process a product they use, or process a product they produce. For that reason the farmers of this area should, and I presume would, work with Littlefield in this endeavor. We are fortunate to have a very good group of progressive-minded farmers in this area. (3) With very few exceptions, the young people graduating from our schools will be forced to leave Littlefield for their life's work. Losing our youth has long been recognized as an emotional strain on the adults living in areas such as ours; children etc. forced to live miles from their families and friends making a hardship on the parents and the young people. In addition losing our youth is an economic dream of our community, students are educated by the taxpayers. As such time as they grow up, obtain jobs and they are supporting another community where they now live. On the other hand, major taxpayers in our community must pay the education bill for generation after them remaining here to help carry the load in the future. With proper emphasis on Industrial Development we can reduce this trend. (4) Industrial Development provides an advantage to the family household budget. As a buyer of household goods you will be able to buy more economically in most instances. The reason for this is that the increased and steady payroll levels of to a degree the spurt buying of a primarily agricultural economy. Keep in mind that the low points of agricultural buying would be raised; the peaking would simply start from a higher gross business base. The increased annual retail sales would mean more special prices, etc. to attract your attention because the average business would have a large gross sales base on which to speculate. (5) Industrial Development would aid salary workers because the retail businesses would do a larger gross sales and be in position to increase workers salaries. A larger gross business would potentially mean more profit, hence be in a position to raise the salaries of the personnel capable of increasing their productivity. Industrial development would also offer some opportunity for

off-season employment for many farmers and farm workers. This could add a valuable balance to economy to many of our fine Lamb County families. (6) Industrial Development would be valuable to all property owners in the area. Regardless of whether you own a home, farm-land or commercial property, it would enhance the value of this property. Regardless of your profession or vocation it would be well worth your while to consider the assets

...NATIONAL HOSPITAL WEEK

MAY
8
TO
15

In 1938 the original Littlefield Hospital was built by Drs. Roy E. Hunt, Thomas B. Duke, J. R. Coen, William N. Orr and Mr. Floyd Coffman.

Littlefield Hospital was originally designed and built for 20 patient rooms. The emergency room and other facilities were added in 1956. Then in 1957 a new clinic was added, thereby increasing room for additional doctors and patients. In 1959 an entire second floor was added and the lower floor completely remodeled.

May 12 marks a memorable day in the area of medicine and care in that this is the birthday of Florence Nightingale the founder of our wonderful nursing profession.

We at the Littlefield Hospital and Clinic are proud to be a part of the medical care picture of Lamb County. We are proud that we are able to offer these fine facilities that are made possible by our American way of life. We invite everyone to join with us this week in the recognition of NATIONAL HOSPITAL WEEK.

Eighth Grade At Olton Themes Stars At Fete

The annual Eighth grade banquet, a courtesy for the Eighth grade students, was held Friday night in Fellowship Hall of the First Methodist Church with the ladies of that church as hostesses.

The invitation read:
You can't ride a missile
You can't walk to Mars.
But come to the Church
And climb the Stairway to the stars.

Silver stars and blue clouds decorated the hall. White candles, bowls of iris and greenery decorated the tables. Sky blue stars decorated the place cards. Napkins were folded to make a stairway. Programs were blue decorated with silver stairway stars and moon.

Thirteen warblers composed of Jani George, Terri Miller, Lorita Blades, Rosa Lee Miller, Pam Hair, Judy Dennis, Lana George, Cheryl Langford, Deanna Thompson, Mary Roberts, Deena DeBerry, Deanna McKnight and Paula Jones sang "Catch a Falling Star" and "Over the Rainbow."

Suzanne Martin read the class prophecy.

Rev. W. F. Gaede introduced the main speaker, Rev. Allen Adams of Shallowater. Rev. Adams challenged the students to reach for the stars.

Menu consisted of baked ham, french peas, potato boats, pear salad, hot rolls, butter, iced tea, cream and cookies.

Approximately ninety eighth graders attended and their teachers.

Federal Aid Leads To Federal Control

The sovereignty of our states is threatened by federal spending policies that inevitably are accompanied by federal control of programs resulting from those policies.

The battle of the federal budget which must be waged year after year has to do with a very real deal of money. In fact, the federal government's spending is going on now at about the rate of \$2000 per year for every family in the United States.

We should not conclude, however, that the big spenders have to do with money. As a matter of fact, the battle is not even waged primarily with money. Much more is involved. The necessary struggle to reduce government spending is primarily concerned with the design of a plan for our nation's life, worked over many years. The design is strong and carefully balanced, built to endure if we let it be and if we will not set about deliberately to destroy it.

We, the people of the United States, will continue to be urged by every kind of persuasion to demand that the federal government adopt all sorts of new schemes for the states with their own money to take care of the needs of their own people.

This money will be taken from the American people from you. It will either be taken now or placed on the bill to be paid later. Its expenditure will either call for a bigger federal budget or to the already mountain-high national debt. The added spending will foster continued inflation and lower the value and honesty of the American dollar. It will leave us vulnerable to attack by the anti-freedom. Mistaken manipulation of gold or other economic resources.

That is a long list of evils growing out of unbridled government spending. Those evils have to do with money. And yet it may be repeated the economic effect of such spending is not the most important and most far-reaching effect. If these enticingly presented new programs were federal aid to the states are carried out, the greatest evil will be the injury to our sovereign freedom of our states and the liberties which can be safeguarded only through the preservation of that sovereign freedom.

Trade In Texas On Decline

The travel industry is the third biggest economic factor in the nation, but Texas' share of it has been declining steadily since 1957.

To reverse this trend, the Texas Motel Association has given a plan to the Legislature which asks to help the state's general economy as well as the many-sided travel and tourist industry. Texas motels must collect a 3 per cent tax on persons who rent rooms, and last year they collected over almost \$3 million into the state treasury. Why not, ask the highway hosts, take 10 per cent of the tax collections each year and use the money to advertise for additional vacationers?

The national magazine of motel management, MOTEL COURT JOURNAL, points out that 10 of the states already use the tourists' own money to advertise for more tourists and that Texas is falling far behind in the race. In 1957, for instance, out-of-state vacationers spent \$64 million more in Texas than they did in 1960—the difference going into the businesses and tax revenues of other states.

Legislators have changed Texas laws to permit motels to advertise for tourists, but money allocated for the Texas Highway Department's use for this job has been inadequate to compete with the multi-colored enticements of other states. Bob Perry, executive secretary of the Texas Motel Association, said the state's 3,600 motels

The American principle that state and local governments should do whatever ought to be done for the people by their governments is part of the traditional and wholesome emphasis on the individual and the family. Local governments are closest to the individual citizens and, consequently are most likely to be answerable to them. Central governments are always farther removed from the individual. They operate by mechanical rules. A big impersonal bureaucracy comes to treat human beings almost as things, whether the problem is education, medical care, welfare, or anything else that directly concerns the lives of people.

There is another compelling reason that the sovereign freedom of your state is important to you and your family every day. This is the means chosen by the Founding Fathers to make certain that governmental power is divided.

That is the first axiom of American freedom. The makers of the Constitution set out to insure for all time the division of governmental power. They were accomplishing exactly what they considered to be the most important task of all when they placed strict limitations on the power of the central government. There was nothing accidental about it.

We Americans have in the sovereign independence of our states a political design as beautifully fitted together and as delicately balanced as a finely made watch. Both require care if they are to operate correctly.

No more effective method has ever been devised to destroy the delicate harmony of our federal-state system than that bribery of the states called federal aid. Do you personally want more such bribery? Are you willing to help destroy the beautiful design for balanced power which the Constitution gave us in trust for future generations and which is our greatest gift to other peoples yearning to be free?

We, the people, can save or lose our freedom from monopoly government. We can insist that our sovereign states must do their own work and that local units of government must do their own work, with no bribes from Washington asked for or taken. Or we can do nothing. If we, the people, choose to do nothing, we will be consenting to the loss for all time of the seeds of liberty for our children and our children's children.

actually are in the minority among businesses which will gain through heavier influx of tourists. The 8.6 million visitors to Texas last year spent \$157 million in the state, Perry said. Out of the average dollar, he explained:

- 20 cents were spent in retail stores,
- 28 cents were spent for food,
- 8 cents were spent on recreation,
- 3 cents were spent on tires, auto parts, repairs.
- 19 cents were spent for gasoline and oil, and
- 22 cents were spent for lodging.

Perry cited Texas Highway Department records showing the average vacationer spent six days in Texas, toured 1,105 miles in the state, leaving \$8.91 a day among merchants along the way.

"By regular use of 10 per cent of the tourist tax for additional tourist advertising and promotion," Perry said, "Texas can regain the \$64 million a year it is losing to other states. Not only will many small businesses of Texas profit more, but the general public will get the benefit of a more prosperous economy and more of the tax burden being shifted to out-of-state visitors."

One Southern governor has stated it another way: One out-of-state tourist brings more cash profit than a bale of cotton, and he's a danged sight easier to pick!

Federal Retreat Seen In Taxation Field

The House of Representatives of the Texas Legislature unquestionably was wasting its time when it petitioned the federal government to get out of the excise tax field and leave it to the states. For at the same time the Texas legislature were making this plea the lower House of Congress was approving a plan for channeling billions into the huge interstate highway program. And the highway financing plan is based upon excise taxation.

An excise, as the term generally is used, is levied on the manufacture, sale or consumption of a commodity. The retail sales tax is a true excise although the designation more commonly applied to taxes levied at the manufacturing level. Both are, of course, paid ultimately by the consumer of goods.

In the case of the highway program, the excise involved are the 4-cent federal tax levied on a gallon of gasoline and diesel fuel sold at retail, the levy on tires and tubes and the manufacturers tax on trucks and buses. If the bill approved by the House becomes law, the motor fuel tax due to drop to 3 cents on June 30 would be at the present level until 1972, and a

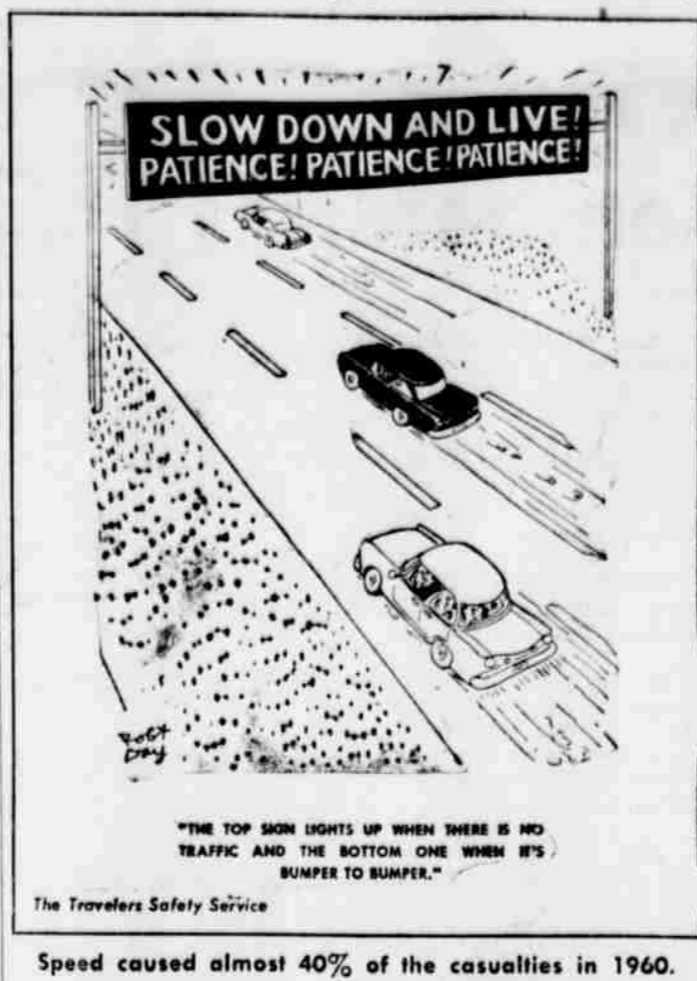

higher tax on heavy motor vehicles and tires and tubes would extend for the same period.

This is far from representing an abandonment of federal excise taxes. In fact, by diverting to the highway program \$150 million in highway user (excise) taxes now going into the deficit-ridden general fund, the House action would tend to make it more difficult for the federal government to relinquish excise taxes in other fields.

There is sympathy for the Legislature in its problem of raising many millions of new revenues from sources already heavily tax burdened or largely pre-empted by the federal government. The hard fact is that the lawmakers can not find anything to tax that is not already taxed. The C. Northcote Parkinson truism that "expenditures rise to meet income" is being made an understatement by the financial experience of both state and federal governments. The real sympathy should go to the income earner-taxpayer, who must struggle under the burden imposed upon him by the operation of this economic law both in his personal life and in government at all levels.

It's the Law in Texas

It's a good idea to give written consent for necessary medical care if your child leaves home for a visit or a camping trip, or if

you plan to be away for any length of time.

For example, a summer camp nurse may bring a boy into a hospital with an acute case of appendicitis. But the doctor may well hesitate to go ahead and operate without the parent's consent.

Is the doctor arbitrary, and is such permission just a legal technicality? No, he is well within his rights, though he may give first aid — but only for emergency treatment where a child's health or life may be at stake. He is likely to put off follow-up

Shirley Young To Graduate From Institute

Southwestern Bible Institute, a co-educational college of Waxahatchie, announces her honor at graduates for the 1961 graduating class. Shirley Young, daughter of Mr. and Mrs. W. P. care until he can reach the child's parents. A relative or baby sitter generally cannot consent for a child's treatment.

Even an adult must request treatment and grant consent to medical care on his own before a doctor can give it to him. Children cannot do this.

By going to your doctor you show your willingness and consent to accept his treatment. Your consent is assumed also when you ask for a house call by the doctor, or if as a result of an accident you come to a hospital for emergency treatment. If you are unconscious, the doctor may well give you emergency care, yet later he should get your consent to further treatment.

Minors cannot consent to medical treatment, and except in dire emergencies their parents or guardians must give it for them.

The consent should not be broadly or loosely phrased, but should be as specific as circumstances permit.

The principal reason for having the consent in writing is to avoid later misunderstandings. It is a protection both to the patient and physician.

Ding-Dong Daddies Doing Dynamic Deeds In Dumas

With a tendency in some quarters to holler "uncle" when business gets rough (Uncle Sam, that is) the citizens of Dumas, Texas, rightly deserve the recognition they're getting in the current issue of Farm Quarterly, national farm magazine, published in Cincinnati.

Back in the roaring 20's somebody wrote a song, "I'm a Ding-Dong Daddy from Dumas, you oughta see me do my stuff!" Today, Dumas, county seat of Moore County in the Panhandle, is prosperous because the Ding-Dong Daddies got together on some big community projects.

The latest is a brand new commercial feedlot designed to keep both their feed and their cattle at home.

Moore county produces some 100,000 tons of milo per year as well as 2 to 2 1/2 million bushels of wheat. The livestock population consists of about 4500 cows, while some 20 to 25 thousand stockers graze the wheat pastures every winter. These stockers are moved in from nearby states and in the past were taken up the line to Colorado feedlots when the grazing season was over. Then the grain raised in Moore county followed in trucks.

Last year the Daddies decided it was time to do something about this. They organized the Moore County Feeders, Inc., issued stock of \$1 par value and soon had enough capital to build a \$135,000 feedlot with capacity for 5,000 head of cattle. This allows a turnover of 12,000 to 15,000 cattle a year.

Officers of the corporation are farmers or ranchers and a veterinarian. An experienced feeder from Nebraska was hired to run the feedlot. All this took place within a few weeks after the Dumas Daddies first toured feed lots to learn how they could create a market at home for their milo and silage, and keep stockers right in the county while they are grow-

ing beef. The Ding-Dong Daddies cast their eyeteeth on organizing community projects in 1947 when they set up the Dumas Co-op grain elevator. Starting with a tiny irrigated building of 27,000 bushel capacity, the Coop now has facilities for storing 1,750,000 bushels of locally produced grain.

During the 1940's, natural gas and oil deposits brought big industry to Moore county, with more travelers than Dumas had ever seen. Hotel space was totally inadequate. A drive was organized to raise funds and in 1952 Dumas celebrated the opening of a modern, 4-story, locally-owned hotel.

New families coming in brought a demand for homes, but funds for building were pretty slim in the county so the Daddies organized the North Plains Savings and Loan Association. It now has a \$1.7 million in total assets, \$1.3 million of which are in first mortgage loans. Most of these loans are on residences, some are for business and farm improvements.

Dumas boasts an up-to-the-minute hospital financed through county bond issues; a neat, well-kept airport; and a new library is under construction as the result of a \$100,000 gift from one of the county's ranchers.

Philosopher Says Cuban Fiasco 'Jist Ain't Got No Solution'

Editor's note: The Sandhills Philosopher on his Johnson grass farm discusses ignorance this week, a subject on which he claims to have first-hand knowledge.

Dear editor: Although I don't think the fate of the world rests on Cuba — as a matter of fact, I don't know what the fate of the world rests on, maybe nobody, at least there's nobody I can put my finger on — everybody is pretty generally agreed the United States pulled off a diplomatic flop in connection with that country, but that's not what I've been thinking about.

What I've been thinking about is that in the past week I've read articles by dozens of columnists, experts, statesmen, etc. and while every one of them can tell you what we did wrong about Cuba, not a one of them can tell you what we should have done that would have been right.

Everybody seems to be outraged at how we could have pulled such a blooper, and everybody keeps on hollering. Why don't we do something about the Cuban situation? But when you ask them what, they shrug and say that's Washington's job.

The editorial writers of this country are first rate at telling us what we did wrong, but when it comes to telling us what we could do right, they've moved on to the next crisis and what we did wrong about that.

Now you might think this is a criticism of the editorial writers and columnists, but it isn't. The reason they don't tell us what we ought to do about Cuba is that they don't know either.

What a lot of people don't understand is that there are a lot of problems in this world to which there ain't no answer.

If you're looking to me to tell you what the answer to Cuba is, I'll tell you just as soon as I figure out what the answer is to the farm problem, tomorrow's weather, the city problem, family squabbles, the value of the dollar, teenagers, middle aged, old people, earth-quakes, television an dwhy my tractor won't start. Don't wait around for an answer if you've got any work to do.

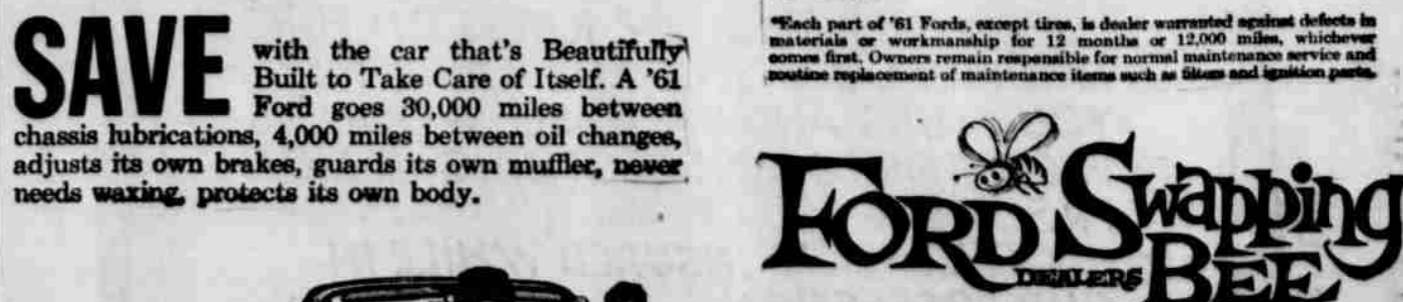

Yours faithfully,
J.A.

AMHERST NEWS, By Mrs. Lester LaGrange

Garden Club At Amherst Holds Annual Workshop For Members

AMHERST - The Annual spring workshop of the Amherst Garden Club was held May 3 in Fellowship hall of the Methodist Church. Mrs. Wallace Gosdin, Club president, welcomed guests and introduced the national flower show judges. Mrs. Ruth Alexander, and Mrs. Allie Carden from Anton, who spoke and made flower arrangements.

Mrs. Alexander discussed and demonstrated balance and design in arrangements. Mrs. Carden's subject was "church arrangements".

A base, on which an arrangement is placed is an important accessory. Foliage is important also. In church arrangements, as in

others, the container must never be the center of interest - Dignity is achieved in simple shapes. An arrangement is proportioned to space it is to occupy. The roses, irises, tulips, poppies, and flowering shrubs were fine specimens and would have done credit to any locality and the arrangements made by the judges vied with each other in beauty and design.

A salad luncheon was served by the local club members. Mrs. Bill Workman, Mrs. Charlie Thomas, and Mrs. Clay Williams formed the committee on arrangements for the luncheon.

Guests were Mrs. Loyd Ivey, Sudan, Mrs. A. K. Shelby, Earth,

Mrs. Aubrey Jones, Mrs. Jim Bradley, Mrs. Harvie Messamore, Mrs. Allan White, Mrs. N. B. Embury and Mrs. Lester LaGrange. Members were Mmes. Wallace Gosdin, Victor Reynolds, Le Payne, E. L. Black, Henry Meyers, Charlie Thomas, George Harmon, Bill Workman, Horace Woodward, Clay Williams, and a new member, Mrs. Melton Welch, Earth.

Den II of the Cub Scouts met in the home of their den mother, Mrs. Benny Shipley, Tuesday afternoon. Assistant den mother, Mrs. Gerald Coffey attended and helped with the project for May, the study of Indian tribes in this country. They are making teepees of cloth.

An authority in New Mexico has been contacted for names of Indian boys on the Navajo reservation for the local cub scouts to have as "pen pals." Various phases of Indian life is proving to be of major interest to the boys.

Stubble Mulching Race Is Announced For July

To add emphasis to the widely recognized and valuable cultural practice of stubble mulching, a national contest - the first - has been announced. It will be held in Wichita Falls from July 28-28 under the sponsorship of a local radio station.

According to Jack Barton, extension soil and water conservation specialist and one of the investigators of the contest, stubble mulching, when properly carried out, greatly reduces both wind and water erosion. It is a year-round method of managing plant residues on cropland, says Barton. Harvesting, seedbed preparation, planting and cultivating are all done so as to leave adequate residue or stubble from the previous crop on top of the soil until after the next crop is seeded.

Barton adds that keeping the stubble or mulch on the soil surface cuts down possible damage from wind erosion and helps keep rain where it falls. Runoff is less

because the soil is in condition to take in water faster and should there be runoff, the mulch will slow the water and reduce erosion. Too, he says the decaying stubble will add valuable organic matter to the soil.

The primary objective of the contest is to stimulate interest and wider use of stubble mulching and support the programs of local soil conservation districts, advises Barton. He adds that any person 18 years of age, or older on January 1, 1961, owning, operating, or residing on a farm and whose principal income is from farming is eligible. Competition is open to the nation with cash and other awards provided by the sponsor.

Barton said local county agents have copies of the rules and regulations and would be glad to supply them to interested persons. Copies have also been sent to other states

Mrs. Bill Elms and Mrs. Reba Porter spent Monday through Wednesday at Ceta Canyon and attended a work and training camp for WSCS members in the Northwest Texas conference.

Mrs. W. E. McDaniel and her daughter, Martha were in Albuquerque, N. M. Wednesday. Martha will finish at Texas Tech this month and their trip was for a requested interview there. Mrs. James Holland substituted for Mrs. McDaniel at school.

Mr. and Mrs. John Nix, Texline visited his mother, Mrs. Mat Nix, Sr. and other relatives last week. Mrs. Nix, Sr. is a patient in the local hospital.

Leroy Cowan substituted for Mrs. Doris Stone this week in Junior High School. She accompanied her husband to Odessa where he was honored for 10 years with the El Paso Natural Gas Company.

Better Than "Well"

After recovery from mental illness, some persons reach heights beyond their earlier capabilities, says Dr. Karl Mnninger, psychiatrist. Abraham Lincoln is an example. He recovered from a period of frustration and depression to become a great leader.

About Your Health

AUSTIN - A pesky little insect, capable of going for months without food, is a sour note in the otherwise sweet symphony of a Texas Spring.

It's a softshelled tick, known scientifically as Ornithodoros turicata, transmitter of relapsing fever. This time of year they'll be out in force over most of Texas - at the very season when the natural human inclination is toward picnics and exploratory sojourns into the Great Outdoors.

State Health Department entomologists say the pernicious, fever-laden parasites can bite, feed, release their hold and drop to the ground without their human victims ever knowing they have provided them with a blood meal.

Many cases of relapsing fever undoubtedly occur in Texas without ever coming to official attention. Ticks pick up the germ while feeding on infected wild rodents, become infected themselves and then pass it on to humans during a feeding process.

Soft-shelled ticks are close relatives of the hard-shelled ticks which spread spotted fever, tularemia, a type of encephalitis and other miseries.

Public health workers handle ticks with great caution to avoid being bitten and exposed to the fever they might be carrying. Specimens are kept in a specially constructed tictorium where, if one escapes, it will fall into an oil bath and be killed.

State Health Department laboratory technicians over the years have added many refinements to diagnostic techniques relating to relapsing fever. The strange disease occurs all over the world, stick to woods and fields. Both types are actually occupational hazards for ranchers and foresters and people in similar lines of work.

Soft-shelled ticks have been known to survive for seven months without food, so long vacancy of a vacation cottage is not insurance of freedom from ticks.

So go ahead, have fun outdoors this Spring. But use plenty of insect repellent on exposed skin and on clothing. (A weekly feature from the Health Education Division, Texas State Department of Health.)

NEW! FOR TEXANS

STATE CAPITAL Highlights AND Sidelights

by Vern Sanford
TEXAS PRESS ASSOCIATION

AUSTIN Tex. - From here on the Legislature must make every minute count if it is to wind up essential business before the regular session ends on May 29.

Despite the dwindling time, filibusters, postponements and disagreements have slowed progress on tax-raising and other "must" legislation.

The House passed 2 per cent sales tax faces two ultimatums. Gov. Price Daniel said he could not allow it to become law unless the total money-raising program puts more of the tax burden on business and less on individuals. Sen. Henry B. Gonzalez of San Antonio said he would filibuster in the Senate.

State Comptroller Robert S. Calvert estimated the house sales tax bill would raise in excess of \$150,000,000 a year. This is higher than other estimates and would provide enough or nearly enough to meet estimated revenue needs. Calvert, by law, has the final and official say-so on tax yield estimates.

Governor Daniel's veto threat chilled earlier optimism about an early wrap-up of money problems and turned House members to thinking again in terms of compromise and "package bills."

SPENDING CONFEREES - A ten-man conference committee is at work ironing out the differences between House and Senate versions of the general appropriations bill.

House bill would cost about \$16,000,000 more than the Senate's. Committee's task of striking a balance between the two is expected to take three weeks.

Senate members of this important committee are Senators Ray Roberts of McKinney, A. M. Aikin, Jr. of Paris, Crawford Martin of Hillsboro, Grady Hazlewood of Amarillo and Wardlow Lane of Center.

House members are Representatives James Cotton of Weatherford, Bill Hollowell of Grand Saline, B. H. Dewey of Bryan, J. W. Buchanan of Dumas and Malcolm McGregor of El Paso.

TEACHER PAY PUSHED - Advocates of higher teacher salaries are pushing to get their bill in position for quick final action once the money-raising and general appropriations measures are out of the way.

House appropriations Committee approved and sent to the floor a bill that would provide the full \$800 a year salary increase sought by teachers.

Goal is to get a pay raise bill passed in both houses, then send it to a conference committee to work out differences. Then at the strategic moment it would be ready for final adoption by both houses.

TRAINING METHODS SCORED - House members are pressing for speedy action for a measure that would require less emphasis on "how" and more emphasis on "what" in public school teacher training.

Rep. Henry C. Grover of Houston, a teacher on leave, is sponsor of the bill that would reduce required education teaching method courses from 24 semester hours to 12 for junior and senior high teachers. For grade school teachers the maximum would be reduced from a possible 60 to 24 semester hours.

One supporter observed that the late Albert Einstein wouldn't have been eligible to teach mathematics in a Texas high school. House voted to instruct the Education Committee to report on the bill immediately.

RE-DISTRICTING HITS BUMP - Senate efforts to pass a Senatorial re-districting bill were postponed by Sen. Jap Fuller's filibustering opposition.

Senator Fuller of Port Arthur opposes the proposed measure because it would continue to combine Orange County with Jefferson (Beaumont, Port Arthur) to form his district. Jefferson County alone has more than enough voters to be a one-county district, says Fuller, and Orange would rather be in another district with counties of the same size.

Pressure to force agreement on a re-districting bill will be very strong since, if the Legislature fails to act, a non-Legislative Board will take over.

GLOOMY REPORTS - While lawmakers struggled to find new taxes, the news about present taxes was bad all over.

State Treasurer Jesse James reported that Texans apparently are not smoking and drinking like

they used to, causing a million dollar slump in tobacco and liquor taxes in April. Revenue dropped from \$8,889,855 in March to \$7,362,176 in April.

Motor fuel tax revenue was also off, according to State Highway Engineer DeWitt Greer. A 3 1/2 per cent drop during the past eight months cost the state \$3,000,000.

Meanwhile, in the Third Court of Civil Appeals, the state lost in an effort to collect a state sales tax on component parts of radio sets, such as hi-fi tuners. Court said the law is not clear.

LOAN DISPUTE FLARES - Words were hot, but the issues unclear, as Senate committee hearings on a small loan bill stretched out.

Critics of the House-passed bill fell into at least two factions: (1) those who felt the interest rates (up to 40 per cent on the smallest loans) were too high and (2) those who felt over-all charges should be higher for loans of \$100 and less.

Meanwhile, Atty. Gen. Will Wilson issued a statement blasting "powerful out-of-state loan sharks trying to 'bottle up' regulation. Senate Committee invited him to appear and discuss the matter with them.

MORE "NEATNIKS" NEEDED - Amid its \$7,000,000 a year job of gathering up mountains of litter from public roadsides, the Texas Highway Department issued a plea to Texas motorists.

Please don't use the highway as a trash can, said the Department; be a "neatnik" and save on state costs.

Most of the litterbugs, says the Department, are home grown, not out-of-state visitors.

ACTION AND REACTION - After thousands of college students took a long, riotous week-end in Galveston, the Senate called on the Higher Education Commission to look into why the students weren't at their books.

In the opposite wing of the Capitol, the House passed two measures concerning the Gulf Coast area.

One would authorize the state to turn over 88.5 miles of Padre Island to the federal government for national park development. Other is a proposed constitutional amendment that would give city and county governments authority to regulate traffic and sanitation on adjacent state-owned beaches.

A state agency such as the Highway Department, would be authorized to set flexible speed limits, according to road conditions, under another proposal for constitutional change given House approval.

House also passed a proposed constitutional amendment removing the present \$47,000,000 a year ceiling on state welfare spending. Change would allow Legislature to appropriate for welfare as needed, up to the amount that would be matched federally.

Sixteen-year-olds, accused of very serious crimes could be tried as adults rather than in juvenile court under a House-passed bill. Present minimum age for adult handling is 17 for boys, 18 for girls.

Running for one state office while holding another would be barred under a proposed constitutional amendment given preliminary House approval.

All proposed amendments have to be approved by the people in the 1961 general election before becoming effective.

SHORT SNOTS - A group of steel importing firms are seeking court action to stop the State Highway Department's ban of use of foreign made products in state highway projects. Suit was filed in a Travis County district court.

Construction contracts let during March in Texas set a record for that month of the year, reports the University Bureau of Business Research. Economists did not expect the peak to hold, but held hope that the renewed vigor meant the end of the building slump.

Texas' unemployment picture also brightened during March. Total number employed rose to 3,387,300, and unemployment declined by 28,100. But the number of jobless persons was still higher than then for the same month last year, said the Texas Employment Commission.

Rep. W. T. Oliver of Port Neches has announced he is a candidate for Speaker of the House in the next Legislature. Oliver is generally regarded as a conservative.
