B. Y. P. U. MEETINGS

The Senior Department of B. Y. P. U., Baptist church met Sunday night at six o'clock with 18 members and three visitors present. Two new members were voted in.

The associational B. Y. P. U. met here Sunday afternoon at two o'clock. Levelland, 16th Street and First Baptist church B. Y. P. U.'s of Lubbock, were represented. The next meeting will be held in April at 16th street church, Lubbock.

BIRTHDAY PARTY

Tuesday afternoon Hilbert Kyle Seale entertained his friends with a party honoring his fifth birthday.

After numerous games were played the children were ushered into the dining room where five blue candles in pink holders burned on the birthday cake. Refreshments of fruit salad, whipped cream and cake were served to 20 guests.

COLLEGE NEWS

School is getting pretty well back to normal again since the holidays. Most of our students who were late in getting back on account of sickness or other hindrances are here now. Some of our local students are being kept out of school because of colds and kindred ailments.

Sam Lemley, of Wellington, was here the first of the week. He came to bring his son, Lamoine, to school, and to attend to some other matters of business.

A. J. Christmas family also returned to Littlefield in time for the children to enter school Monday.

The State High School Inspector spent the day with us Tuesday. She seems to be favorably impressed with the work the school is doing. This same inspector visited the school once before it was moved to Littlefield.

Monday afternoon, Jno. R. Freema was called to Sudan to conduct the funeral service of a four year old child who died of an attack of diphtheria.

R. O. Connor is expected here sometime during the forepart of the week, word having been received here to that effect.

Work on the interior of Dean Burks house is in progress, and it is expected that the house will be ready for occupation within a short while.

The work on the four inch water

line to the college is still progressing, and if nothing prevents, the college campus section will soon have the benefit of city fire protection.

Art Work in the College

Miss Nova Austin, daughter of N. R. Austin, Board member, who has been giving art lessons in the Austin home for a few weeks, has transferred her work to the college building. Anyone desiring to know more of the character of her work, is invited to visit her room at the college where some of her work may be seen and where she will be glad to give and desired information along that line.

Miss Austin is able to give lessons in the following branches of artwork: pencil, pen and ink, charcoal, fabric, (including stenciling) water color, and oil color. Anyone desiring to study art, whether that person has work in the college or not, is invited to take work with Miss Austin.

Editor and Publisher

Subscribers who change their addresses, or fail to get their paper, should immediately notify this office, giving both new and old addresses. Communications of local interest are solicited. They should be briefly written, on only one side of the paper, and must reach this office not later than Wednesday noon of each week. The right of revision or rejection is reserved by the publisher.

Advertising that does not show in its text or typography that it is paid for must be marked as an advertisement. All local advertisements remain in this paper for the time specified or until ordered out. All notices, matters not by whom nor for what purpose, if the object is to raise money by admission fee or otherwise, is an advertisement and when sent in for publication must be paid for at the regular advertising rate per line for each issue printed.

Obituaries, cards of thanks, and resolutions of respect will also be charged for at the same rate.

Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of the Littlefield Leader will be gladly corrected upon its being brought to the attention of the publisher.

In case of errors or omissions in local or other advertisements, the publisher does not hold himself liable for damage further than the amount received by him for such advertisement.

REAL FARM RELIEF

If a news item sent out from Washington City a few days ago is correct we are going to get farm relief from a source no one expected it to come from. The report states chemists have, after years of experimenting, devised a way to manufacture a good grade of paper from cornstalks. In fact, printers are even now at work on a book that will be printed entirely on paper made from that waste material.

It must be apparent to everyone in Littlefield that if a way has been devised for using up this product of the farm we are a long way on the road to actual farm relief. Here is a part of the nation's corn crop that we've never been able to realize any money on. Thousands of tons of cornstalks are produced every year because we can't get the corn with out the stalk. But up to this time it has been just so much waste material. Now if paper can be made out of this waste there is no reason why the country should not profit two ways—through the money derived from the sale of cornstalks, and through cheaper paper that would have to come with a product as plentiful to make it from.

There is a big field ahead for both the farmer and the papermaker if this new discovery pans out as those working on it claim it is going to. And who knows but it may, after all, bring the poor, down-trodden newspaper owners of the country a little relief too, in that it may serve to cheapen the one thing that seems to stay up like an airplane—the price of paper.

A Cincinnati judge has ruled that raide music is not noise. There must be some that he hasn't heard.

AN OPEN WINTER

The fact that the present season up to the first of January, was what weather men call "an open winter" has resulted in an unusual amount of sickness throughout the nation.

An epidemic of influenza, milder than in 1919, has been sweeping entire states. Physicians everywhere report an unusually large number of cases of lagrippe and pneumonia, and trace it directly to a lack of seasonable weather. Whether or not it will abate with colder days in January and February remains to be seen.

But the Littlefield citizen who wants to be on the safe side will not depend entirely on a drop in temperature. Watch your eating, dress comfortably, avoid drafts, but sleep with a window open so you can have fresh air at night. Start doctoring the moment you feel symptoms of a cold. These rules, if followed, will go far toward preventing illness, and in view of the heavy toll of death this season traced directly to colds, no one should need a second warning.

Nowadays they offer silver loving cups for almost everything but dodging automobiles.

IT SOUNDS REASONABLE

A Wisconsin university professor, following an investigation over a period of several years, reaches the conclusion that the most prosperous and progressive communities are those in which the most reading is done.

That sounds reasonable, because people who are posted do not spend as much money foolishly as those who are not in touch with the business and industrial world through the newspaper.

We've never been able to understand why the government warns of a paper shortage and yet goes right on printing the Congressional Record.

A subscriber sends us this one: "A rooster discovered an ostrich egg and rolled it into the hen-house and said: 'Now ladies, I do not want to embarrass you, but here's a sample of what other people are doing.'"

The subscriber didn't sign his name but we have an idea it came from W. T. Jones, jr.

Our idea of the prize idiot would be the man who would offer President Coolidge a job in the talking movies.

We just read where a Washington family had four sets of twins in seven years. Another case of seven years of plenty.

—married to a brute, in love with a man

SOMETIMES, Laura thought herself gripped by some terrible nightmare. But the screaming, fever-laden jungle with its brooding loneliness and that tattered, whiskey-soaked beast, who was her husband, were only too real. How could she have ever dreamed that she loved him?—the scientist she had thought a man. True, she had been very young when she had married him, and had come to Brazil. But fever, that white man's curse, had got into his blood—and she had seen him slowly degenerate into a booze-soaked beast.

like eyes—eyes clouded with silent misery. Amazement, anger, pity were but the prelude to love. And when one day an answering light illumined her soft, dark eyes flashing him a wonderful message—

Thus it began—this strange drama of the jungle—a drama of maddening love on Townley's part—a tragedy of renunciation, of desperate battling with conscience on the part of Laura. Don't miss this startling true-life story, "Flower of the Jungle," in February True Story Magazine.

LITTLE LEADERS

Littlefield people can be glad of one thing just now. They're not the only ones with Christmas bills to pay.

Good old Littlefield would be a paradise if all of us could make money as easy as we make mistakes.

When a Littlefield woman can't brag about having the best husband in the world she seems to get just as much pleasure out of bragging that she has the worst.

No Littlefield man likes to hear a woman swear. But what's a woman going to do when she discovers that there is too much starch in her under-shirt?

QUALITY AT LOW COST

Read what these leading automobile editors said after seeing and riding in the new Chevrolet Six—

"In appearance, performance and mechanical nicety the new Chevrolet Six presents actual values far beyond its price range."

—Hazen Conklin
New York World

"Aside from beauty in body lines and attractiveness in finish, the astounding feature of the new Chevrolet Six is its powerful and flexible motor. One will have to go far to equal the high performance of this new Chevrolet in general road and traffic use."

—Leon J. Pinkston
San Francisco Chronicle

"The new Chevrolet is a triumph for volume production. The car at its price is one of the greatest achievements ever recorded in the automobile industry. Its beauty is a treat; its riding comfort a new delight and its performance a real sensation."

—Ray Priest
Detroit Times

"St. Louis motordom is tremendously enthused over the new Chevrolet Six. Personally I have never seen the public so interested in a new car. The factory should be congratulated on the truly monumental engineering feat it has accomplished."

—Robert Henry Hall

Unintentional Suicide
 Many people are slowly poisoning
 themselves just as surely as if they
 drank iodine every morning for break-
 fast. They are daily absorbing the
 toxins, or poisons, created by accumu-
 lated waste matter in their constipated
 digestive systems. Sooner or later
 disease will conquer their weakened
 bodies.
 If you have dizzy spells, headaches,
 coated tongue, bad breath, insomnia,
 no appetite, bilious attacks or pains in
 the back and limbs, you are probably
 suffering from self poisoning caused by
 constipation. The surest and pleasantest
 relief for this condition is Herbine, the
 vegetable cathartic which acts in the
 natural way. Get a bottle today from

Simplicity of cooling system is a feature of the new Ford

A COMPLETE water plant is a part of every automobile as it is a part of every modern city.

The purpose of this water plant is to keep the engine cooled to a temperature that will make it efficient in operation. If it were not for this, the cylinder walls would become overheated and the pistons refuse to operate.

The cooling system of the new Ford is particularly interesting because it is so simple and reliable.

When the radiator is full of water, the engine of the new Ford will not overheat under the hardest driving. Yet the water is so regulated that it will not impair engine operation by running too cold in winter.

The cooling surface of the Ford radiator is large, with four rows of tubes set in staggered position so that each receives the full benefit of the incoming air. The fan is of the airplane propeller type and draws air through the radiator at the rapid rate of 850 cubic feet per minute at 1000 revolutions per minute of the motor.

The hot water around the cylinder head is drawn to the radiator to be cooled by a centrifugal water pump of new design.

The entire cooling system of the new Ford is so simple in design and so carefully made that it requires very little attention.

The radiator should be kept full, of course, and drained once each month so that sediment will not collect and retard the free passage of water. In cold weather, a reliable anti-freeze solution should be added.

As owner and manager of this important water plant you should also see that the water pump and fan shaft are properly lubricated and the packing around the pump shaft kept in adjustment.

Hose connections may also need replacement after long service. For those little adjustments, it pays to call on the Ford dealer.

He works under close factory supervision and he has been specially trained and equipped to do a thorough, competent job at a fair price.

HEADQUARTERS WOLVERINE SHELL CORDOVAN HORSEHIDE WORK SHOES WEAR 1000 MILES—STAY SOFT

If you want to get longer wear and greater comfort out of work shoes, we recommend that your next pair be Wolverine Work Shoes—made of Shell Cordovan Horsehide. This leather out wears all others because it includes an inner shell found only on the horse's hips (about one-sixth of the hide.) First you wear out the leather—then you wear out the shell. No wonder many say Wolverines wear two or three years!

And that's not all. Shell Horsehide as tanned by Wolverine dries soft under all weather conditions; remains scuffproof; has fifty percent greater resistance against acids; and is almost impossible to rip and tear.

We predict that after wearing one pair of Wolverine Horsehides, you'll never be satisfied with anything less in wear and comfort. Ankle-lengths to knee-highs . . . grease-filled or flexible soles . . . we've got them all—at mighty reasonable prices. Why not come in today and try on a pair of WOLVERINE Work Shoes.

this newspaper. Excerpts from the article are as follows:

"For the past ten years Mr. Grow lived at Gorman, in North Central Texas, but knowing the potentialities of West Texas he decided to move out to Littlefield and make his business grow up with the country—which was our gain.

"He came to Littlefield, a stranger, to take over the sales of a product about which he knew very little except by hearsay—the prospects of increasing the Conoco business there were very unfavorable—the best service stations in town were tied up under long time leases by competitive companies, and up to that time it might as well be said that Conoco 'also ran.' Certainly, there was nothing bright in the whole prospect ex-

cept as he might make it so. And did he make it shine?

"After three months of getting acquainted and exposing the Littlefield folks to some original ideas and a winning personality, and letting them learn that he has a world of the stuff they string on tennis rackets, he has increased the business even-up a hundred percent and is still going stout. Perspiring Canine!

"First off he announced in the local paper that he was there, and why; that he wanted to get acquainted with everybody, and to make them acquainted with Conoco products and the million dollars worth of service that went along with them. The next week he followed with more—one introducing Mrs. Grow as his "Ware-houseman and Assistant in General," for telephone orders or any other business anybody might have with him.

"Besides handling the bulk business, Mr. Grow has built one service station on his own account and has influenced the building of another, right in the heart of the town, at a cost of

Adults Contract Children's Diseases

Adults can, and do, contract many children's diseases. And, usually, they suffer from them much more than children do. For instance, many adults contract worms, an ailment usually associated with children. Sometimes they suffer intensely and take expensive medical treatments, without realizing that worms are the cause of their troubles. Yet, the symptoms are the same as in children, loss of appetite and weight, grinding the teeth and restless sleep, itching of the nose and anus, and abdominal pains. And, the same medicine that surely and harmlessly expels round and pin worms from children will do the same for adults—White's Cream Vermifuge, which you can get at

EDITORIAL

We firmly believe that every man of our acquaintance can remember every licking that he got, and didn't deserve as a kid, but he forgets all about the ones that he did deserve, but didn't get.

The man of today who hides behind a woman's skirt isn't a coward he's a magician.

Next week will be Thrift Week, which reminds us that Thrift is the father of Independence.

Boy: "Do you know

Dad, that in some parts of Africa a man doesn't know his wife until he marries her? Dad: "Why single out Africa?"

It is said that playing safe at a grade crossing beats playing a harp.

There's one thing about winter weather in this country. It's never cold and disagreeable but what you can read in the papers that it's a lot worse somewhere else.

AN OPPORTUNITY!

...FOR STOCKMEN...

WHY NOT OWN A RANCH WHERE YOU CAN FINISH FOR MARKETS AND ADD TO YOUR PROFITS EACH YEAR.

Several real buys in small ranches out of the famous Yellow House Ranch on the South Plains of Texas, in Lamb and Hockley Counties, as listed below. All these tracts are located convenient to railroad, splendid schools, good towns, and surrounded by the greatest agricultural development in Texas where feed is plentiful.

This section is destined to be one of the best finishing grounds in the South, and the small rancher here will have an advantage worth-while.

14,000 acres, including Yellow House Ranch headquarters improvements. No better cattle or sheep range, with plenty of good agricultural land that will increase in value. Fenced and cross-fenced. It will pay you to investigate this promptly.

Price \$15.00 per acre. Liberal terms, 6% interest on deferred payments.

2500 acres. One of the best little combination propositions, in this section, splendid location.

Price \$15.00 per acre. Reasonable cash payment, liberal terms on balance, 6% interest.

4500 acres. Two miles from \$80,000.00 brick school building, store and gin. Fine location and splendid little ranch, with plenty of good agricultural land.

Price \$16.00 per acre. Liberal terms, 6% interest.

3500 acres. Mostly enclosed with sheep proof fence. Splendid location and includes some good agricultural land.

Price \$16.50 per acre. Liberal terms, 6% interest.

3000 acres. A splendid little ranch and all the good farm land needed.

Price \$16.00 per acre. Liberal terms, 6% interest.

Also, smaller combination farm and ranch tracts, if desired, at attractive prices.

In addition to these combination tracts, we have some fifty thousand acres of 100% agricultural land surrounded by development in tracts of 177.1 acres each at \$30.00 and \$35.00 per acre. One-fifth cash, balance liberal terms, 6% interest.

It will pay you to investigate these propositions at your earliest convenience, as these lands are selling and the country developing rapidly.
