Large Crowd At Chamber of Commerce Banquet

Road Work Program Is Outlined by C of C Board

A large crowd attended the annual Chamber of Commerce members and wives banquet held here last Friday night at the First Methodist Church. The purpose of the banquet was to welcome new members into the Chamber of Commerce and to outline the program of work which was proposed as a result of a survey covering members of the organization.

Introducing the tentative plans, C. C. president Jack Christian said the Chamber of Commerce is a group of civic-minded business men and citizens doing through unit effort what no one individual can do alone. The officers and members merely coordinate your ideas and ideas into definite and constructive action.

Interesting Program
The invocation by Rev. S. M. Norman, Mrs. Weldon Findley and Mrs. Norman entertained the members with vocal solos. Mrs. Findley accompanied by Mrs. E. J. Pack-Norman was accompanied by Clara Lou Stone.

The point of the program was a speech by Rev. Luther Sharpe, President of the Chamber of Commerce, who ministered from Clovis, N. M. Community Cooperation
Sharpe spoke on "Community Cooperation." He compared the five vitamins to the community. Vitamin A is the first requirement for a progressive, prosperous community is A—attractiveness. Vitamin B is the second requirement for a community is B—brotherhood. Vitamin C is the third requirement for a community is C—cooperation. Vitamin D is the fourth requirement for a community is D—devotion. Vitamin E is the fifth requirement for a community is E—enthusiasm.

Sharpe left his audience feeling that they had heard something worth while in an entertaining manner. Jack Christian terminated the evening with an expression of appreciation to the several organizations for their cooperation in realizing the banquet. The Lions, Rotary, American Legion, Veterans of Foreign Wars, Red Cross, Salvation Army, and the Society of the Woman's Club. Christian again emphasized the Chamber of Commerce needs suggestions on matters pertaining to civic development. Approximately 125 persons attended the banquet.

Election To Vote On Securities To Be Held Soon

Bond Issue Will Not Increase Taxes, Say School Officials

At a Monday night session, the school board set the amount of the proposed school improvement bond issue which will be put before voters in the near future. The exact date of the election has not been set, according to Dr. William N. Orr, president of the school board.

Totaling \$75,000, the bonds have been sold to three different companies, \$25,000 to each of the following: First of Texas Corporation, San Antonio; Dallas Union Trust Co., Fort Worth; Edwards Security Co., Fort Worth.

Time on the bonds is fifteen years with a ten year option; for the first five years the bonds will yield 2 1-2 percent interest, for the remaining ten years they will bear interest of 2 1-2 percent.

Improvements Needed
Money realized from the sale of the bonds, on approval of the issues, would be used in a long-term program of badly needed improvements to both white and colored schools.

These would include remodeling, redecorating, and repairing the buildings in general, provide additional class rooms to alleviate the over crowded condition now existing, and provide needed laboratory equipment. Library facilities would be expanded and improved.

The bond issue would not increase present taxes, neither rate nor evaluation, in any way, school authorities explained. The school district is to pay the cost of preparing the bonds.

She visited her grand-son and grand-daughter, Mr. and Mrs. Marshall Burleson and family, at San Bernardino, and at Los Angelo, Cal. She spent sometime with her daughter-in-law, Mrs. F. M. Burleson, Sr. and family.

This is the first trip in sometime for Mrs. Burleson, who is about 75 years of age. She reports, however, a very enjoyable trip and visit in California, and according to friends the vacation from Littlefield did her a lot of good.

Club Visits Dallas Fair

The Lum's Chapel Home Demonstration Club members are very much elated over their trip to Dallas Fair, October 8th.

Seventeen ladies went in the party, having engaged a special bus out of Lubbock for their transportation.

Knowing it would be impossible for each lady to see all the many attractions. They were divided into two separate groups, and each group then decided what they wanted to see.

Besides the usual exhibits, and midway attractions, etc, which are always seen each year at the Fair, there are several outstanding attractions which to us are entirely new.

I shall give a brief description of one show which I think is worthy of the entire trip alone. This show is known as "Ice Cycles of 1947." It is a musical spectacle on ice, and has won international fame for its ability to blend the sport of ice skating with comedy, originality and unique lighting effects in the production of colorful musical revues. One of Walt Disney's fabulous characters to don the silver blades is the ever amusing "Pluto."

Modern nursery rhymes are depicted by twenty-four little Shepherdesses, each with her own little lamb.

Scandinavian Christmas is represented by Santa Claus and ten children.

Master of the art of still skating is Henry Lie.

Master of the Blades is Robin Lee who is five times senior American skating champion.

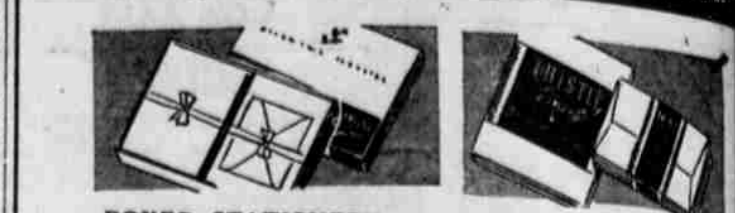

Buddy Lewis has earned a place in the Hall of Fame, "Believe It Or Not." Ripley credits this Ice Cycles jumper with a speed of 40 miles an hour.

These and many more revues make up the "Ice Cycles of 1947." This description will give the reader only a vague idea of this beautiful program of ice skating. It must be seen to be appreciated.

Another attraction which is worth the trip alone is the show starring Mary Martin in the musical smash "Annie Get Your Gun." The cast includes fifty-three characters. This show is a real treat which one seldom has the opportunity to see and enjoy, since all the characters appear in person.

Art lovers are feasted to their hearts content by the gorgeous array of beautiful pictures. Many rare old paintings being sent to Dallas

Fair from art museums in New York City. Some of these paintings dates back to the 17th century. Besides there are many, many paintings by modern artists.

Then there are the ever-popular trained white horses. The acrobatic stunts shown in connection with the white horse show, are simply breathtaking.

Another place of interest is the "Texas Building" where there are shown many historical relics of pioneer days in the growth and development of Texas.

Club members who composed this party are Mesdames Buri Rogers, Percy Carter, J. T. Brown, Taylor, Cecil Gipson, Jack Doss Maner, Hub Spraberry, McCarty, Ott Baisden Wayne, Floyd Brown, Herahel Barker, Tisdale, Leonard Bryant, Ann Cater and Emay Hobbs. The ladies felt quite independent on this trip because of the fact their expenses were paid from funds, which they themselves earned from time to time, so had to seek assistance from husbands.

A Report From Greece

BY GEORGE MAHON

This is about Greece, written from London while I am awaiting a ship for New York. Our Committee on Foreign Aid has recently returned from a week in Greece.

Before going there, I had rather expected to see people dying in the streets from starvation and want. I believe Greece is in worse shape than any nation in Europe, but the aid program of the U. S. and the efforts of the people are preventing the complete collapse of the country. The Greeks made a heroic effort during the war to hold the enemy and give aid to the Allies and since VE Day vast sums of money of many nations have been spent there to arrest the ravages of diseases and starvation.

At present our nation is in the midst of the 300 million dollar aid program to Greece which is being administered by former Governor Griswold of Nebraska. The object of the program is to help stabilize the country and prevent the further extension of the Russian Iron Curtain.

It is no secret that the principal object of American foreign policy in Europe is to assist democratic peoples and prevent the extension of Communist terrorization and domination to the Atlantic Ocean, enveloping all Europe. If the Iron Curtain of Russian Communism comes to the Atlantic, billions of additional American dollars will have to be spent on our national defense program and American security will be in jeopardy. For right or wrong that is the prevailing viewpoint of our Government. No one knows for certain just what may develop; history will record whether our policy is right or wrong. We are taking a chance and if we lose, our efforts and our money may go for naught.

Greece has about the same population as Texas, but it is only one-fifth the size of our state. And what is more important, most of the country consists of a series of rugged mountain ranges and the land available for agriculture is very limited. Moreover the people depend principally on agriculture for a living as there is practically no industry. The annual rainfall is about the same as in West Texas.

We first went to Athens and then to Macedonia in northern Greece where much of the guerrilla warfare is being carried on. In company with Greek soldiers and officials, we went as far north as the Bulgarian and Yugoslav borders. In this part of Greece I saw scores of farms which would normally be planted to wheat lying idle because the people had fled from their farms and villages as a result of the terrorization program of the so-called bandits and guerrillas. It is estimated that 250,000 have fled from their homes because of the guerrilla menace, and they are living in the cities under unspeakable conditions. There are about 16,000 of these bandits in widely separated areas who hide out in the mountains and conduct sporadic raids upon the villages.

Some of the bandits are accepting the offer of the Greek Government to surrender on a promise of no punishment. I talked to a number of these surrendered bandits in different localities. Most of them were

quite young. Their stories and everything I heard in Greece confirmed the charge that the bandits are being inspired and supported by the Communists across the Greek borders to the north.

The primary need in Greece is employment and freedom from the reign of terror of the bandits. Governor Griswold and his staff are actively pressing for action in the American aid program but their job is difficult and success is not assured. The Greek Government has been reorganized under Prime Minister Sophoulis, age 86, but the Government is still weak and the Greek army at present is doing a poor job of suppressing the bandits and restoring order. I found no one who thought American troops should take over this task. Such a policy in my opinion is not only unnecessary but would be a tragic mistake otherwise.

The top men in the agriculture program of the American Mission in Greece are E. N. Holmgren and B. F. Vance, both of whom were former administrators in the AAA program in Texas. Perhaps they were selected because Greek agriculture is similar in some respects to our own. I visited many dry-land farms and many farms where underground water is pumped for irrigation. The average farm is 7 acres in size. The irrigation program seems to offer the quickest way to increase production.

The Greek cotton crop will not be adequate to meet the needs of the country. Greece normally raises about 60,000 bales of cotton. There is a surplus of olive oil and tobacco for export but the Greek currency is on such a weak footing that the export program is far from satisfactory. There is little confidence in the value of the currency.

The war devastation in Greece was terrific and many of the highways and railroads are impassable, and the great ports for Athens and Salonika are not yet in full operation. It takes time to repair the ravages of war.

Of one thing I am sure, the rank and file of the people in Greece do not want Communism and they will not willingly accept it. They are close to the Communist states of Bulgaria, Yugoslavia and Russia and the rank and file want no part of it. But Communism operates through terrorist methods and when a police state is established freedom is lost. That is the principal reason why Communism is such a threat throughout the world.

I have been forcefully struck during our study in Europe with this fact. You do not learn too much about a country at the Embassy or at the seat of the Government. You learn more by visiting the people in the streets and in the workshops—by visiting them in their homes on their farms and in their villages.

If you start a conversation in a village the whole neighborhood gathers about you. The people seem anxious to express their opinions and I found the people in Greece were well informed and greatly interested in current problems. They are well aware of American aid and they are grateful for it. That is not true throughout Europe.

One who has not been in Greece cannot realize the abject poverty of the Greek people. The most they could hope for is a chance to earn a meager existence and live in peace.

Our nation is seeking to follow a policy of enlightened self interested

in Greece. It is a gamble of our powerful country in the interest of world stability and peace. In six months we should know whether the chances of success are good.

In addition to conferences with members of the American Mission in Greece we met at length with Prime Minister Sophoulis and various other Greek officials. We made no promise in behalf of Congress of the American people. We sought to get facts which would be of assistance to Congress whom further action is taken in Washington.

How women and girls may get wanted relief from functional pe - pain

Cardul is a liquid m... which many women say has... relief from the cramp-like agony and nervous strain of functional periodic stress. Here's how it may help:

- 1 Taken like a tonic, it should stimulate appetite, aid digestion, thus help build resistance for the "time" to come.
- 2 Started 3 days before "your time", it should help relieve pain due to purely functional periodic causes.

Try Cardul. If it helps, you'll be glad you did.

BULL LAKE PHILOSOPHER SAYS HE AND HIS NEIGHBOR FOLLOWING NEW FOOD CONSERVATION PLAN

EDITOR'S NOTE: The Philosopher on his Johnson grass on Bull Lake says he's willing to do his part in the food conservation program, that is, we guess that's what he's saying in his letter this week.

Dear Editor:

It may have been because the door slammed shut on it as I had been usin it for a door prop since it wouldn't work noway but Sunday night my radio suddenly started workin right after a puff of wind hit and I listened to President Truman's speech on savin food and I

want you to know I'm in favor of it.

In fact, I'm right proud of bein even ahead of the President of the United States in my thinkin as I've been havin meatless Tuesdays and a few Wednesdays and Thursdays and Fridays etc., out here on Bull Lake for several months now, and my hens is even ahead of the President and me both as they ain't been layin more'n once or twice a week and I've had poultryless Thursdays for

months and Saturdays and Mondays to boot.

However, I noticed President Truman also suggested that farmers feed less grain to their livestock and I just want him to know that it may be a good idea in Iowa but the thing can be overdone, you can carry patriotism and international responsibility too far in that direction, and if anybody in Washington don't believe it let them come out here and examine the ribs showin in my meat hog. A hog ain't got no sense of world-wide responsibility and without enough food will grow thin steadily, don't make no difference whether Communism sweeps Europe or not. I know, as I been raisin hogs without enough grain for years and there ain't enough meat on one of my hog's spare ribs to keep one European from goin wrong politically more'n a week.

However, I would like for you and the rest of the world to know we're gonna stick by the program out here. In fact, my neighbor from across the river creek adopted the plan himself two weeks ago. He had a crib full of corn and one night his hog broke out of his pen when the balin wire holdin the top plank finally rusted in two and pushed open the barn door and stayed in that corn all night eatin a two weeks' supply at one time.

The next mornin when my neighbor found it out he was so mad he started to whip his hog but then decided he would use psychology on him and locked him up in his pen, re-wired the top plank, and made him go two weeks without no corn, just as punishment. It taught that hog a lesson, don't make no difference if he did it learnin it.

Yours faithfully,
J. A.

Forecast Cotton Crop of 11,508,000 Bales For 1947

The Agriculture Department, reporting that cotton production outlook has declined slightly because of last month's bad weather conditions, Thursday forecast a cotton crop of 11,508,000 bales for 1947.

The department said the Gulf coast hurricane and other storms last month reduced the lint quality and interfered with picking for a short time, but otherwise caused only slight damage.

The department said the forecast was 341,000 bales, or three per cent less than the forecast made Sept. 1.

The department said continued dry, hot weather from Alabama westward through Oklahoma reduced prospects for the late portion of the crop more than offsetting generally favorable weather in Georgia and the Far Western states.

COTTON QUOTATIONS

BEST FIBER—"Cotton is the best fiber I know of. We in the rayon industry would give a whole lot to be able to produce a cellulose molecule like that of your natural fiber."—Dr. Fred Bonnet, American Viscose Co.

BLESSING—"Mechanization is a forward step which eventually will richly bless the Cotton Belt."—"Alabama Farmer's State."

PLAN AHEAD—"Successful cotton farming is becoming more and more a year round job. Planning ahead for next year's cotton is just as necessary and profitable as planning livestock production on a 12-month basis."—"Southern Agriculturist."

NEED COTTON—"It would not be to the interest of Texas for cotton production to remain at a low level, even though many new crops can be raised. As conditions return to normal, some expanded supplementary crops may have to be sharply reduced. Unless a good market for cotton can be maintained, agricultural income is very likely to decline."—"Dallas Times Herald."

PRICE AND QUALITY—"If American cotton is to hold its place in the world market, it must do so on the basis of price and quality—

Kidneys Must Work Well

For You To Feel Well

24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood. If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly. Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at night, swelling. Why not try Doan's Pills? You will be using a medicine recommended the country over. Doan's stimulates the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get Doan's today. Use with confidence. At all drug stores.

not subsidy."—Atlanta "Constitution."

MOST CASH—"If you let a foot rule represent all land in Alabama, you'll find that more than 6 of the 12 inches are producing trees—only one inch is in corn, and only one-half inch in cotton. Yet cotton is producing more cash than any other farm product."—Director P. O. Davis, Alabama Extension Service.

CAN'T BE LEFT OUT—"Cotton is too profitable, too dependable to be left out of farm plans."—"Farming For Profit."

Tips From Home Demonstration Agent

If you're one of the thousands of Texas farm families who are in the middle of planning a new home, you probably have a color problem. Such as a color scheme for your living room furniture or colors for decorating the house.

Reports have reached me, indicating that grey is one of the best-accepted colors in upholstered furniture and in decoration. Schemes with grey as a basic color work out very

nicely because grey harmonizes well with other hues.

Other colors that seem to be popular with furniture buyers are gold, chartreuse deep greens, bright reds. Blues seem to be favored lately with consumers, and have wine shades. At least the poorest selling colors in upholstered furniture lines now.

Dark upholstery in general is falling from popularity. The light colors such as grey are selling right left. And that may help you in selecting a color scheme for your living room.

Farming on the South is more profitable than in any part of the Southwest.

Demonstration Tips: Better Light

If you looked inside your lamp or paper lamp shades you may find the outside condition, but the inside may be soiled. Discoloration may be causing as much as 25 to 30 per cent of the light you had when the shade was new.

The best thing to do, of course, is to replace the yellow and dried out shades as soon as possible. If you can't do this, then try these suggestions: spray or brush on the inside of the shade with casein or a white water mix paint. If the lining is too dark to be covered easily with paint, cut a lining from a sheet of white paper by rolling your shade along the paper, and using transparent tape to fasten the seams.

Mystery of the Missing Farms

Yes, the number of farms in America is shrinking (by a quarter-million in the last five years!). What's happened to the missing farms? The land has been taken in by other farms, increasing the average size by twenty acres!

Does this growth mean farming's no longer a family enterprise? Just the opposite! More families own farms today than ever—only with labor-saving equipment they can handle more land, more work.

where our free, American life is secure. Where every member cooperates and shares the work... living together in temperance and tolerance—temperance that prefers a moderate beverage like beer, and tolerance for a taste that may be different from one's own.

From where I sit, our Family Farms (and they're 96% of all farms) are something that this country can be proud of!

Berry Jersey Herd Rated For Type

COLUMBUS, OHIO—The registered Jersey Herd owned by A. L. Berry, Amherst, Texas, has recently been classified for type under the program of The American Jersey Cattle Club, whose headquarters are here. Professor G. G. Gibson, Texas A. & M. College, an official classification inspector for the Cattle Club, made the classification of the Berry Herd.

Under the Jersey Herd Classification program animals are composed for type against the breed's score card which allots 100 points to a perfect animal. Animals are given individual rating of Excellent, Very good, good plus, good, fair or poor in accordance with number of points which they receive on the score card basis.

The 16 animals classified in the Berry herd include 7 very good, 7 good plus and 2 good for an average score of 84.06 per cent. This score exceeds the average rating of 82.74 per cent for all animals classified in the Jersey breed and Mr. Berry is to be congratulated on the type of cattle in his herd.
