NT DUGGAN GIVEN HEARTY RESPONSE ON FIRST TRIP OF THE W. T. C. OF C. DISTRICT MEETINGS

Arthur P. Duggan, of Chamber of Commerce, Friday from his first and holding of dis-... Everywhere he was greeted by great... and his rousing ad-... with loudest ac-... consisted of Presi-... wife and son, Arthur... D. Arnett, Manager... and wife, Publicity... D. Whitehead, Exhibit... M. Whitaker and son

ponit the citizenry turned out to greet them with an old fashioned basket dinner spread beneath the umbrageous shade of the wide-spreading trees. At all of these various places the addresses of the party were most cordially received. Late that afternoon the party journeyed into El Paso.

At noon the next day the El Paso Chamber of Commerce gave a big banquet in the Paso Del Norte hotel dining room, every nook and crevice of the room being filled with tables and still unable to accommodate the vast crowd that sought the privilege of attending. During this period President Duggan gave special emphasis in his address to the tax equalization question which appealed especially to the El Pasoans, since that is one of the highest taxed counties of the state. His address was frequently punctuated with outbursts of applause from the banquet auditors, all of whom were prominent citizens and leading tax-payers of the city. At the close of his address hearty statements of endorsement were made by the chairman and Congressman Hudspeth, approved by the entire assemblage by their applause.

That afternoon the party was driven across the Rio Grande into Juarez, where they were treated to a typical Mexican dinner. Of this trip President Duggan had very little to say, perhaps due to the fact that there

COMMERCIAL BODY DISCUSS MATTERS OF IMPORTANCE

At the meeting of the Chamber of Commerce directors held Tuesday noon, a letter received from Olton fair officials was read, wherein an invitation was extended Littlefield to participate in their community fair to be held September 24 and 25. The invitation was accepted.

The matter of a rest room to be opened in Littlefield was discussed, and a committee consisting of T. Y. Casey, T. S. Sales and R. E. McCaskill was appointed to select location and make other arrangements.

It having been reported that the cotton leaf worm had been working on some of the cotton in nearby counties, a committee composed of A. C. Chesher, Kirk Allbright, Ralph Dunbar, J. M. Stokes and F. G. Sadler, was appointed to investigate the matter, and if any reports of leaf worm could be obtained in this vicinity to take such steps as were necessary to secure the poison for their eradication. Any farmers who may have any indications of leaf worm in their crop are asked to report immediately to some of the members of this committee.

The matter of growing more wheat in this section was ardently discussed, it being the consensus of opinion that such would be a profitable crop for this section, bringing financial returns at a time when greatly needed.

BURLESON WINS HONORS

Littlefield Pitcher With Greenville in Line for Big Job.

Walter Burleson, local merchant and ace pitcher for the Greenville baseball team this year, is in line for a big league position next year, according to the Greenville Morning Herald, a recent copy of which was received this week by the Leader.

Burleson has made an exceptional record on the mound this year, closing the season's game with a score 5-0 in favor of his team. The Greenville Herald in commenting upon his ability as a pitcher said: "Walter Burleson will be popular anywhere he goes—his hustling spirit will make him a favorite and his natural ability should win him a place in faster company than the East Texas League."

A \$70,000 INVESTMENT

Dr. Hall, of Midland, May Become a Citizen of Littlefield.

A deal was closed this week whereby Dr. J. G. Hall, of Midland, exchanged his fine home at that place for 1,325 acres of land north of Plainview. He also purchased 177 acres of choice land about five miles southeast of Littlefield, the local deal being handled by the Yeager-Chesher Land Co.

Dr. Hall is contemplating making his home either at Littlefield or Lubbock.

Mr. and Mrs. Frank Des Gurgas and family of Gallup, New Mex., visited Mrs. Des Gurgas' brother and family, Mr. and Mrs. E. G. Courtney, last week, returning last Monday.

There'll Be a Hot Time

New York is marshalling its forces for one gala reception when Gertrude "Trudy" Ederle comes home from her record breaking swim of the English channel. She sails for home Aug. 21—leaving a record, (the first woman) of 14 1/2 hours across the channel—a mark which bids to stand for many years.

TO BE PREPARED.

Reported Leaf Worm Climbing Cap Rock into Eastern Territory.

On account of the reports of leaf worm ravages under the Cap Rock country, and the indications that they are traveling this direction, it is urged by the local Chamber of Commerce that if such worms should be found on cotton of this vicinity that the farmers report same immediately to the local Chamber of Commerce, when a prompt and concerted action will be taken for their quick eradication.

Up to the present it is said that the cotton of this section has been comparatively free from insects of any kind.

ORGANIZATION IS PERFECTED GIVING PLAINS PUBLICITY

A permanent organization, yet to be named, was perfected at the Board of City Development in Plainview last Tuesday afternoon, as the result of a meeting of representatives from the ten counties which cooperatively have determined upon a program of advertising and developing the area. The report of the meeting, as published by the Plainview Herald, was as follows:

"The meeting was the outgrowth of action taken at a banquet held here on the night of August 9th at the Hotel Ware when invitations were extended to all communities of Parmer, Bailey, Castro, Lamb, Swisher, Briscoe, Floyd and Hale Counties and parts of Deaf Smith and Crosby Counties to enter into a conference with reference to the proposed cooperative move. At that time it was decided that each representative should return to his home, sell the idea to his home people and have them appoint a delegate to yesterday's meeting. Every county in the territory was represented here yesterday.

"After an explanation of the program as it has been thought of to date was made by the chairman, E. B. Miller, the delegates voted to perfect a permanent organization. A nominating committee of Ed Bishop of Floydada, Judge J. E. Swepton of Tulla, Maury Hopkins of Plainview, H. B. Adams of Lockney and Judge L. A. Wicks of Ralls nominated E. B. Miller, Plainview, president; J. E. Swepton, Tulla, vice president; A. L. Winfrey, Ralls, vice president; H. B. Adams, Lockney, secretary; and A. O. Thompson, Hereford, treasurer. These officers, unanimously elected, and a representative from each post-

REV. F. J. BERRY IN A SUCCESSFUL REVIVAL MEETING

Rev. F. J. Berry, of McKinney, Texas, is this week conducting a revival meeting for the Christian church, located south of the city park.

The services are being held under an arbor located beside the church building, and good crowds are attending.

Rev. Berry is one of the strong preachers of his denomination. Being entirely void of any flamboyant and extraneous methods, exaggeration or clap-trap jingle that frequently characterizes evangelists, he is preaching a wholesome Gospel that drives straight to the hearts of his auditors. It is the comment of many who are attending these meetings that he is one of the most logical, forceful and convincing speakers that has ever occupied a Littlefield pulpit.

CHESSER INSISTS CROP PROSPECTS TO BE VERY BEST

"I have never seen better crop prospects during the three years I have been a citizen of Littlefield," declared A. C. Chesher, of the Yeager-Chesher Land Co., to a Leader representative this week. "In fact, I very much doubt if there have ever been any better crop prospects in the history of the South Plains country during its agricultural period," continued Mr. Chesher. "It is hard to conceive of it being better."

"During the past two weeks we have sold five farms, and the indications now are that we are going to have a big realty business this fall. Every day we are getting enquiries regarding land in this country. We have a choice array of listings, suitable to nearly and desire, and with the many who are looking for homesteads in this prosperous new country," said Mr. Chesher. "I know of no reason why business in the realty line should not be as good this year as it was last. In fact, I am inclined to believe it will be better and of a more stable nature."

VARIETY IN BREAD.

Everybody gets tired of eating the same kind of bread day after day. Introduce variety by having whole wheat, graham, or rye bread once in a while; sweet breads, such as raisin, date, nut or coffee ring; quick breads like muffins and biscuits; crisp breads, including toast, crackers, or bread sticks.

RAT POISON.

Anyone desiring poison for rats, prairie dogs or other rodents may receive same free by applying to the Littlefield Chamber of Commerce office.

MRS. LOGAN ENTERTAINS.

Mrs. E. A. Logan entertained a number of friends last Thursday with a six o'clock dinner and two tables of bridge. Those present were Misses Dess Key and Helen Logan; Messrs. Clarence Barnes and Leonard Minnett, of Dallas, and Mr. and Mrs. E. A. Logan.

SOUTH PLAINS INSTITUTE WILL BE AT LUBBOCK

The statement in last week's issue of the Leader that the teachers of Littlefield would attend institute at Canyon was a mistake, according to Prof. Harrison, as all the teachers of Lamb county will attend the South Plains Institute, which will be held in Lubbock September 6 to 10.

The teachers of Lamb county are fortunate in having the opportunity to attend this institute. Dr. C. H. Judd, head of the School of Education, University of Chicago, will speak twice daily—at 9 a. m. and 1.30 p. m. During the week Dr. Judd will also deliver one evening lecture. His subjects will be: Monday, Reading; Tuesday, Numbers; Wednesday morning, Spelling; Wednesday afternoon, Geography; Thursday morning, The Results of Expansion of American Education; Thursday afternoon, The Social Psychology as a Basis of Education; Friday morning, Curriculum Reconstruction; Friday afternoon, Scientific Studies in Education.

Dr. P. W. Horn, president of Texas Technological College, will be the Conductor of the Institute. Dean A. W. Evans, of the Tech, will have charge of the high school section. Dean J. M. Gordon will have charge of the intermediate section, and Miss Lilla Baugh of the Teachers' College, Kingsville, and Miss Corine Nash, Primary Supervisor or Lubbock Schools, will have charge of the primary section.

Teachers from the following counties will be in attendance: Bailey, Crosby, Cochran, Dickens, Dawson, Garza, Gaines, Hockley, Lynn, Hale, Lamb, Lubbock, Terry, Yoakum.

Try your wits on this: Doug arebrebus yap ni ecnavda.

BAPTIST MEETING DRAWS BIG CROWD INTO THE ARBOR

The revival meeting now in progress, under the auspices of the Baptist church, is attracting large crowds nightly and the day meetings are being well attended. In fact, the congregation has so largely increased that it has become necessary to erect an arbor on Main street, just south of the First National bank for accommodation.

Rev. Layton Maddox, pastor of the Baptist church at Belton, is doing the preaching.

A feature of the meeting is the music, under direction of Prof. Jerry Cox, of Fort Worth. Two pianos and other instrumentation add to the waves of melody that go up from the throats of the congregation under the skilled leadership of Prof. Cox.

SEWER SYSTEM TO BE COMPLETED BY FIRST OF OCTOBER

Work on the installation of Littlefield's sewer system is steadily progressing, according to Engineer A. B. Carson, in charge of the work.

Mr. Carson states that the disposal plant, located northeast of town, is now practically completed. All the mains have been laid, and practically all the laterals east of Main street are now in and ready for service. All ditching will be completed within the next three weeks and the crew will start cleaning up.

Mr. Carson states that material is now arriving as fast as is needed, and the work is progressing as rapidly as could be desired. It is hoped to finish the contract and turn the system over to the city for acceptance by October 1st.

It is stated that all ditch lines and street crossings will be leveled just as soon as the major portion of the ditching has been completed. A few good rains would be of considerable value in assisting the moving of dirt to its proper place in releveling.

The Brazos River has a drainage area of 41,700 square miles, all in Texas, and the Colorado River is second with a drainage area of 37,800 square miles.

The city of Alpine in Brewster county is one of the highest cities in Texas with an altitude of 4,484 feet.

Prohibition Head?

It is rumored that Brig. Gen. C. Andrews, present dry will resign on his return abroad. If he does, Roy H. [Name], who is strongly backed by Anti-Saloon League, is pointed as the most likely successor to [Name].

**LOCAL JANITOR
TAKES A SPECIAL
COURSE IN WORK**

With the opening of the schools of this city for the new term, the buildings and grounds are going to be bet-

ter cared for than ever before by reason of the special training given to Henry Golightly, the janitor. Mr. Golightly took advantage of the school for janitors and engineers conducted at the Colorado State College, at Greeley, in the early part of the summer, and comes back better prepared to care for his duties than ever before.

LINDLEY'S VARIETY STORE

Come and see what your money will buy! We have a nice line of Variety Goods that will appeal to both your taste and pocketbook.

MRS. ELLON LINDLEY, Prop.

**McCORMICK ROW BINDERS AND THE
TWINE TO GO IN THEM**

The McCormick Corn Binder is easily in the lead

of all others. With the new internal drive gear, doing away with the old chain system, ample and positive oiling system and the quality of material that enters into the construction, the McCormick gives most satisfactory service and longest wear.

Deering Twine is double strength, will not tangle in the box, is specially treated against insects—two balls fills the can. It is guaranteed for length, strength and weight.

Elk's New Chief

Charles H. Brankelov of Philadelphia has just been chosen without opposition, to be the new Grand Exalted Ruler of the Elks. This is his seventh term as head of his local order and he has served 3 terms as Grand Exalted Esquire.

At the school attended by Mr. Golightly the janitors are taught scientific methods of wielding brush and broom, how to clean blackboards and buildings, and how to light them to the end that the health of the children of the community will be preserved. Mr. Golightly states that the information received at the college was well worth the cost. Janitors and engineers from several states were present at Greeley this year taking the course.

PERSONAL ITEMS

Misses Hazel and Salome Cox and Miss Estell Ferrell visited in Lubbock Sunday.

Chas. Touchon, of Tucson, Ariz., is prospecting in Littlefield this week.

Mr. and Mrs. W. M. Pool returned Thursday from a visit to Dickens county.

Mr. and Mrs. Ed Aryain left Sunday for market at Dallas and Fort Worth.

Mrs. A. A. Anderson and little daughter, Patsy Mary, left Sunday for a visit to Comanche.

Mr. and Mrs. Jim Douglas and little son of Plainview visited Mr. and Mrs. Arbie Joplin last week.

Mr. and Mrs. T. S. Sales, Mrs. Corrie Leache and Miss Nadine Hally spent Sunday in Lubbock.

Dave Cornillus, Jr., of Throckmorton, is visiting his aunt and uncle, Mr. and Mrs. T. A. Henson, this week.

Mr. and Mrs. D. E. Truly and Mr. and Mrs. J. W. Harralson, of Hubbard City, are visiting Ralph Dunbar this week.

Lee Myers, of Jackson, Texas, representative of the Neo Standford Music Co., is in Littlefield this week.

Mrs. T. A. Henson and daughter, Vesta, returned Saturday from a ten days' visit with relatives and friends at Albuquerque, New Mex.

Mrs. Jess Mitchell left Tuesday night for Waco in response to a telegram advising of the serious illness of her father, T. J. Andrews.

Mr. and Mrs. W. H. Gardner spent Monday with Mrs. Gardner's brother, H. P. Burke and family, north of town.

Austin Honie visited his wife at Tullia last week-end. She has been confined to her bed for the last two weeks, but is improving nicely now.

Mr. and Mrs. John Kling, accompanied by Mrs. John Blair and daughter, Cloda, returned from Sweetwater last Sunday.

Misses Vivian and Ruth Courtney will return this week from Canyon where they have been attending normal for the past six weeks.

Sid J. Robinson and family of Abilene spent the week-end with Rev. C. A. Dugger and family. Mr. Robinson is a brother to Mrs. Dugger.

Mr. and Mrs. Miles J. Baze, of Oklahoma City, are visiting the former's mother, Mrs. Bessie Baze, this week.

Mr. and Mrs. Gus Shaw and daughter, Myrtle Marian, visited Dr. and Mrs. C. J. Wagner of Lubbock last week-end.

Mr. and Mrs. E. A. Hawkes, daughter Willetta, and son Chester, Miss Jean La Forge and Joe Bardner of

Lancing, Mich., visited Mr. and Mrs. W. W. Gillette last week en route to their home from a tour through the western states.

Mrs. G. T. Massie and little daughter, Helen, of Corpus Christi, daughter of Mr. and Mrs. W. H. Badger, visited them last week.

Mrs. J. C. Fowler returned Friday from a visit to Waxahachie where she has been visiting relatives the past week.

J. W. Gomillian, of Litton Springs, who recently purchased the Spade headquarters, is in Littlefield on business this week.

Mrs. Maude Burrus returned Saturday from market at Fort Worth and Dallas for the Barnes Mercantile Co., bringing many new things.

Mrs. T. D. Gray and little daughter, Patsy Mary, are visiting Mrs. Gray's parents, Mr. and Mrs. James Silvers, of Emzy, New Mex., this week.

Miss Midge Brown, of Belton, arrived Sunday to help with the music part of the revival meeting now being held here.

Mrs. S. C. Lloyd and daughters, Stella and Mrs. J. M. Stokes, visited in Spur and Afton a few days last week, returning Monday.

Dean Dugger, son of Rev. C. A. Dugger, left Wednesday for Arizona where he will teach school the coming year.

Jim York and wife and three children, of Borden county, visited Mr. and Mrs. Clyde Willis last week, returning Tuesday.

Mrs. E. M. Grantham, of Washington, D. C., who is visiting her mother, Mrs. J. C. Houk, underwent the operation of having her tonsils removed last week and is getting along nicely.

Mrs. G. T. Massie and little daughter, Helen, who is visiting her parents, Mr. and Mrs. W. H. Badger, is spending a few days in Floydada this week.

B. N. Joplin, of Waterloo, Iowa, who has been visiting his parents, five miles south of town, returned to his home Tuesday. He was accompanied as far as Amarillo by his parents, Mr. and Mrs. C. A. Joplin, where they will visit for a few days.

Mr. and Mrs. George Long, of Quannah, were here last week visiting L. R. Crockett and family and viewing out the virtues of this country. They went back home to sell off their property and hope to return here soon, making this their future home.

L. R. Crockett is this week in receipt of a letter from L. J. Sullivan, former Littlefield citizen, but now living at Vernon. Mr. Sullivan announces in the letter the arrival of a brand new baby girl at their home. Knowing well the state of ecstatic pleasure that takes possession of Liniment, the boy confidently expects Mr. Sullivan to bring Mrs. Sullivan and the two boys out here before very long to play the new family acquisition.

Many fruit juices are well suited to vinegar making, as they contain sugar in the proper proportion and other necessary or desirable substances. The United States Department of Agriculture has published a bulletin on making vinegar at home.

—THE—
F O R D

—Years ago dubbed the "universal Car" never more popular than today. In fact, 14,000,000 Fords now doing service to the people furnish a unmistakable tribute to their satisfaction as the most popular car on the market today.

NEW MODELS—

Now on display at our show rooms revealed improvements in mechanical construction and more handsomely finished cars than ever before. All closed-in cars are now finished Pyrixylin, the paint that holds its lustre, withstands the weather and will hardly scratch. No better paint is used on the higher priced models. The Coupes now come in Drake Green color and Emerald Green stripings, while the Sedans are finished in Mole Skin Gray with Champaign stripings. They are beauties to look at!

CONSTRUCTION—

The construction of all Ford models have been revised and improved until today they present the most handsome appearance of any car appearing in their class. Swing-out windshields, cloth upholstery in coupes and sedan, all bodies, quick-action windows, improved fan and coil location, and umerous other advanced features speak for themselves.

THE TERMS—

Anyone who has a little money for the down payment can own a Ford. We have a plan of payments that will meet the most elastic pocketbook. Drop in and let us show you these new models and explain our easy payment system.

territory are to constitute a board of directors, with an executive board.

W. G. Kennedy, L. R. Kress, W. G. Kennedy, O. Thompson, Hereford, were named to draft by-laws and to outline the efforts of the organization. The committee will determine the organization. It will work out financial plans and work out financial plans.

This committee has work at a meeting will be held to consider such constitution. In the meetings will be held to further sell

the citizens of those communities on the general plan. Members of the board will call these meetings and act as speakers.

"Henry Ansley of the Amarillo News-Globe was a visitor at the meeting and offered the use of the columns, editorial and news, of his paper as well as a full page of complimentary advertising. This page will be prepared by Homer Steen of Floydada and will appear in the Sunday issue of August 29th. It will further attempt to sell the plan to our own people and will offer a cash prize for a suggested name for the whole area under which future publicity will appear. All of the other newspapers in the area will be asked to carry this page complimentary also.

"C. H. Amacker of Amarillo, manager of the Tri-State Fair there, was another visitor. He suggested that the ten counties in the new organization have their exhibits at Ama-

rillos placed adjoining each other, stating that each of the ten counties had already asked for space and that he was authorized to so reconstruct the exhibit building to make the arrangement possible. Those in the meeting voted to accept this plan.

"Numerous expressions of faith in the project and willingness of the various communities to start active work on the plans of the organization were heard and before adjournment each person present gave the treasurer ten dollars to establish a small fund to meet incidental expenses until such time as the finances of the organization can be worked out.

"Those in attendance at the meeting were: Robt. A. Sone, Muleshoe; S. W. Cooper, Crosbyton; A. C. Hyatt, Ralls; Maury Hopkins, Plainview; M. R. Avery, Dimmitt; Nelson Perdue, Hale Center; Matt A. Cram, Plainview; H. S. Patrick, Dimmitt; L. A. Weeks, Ralls; A. O. Thompson, Hereford; Wm. G. Kennedy, Muleshoe; W. D. Watkins, Ralls; J. B. Cardwell, Plainview; F. W. Struve, Abernathy; Henry Ansley, Amarillo; Dr. S. J. Underwood, Hale Center; E. B. Miller, Plainview; J. E. Swepton, Tullia; Homer Steen, Floydada; Fred Parker, Runningwater; T. D. Moss, Hereford; Ed Bishop, Floydada; M. A. Crum, Friona; H. B. Adams, Lockney; J. I. Hammonds, Floydada; H. P. Webb, Olton; John W. Elliott, Kress; M. E. Cleavinger, Spring Lake; C. H. Amacker, Amarillo; L. R. Thompson, Kress; and Mack Boswell, Plainview.

Herman Buck, of Olton, were the guests of Mr. Buck's niece, Mrs. Ed Langford and family, Friday.

Mr. and Mrs. Floyd Keeny entertained the young people Saturday night.

Mr. and Mrs. Leonard Wydner went to Spur Saturday afternoon to visit Mrs. Wydner's parents.

Rev. John Carney lectured here Sunday at 11 o'clock.

John Rogers returned Monday from Roswell.

Edgar Birch is visiting his parents at Byers, Okla.

Monroe Woodruff returned home from Young county Saturday. He was accompanied by his cousin, Tom Snellings, of that place.

School will begin September 1st and dismiss a month later for cotton picking.

Earl Yardley and Henry Johnson came in Friday from Amarillo where they have been working in the oil field.

Mrs. Jimmie Brittain of Littlefield visited the W. D. Armstrong family Sunday.

"In Business For Your Health"

TO THE VOTERS OF LAMB COUNTY:

In this, the last issue of the Leader before the primary election Saturday, August 28th, I am making a last appeal for your vote in my behalf. It has been impossible for me to see every voter, much as I desired to do so, and I am making this general plea for your favorable consideration the columns of this newspaper.

I desire to state that I am considered by all who have known me in this county for the past three years as being fully qualified to efficiently perform the duties of your County Treasurer. I am an ex-student of Meridian college, have had considerable experience in clerical work and business in general. I respectfully refer the voters to anyone who has known me at any time during my past life as to my ability and integrity. I feel confident I can successfully perform the duties of this important office and sincerely solicit your vote and influence with others in my behalf.

Thanking you in advance for your favorable consideration, I am, very truly yours, M. M. (Jimmie) Brittain, Littlefield. Adv.-1tc.

Whitharral Items

Mrs. Pearl Yardley has been ill for two weeks but is improving now.

C. B. Edgar is building a modern bungalow dwelling west of his store.

Dan Cupid is making the darts fly around Whitharral lately.

Lee Stokes, of Vernon, came in Sunday afternoon and was quietly married to Miss Ola Wright Monday at Levelland, Justice of the Peace Taylor officiating. Mr. and Mrs. Stokes left Wednesday for Childress, their future home.

CACTUS CLUB MET.

The Cactus club met with Mrs. T. Y. Casey and Mrs. H. R. Hudson last Friday.

SWIMMING PARTY.

A delightful afternoon was enjoyed at the swimming pool last Thursday by Mesdames Chas. Harless, C. C. Clements, Ray Jones, Drayton Lambert, A. C. Chesher, Ed Houk, Clayborne Harvey, E. O. Anderson of Clovis, J. C. Houk, E. M. Grantham of Washington, D. C., Dell Houk, Sadie Davis and Misses Alyne Arnett and Myrtle Marion Shaw.

THOSE LOUSY HOGS.

Hog lice, which are generally prevalent wherever hogs are raised, causes considerable loss to the swine industry. This loss takes the form of increased quantity of feed consumed per pound of gain, arrested growth of young pigs, and shrinkage in weight of fattening hogs. Only one species of lice commonly affects hogs, and this parasite obtains its food by puncturing the skin of the animal and sucking its blood. The lice can be eradicated by hand applications, spraying, and dipping. Dipping is the best method of applying treatment. Crude petroleum and coal-tar creosote dips are effective remedies.

SANITATION SAVES PIGS.

More than 600 Illinois farmers using the swine sanitation system advised by the Department of Agriculture saved from 1 to 3 pigs per litter more than under old methods.

WHITHARRAL ITEMS (Cont.)

Otis Riddle and family of Odell, Texas, were the guests of Mr. and Mrs. Lee Crowover Tuesday.

A fine baby girl was born last week at Littlefield to Mr. and Mrs. Clarence Daves, of Whitharral.

C. B. Keeny was operated on for the second time at the Lubbock sanitarium. Both operations were for the removal of puss formed from an infected bone.

Mrs. Ed Langford, who has been quite sick for several days, is much better now.

Mr. and Mrs. Howard and family have been visiting in Knox county for the past few weeks.

Mr. and Mrs. Rufe Keeny and family returned Tuesday night from a prospecting trip down the Colorado River valley and other points. They went as far as Brady, Tex., and reported meeting the average motorists night mare, rain, mud and rough roads.

Miss Vivian Jordan of Meridian, Tex., was here this week greeting her pupils and friends. She was accompanied by her father, Rev. Jordan, of South America, and her sister, Miss Leone Jordan of Fort Worth.

Mr. Cook and family of Odell, Tex., spent last week with W. N. Wright and family here.

Our showman citizen, Wilson Fulbright, and family are traveling with their show in Missouri at present.

Miss Lorine Vickery has been at Littlefield this week nursing Mrs. Clarence Davis.

William Morris and family left Tuesday for their home at Hooks, Texas, after a week's visit with relatives here.

Rev. Tom Suttles, of Levelland, preached here Wednesday night.

Grayden Armsrong, who has been at work down near Weatherford, came home Saturday. He was accompanied by his grandmother, Mrs. Armstrong, and a cousin, Clarence Armstrong, of Weatherford.

Homer Wright came in Sunday from Vernon where he has been at work.

Mrs. Marshall Magee attended the teachers examination at Levelland Friday and Saturday.

Prof. Walter Workman and family, of Sudan, were here Friday.

Clarence Pender and family left Friday night for Dallas to visit relatives.

Mr. and Mrs. Nick Troy left Monday for New Mexico to visit relatives and get a load of strawberries.

Messrs. Ammon Estes, Willie, Roy and Jeff Smith came in Saturday for a visit with old friends.

John Buck and family of Montague county, accompanied by Mr. and Mrs.

WANT MASON'S NAMES.

E. L. Cogdill, secretary of the Littlefield Masonic lodge, is anxious to secure the name of every Mason residing in Lamb county.

Blanks for names and addresses will be found at Stokes & Alexander's drug store, Sadler drug store, either of the local banks, or at Higginbotham Bartlett lumber yard, which Masons are requested to fill in, or else mail their name, address and Masonic standing to Mr. Cogdill at Littlefield.

SCHOOL LAND IN BAILEY COUNTY LEASED FOR OIL.

The most important business transacted by the Hale County commissioners, who met at the Hale County court house Monday afternoon, was

the leasing of the remainder of the school lands in Bailey county to V. C. Nelson and P. E. Boesen of Sudan. The land is being leased at 50 cents an acre and 25 cents renewal for the purpose of drilling for oil. There are 3,364.9 acres in the tract leased. If oil is struck the county school fund will receive the usual one-eighth royalty.—Plainview Evening Herald.

A KITCHEN CONVENIENCE.

A breakfast alcove in a farm kitchen is a great convenience. Use a painted stationary stable and built-in benches or seats to match. Such an alcove is cheerful and attractive, and as it is so close to the source of supplies and so easily kept clean it saves the housewife considerable labor.

GREAT ORCHESTRA TO BE AT LUBBOCK WEDNESDAY, 8TH

One of the biggest musical attractions that has ever come to the South Plains will be at Lubbock September 8 when the Imperial Symphony Orchestra of Mexico will play there at the Texas Tech pavillion under the auspices of the South Plains Music Teachers' Association, according to a letter just received from Miss Mary Dunn, of Lubbock, who is president of the Association.

The orchestra is making its first American tour and is meeting with hearty applause everywhere it plays. One minute the listener is delighted with the freshness of the popular Mexican airs, to be soothed a moment later by the sweetness and solemnity of the classics of the Southern Republic. Standard semi-classical numbers, grand opera selections, popular ballads and old time melodies have their place on the evening's program.

The 40-piece orchestra is under the direction of Robert L. Dechy, graduate of the Mexican Conservatory of Music. He played for President Diaz when he was ten years of age and was pronounced a genius by the president. In addition to the Orchestra proper, the Symphony party includes a number of prominent soloists of Mexico. Felix Marines, first violinist, a graduate of the Conservatory of Music of Milan, Italy, is receiving the acclaim of American audiences wherever the Symphony Orchestra appears.

Among the numbers on the program is "The Overture from William Tell," "The Hungarian Rhapsody of Litz," "A selection from Carmen" and many others.

The orchestra will be at the Tech Pavillion during the South Plains Teachers Institute and in addition to the teachers who will attend, a large number of music lovers from the entire South Plains section are expected to hear the program which will be the outstanding musical attraction in this section for a long time.

OPTOMETRIST IS HERE.

Dr. Ferrell, of McKinney, to Locate in Littlefield.

Dr. J. B. Ferrell, optometrist, was in Littlefield Tuesday looking for a location with the view of making this his future home.

Dr. Ferrell is a registered optometrist by examination, and has been practicing his profession at McKinney for the past 14 years.

He owns land west of Littlefield which is being converted into a modern farm, and believes that this place is an excellent one for his particular line as well as a desirable place in which to live.

PERSONAL ITEMS

"Ma" had a new calf on the farm last night.

J. H. Lucas is this week moving into the Dr. Phillans home.

Wayne Harless, who has been on the sick list, is much better.

Mrs. A. C. Chesher returned Tuesday from a visit to Abilene.

J. M. Ferrell and wife spent Sunday in Levelland.

E. J. Lindley, of Post, made a business trip to Littlefield Tuesday.

Less Barker and father left Thursday for a visit to Chillicothe.

Earl Rain, of Slaton, made a business trip to Littlefield Wednesday.

Ernest Marsh of Quitaque is visiting friends in Littlefield for a few days.

Lem McDowell, of Sulphur Springs, was in Littlefield Tuesday looking for a location.

Lura Mae Clark is visiting her uncle and aunt, Mr. and Mrs. Van Clark, this week.

Mr. and Mrs. John W. Blalock and family returned Tuesday from a visit to Duncan and Waurick, Okla.

Mr. and Mrs. W. M. Pumphry and son, Joe, of Winters, were guests in the J. W. Blessing home last week.

Mrs. J. D. Jones accompanied Mr. Jones parents home last Tuesday to Abilene where she will visit for a few days.

The Leader is in receipt of a letter from Mrs. R. D. Borough, ordering this newspaper sent to her new home address in Amarillo for a year.

Mrs. Bessie Baze and son, Miles J.

Baze and wife, of Oklahoma City, and son and daughter, J. K. and Carlotta, spent Sunday in Clovis.

Miles J. Baze, of Oklahoma City, son of Mrs. Bessie Baze, who has been visiting her, returned last Wednesday.

Ernest Boone, nephew of Mrs. Carrie Leache, and Frank English, of Currie, Texas, is visiting Mrs. Leache this week.

J. B. Blessing, Mr. and Mrs. C. C. Hall, of Amherst, and Mr. and Mrs. Fales, of Yellowhouse, were guests in the J. W. Blessing home Sunday.

Ernest Williams, of the Shaw-Arnett Co., left Tuesday for Perryton to move his family to Littlefield, making this their future home.

The Women's Study Club will meet at the home of Mrs. E. A. Bills next Wednesday, Sept. 1st. The subject for discussion will be "Ireland," and Mrs. C. A. Dugger will have charge.

Taking the Profit Out of War

By **BERNARD M. BARUCH**

Reprinted from *The Atlantic Monthly*.

[The February issue of the Atlantic for 1925 carried a paper by Mr. Sisley Huddleston dealing with the general subject of "taking the profit out of war." The phrase was put into the language by the War Industries Board toward the close of the World War through its efforts to eliminate all war profits. Mr. Huddleston's article came to the attention of Mr. Bernard M. Baruch, chairman of the War Industries Board and administrator of the War Industries Board, and (as he writes us), since it seemed to indicate a growing interest in the idea, induced him to invoke practical means to bring about a full comprehension of taking the profit out of war in the various great countries of the world. To this end he responded to a suggestion of Mr. Owen D. Young, of the Page School of International Relations at Johns Hopkins University, that he establish a course of lectures there to expound the War Industries Board plan in detail. Later he will proceed to make similar arrangements at leading universities in Great Britain, France, Germany, Italy, and Japan. Agreeing with Mr. Baruch that the subject calls for public knowledge and discussion, it was natural for the Atlantic to turn to him for the following paper.—THE EDITORS OF THE ATLANTIC MONTHLY.]

War was once described as Prussia's most profitable industry. It needs only a scant examination of history to learn that other countries were open to the same indictment. The methods of the Robber Barons did not pass with the end of feudalism. Annexation by conquest did not cease. But when America entered the World War President Wilson fathered a doctrine that shall always govern us—that never a foot of territory would be added to our boundaries by force.

So, as America has taken the lead toward making impossible national profit through war, it too may be America's privilege to point the way toward making impossible individual profit through war. To take the profit out of war is to take a long step toward creating an economic detestation of war. The experience of the United States in the World War affords a basis for the belief that the plan here discussed is practical. In fact, it is more than a belief—it is a certainty, although not widely known.

The world is such a busy place, and the radius of human activity has been so greatly enlarged because of modern inventions, that it is not strange that there are but few people who are conversant with what was quietly but effectively taking place in its country in the mobilization and use of its material resources in the World War—a process that would have eventually eliminated all improper profits. Strength is given to the public advocacy of industrial mobilization made by both President Harding and President Coolidge—Mr. Coolidge as recently as last October in his Omaha speech to the American Legion—by the fact that the plan they advocated as a part of the regular national war agencies had once been set up and successfully operated under the War Industries Board.

Preceding the President's recent clear exposition of this subject, some degree of public interest had been engendered by an exchange of letters between Owen D. Young (of Dawes plan fame), in behalf of the Walter Hines Page School of International Relations, and the writer. The correspondence resulted in the establishment of lectures at the Page School (of Johns Hopkins University) on this theme. Previously the *Atlantic Monthly* printed an article by Sisley Huddleston, who pointed out that Europe saw great strides toward peace in the "American idea of 'taking the profit out of war' in a systematic way. His basic reference was to the plan of the War Industries Board.

The resources of a country might be referred to as the five M's: (1) man power; (2) money; (3) maintenance or food; (4) material resources (including raw materials, manufacturing facilities, transportation, fuel and power); and (5) morale. The intelligence with which the first four are directed and co-ordinated as a whole will determine the fifth, the morale of the community.

In the war emergency it early became evident to those who were charged with the responsibility of mobilizing the resources that there was a just sentiment among the people against profiteering. Profiteering might be willful and profit making might be involuntary; but, whatever its form, there was a just determination it should cease. So it became necessary to fix prices where the supply was limited.

Whenever the government created a shortage by its demands, prices were fixed, not only for the Army, Navy and the Allies, but for the civilian population as well. And in addition to price fixing on war essentials (such as steel, wool, copper, and so forth), the balance, after the war program had been filled, was rationed or distributed according to the priority needs of the various civilian demands. In other words, where the price of the product of an industry was fixed that industry had to deliver the part which the government did not need to the civilian population, not in the way the industry chose, but as the government directed.

It must be remembered that when the war came there was no adequate preparation. Indeed, it is doubted by the best authorities whether any effective form of preparation then known would have been of much avail in view of the widespread and engulfing results of the war and the lack of knowledge of the various instruments of destruction which were being devised and which it became necessary to combat.

Our own Army had several divisions competing one with another for mate-

rials, transportation, housing, and so forth. On top of that there prevailed the demands of the Shipping Board, with the slogan that ships would win the war, and of the Food Administration, with the slogan that food would win the war. Further, there was the Railroad Administration with its need for material and labor, and finally there was the feverish quest for labor and supplies on the part of the munition makers—all competing for labor, money, materials, transportation, fuel, power, and each insisting on the greater importance of its activity. All this while the labor supply was being lessened by the flow of men into the Army.

While an endeavor was being made to bring order out of chaos, the great undertaking had to go on. Men, ships, munitions, food, material, had to be provided. Old organizations, methods and traditions had to be met and changed, but not destroyed until the new was set up. The wonder of it all is, not that there were so many mistakes, but that so much was accomplished.

At the time we entered the war prices were at their peak, and tending higher because of the war's insatiable demands. The problem was not alone to secure the materials and labor and to stop the confusion, but to do it in such a way that the morale of the people would be maintained. The prices of some things, like steel and copper, were fixed far below prevailing rates, and the wages of labor in those industries were standardized. The more highly organized an industry, the easier it was to arrange. Order did not commence to appear until the Army funneled its needs through one man sitting with a section of the War Industry Board and until the Navy, Shipping Board, Allies and Railroad Administration did likewise. Each department satisfied its requirements through a central authoritative body. This was called the War Industries Board, controlling and directing all materials and co-ordinating through its chairman the whole system of governmental and civilian supply and demand. It was created by executive order in March of the year 1918.

Briefly, this board endeavored to mobilize the industries of America so that the fighting forces of the Allied and associated nations could draw from the United States—the last reservoir of men, materials and money—the things needed for the winning of the war at the time the things were needed and with the least dislocation of industry and the least disturbance of the civilian population.

The War Industries Board was organized like any other supervisory committee, with a chairman, vice chairman, members in charge of various activities, bureau chiefs and subordinate workers. It surveyed and sought to arrange the whole industrial war field under the plenary powers conferred by the President and the Congress. How well it did this is a story for others to tell. What it did is the basis of the plan I am here drawing.

It was comparatively easy to fix prices and to distribute materials, and indeed to stabilize the wages of labor in those industries in which prices were fixed. The labor situation, however, became increasingly difficult, particularly when General Crowder found it necessary to withdraw men for the proposed campaign of 1919 after 4,600,000 soldiers had already been taken.

Much has been said about the profiteering of labor. It is an unjust accusation. It is only fair to say that this condition was primarily brought about through the inexperience of the organization within our own governmental departments and by the furious bidding of munition makers and ship builders for services. That situation, together with the increased prices of the things that labor had to buy with the results of its work, made it inevitable that labor must get higher wages.

So it became evident that the price fixing program had to go even further, and the War Industries Board, when the Armistice came, was proceeding with a campaign to fix the prices of all the basic things that labor had to buy. Some had previously been fixed. I speak of labor in a much broader sense than manual labor, for the unorganized so-called "white collar" part of our community—clerks, teachers, government employees, professional men—were less able to meet the situation than labor in the narrower sense. For the protection of relief of such groups certain were devised. To illustrate—

One of them provided that manufacturers, jobbers and retailers of shoes could make and sell shoes only of a specified quality at a fixed price, effective July, 1919. No one who did not have a card of the War Industries Board in his window could sell shoes, and only the standardized shoes could be sold. No jobber or manufacturer would sell shoes to anybody who did not have this card. The shoes were to be stamped Class A, B or C and had to be of the quality prescribed and sold at the price fixed. The country was so organized in every district that there could be immediately reported to Washington the name of any shoe retailer who did not carry out the regulations of the War Industries Board as to price and quality. Through restrictions on his labor, money, raw materials and transportation no manufacturer would have been permitted to sell to any dealer violating the regulations. The Armistice stopped the execution of this plan.

Another plan of this nature: The manufacturers of men's and women's wearing apparel had in 1918 been called to Washington, together with the retailers of various goods, and notified that regulations would have to be made in regard to retail prices and standardization of clothing.

The rulings by the board were made known through the issuance of official bulletins at irregular intervals and were widely distributed by the press, which co-operated in this most necessary work with a whole-hearted purpose that gave to the orders of the War Industries Board the instant and broad circulation they required.

Mr. Hoover already was doing much to perfect his control of food products and prices. There was also talk of fixing rents, and in some cities this was done.

If we were to start, in the event of another war, at the place where we were industrially when the World War ended, the President, acting through an agency similar to the War Industries Board, would have the right to fix prices of all things as of a date previous to the declaration of war when there was a fair peace time relationship among the various activities of the nation. It would be illegal to buy, sell, serve or rent at any other than these prices. Brakes would be applied to every agency of inflation before the hurtful process started. An intelligent control of the flow of men, money and materials would be imposed, instead of having the blind panic heretofore ensuing on the first appearance of the frantic demands of war. The Draft Board would have before it the rulings of the priority committee, together with the estimated needs of every business and profession in its relationship to the conduct of the war, and men would be selected accordingly. The Draft Board could more intelligently decide, with the advice of the priority committee, many of the problems with which it would be faced. There would be no sending of men to the trenches who were needed for expert industrial war

work and then bringing them back again. Businesses not necessary to the winning of the war would be curtailed. The Draft Board would have that information before it.

The prices of all things being fixed, the price fixing committee would make any necessary adjustments, as was done during the war. Under the system used in 1918 these prices were made public and adjusted every three months, so that any consumer or producer had his day in court when he considered prices unfair. Those who complained that during the war prices were too high had this ready recourse to hand.

In the meantime all the industries of the country would have been mobilized by the formation of committees representative of each industry as was done in the World War. Over them would be placed a government director or commodity chief. The various government departments would appoint committees representing their requirements, so that on one committee the resources of the nation would be represented and on the other the demands of the government. The government director would stand between to decide, in conjunction with the priority committee, to what department supplies should go.

Money would be controlled and directed like any other resource. "Taking the profit out of war" is not synonymous with "conscription of wealth," as it is sometimes regarded. The latter is a theoretical project, prohibited by our Constitution, contrary to the spirit of our social and political institutions, and impossible in practice. Taking the profit out of war is an orderly and scientific development of the economics and conduct of modern war, necessary to the effective mobilization of national resources and indispensable to equalizing the burdens of war among the armed and civilian population. Born of experience and proved by practice, it removes some of the most destructive concomitants of modern war—the confusion and waste incident to war time inflation.

This term "conscription of wealth," used by so many, has created a hope among those of socialistic tendencies, and a fear among those who, like me, believe in our system based upon personal initiative and reward, of a taking of money, without payment, for the use of State. Neither the hope nor the fear is justified by the recommendation herein contained or by our experience in the war. The use of money should be controlled and directed in a national emergency. A man should no more be permitted to use his money as he wishes than he should be permitted to use the production of his mine, mill or factory except through the general supervising agency. This was being done toward the end of the war.

During the final phase of the World War no man or corporation or institution could raise money without the approval of the Capital Issues Commit-

Chrysler Announces New 4 Cylinder Car

Full Size, Unskimped Leg Room, Unusual Comfort features the '50.' It has the same standardized quality as in other Chryslers, typical Chrysler design, performance and appearance, included in the low priced creation—all at the lowest prices for which Chrysler has ever been sold. Its three models—coupe, coach and four-door sedans are

Priced at \$750, \$780 and \$830, f.o.b. Detroit

This new Four has better riding comfort, greater roominess. In fact, it is a full sized car in which modern space engineering has been surprisingly utilized. It handles easier and gives speed with comfort up to the car's maximum. The economy of 25 miles per gallon of gasoline—these and other features, notably the apparent great value built into the car, are expected by the Chrysler organization to make this new car an immediate success in the small car field. They will be on display in our show rooms in a few days.

Don't Buy Until You See the New Chrysler

You owe it to yourself to see this new Chrysler Four before buying your new car this fall. Its outstanding features will readily convince you of its superiority.

JESS. MITCHELL,

MEMBER

Editor and Publisher

National Editorial Association, Texas Press Association

Subscribers who change their addresses, or fail to get their paper, should immediately notify this office, giving both new and old addresses. Communications of local interest are solicited. They should be briefly written, on only one side of the paper, and must reach this office not later than Wednesday noon of each week. The right of revision or rejection is reserved by the publisher.

Advertising that does not show in its text or typography that it is paid for must be marked as an advertisement. All local advertisements remain in this paper for the time specified or until ordered out. All notices, matters not by whom nor for what purpose, if the object is to raise money by admission fee or otherwise, is an advertisement and when sent in for publication must be paid for at the regular advertising rate per line for each issue printed.

Obituaries, cards of thanks, and resolutions of respect will also be charged for at the same rate.

Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of the Littlefield Leader will be gladly corrected upon its being brought to the attention of the publisher.

A THOUGHT FOR THE WEEK

Better is a handful with quietness than both the hands full with travail and vexations of spirit.—Ecl. 4:6.

That happy state of mind, so rarely possessed, in which we can say, "I have enough," is the highest attainment of philosophy.—Zimmerman.

KNOWS HER BUSINESS.

A couple of weeks ago we had an excellent example of the fact that Nature knows her business, and that she has a law of compensation which equalizes everything pretty well in the long run.

Out of the West Indies came a hurricane to sweep the South Atlantic coast, destroying thousands of dollars worth of property. Fortunately the loss of life was not large. The wind wrought havoc, but the clouds accompanying it were filled with moisture, and these broke over the Middle West, all over the South Plains country, at a time when nothing but good rains would have matured some of the growing crops much in need of moisture.

As a result, this section is now boasting of the finest crop prospects in its entire history. Some of the early feed stuff, corn, kaffir and maize that had begun to fire at the bottom, pricked up immediately and went on with its growth and development to perfect maturity. Pastures were refreshed and late gardens much revived. While there was considerable property loss in the Islands yet it has been estimated that the increased value of crops in the U. S., occasioned by this storm will amount in the neighborhood of \$50,000,000.

Take it up one side and down the other and Littlefield people probably

complain more about the weather than anything else, and always without figuring that "it is an ill wind that blows nobody good."

Old Nature proved by the hurricane and the winds that she knows her business, and she has been proving it for hundreds of years. The great trouble with most of us is we don't look close enough for the evidences. We are too quick to find fault with the very thing that is working to our own interest if we could only realize it.

Of course, none of us are happy that our prosperity may sometimes come as the result of some one else's adversity, that is Nature's business, not ours; but we may console ourselves sometimes with the thought that when we are getting the bad side of the situation some other part of the world is getting the better one.

Wolves are blamed for a spread of rabies in Russia. Maybe it started from a wolf that had been bitten by a Bolshevik.

THE OTHER FELLOW.

No one man ever made a baseball team, and no one man ever carried on a successful business by himself. City carpenters and plumbers may think they have little interest in the farmer. The man handling freight on a city delivery truck or the tinkeeper paying off a bunch of stevedores on a seaport dock, may say: "What do we care about the farmer's problems?"

But the majority of carpenters secure employment from individuals or corporations who, in turn, are dependent for the business they do, upon the sale or manufacture of products derived from some farm crop. A large part of the business of the

city drayman and the waterfront stevedores, will be handling farm crops, either in their fresh state, canned, or in the shape of sugar, flour, cured meats, etc. The man who says he is not interested in agriculture lacks good sense.

Lack of tariff protection on crops where it is necessary, simply cuts off the jobs of thousands of workmen in other lines of industry besides farming. What good does it do the laboring man if he can buy butter, eggs or sugar for a few cents less each month, if unrestricted foreign competition causes him to lose his job? The sooner we all learn that we have an interest in each other's problems, the sooner will industrial and agricultural stability be assured.

When we see a fellow with bell-bottom pants, vaseline on his hair and a wrist watch we wonder why they ever went to the trouble to search the African jungle for the missing link.

EVERYBODY RIDING.

The best place for the Littlefield man who hasn't been won over to the side of the automobile is in the Solomon Islands, where there are 150,000 and only two autos, or in Afghanistan, with only one machine to each million people. Because in this country they are certainly getting thick, the latest census showing one auto to every six people. If trucks and motor buses were counted in there would be a machine for every family.

The city man wants to get to the country and the country man wants to get to the city, so everybody rides. And while riding they are coming to know each other better, to like each other better and to get more out of life.

Nothing, not even war, has served to bring the entire United States closer together and make one big family of it than the auto. The man who can't see this and appreciate the fact that the auto has been a great help toward prosperity is out of step.

It's up to everybody to boost this new friend of the race, though he may not yet have one.

More than one man has worked his wife to death and then tried to square himself by putting "At Rest" on her tombstone.

ANOTHER "MONEY CROP."

We took occasion recently to call attention to the opportunity for money making offered by a few colonies of bees, and hardly had it appeared in print until we received a government report showing that several thousand residents of the U. S. are making comfortable livings, some of them actually getting rich, in peanut culture. Government figures show that \$20,000,000 was spent for peanuts and peanut products in this country last year. It shows that while 694,075,000 pounds of peanuts were raised in the U. S. we still had to import 83,000,000 pounds to meet the domestic demand.

So here is another chance for the Littlefield man who is always anxious to "try his hand" at new and different "money crops." Of course you can't grow peanuts in any kind of soil, nor in any kind of climate. But there are many thousands of untilled acres on which they can be grown. You might find in peanut raising the very path that will lead you to a fortune.

A scientist says the blood of a baboon is like that of a human. But how about its conduct?

HAY FEVER DAYS.

We're back around to hay fever days again. You may be fortunate enough not to have made the acquaintance of this disease, but if you have at any time felt a touch of it you know it is no laughing matter.

Most anyone is subject to it and an attack of it is difficult to get rid of. Doctors say the only sure remedy is scientific eating—lots of fruit and no meat during the hay fever season. That will cure it—but here is the way to prevent it in the first place:

Cut your weeds. Decaying weeds and other vegetable matter breeds hay fever in the fall just the same as green weeds breed disease—carrying germs in the spring. So if you want to do your part toward keeping down hay fever in Littlefield cut your weeds now before they are fully ripened and the pollen and seed begin to be carried about by the wind.

Kwitcherbellakin and smfle.

IF POSTMASTERS TALKED.

If the regulations of the postal service permitted our postmasters to tell what goes in and out of the Littlefield postoffice we would have a lurid and convincing argument for home-town trade.

The postmaster would tell us of the many hundreds of dollars that go into the coffers of the big city mail-order houses; of the multiplied money orders he issues that bring no general returns, and all of this at the sacrifice of home trade and community prosperity.

It has been only a few days ago that several mail bags arrived here filled to capacity with big mail-order catalogs that were dumped into this community, with their vivid illustrations and bright colored ink they are wonderfully fascinating and they will carry thousands of dollars out of this community this fall unless some steps are taken to counteract their influence.

There is only one way to compete with the mail-order concern, and that is to compete with their advertising. Whenever local business awakens to the fact that they are entitled to the business of this town and community and can get it if they go after it in the right manner, then the mail-order houses will look for some other place to send their catalogs and our community prosperity in general will be considerably enhanced.

THE HOME NEWSPAPER.

If there is anything in the average town worth talking about, ten chances to one the home newspaper had a hand in putting it there.

Every town gets its money's worth through its home newspaper. It's the wagon that carries all your goods to market. It ought to be kept in good repair. It will pay to grease it, paint it and keep its running gears in good shape and shelter.

It is the guardian and defender of every interest, the forerunner and pioneer of every movement and the sturdy advocate of law and order. It is your home institution and it is to your interest to make it the best possible.

LITTLE LEADERS

their wife chews gum.

If you see a Littlefield man wearing a rusty looking suit it may be the one the merchant said would "wear like iron."

Some Littlefield mothers are looking forward to their own vacations which will come when school starts again.

Some Littlefield men will buy fake stocks and believe the weather man, but we never heard of one so foolish that he would set his timepiece by a woman's wrist watch.

Littlefield girls claim they dress for comfort, but now and then we see one dressed as though she wanted to give everybody in town a good laugh.

Nothing makes a Littlefield woman madder than to search her husband's pockets for a little change and find a letter she gave him to mail two weeks ago.

Some Littlefield people will sit around home for hours without saying a word and then go to the picture show and talk all evening.

THE GREAT COWPEA.

The cowpea not only increases the productiveness of the soil, but also improves its general physical condition. This crop has the advantage of making a good growth on soils that will not produce profitable yields of other legumes or cereals. It is an excellent green-manure crop for vineyards and orchards.

Except on the poorer soils it is more profitable to utilize the cowpea as hay or pasture and then plow under the stubble than to plow under the entire crop. About 85 per cent of the fertilizing and soil improving value of the cowpea is contained in the hay and about 15 per cent in the roots and stubble. Feeding experiments indicate that much of the fertilizing value of feeds is recovered in the manure. It is therefore possible to obtain the feeding value of the cowpea as hay or pasture and, in returning the manure to the soil, to save a large part of the fertilizing value.

QUICK BREADS.

In making quick breads and cakes allow in general 1 to 1 1/2 teaspoons of baking powder for each cup of flour. Butter cakes that have a great deal of egg white may, however, need less. Pop-overs and sponge cakes are the exceptions and require no baking powder at all.

Political Announcements

The Lamb County Leader is authorized to announce the following candidates for the respective offices to which they aspire, subject to the action of the Democratic Primary election, the fourth Saturday in August, 1926.

County Tax Assessor.
S. M. Davis, Olton.
Roy L. Gattis, Littlefield.
County Clerk.
Marshall R. Cavett, Olton.
A. H. McGavock, Littlefield.
County Treasurer.
M. M. (Jimmie) Brittain, Littlefield.
Guy Willis, Olton.

THE PROGRESS OF TEXAS AS MEASURED BY PUBLIC UTILITIES

A glance backward and a look ahead which business men always take at the beginning of a year shows that Texas has been making progress during 1925. It shows that the prospects for further advancement during 1926 is good.

And in every phase of the review and prospect is seen the progress of the several essential public services upon which growth and achievement have depended.

The service of the telephone in this community is one of the items that have made for development here and without which the development of the past year could not have been accomplished. In the outlook for the present New Year this company is expected to be a major factor in the building of this community to still better service to the people.

The service of the Panhandle Telephone system and the growth of this community go hand in hand. Our aims and ambitions, if they are right, are identical.

Littlefield State Bank

FARMERS SHOWING INTEREST IN RAISING OF WHEAT

Excellent yield of wheat in this year has started the farmers of this section to why more wheat is not raised in the Littlefield vicinity, and they have already come to the conclusion that they have been overlooking a "good bet."

It is the statement of several of the leading farmers of this vicinity that wheat can be raised as well in this section as in the northern part of the county, which statement is adequately proven by some of the fine wheat crops harvested here this year, some of which went as high as 39 bushels per acre. Others declare that while some of their particular farm land is not adapted to wheat raising, yet there are particular portions which

is, and in some sections, especially the south half of the Spade ranch and in the vicinity of Whittharral it is declared that wheat may be grown as profitably as anywhere else in the county.

In the interest of a larger wheat crop in this vicinity P. W. Walker has offered to furnish the seed, properly treated against smut and other disease at practically a cost basis as an inducement for larger acreage here this year. It is also stated that the authorities of the State Experiment Station at Lubbock will be glad to come out here at any time and make a special examination and analysis of particular tracts of land for the farmers as to whether it is adaptable for wheat growing.

It is pointed out that wheat coming onto the market during July furnishes an early money crop, perhaps the earliest of this section, and at a time when generally needed by the farmers.

Stomach So Bad Can't Eat Even Fruit

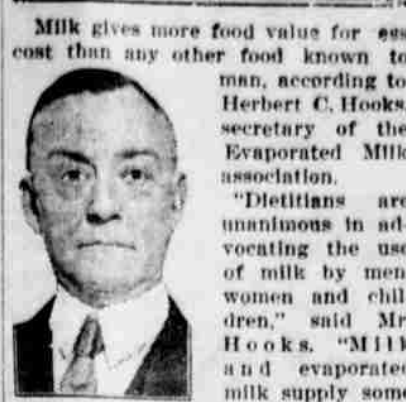

"For years was badly constipated and troubled with gas after eating. Could not eat fruit and many other things. Adlerika has done me good—can now eat anything." (Signed) W. H. Fletcher. Adlerika removes GAS and often brings astonishing relief to the stomach. Brings out a surprising amount of old waste matter you never thought was in the system. Stops that full, bloated feeling and makes you enjoy eating. Excellent for chronic constipation. Stokes & Alexander Drug Co.

FINISH SCHOOL BUILDING.

Olton South Ward school building is almost ready for occupancy. They have the outside nicely painted and the carpenters will soon have the inside ceiled and overhauled ready for school. They have the new home for the teacher done and nicely painted, ready to go. The teachers are employed. This is a new ward, where they used only one teacher last year but will have two this year. They also have some that are ready for the high school which we understand will be brought to Olton where they can have a first class high school with 18½ credits.—Olton Enterprise.

Milk Gives Most Food Value At Least Cost

Milk Gives Most Food Value At Least Cost

H. C. Hooks.

Milk gives more food value for less cost than any other food known to man, according to Herbert C. Hooks, secretary of the Evaporated Milk Association.

"Dietitians are unanimous in advocating the use of milk by men, women and children," said Mr. Hooks. "Milk and evaporated milk supply some of all the materials necessary for the growth and maintenance of the body; they furnish energy for work, play and warmth."

"Milk helps repair the wear and tear of the body. It is a good as meat for building muscle. Moreover, it is cheaper. A quart of milk will supply as much protein as seven ounces of sirloin steak or four large eggs. Milk, particularly evaporated milk, which has twice the mineral content of market milk, is one of the best and cheapest sources of lime, which is a form of calcium. Infants and growing children need lime to build bones and teeth. It is just as necessary for adults to keep their bones in good condition. One quart of milk, or one pint of evaporated milk, furnishes as much calcium as ten large oranges, thirty-two eggs or twenty pounds of beef. Milk also is a valuable source of phosphorus and supplies a certain amount of iron."

"By some authorities milk is said to be an aid in longevity. Dr. Herman Bundesen, health commissioner for Chicago, gives his prescription for long life as follows: Drink one quart of milk a day and mix with one hour of sunshine. Repeat ad infinitum."

"Due to the efforts of health officials to get across to the public the message of milk, its general use in the United States has advanced tremendously in the last decade. This is especially true of evaporated milk for reasons of its convenience and economy. Housewives know there is no fear of obtaining contaminated evaporated milk, because it is not only the best grade of market milk rendered double-sterilized by dehydrating, but it is sterilized as well."

ENOCHS GIN WILL HANDLE A LARGE COTTON ACREAGE

"Prospects for future land business could not be more flattering," said J. H. Lucas, of The Blalock Co., to a Leader representative this week. During the past few weeks there have been several prospectors looking over our lands, and every day there are several enquiries in the mail. Incidentally, a few sales are now being made, said Mr. Lucas, and just as soon as the cotton growers of east and central Texas get through with their fall crops a big influx of buyers is looked for, he said. Lucas said his company still had about 10,000 acres of land yet for sale, and expected to easily clean up the entire tract this fall.

Work on a 5-80 Lummus type cotton gin was begun at Enochs last week and is being pushed to completion. There is about 20,000 acres of crop on the Enochs lands this year, about 50 per cent of it being in cotton.

All the crops of that section are especially fine, declared Lucas. Most of it is sod, but it could scarcely be better. D. W. Henry, who came there from Nolan last fall, purchasing 640 acres, has 600 of it in cultivation, 300 of which is cotton, and it is all as fine as could be asked for.

A. F. Wharton, E. G. Flowers and T. H. Enochs, Jr., of Jackson, Miss., are here this week looking over the Enochs properties and are greatly pleased with the sales and development that is going on there. They all had emphatic favorable remarks to make regarding the fine crop prospects of this entire section, and especially regarding the future prosperity of their particular interests.

STOVE DEMONSTRATION.

Texas Utilities Have Experts Explain Merits of Electric Cooking.

The Texas Utilities Co., R. E. McCaskill, manager, put on a very popu-

lar and successful demonstration last night. Miss Ethel Mansfield, Okla., and demonstration secretary. She was assisted by Miss West, Westinghouse representative. The demonstration was well attended and was a learning experience for all present. The electric stove was the center of attraction. Caskill stated that the number of prospectors having one of these convenient articles in their homes is a near future.

"COURTESY AND SERVICE"

Happy Wedlock Sure Thing If Bride Is Cook

By KATHRYN ST. JOHN

Haphazard meals yearly ruin thousands of marriages. Most marital ships would maintain an even keel if brides knew cooking.

Many of the first year's troubles between newlyweds would be avoided if the wife were capable of preparing foods with an experienced hand. Wives are to blame for the failure of many business men in the final analysis. The business man's health depends a great deal on what he eats. And it's up to his wife to see that he gets the right kind of food. A healthfully balanced diet goes a long way toward making the tired business man less fatigued.

The expert home manager sees to it that her husband never comes home to a delicatessen lunch. There is a carefully planned meal waiting for him. The real housewife knows that an unbalanced diet means trouble and avoids it. Likewise, she appreciates the fact that variation in her menus is important. In this connection the following recipes have been selected as an aid to the home manager:

Frozen Salad.

- ½ cup mayonnaise dressing
- ¼ cup candied cherries
- ¼ cup diced pineapple
- ¼ cup diced apple
- 1 tbsp. pineapple juice
- ¼ cup cream

Mix the fruit and juices. Combine milk and cream, chill and whip; then fold in the fruit and mayonnaise. Pour into a mold and pack in equal parts of salt and ice. Serve on lettuce leaves. This serves 4.

Orange Bavarian.

- 1 tbsp. gelatin
- ¼ cup cold water
- 1 cup orange juice
- 2 tbsp. lemon juice
- ¼ tsp. salt
- 1-3 cup evaporated milk
- 1-3 cup whipping cream
- ¼ cup sugar

Soak gelatin in cold water, add fruit juices, sugar and salt. Heat in the top of a double boiler until gelatin dissolves. Strain and set in pan of cold water. When mixture begins to set, fold in the evaporated milk and cream which have been beaten stiff.

Banana Ice Cream.

- 4 very ripe bananas
- ¼ cup lemon juice
- ¼ cup sugar
- 2 cups evaporated milk
- 1 cup cream
- ¼ tsp. salt

Scrape off adhering fibrous portions on surface of peeled bananas. Mash and rub through a sieve. Add the rest of the ingredients in the order given and stir until all are well blended. Let stand for 20 minutes so that all sugar may dissolve. Freeze in a 1 to 6 salt-ice mixture. This recipe makes ½ gallon cream.

Unseen Sources of Long Life

The basic sources of automobile value are not always apparent to the eye.

A motor car, like a house, may LOOK a great deal more substantial than it really is.

Because of this difficulty, more and more thousands are turning to Dodge Brothers product for insurance against disappointment.

The years have proved, and each year proves anew, that Dodge Brothers are as deeply concerned with the UNSEEN goodness of their motor car, as with the seen.

The mileage it will deliver, the safety it will provide, the expense and trouble it will save the owner over a period of years, are quite as important to Dodge Brothers as the more obvious details of equipment and style.

A THOUGHT FOR THE WEEK

Better is a handful with quietness than both the hands full with travail and vexations of spirit.—Ecc. 4:6.

That happy state of mind, so rarely possessed, in which we can say, "I have enough," is the highest attainment of philosophy.—Zimmerman.

KNOWS HER BUSINESS.

A couple of weeks ago we had an excellent example of the fact that Nature knows her business, and that she has a law of compensation which equalizes everything pretty well in the long run.

Out of the West Indies came a hurricane to sweep the South Atlantic coast, destroying thousands of dollars worth of property. Fortunately the loss of life was not irage. The wind wrought havoc, but the clouds accompanying it were filled with moisture, and these broke over the Middle West, all over the South Plains country, at a time when nothing but good rains would have matured some of the growing crops much in need of moisture.

As a result, this section is now boasting of the finest crop prospects in its entire history. Some of the early feed stuff, corn, kaffir and maize that had begun to fire at the bottom, pricked up immediately and went on with its growth and development to perfect maturity. Pastures were refreshed and late gardens much revived. While there was considerable property loss in the Islands yet it has been estimated that the increased value of crops in the U. S., occasioned by this storm will amount in the neighborhood of \$50,000,000.

Take it up one side and down the other and Littlefield people probably

complain more about the weather than anything else, and always without figuring that "it is an ill wind that blows nobody good."

Old Nature proved by the hurricane and the winds that she knows her business, and she has been proving it for hundreds of years. The great trouble with most of us is we don't look close enough for the evidences. We are too quick to find fault with the very thing that is working to our own interest if we could only realize it.

Of course, none of us are happy that our prosperity may sometimes come as the result of some one else's adversity, that is Nature's business, not ours; but we may console ourselves sometimes with the thought that when we are getting the bad side of the situation some other part of the world is getting the better one.

Wolves are blamed for a spread of rabies in Russia. Maybe it started from a wolf that had been bitten by a Bolshevik.

THE OTHER FELLOW.

No one man ever made a baseball team, and no one man ever carried on a successful business by himself. City carpenters and plumbers may think they have little interest in the farmer. The man handling freight on a city delivery truck or the timkeeper paying off a bunch of stevedores on a seaport dock, may say: "What do we care about the farmer's problems?"

But the majority of carpenters secure employment from individuals or corporations who, in turn, are dependent for the business they do, upon the sale or manufacture of products derived from some farm crop. A large part of the business of the

city drayman and the waterfront stevedores, will be handling farm crops, either in their fresh state, canned, or in the shape of sugar, flour, cured meats, etc. The man who says he is not interested in agriculture lacks good sense.

Lack of tariff protection on crops where it is necessary, simply cuts off the jobs of thousands of workmen in other lines of industry besides farming. What good does it do the laboring man if he can buy butter, eggs or sugar for a few cents less each month, if unrestricted foreign competition causes him to lose his job? The sooner we all learn that we have an interest in each other's problems, the sooner will industrial and agricultural stability be assured.

When we see a fellow with bell-bottom pants, vaseline on his hair and a wrist watch we wonder why they ever went to the trouble to search the African jungle for the missing link.

EVERYBODY RIDING.

The best place for the Littlefield man who hasn't been won over to the side of the automobile is in the Solomon Islands, where there are 150,000 and only two autos, or in Afghanistan, with only one machine to each million people. Because in this country they are certainly getting thick, the latest census showing one auto to every six people. If trucks and motor buses were counted in there would be a machine for every family.

The city man wants to get to the country and the country man wants to get to the city, so everybody rides. And while riding they are coming to know each other better, to like each other better and to get more out of life.

Nothing, not even war, has served to bring the entire United States closer together and make one big family of it than the auto. The man who can't see this and appreciate the fact that the auto has been a great help toward prosperity is out of step.

It's up to everybody to boost this new friend of the race, though he may not yet have one.

More than one man has worked his wife to death and then tried to square himself by putting "At Rest" on her tombstone.

ANOTHER "MONEY CROP."

We took occasion recently to call attention to the opportunity for money making offered by a few colonies of bees, and hardly had it appeared in print until we received a government report showing that several thousand residents of the U. S. are making comfortable livings, some of them actually getting rich, in peanut culture. Government figures show that \$20,000,000 was spent for peanuts and peanut products in this country last year. It shows that while 694,075,000 pounds of peanuts were raised in the U. S. we still had to import 83,000,000 pounds to meet the domestic demand.

So here is another chance for the Littlefield man who is always anxious to "try his hand" at new and different "money crops." Of course you can't grow peanuts in any kind of soil, nor in any kind of climate. But there are many thousands of untilled acres on which they can be grown. You might find in peanut raising the very path that will lead you to a fortune.

A scientist says the blood of a baboon is like that of a human. But how about its conduct?

HAY FEVER DAYS.

We're back around to hay fever days again. You may be fortunate enough not to have made the acquaintance of this disease, but if you have at any time felt a touch of it you know it is no laughing matter.

Most anyone is subject to it and an attack of it is difficult to get rid of. Doctors say the only sure remedy is scientific eating—lots of fruit and no meat during the hay fever season. That will cure it—but here is the way to prevent it in the first place:

Cut your weeds. Decaying weeds and other vegetable matter breeds hay fever in the fall just the same as green weeds breed disease—carrying germs in the spring. So if you want to do your part toward keeping down hay fever in Littlefield cut your weeds now before they are fully ripened and the pollen and seed begin to be carried about by the wind.

Kwitcherbellaikin and smile.

IF POSTMASTERS TALKED.

If the regulations of the postal service permitted our postmasters to tell what goes in and out of the Littlefield postoffice we would have a lurid and convincing argument for home-town trade.

The postmaster would tell us of the many hundreds of dollars that go into the coffers of the big city mail-order houses; of the multiplied money orders he issues that bring no general returns, and all of this at the sacrifice of home trade and community prosperity.

It has been only a few days ago that several mail bags arrived here filled to capacity with big mail-order catalogs that were dumped into this community, with their vivid illustrations and bright colored ink they are wonderfully fascinating and they will carry thousands of dollars out of this community this fall unless some steps are taken to counteract their influence.

There is only one way to compete with the mail-order concern, and that is to compete with their advertising. Whenever local business awakens to the fact that they are entitled to the business of this town and community and can get it if they go after it in the right manner, then the mail-order houses will look for some other place to send their catalogs and our community prosperity in general will be considerably enhanced.

THE HOME NEWSPAPER.

If there is anything in the average town worth talking about, ten chances to one the home newspaper had a hand in putting it there.

Every town gets its money's worth through its home newspaper. It's the wagon that carries all your goods to market. It ought to be kept in good repair. It will pay to grease it, paint it and keep its running gears in good shape and shelter.

It is the guardian and defender of every interest, the forerunner and pioneer of every movement and the sturdy advocate of law and order. It is your home institution and it is to your interest to make it the best possible.

LITTLE LEADERS

If we were asked what is the most taxed thing in Littlefield our first guess would be a mother's patience.

We have often wondered why it is some Littlefield men will go around with a quart of tobacco buried in their jaw and then get nervous when

their wife chews gum.
If you see a Littlefield man wearing a rusty looking suit it may be the one the merchant said would "wear like iron."

Some Littlefield mothers are looking forward to their own vacations which will come when school starts again.

Some Littlefield men will buy fake stocks and believe the weather man, but we never heard of one so foolish that he would set his timepiece by a woman's wrist watch.

Littlefield girls claim they dress for comfort, but now and then we see one dressed as though she wanted to give everybody in town a good laugh.

Nothing makes a Littlefield woman madder than to search her husband's pockets for a little change and find a letter she gave him to mail two weeks ago.

Some Littlefield people will sit around home for hours without saying a word and then go to the picture show and talk all evening.

THE GREAT COWPEA.

The cowpea not only increases the productivity of the soil, but also improves its general physical condition. This crop has the advantage of making a good growth on soils that will not produce profitable yields of other legumes or cereals. It is an excellent green-manure crop for vineyards and orchards.

Except on the poorer soils it is more profitable to utilize the cowpea as hay or pasture and then plow under the stubble than to plow under the entire crop. About 85 per cent of the fertilizing and soil improving value of the cowpea is contained in the hay and about 15 per cent in the roots and stubble. Feeding experiments indicate that much of the fertilizing value of feeds is recovered in the manure. It is therefore possible to obtain the feeding value of the cowpea as hay or pasture and, in returning the manure to the soil, to save a large part of the fertilizing value.

QUICK BREADS.

In making quick breads and cakes allow in general 1 to 1½ teaspoons of baking powder for each cup of flour. Butter cakes that have a great deal of egg white may, however, need less. Pop-overs and sponge cakes are the exceptions and require no baking powder at all.

Political Announcements

The Lamb County Leader is authorized to announce the following candidates for the respective offices to which they aspire, subject to the action of the Democratic Primary election, the fourth Saturday in August, 1926.
County Tax Assessor.
S. M. Davis, Olton.
Roy L. Gattis, Littlefield.
County Clerk.
Marshall R. Cavett, Olton.
A. H. McGavock, Littlefield.
County Treasurer.
M. M. (Jimmie) Brittain, Littlefield.
Guy Willis, Olton.

THE PROGRESS OF TEXAS AS MEASURED BY PUBLIC UTILITIES

A glance backward and a look ahead which business men of ways take at the beginning of a year shows that Texas has been making progress during 1925. It shows that the prospects for further advancement during 1926 is good.

And in every phase of the review and prospect is seen the progress of the several essential public services upon which growth and achievement have depended.

The service of the telephone in this community is one of the items that have made for development here and without which the development of the past year could not have been accomplished. In the outlook for the present New Year this company is expected to be a major factor in the building of this community to still better service to the people.

The service of the Panhandle Telephone system and the growth of this community go hand in hand. Our aims and ambitions, if they are right, are identical.

Littlefield State Bank

FARMERS SHOWING INTEREST IN RAISING OF WHEAT

Excellent yield of wheat in this year has started the farmers of this section to why more wheat is not the Littlefield vicinity, and them have already come to a decision that they have been

overlooking a "good bet." It is the statement of several of the leading farmers of this vicinity that wheat can be raised as well in this section as in the northern part of the county, which statement is adequately proven by some of the fine wheat crops harvested here this year, some of which went as high as 30 bushels per acre. Others declare that while some of their particular farm land is not adapted to wheat raising, yet there are particular portions which

is, and in some sections, especially the south half of the Spade ranch and in the vicinity of Whitbarral it is declared that wheat may be grown as profitably as anywhere else in the county.

In the interest of a larger wheat crop in this vicinity P. W. Walker has offered to furnish the seed, properly treated against smut and other disease at practically a cost basis as an inducement for larger acreage here this year. It is also stated that the authorities of the State Experiment Station at Lubbock will be glad to come out here at any time and make a special examination and analysis of particular tracts of land for the farmers as to whether it is adaptable for wheat growing.

It is pointed out that wheat coming onto the market during July furnishes an early money crop, perhaps the earliest of this section, and at a time when generally needed by the farmers.

Stomach So Bad Can't Eat Even Fruit

"For years was badly constipated and troubled with gas after eating. Could not eat fruit and many other things. Adlerika has done me good—can now eat anything." (Signed) W. H. Fletcher. Adlerika removes GAS and often brings astonishing relief to the stomach. Brings out a surprising amount of old waste matter you never thought was in the system. Stops that full, bloated feeling and makes you enjoy eating. Excellent for chronic constipation. Stokes & Alexander Drug Co.

FINISH SCHOOL BUILDING.

Olton South Ward school building is almost ready for occupancy. They have the outside nicely painted and the carpenters will soon have the inside ceiled and overhauled ready for school. They have the new home for the teacher done and nicely painted, ready to go. The teachers are employed. This is a new ward, where they used only one teacher last year but will have two this year. They also have some that are ready for the high school which we understand will be brought to Olton where they can have a first class high school with 18 1/2 credits.—Olton Enterprise.

help keep Littlefield clean.

Milk Gives Most Food Value At Least Cost

H. C. Hooks.

Milk gives more food value for less cost than any other food known to man, according to Herbert C. Hooks, secretary of the Evaporated Milk Association.

"Dietitians are unanimous in advocating the use of milk by men, women and children," said Mr. Hooks. "Milk and evaporated milk supply some of all the materials necessary for the growth and maintenance of the body; they furnish energy for work, play and warmth. Milk helps repair the wear and tear of the body. It is a good meat for building muscle. Moreover, it is cheaper. A quart of milk will supply as much protein as seven ounces of sirloin steak or four large eggs. Milk, particularly evaporated milk, which has twice the mineral content of market milk, is one of the best and cheapest sources of lime, which is a form of calcium. Infants and growing children need lime to build bones and teeth. It is just as necessary for adults to keep their bones in good condition. One quart of milk, or one pint of evaporated milk, furnishes as much calcium as ten large oranges, thirty-two eggs or twenty pounds of beef. Milk also is a valuable source of phosphorus and supplies a certain amount of iron."

"By some authorities milk is said to be an aid in longevity. Dr. Herman Bundesen, health commissioner for Chicago, gives his prescription for long life as follows: Drink one quart of milk a day and mix with one hour of sunshine. Repeat and infirmity. "Due to the efforts of health officials to get across to the public the message of milk, its general use in the United States has advanced tremendously in the last decade. This is especially true of evaporated milk for reasons of its convenience and economy. Housewives know there is no fear of obtaining contaminated evaporated milk, because it is not only the best grade of market milk rendered double-lych by dehydrating, but it is sterilized as well."

Happy Wedlock Sure Thing If Bride Is Cook

By KATHRYN ST. JOHN

Haphazard meals yearly ruin thousands of marriages. Most marital ships would maintain an even keel if brides knew cooking.

Many of the first year's troubles between newlyweds would be avoided if the wife were capable of preparing foods with an experienced hand. Wives are to blame for the failure of many business men in the final analysis. The business man's health depends a great deal on what he eats. And it's up to his wife to see that he gets the right kind of food. A healthfully balanced diet goes a long way toward making the tired business man less fatigued.

The expert home manager sees to it that her husband never comes home to a delicatessen lunch. There is a carefully planned meal waiting for him. The real housewife knows that an unbalanced diet means trouble and avoids it. Likewise, she appreciates the fact that variation in her menus is important. In this connection the following recipes have been selected as an aid to the home manager:

Frozen Salad.
 1/2 cup mayonnaise 1/2 cup diced dressing cherries
 1/2 cup diced pine-apple 1/2 cup diced apple
 4 tbsp. pineapple juice 2 tbsp. lemon juice
 1/2 cup evaporated milk
 1/2 cup cream
 Mix the fruit and juices. Combine milk and cream, chill and whip; then fold in the fruit and mayonnaise. Pour into a mold and pack in equal parts of salt and ice. Serve on lettuce leaves. This serves 4.

Orange Bavarian.
 1 tbsp. gelatin 1-2 cup evaporated milk
 1/4 cup cold water
 1 cup orange juice 1-2 cup whipping cream
 2 tbsp. lemon juice
 1/2 tsp. salt
 Soak gelatin in cold water, add fruit juices, sugar and salt. Heat in the top of a double boiler until gelatin dissolves. Strain and set in pan of cold water. When mixture begins to set, fold in the evaporated milk and cream which have been beaten stiff.

Banana Ice Cream.
 6 very ripe bananas 2 cups evaporated milk
 1/2 cup lemon juice 2 cups cream
 1/2 cup sugar 1/4 tsp. salt
 Scrape off adhering fibrous portions on surface of peeled bananas. Mash and rub through a sieve. Add the rest of the ingredients in the order given and stir until all are well blended. Let stand for 20 minutes so that all sugar may dissolve. Freeze in 1 1/2 to 2 salt-ice mixture. This recipe makes 1/2 gallon cream.

ENOCHS GIN WILL HANDLE A LARGE COTTON ACREAGE

"Prospects for future land business could not be more flattering," said J. H. Lucas, of The Blalock Co., to a Leader representative this week. During the past few weeks there have been several prospectors looking over our lands, and every day there are several enquiries in the mail. Incidentally, a few sales are now being made, said Mr. Lucas, and just as soon as the cotton growers of east and central Texas get through with their fall crops a big influx of buyers is looked for, he said. Lucas said his company still had about 10,000 acres of land yet for sale, and expected to easily clean up the entire tract this fall.

Work on a 5-80 Lummus type cotton gin was begun at Enochs last week and is being pushed to completion. There is about 20,000 acres of crop on the Enochs lands this year, about 50 per cent of it being in cotton.

All the crops of that section are especially fine, declared Lucas. Most of it is sod, but it could scarcely be better. D. W. Henry, who came there from Nolan last fall, purchasing 640 acres, has 600 of it in cultivation, 300 of which is cotton, and it is all as fine as could be asked for.

A. F. Wharton, E. G. Flowers and T. H. Enochs, Jr., of Jackson, Miss., are here this week looking over the Enochs properties and are greatly pleased with the sales and development that is going on there. They all had emphatic favorable remarks to make regarding the fine crop prospects of this entire section, and especially regarding the future prosperity of their particular interests.

STOVE DEMONSTRATION.

Texas Utilities Have Experts Explain Merits of Electric Cooking.

The Texas Utilities Co., R. E. McCaskill, manager, put on a very popu-

lar and successful electric range demonstration last week. Miss Ethel Stone, economist, of Mansfield, Ohio, gave daily lectures and demonstrations on electric cooking. She was assisted by A. F. Kressig, Westinghouse range expert. Each afternoon the demonstration room was well filled with ladies desirous of learning more about the "clean and easy way" of cooking. Several electric stoves were sold, and Mr. McCaskill states that he has a large number of prospects who are interested in having one of these valuable and convenient articles in their homes in the near future.

Unseen Sources of Long Life

The basic sources of automobile value are not always apparent to the eye.

A motor car, like a house, may LOOK a great deal more substantial than it really is.

Because of this difficulty, more and more thousands are turning to Dodge Brothers product for insurance against disappointment.

The years have proved, and each year proves anew, that Dodge Brothers are as deeply concerned with the UNSEEN goodness of their motor car, as with the seen.

The mileage it will deliver, the safety it will provide, the expense and trouble it will save the owner over a period of years, are quite as important to Dodge Brothers as the more obvious details of equipment and style.

F. C. Kazmier, representing the poultry department of A. & M. College, was here last week visiting E. C. Cundiff and getting a check on the poultry products of this vicinity.

PRESIDENT DUGGAN GIVEN HEARTY RESPONSE FIRST W. T. C. OF C. MEETINGS

(Continued from first page)

were ladies in the party, and the representative of the Leader was unable to obtain a statement of the affair from any of the gentler sex accompanying them. However, this newspaper is well assured of the fact that the decorum of the party was entirely preserved on this occasion, due to the fact that there were several newspaper reporters along, if for no other reason. Returning that afternoon to El Paso the official party inspected the State School of Mines located there, after which they drove to Alamogordo, where they were again banqueted and had a program of more speaking.

During the afternoon they drove up to Cloudcroft where they were entertained by that Chamber of Commerce with another banquet, spending the night in the "City above the Clouds." The Leader is strictly forbidden by Mrs. Duggan to make any specific mention of the mountain deluge that met them about half way up, the auto that started to skid over the edge of the precipice and down some 2,000 feet to the hereafter, but which suddenly changed its mind and rammed into the mountain cut on the other side of the highway with sufficient force to loosen great obs of overhanging dirt and numerous rocks of more or less Gibraltaric dimensions. The Leader is not permitted to delineate in detail the unparalleled agility demonstrated by the President's wife as the car careened toward the vacant side of the precipice, the vocal pyrotechnics that escaped the throat of the Spade foreman's wife nor the flow of voluble oratory that exuded from the throat of the robust wife of Manager Wade, who about that time discovered

that the suit case containing her entire summer's wardrobe had mysteriously disappeared.

The next morning the party drove down the mountain to Ruidoso, one of the most beautiful spots visited during the entire pilgrimage. They were most cordially entertained at the lodge, driving on to Artesia the morning of the 16th where they held another district meeting, which was attended by Governor A. T. Hannett, of New Mexico. President Duggan and Gov. Hannett were the principal speakers of the occasion. The meeting was largely attended and there was also another banquet.

Late that afternoon the party drove to Carlsbad where the next day they attended a meeting of the Southern New Mexico Association, a new organization similar to W. T. C. of C., embracing thirteen towns of that section. The principal meeting was held in what is known as the "big room" of the Carlsbad cavern. It is 800 feet below the surface of the earth, two and a half miles back from the entrance, and the meeting was attended by 45 people. Here Governor Hannett and President Duggan were again the principal speakers. Under the spell of the occasion and the unusual inspiration of the place, it is said by other members of the party that Mr. Duggan delivered one of the most eloquent addresses ever heard in the Southwest. Hon. Willard E. Holt, ex-lieutenant governor of Michigan, now living at Lordsburg, New Mexico, (a long time friend of the editor of this newspaper) was present, and declared it to be the most beautiful address he ever heard.

While at Lordsburg President Duggan and Gov. Hannett were also called upon to express their ideas of feminine pulchritude in the capacity of judges for a bathing beauty show given that afternoon. Eighteen

beautiful creatures of fair form and comely face constituted the review. The Leader is not calling any names; but it is the reported statement of one of the party that the sight was enough to make a man wish he was young, unmarried and lived in the State of Utah with a million dollar bank account during the halcyon days of Brigham Young. The Leader is not very well acquainted with the artistic acumen of the New Mexico governor, but it is willing to wager its last simoleon that the Commercial president, who has always been a well versed coinesuer of beauty, did full justice to the occasion and rendered a verdict that was in full accord with popular public sentiment, although it may not have appealed to the aesthetic taste of his "better half."

Everywhere the official party journeyed, "Equalization of Taxes," which was the keynote of Mr. Duggan's address, was heartily received. It is a subject that vitally touches the financial condition of every citizen of

West Texas, hence the universal interest. Mr. Duggan's subject had ever been raised throughout the entire state and especially in counties of the west and south section than this one of equalization of taxation. "We intend to do away with inequality, unjustness and can spirit of the fact into the hands of the people all over the state," Mr. Duggan, "until the matter is adequately adjusted to the satisfaction of every citizen residing in this great empire."

OLD BUT GOOD

In Germany the use of legume as green manure began in the middle of the nineteenth century and proved an important factor in reclaiming the sandy lands of Prussia.
