**Federal Land Bank Loans To Be Paid In Cash, Not Bonds**

Houston, August 7.—Farm mortgage loans by The Federal Land Bank of Houston and the Land Bank Commissioner will now be made in cash instead of bonds of the Federal Farm Mortgage Corporation and part cash, as has been the practice for nearly a year and a half. A. C. Williams, president of the Land Bank, announced Saturday.

With a ready market for bonds, Mr. Williams explained, there will be no difficulty in selling these bonds and putting the land bank and Commissioner's loans on a cash basis.

The Federal Land Banks make loans to farmers and ranchmen on the security of first mortgages on farm or ranch lands and buildings. Acting as agent for the Land Bank Commissioner the bank may also make loans to those engaged in farming operations on the security of first or second mortgages on farm property.

Recent amendments to the Federal Farm Loan Act and the Emergency Farm Mortgage Act of 1933 have broadened the lending powers of the Land Bank Commissioner so as to include the refinancing of secured or unsecured indebtedness of the farmer, and for the purpose of refinancing indebtedness incurred in connection with the purchase of land for agricultural uses, provided the loans are eligible in other respects and the applicants can show the required equity in their properties and are in satisfactory financial condition.

"One of the principal reasons for using bonds in lieu of cash in making land bank and Commissioner's loans," Mr. Williams said, "was to get a wide distribution of the bonds throughout the country and small towns as well as in the cities. About 425,000 loans have been made since the Corporation came into existence. These bonds have been very well received by the public in general and the farmers' creditors in particular. In fact, during much of the time in which they have been in existence they have sold at above par."

The interest rate on new Federal Land Bank loans is now four per cent per annum and loans by the Land Bank Commissioner bear interest at the rate of five per cent per annum. A temporary reduction of interest on Federal Land Bank loans having installments due prior to July 1, 1935, was put into effect July 1, 1935. This was the result of new legislation, The Farm Credit Act of 1935, which was signed by President Roosevelt June 3, and reduced the interest rate to 3 1/2 per cent for interest payable in the one year period, commencing July 1, 1935, and to four per cent for all interest payable in the two year period commencing July 1, 1936. Interest payable on installment dates occurring after July 30, 1935, will be at the original contract rate of the loans. These loans are repayable over a long period of time and on convenient terms.

**C. C. Tremain And A. G. Hemphill Catch Trout 18 Inches Long**

Mr. and Mrs. C. C. Tremain and Mr. and Mrs. A. G. Hemphill returned Friday from a two weeks' vacation and fishing trip to Creed, Colorado.

After declaring they all had a wonderful trip and caught lots of fish, Mr. Hemphill said:

"Our catch each day was not very great owing to the size of the fish. It is the truth that Tremain and I caught 24 large mountain trout in one day. He caught 9 and I got 15 and we could have got more, but our arms gave out on account of the hard work of landing them, they were so large. We caught them around 18 inches in length. Tremain had one so big he refused to bring it in, so he gave it all the advantage to get away."

Mr. Hemphill stated he started the fishing expeditions from this section to Creed, Colorado, eleven years ago, saying he had been going to Creed from Plainview for four years prior to moving to Littlefield.

**Rates On Incomes To Be Increased**

Swiftly rejecting a series of amendments, some of them radical, the house Saturday all but agreed upon that section of the \$270,000,000 tax bill that would boost rates on individual incomes over \$50,000 a year.

In brief, the bill would raise from 30 to 31 per cent the tax on that portion of an individual's income between \$50,000 and \$56,000. It then would step up rates all along the line until a maximum of 75 per cent, against the present 59, was reached on that part of income over \$5,000,000.

This section of the bill is officially estimated to raise an additional \$45,000,000 a year.
