

Child Sustains Severe Burns When Gasoline Can Explodes

Larry Rice, 11-year-old son of Sheriff and Mrs. Hugh Rice, who was severely burned about ten days ago and has since been a patient at the Littlefield Hospital, is doing well as can be expected, it is reported.

Larry and a companion, Tommy Rice, were enjoying a wiener roast in the backyard at the Rice home, when they decided to "pep up" the wiener by pouring gasoline from a large can on to the blaze. The two-year-old boy, in Larry's hands, exploded, throwing the blaze over the child's clothing. The accident probably had been fatal had two young men, passers-by, extinguished the fire from the boy's clothing and took him to the Littlefield Hospital.

Sheriff and Mrs. Rice were absent from home at the time, and only the grandmother, Mrs. Della Moore, was there.

The child sustained burns on his chest and body down to his waist, and his left hand. According to his father, he is getting along as well as could be expected.

Local Post Sends 2 Representatives To Legion College

The Richard New Post of the American Legion met in regular session at the Hut Monday at 8 p.m. with a good attendance.

During the business session, conducted by Commander Hugo Beyer, two representatives from the local organization were selected by the group to attend the three-day American Legion College, which will convene at Lubbock February 21-22-23. They are Hugo Beyer and C. W. Griffing.

The American Legion has a fine world program and that veterans of World War II might become better acquainted with the organization, this college has been dedicated to that purpose.

Urgently Needed

Lyle Brandon, executive secretary of the local Chapter of the American Red Cross, has written the following letter, which is being published and is self-explanatory:

We are asking your help in accumulating some clothing for several persons. Because proper clothing is so hard to buy and also because our Red Cross funds are getting low, we will appreciate any used clothing that you might have on hand.

We have had several burn-outs with other destitute cases, we have exhausted our supply of clothing. We especially need clothing for an eight-year-old boy and a year-old boy and baby clothing, twins 13 months old, and a new hat for a 5-year-old girl. We also need a few little two-year-old girls and a girl 15 years of age. These from three different families.

This need is urgent and we will appreciate very much if you will donate the clothing to the Red Cross, in the white stucco building back of the courthouse, or call phone No. 110-M and we will arrive to pick them up.

It would like to say something about our Production program. We have been requested to make 400 garments for children of torn countries. We have material on hand and the thread and things will be furnished. Work needed to make these garments. We do not have a chairman but if you can give some of your time, please contact me at the Red Cross office.

Yours Sincerely,
"Your Sincerely,
"MRS. LYLE BRANDON,
Executive Secretary,
American Red Cross, Lamb County Chapter."

Oil companies are again centering their interest on Lamb County, and considerable leasing is taking place, believed to be for the major oil companies of this state.

A seismograph crew for the Sun Oil Company is working the entire Earth area, according to reports. These workers are making Plainview their headquarters.

Considerable oil leasing is also taking place over that area, where leases run from \$1 to \$2.50 per acre and 50 cents a year rental.

Wildcat To Be Drilled

Reports also are to the effect that a wildcat is to be drilled four miles northeast of Sudan.

Stimulates Action

The opening of the pool at Petersburg, in Hale County, and the producing well known as Fisher No. 1, are believed to have stimulated the oil interest over this area. Location is said to have been made on Judge LaFont's place for an offset to the Petersburg well. About 15 rigs are covers 108 city blocks.

Shell Oil Leasing

The Shell Oil Company is leasing considerable land in the Spade area, and are said to be paying \$3 per acre.

The Humble Oil Company is also believed to be active in the Littlefield area.

Area In For Big Play

Leasing is said to be more active about six miles west of Littlefield, north of Sudan, south of Amherst and in the Spade area. However, some leasing is taking place all around Littlefield and Sudan, which is being done by brokers, and believed to be for the major oil companies, and it is predicted that this entire territory will be leased during this activity.

It is the general opinion of oil men that the counties, Lamb, Hale and Floyd, are due to receive big oil play. There are now six wildcats drilled in Floyd County.

Improvements Place Earth on Pavement to Amarillo

Construction was started a few days ago on the building of a paved highway from the paving six miles north of Earth to the Bovina-Dimmitt highway.

This new stretch of pavement will be 20 miles long and will place Earth on pavement to Amarillo without travelling any mileage in an out-of-the-way direction.

Earth now enjoys paving in every direction. This young and growing city is on Highway 70, as part of the stretch between Plainview and Muleshoe.

Construction was completed several months ago on the pavement between Amherst and Earth. The last stretch of work started six miles north of Amherst and extended 10 miles north into Earth.

Weekly WAA Surplus News

Special types of surplus fire-fighting equipment will be channeled to municipal and volunteer fire departments to combat rising fire losses throughout the nation, WAA has announced. Surplus equipment such as ladder trucks, pumping engines, crash trucks and office of civilian defense type pumpers is urgently needed by municipal fire departments to replace old and worn equipment. WAA said. Federal agencies will continue to exercise their priority rights; however, since these agencies do not normally purchase this type of property, municipal and volunteer fire departments will have, in practice, exclusive access to surplus fire-fighting equipment.

More than 7,700,000 pairs of surplus half soles will be offered for sale by WAA at new reduced fixed prices ranging from six cents to

eight cents a pair for the various trade levels. Orders will be accepted concurrently from priority claimants and other buyers, including exporters, from February 15 to March 7, 1947. The half soles are black, made of composition rubber, one-quarter inch thick, in sizes six to 11, inclusive. Any WAA regional office will supply detailed information on the offering.

The Fort Worth regional office of WAA is holding one of the largest sales of electrical equipment and supplies yet to be held in the region. Hundreds of different items of electrical merchandise are included in the sale, which closes February 24. Further information may be obtained from WAA, P. O. Box 1407, Fort Worth.

WAA is currently distributing a 16-page booklet entitled, "How to Buy or Lease Surplus Real Estate." The purpose of the pamphlet is to guide business, political subdivisions, institutions, banks and other interested organizations and individuals in taking the steps necessary to acquire government owned surplus real property. Copies of the booklet may be

All such planes are now price-tagged and will on a first come, first served basis with no priority certificate necessary. Prices range from \$1,076 to \$14,000 for the smaller craft and \$15,000 to \$40,000 for the larger, depending on model and construction.

Lieut. Commander Ganzer Visits Parents Here

Lieut. Comm. Martha Ganzer, who has served nine years in the nurses' Corps of the Navy, left Monday after spending two weeks with her parents, Mr. and Mrs. John Ganzer, of one mile west of town.

Lieut. Commander Ganzer is stationed at the District Medical Office of the Navy at San Francisco.

She has seen two tours of sea duty, the first tour being on a hospital ship, the U.S.S. Relief, which ship she left in February, 1942, after a duration of two years on the ship. She made another tour in 1946 on the Transport U.S.S. Thomas Jefferson, which lasted ten months, making runs back and forth between San Francisco and Hawaii, taking dependents.

She spent some time on the East coast, and also at Norman, Okla., and was at Hawaii 14 months before the war.

FARM PROGRAM

Before You Plant

Home gardening is probably one of the things foremost in your mind now . . . and in that connection we have here some information.

Before you plant, remember this: a vegetable grows better than the one planted in . . . and it's better to delay planting until the soil can be prepared properly, than to get in a hurry and plant in poor soil.

Early growth is checked by poorly drained, soggy soil. In areas of heavy rainfall, the first thing you want to do is ditch your garden site, then dig it so there will be large beds four to five feet across on which several rows can be planted. On the other hand, where rainfall is light, pull the soil up in ridges four to six inches high to make individual beds to plant vegetables on.

The soil should be plowed or spaded at least five or six inches . . . and the inches would be better. Deep plowing brings warm air into soil, and helps your seed get off to a better start. If the soil can be stirred several times before planting, so much the better. And get all those bad weeds out of the garden site—Johnsongrass and Bermuda grass—and cactus nut grass. Don't make your vegetables compete with these pests. Of course we all know that rich soil gives the best yields. If you've got rotted manure, apply about 50 pounds to each 100 square feet area. If you haven't enough manure to apply it this way, you can put it in

your furrows just before planting, at the rate of 10 to 20 pounds for each 100 feet of row space. At any rate, spend some time getting your soil ready before you plant.

Division of General Motors.
"Not only was the usual shutdown for retooling avoided," Mr. Keating said, "but there was virtually no decrease in the rate of output when these models went into production. On the day of the change-over, the first of the new models followed the last of the old assembly lines without a gap."

"Chevrolet thus was quite successful in its determined effort to bring out an improved line of motor cars without halting or seriously retarding production, in order that the great number of waiting purchasers—both those who have placed orders and those planning to do so—should encounter additional delay."

"This factor in the automotive picture is one reason why changes have been confined largely to those improvements that could be made without causing the car-needy public to face further inconvenience and disappointment," Mr. Keating added.

The most striking appearance feature of the new models is the result of the advanced treatment of the front end, especially of the fenders and hood, which gain sweepingly smooth overall contours through the omission of side hood mouldings. Fenders and hood blend both in form and in color, to effect a clean-cut simplicity and an appearance of solidity, which is heightened by the elimination of hood louvers.

The number of World War II veterans soared over the 14,000,000 mark in December, according to Veterans Administration estimates.

virtually no interruption of production for the changeover, Chevrolet 31 introduced its new passenger cars, comprising 11 in three series, all smartly in the modern mode. At Chevrolet Company are 103 cars. Three series are the specially Fleetline, the de luxe Fleetline and the economy-range Styleline. All show marked advances over previous models in exterior styling, trim, and in interior finishings.

Information For Veterans

Since my discharge from the services, I find that I am suffering from a chronic ailment. I am entitled to anything in the way of pension or pension because of disability?
Chronic disease causing 10 per cent more disability within one year of separation from active military service is presumed to have been incurred in, or aggravated by military service. Your service must have been for a period of 90 days or more, which was war time service. A finding of service-connected disability may be rebutted by evidence of previous existence of pre-war ailment which affects the same disease.
I was wounded in action in World War I and have a service-connected disability. Can Veterans Administration change my rating from 20 per cent to non-connected total disability at

know if I have any rights to her insurance benefits?

A. If his sisters were jointly designated beneficiaries or if each sister was specifically designated contingent beneficiary of the other, then upon the death of one sister the other sister would get the share of the one who died. However, if the designation is not joint or each sister was not designated contingent beneficiary of the other, then upon the death of one of the sisters the remaining installments would be paid according to law, National Service Life Insurance Act of 1940, and you may have some rights.

Q. Is it true that the maximum fee for the services of an attendant for a disabled veteran has been changed?

A. Yes. Previously the maximum fee was \$5 for attendant service for 24 hours and fractional rates for periods of service less than 24 hours. However, since Jan. 1, 1947, the maximum fee for attendant service has been \$8 for 24 hours; \$5 for the first 8 hours, \$1.50 for the next 8 hours and \$8 for any period over 16 hours.

Q. I am a veteran with a service-connected disability. Does Veterans Administration hire disabled veterans for work in its offices?

A. Yes. It is the policy of Veterans Administration to employ disabled veterans and other physically impaired persons whenever possible.

Q. Do Veterans Administration chaplains report to their respective churches and are the reports official VA statements?

A. VA chaplains in their capacities as ministers, priests and rabbis may forward direct reports to their denominations. In each case, this is personal report and not an official VA statement or report.

Pay Largest Tax Payments in History

American taxpayers last year deposited in Uncle Sam's till the largest peacetime tax payment in history — \$38,640,057,360 — and the third highest on record.

The 1946 collections, the Bureau of Internal Revenue have reported, were exceeded only during the war years of 1945 and 1944. In 1945, the bureau said, payments totaled \$43,352,715,621 and in 1944, collections amounted to \$42,125,986,550. All figures were for calendar years.

As usual, heavily populated New York led all states and the territory of Hawaii by paying in \$7,730,385,969 during the 1946 calendar year. The Empire State was followed among the leaders by Illinois, California and Pennsylvania in that order.

The breakdown by states, listing the grand total of all sources, 1946 as compared to the 1945 collections, and with 1946 individual and corporation income tax payments bracketed in that order, includes:

New Mexico: \$46,405,976 vs. \$39,835,244; (\$33,060,923 and \$4,415,474).

Oklahoma: \$282,088,182 vs. \$309,852,593; (\$139,825,505 and \$58,733,959).

Texas: \$1,048,760,460 vs. \$1,135,522,419; (\$605,761,886 and \$248,382,482).

Return From Trip To Michigan

They were accompanied by Blackie Repass and Edwin Brown, mechanics for the Batson-Payne Motor Company.

Mr. Batson reported that the Willow Run factory was going at full swing, working 10,000 men, and making a car a minute, and that they figured on doubling this within the next 30 days.

They expect to have plenty of cars soon.

Revival At Amherst . .

change necessary, the following sermon topics are to be used for Sunday morning services and night services during the campaign:

"The Wages of Sin," Thursday, Feb. 20; "The Power and Persistence of Sin," Friday; "Weighed in the Balance and Found Wanting," Saturday; "Lost Or Saved, Death or Life, Which?" and "Twice-Born People, How Can It Be?" Sunday; "Why Christ's Death Was Different From Other Deaths," Monday; "Excuses, a One-Way Ticket to Hell," Tuesday; "The Fate of a Fruitless Life," Wednesday; "The Devil's Detours," Thursday; "What Jesus Teaches About the Atonement," Friday; "Too Late to Escape," Saturday; "What the Cross Meant to Paul" and "The Door of Life," Sunday, March 2.

Everyone is invited to come to this friendly church. Unsaved people will not be publicly embarrassed. The Word of God will be preached in its purity with no favors shown to saint nor sinner. Just remember that the Judgment is more sure than death itself; therefore, "Prepare to meet thy God." The time to get ready is NOW! The kind of life a man lives is the result of what he puts his trust in—his life may be a blessing or it may be a blunder, but it can never be a blank.

Next Sunday, Feb. 23, will be called "Young People's Day." The young people are to take charge of the services except for the preaching. All young people of our community are invited to attend unless they will be at some other church. The goal for Sunday School that day is set at 175. We had 163 in Sunday School last Sunday and a packed house for the preaching hour when the presence of God was definitely felt.

To Start Returning Bodies of World War Dead in Fall

Next of kin of World War II dead need take no action relative to the return of the remains of their loved ones until an inquiry as to their wishes has been received from the Quartermaster General of the Army, Bureau of Medicine and Surgery of the Navy, the Commandant of the Marine Corps, or the Commandant of the Coast Guard, Col. E. V. Macatee, commanding officer of the San Antonio General Depot, announces.

The Graves Registration Service will begin returning bodies in the fall of this year from ten temporary cemeteries in both the European and Pacific Theatres, namely: seven in Hawaii, Henri Chapelle, Belgium, Cambridge, England, and St. Laurent, France. Relatives of those buried in these cemeteries will receive inquiries this spring asking whether they wish the remains returned to the United States for burial. This process will be continued as the Graves Registration Service moves from cemetery to cemetery until the entire program is completed. As additional information is received, names of other cemeteries will be published.

Col. Macatee said it is expected two years will be required to finish the program and also emphasized the importance of keeping the Army, Navy, Marine Corps or Coast Guard advised of any change in address or change in next of kin.

HOCKLEY CO. AGENT GOES TO LUBBOCK

The people of Hockley County had not recovered from the announcement that they were losing the services of their County Home Demonstration Agent, when they were shocked by the announcement that their County Agricultural Agent, David W. Sherrill, had resigned to accept a similar position in Lubbock County.

Sherrill had been agent in Hockley County for twelve years, with the exception of time spent in the military service during the war. Sherrill is among the best agricultural agents in the plains country, and his going on to a better paying position is but a natural consequence.

Littlefield Truck & Tractor Co. Announce Appointment as Eversman Leveler Dealer

Littlefield Truck & Tractor Company have announced that they have just been appointed dealers for the Eversman Automatic Land Leveler, and have two of these machines on their floor for inspection.

"Shorty" Yohner, manager of the Littlefield Truck & Tractor Company, points out the money-making advantages when fields are leveled with an Eversman Automatic land leveler as follows: Better leveling, cuts leveling costs 75 per cent, saves water, saves up to two-thirds of irrigating time, and greatly increases production.

Mr. Yohner also states that the Eversman for years has been used as a dual machine—as an automatic land leveler and a dirt remover. Wherever irrigation farming is con-

ducted you'll find the Eversman praised for its speedy, accurate leveling—praised for the way it crushes clods, stirs, pulverizes, and packs the soil, preparing a perfect seed bed while automatically leveling the surface. As a dirt remover it has likewise been invaluable to the farmer. The ease and speed with which it moves a large amount of dirt in a day is well established. You don't need to hire or buy a larger tractor to do your field grading and dirt moving because there is the right size Eversman that will move a big load of dirt with the tractor you now have. All of your leveling can be done with an Eversman and your present tractor at surprisingly low cost.

LaSalle will count heavily on him to splash the Blue and Gold to further victories.

Lamb Co. Leader Receives Letter Of Appreciation

The Leader is in receipt of the following letter from the Treasury Department, U. S. Savings Bonds Division, in appreciation of publicity in support of the sales of U. S. Savings Bonds:

"I want you to know how much the Treasury and your Savings Bond Committee for Texas appreciate the support which the Press of Texas has given.

"During 1946 the people of Texas bought U. S. Savings Bonds: \$240,678,364 in all Savings Bonds; \$171,040,922 of which were in E. Bonds.

"The Press of Texas aided the

local volunteer county chairmen to achieve goals which might not have been possible otherwise.

"The Treasury regards the continued widespread holding of Savings Bonds as the key to future management of the public debt. This problem involves matters which many think concern us little, if at all. Actually, the way our \$260 billion national debt is managed will affect every American's income and what it will buy in the future, his job opportunities, his chance for a full life; for upon wise debt management depends our economic stability.

"During 1947 the Treasury will doubtless sponsor promotional periods, and I trust your plans will include editorial, news and advertising support.

"Thank you.

"Sincerely,
"Nathan Adams,
Chairman for Texas."

Airmail Postage Rates Reduced

Very few people realize the convenience of air mail letter service.

Air mail letters may now be sent to any part of the United States and possessions for 5 cents per ounce, as compared with former rates of 8 cents in the United States, and up to 30 cents in some of the U. S. possessions.

Rates which were formerly 50 cents to 70 cents to outlying parts of the world are now not to exceed 25 cents per one-half ounce, or the weight of an average letter.

Letters to Europe are 15 cents per one-half ounce; to Mexico and Canada, 5 cents per ounce; South America, 10 cents per one-half ounce.

Asia, Africa, Australia, Southeastern Asia, India and the Straits Settlement are 25 cents per one-half ounce.

Small parcels weighing under 8 ounces receive the same treatment as letter mail and the cost is nominal.

Air mail letters placed in the Littlefield postoffice up until 5 p. m., go out of Lubbock the same night in all directions.

The postoffice department is making every effort to increase air mail service to all parts of the world.

Wayland College Starts Building Fund Campaign

The campaign executive committee of Wayland College \$250,000 Building Fund met at 4:30 p. m., Friday, February 7, at campaign headquarters, 513 1/2 N. Broadway, Plainview, Texas.

W. E. Hines of Plainview, the campaign chairman, stressed the importance of the need for a new Girls Dormitory and the benefits both to the college and to the community. He pointed out that Wayland College has the largest enrollment in its history with more than 400 students and that the present facilities are inadequate for present increased demands. He made it clear that enlarged and more adequate dormitory facilities for girls are imperative for most effective and efficient administration.

The new Girls Dormitory will provide every convenience and comfort with a unity type construction which will promote a closely knit family group among students.

Hines said: "This is a community project which will benefit all business in Plainview and vicinity. Everyone will profit, not only from an educational and cultural standpoint, but by doubling the number of students at Wayland it will put almost \$800,000 into circulation in this area."

J. C. Rivers, campaign director, announced that excellent progress is being made in the organization of the various committees in making the campaign an outstanding success.

Honorable J. N. Jordon, mayor of Plainview, attended the Friday meeting of the campaign executive committee and offered the wholehearted cooperation of all city officials for this important project.

Dr. John W. Cobb, Dean of Wayland College, stated that the new Girls Dormitory would offer many memorial opportunities for those who wish to make their gifts in memory of a loved one, either living or deceased, and that appropriate bronze plaques and tablets would be provided with the names of the loved ones and the donors placed in suitable locations.

The girls lounge may be memorialized for \$6,000, and there will be 44 girls' rooms at a cost of \$4,650 per room, with eleven girls' study rooms at \$1500 per room and eleven bath and shower rooms at a cost of \$1500 each.

Dr. Cobb pointed out that these memorial gifts will perpetuate both the name of the donor and the in-

dividual to be memorialized, and such a constructive gift is one which serves a continuing educational purpose and also pays tribute to a loved one.

Where Cissy Spent Her Honeymoon

Most of the young newlyweds in our town spend their honeymoon at Roundstone Lake or Jackson Falls; why the Martins even went as far as New York City.

But when Cissy Cupper married the young Carter boy, they allowed as how they were going to spend their honeymoon right here.

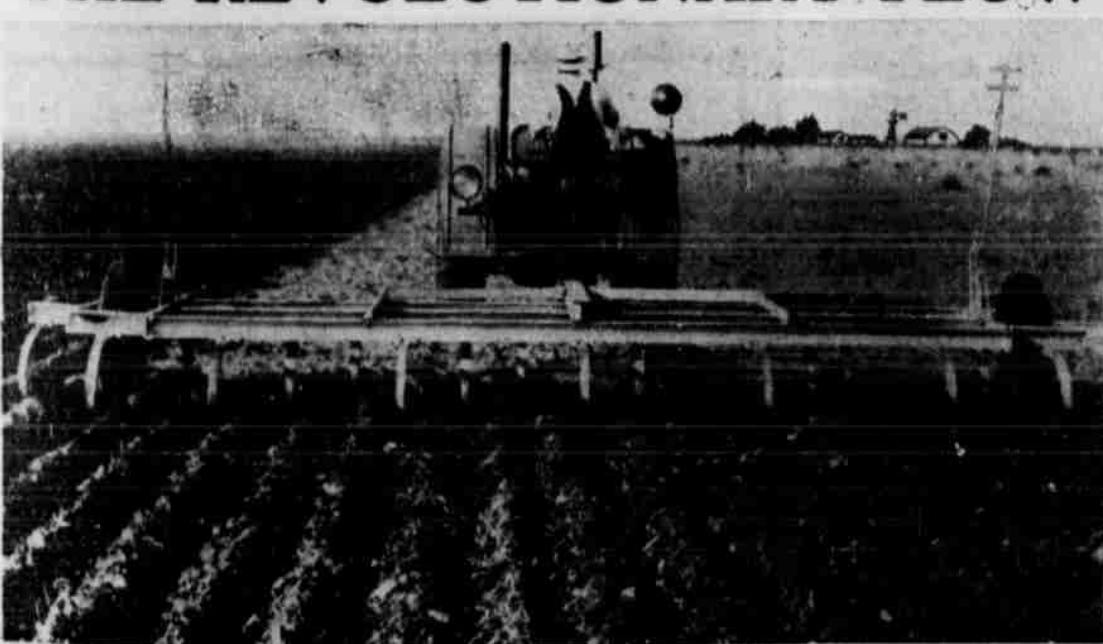

"There's no place better than our town," Cissy says. "And I'd like to start married life at home, with things Bud and I are used to."

Makes sense, come to think of it. Folks naturally left them alone;

How women and girls may get wanted relief from functional periodic pain

Cardul is a liquid medicine which many women say has brought relief from the cramp-like agony and nervous strain of functional periodic distress. Here's how it may help:

- 1 Taken like a tonic, it should stimulate appetite, aid digestion, thus help build resistance for the "time" to come.
- 2 Started 3 days before "your time," it should help relieve pain due to purely functional periodic causes. Try Cardul. If it helps, you'll be glad you did.

School Board Urges Patrons To Support New School Aid Law

At a recent meeting of the Littlefield school board, members prepared and issued the following statement to patrons of the school, urging that they write their representative and any other person of influence at Austin urging the passage of legislation, which would give school teachers a fair increase in salary.

The statement follows: School legislation that you should vitally concerned in:

1. At the present time there is Educational Bill No. 295 before House of Representatives that give our teachers a fair raise salary and at the same time take of our transportation set up. bill will mean about \$35,000 to school.
2. This House Bill No. 295 takes of our local situation.
3. We should have a bill passed Bill No. 295 because we have hundred children in our district that live on the farm. The House No. 295 helps schools that are rural children.
4. We should be definitely opposed to the Educational Bill No. 145 in the Senate. This bill will us the salary aid we are entitled to for our teachers and fails make provision for our transportation set up. In actual money values Bill No. 145 will mean a loss to local district of about \$35,000 annually.
5. The main differences in the are: (a) House Bill No. 295 provides salary aid and transportation for districts that have less than 2,000 scholars. We have 1726. Senate Bill No. 145 only provides schools that have less than 1500 scholars. This would deny us salary aid and transportation aid. 6. If in a compromise bill, the plastic figure is not raised above 1500, then the bill should be so worded to include the Littlefield District and other districts that have as large an area as we, 187 square miles, and with as many students living on the farm, seven hundred or approximately 40 per cent of the total scholastic population.
7. We urge you to read this carefully and write your Representative, L. B. Holt, and Senator Sterling J. Parrish a letter insisting that House Bill No. 295 be passed or one that will provide for our teachers and transportation set up. This is very necessary.

"Dr. Wm. N. Orr, President of the School Board; Joe C. Hutchinson, Superintendent of Schools."

And a Well Was Drilled . . . and Hilburn Field Discovered

Boyce House, in "I give you Texas," relates the following interesting story:

During World War I a group of soldiers on a troop ship en route to France sat around talking. None knew any of the others beyond a nickname, "Bill" or "Joe" or "Tex." One of them said:

"When the war is over I know what I'm going to do. I'm a geologist and a pretty good one, too, if I do say so. I'm going to open up an oil field."

"One of the others asked 'Where?'

"In Texas."

The other said, "Yes, but Texas is a pretty big place; whereabouts in Texas?"

"In Eastland County."

"Whereabouts in Eastland County?"

"Near Rising Star."

The questioner persisted, "Any particular location?"

"Yes, on the Hilburn farm."

The man who had been asking all the questions said, "My father and I own that farm."

He was H. S. Hilburn, now publisher of the Plainview Herald. After the war a well was drilled and the Hilburn field was discovered.—Anton News.

Chronic bronchitis may develop if your cough, chest cold, or acute bronchitis is not treated and you cannot afford to take a chance with any medicine less potent than Creomulsion which goes right to the seat of the trouble to help loosen and expel germ laden phlegm and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes.

Creomulsion blends beechwood creosote by special process with other time tested medicines for coughs. It contains no narcotics.

Mumps on Increase In State of Texas

During the past few weeks there has been a general increase in the incidence of mumps throughout the State. There have been 1750 cases reported since January 1, compared with only 896 cases during the same period last year, according to Dr. Geo. W. Cox, State Health Officer.

Though mumps is one of the common childhood diseases, serious complications may develop, so children should be protected as much as possible from this disease. The usual control procedures such as avoidance of crowds, exclusion from school of all cases or suspected cases and quarantine should be followed. The family physician should always be consulted when a case occurs.

The most easily recognizable characteristic symptom of mumps is a painful swelling of the salivary glands. Sometimes there is an in-

volvement of other portions of the body causing disturbances in the digestive, nervous, circulatory, and genito-urinary systems. The disease is usually accompanied by a temperature rise which more often than not is mild.

"The patient suffering with this disease should be isolated from other members of the family immediately upon the suspicion that mumps exists, and the family physician should be called promptly," Dr. Cox advises. "In the meantime, complete rest in bed is indicated. The doctor's orders should be followed strictly. Violating his instructions can lead to serious injury, which may permanently affect the individual's health."

Seed samples which have been pouring in to the Texas Technological College department of plant industry are being returned to farmers and seedsmen with the explanation that the department is not equipped to test them.
