

### Notice! Honor Roll Women

A committee from the City Federation has been appointed to have the honor roll of the Community Clubhouse prepared and framed into some permanent form. This Honor Roll will hang on the walls of the community clubhouse. 140 names will appear thereon.

Since it is to be a women's honor roll, it has been suggested that the names of the women be printed on the permanent form, rather than the names or the initials of their husbands. This is considered a good suggestion and will be carried out.

The committee, consisting of Mrs. J. I. McDowell, Mrs. F. E. Gary and Mrs. Fox Stripling is anxious to have each 510 woman whose name appears on the community clubhouse honor roll to phone in her "given name" tomorrow, or at your earliest convenience. Unless you phone in your given name, your married name will be used.

Please cooperate in this instance and let the committee have this information at once. They are anxious to have the honor roll in permanent form and this will be perfected immediately.

### W. Tex. Bodies For State Bond Issue

ABILENE, Texas, Sept. 24 (AP)—A State-wide bond issue for highway construction, retention of present automobile registration fees, a gasoline tax of not to exceed 3¢ a gallon and gross receipts tax on motor buses and trucks in commercial use of not to exceed 2 per cent were endorsed by the advisory board of nine of the oil and gas division and the highways committee, both of the West Texas Chamber of Commerce, in a conference between the two groups.

Herald wants ad get results.

### An Experiment Proves Worth In Our County

Two Cotton Growers Find It Best Not to Plant Too Thick

### Plant Two Skip One

Is a Method Which Will Prove a Winner in Years of Excessive Rain Or Years of Drouth

John Bruton and I. B. Cauble have tried out a new plan in cotton planting this year and if the Howard County farmers are wise the majority will adopt this method of planting this crop in the future. "Plant two rows and then skip one and keep this pattern all across your field."

It has proved its worth this year which has been one of excessive rainfall. Because the sun is able to get a good slant at the rows due to the "skip."

In fields where rank growth prevents the sun from reaching the plants we have little chance of making much cotton.

In years of scant rainfall the method of planting will be even more beneficial as it will give the plant root a larger area from which to secure moisture.

If you are not too contrary to profit from the experience of others it might be worth your while to drive out to the Elbow section and view the fields where Messrs. Bruton and Cauble have put this method to the test.

Mr. Bruton planted his entire crop of 320 acres according to this plan and Mr. Cauble planted 150 acres. Both are more than satisfied with results and expect to follow the same plan in the future.

Cotton needs plenty of sunshine in years of heavy rainfall and as much moisture as it is possible to secure in years of scant rainfall, and this method of planting two rows and skipping one fills the bill regardless of how the season terminates. You just can't beat it for crop insurance.

It may be worth a whole lot to Howard county for every farmer to investigate this method.

### T. & P. Railroad Here Expands With Oil Play

Monthly Receipts Double in Past 60 Days and Eight Times Over Year Ago

### Quarter of Million

Over 5,000 Cars Handled in Big Spring Yards Today, Triples in a Year

With monthly receipts totalling more than a quarter of a million dollars and the flow of cars increasing over a third, the freight department of the Texas and Pacific railroad in Big Spring is enjoying a business life of much more than normal dimensions.

The tremendous expansion of the freight department of the T. and P. is also reflected in the passenger service, although of not so large proportions.

Today approximately 5,000 freight cars including oil and tank cars, roll through the Big Spring freight yards each month, according to R. H. Jones local freight agent. Compared with the less than 2,000 cars a month of a year ago, freight traffic today is three times its former size.

Double in 60 Days With receipts totalling approximately \$250,000 a month at present the same expansion is noted in the financial end. Receipts have virtually doubled in the past 60 days, Mr. Jones reports.

Receipts a year ago were from \$50,000 to \$75,000 a month, showing a gigantic advancement compared with the quarter of a million dollars today.

Oil development in West Texas accounts for about 75 per cent of the railroad development, according to Mr. Jones while cotton this year will play a large part in rail activity.

Ship Much Cotton From 25,000 to 30,000 bales of cotton will be shipped from Big Spring directly and about 30,000 bales is expected from the immediate vicinity.

Building and material expansion of the T. and P. yards here is keeping pace with the business development. At present trackage for three refineries East of the city is being laid to accommodate at least 300 cars.

### Pyote Man Soon To Open Modern Hotel In City

Steve Canonico, prominent hotel and restaurant man formerly at Wink and Pyote, is preparing to open a 20 room modern hotel on East Third Street. The lower floor of the building, which is now under construction will house a filling station and garage while the second floor is to be the hotel.

Mr. Canonico plans to furnish his place for beauty and comfort and will have one of the leading hostesses in the city. Mrs. Canonico is moving from Pyote as soon as the new place is completed.

### EAST THIRD STREET BAPTIST CHURCH REVIVAL

Sept. 23 to Oct. 7. Despite the rainy and threatening weather last night a great crowd assembled to hear a wonderful sermon delivered by the pastor Rev. S. B. Hughes.

The church was packed last night but do not let this hinder you from joining us every night for the next two weeks, for we need your help and cooperation, is the pastor's appeal.

Come early for we have grove prayer meetings at 7 o'clock for every age.

If you will come and join in the music and then listen to what the pastor has in store for the lost people of Big Spring you will surely come and bring some one with you.

### GOIN' FISHING

Friends of Bob Austin, W. R. Purser and John Curtis are all cracked up to listen to some fish stories in the near future as these three gentlemen who claim to hold the championship among fishermen, are planning to leave tomorrow on a fishing trip. Their friends know that they will have plenty to talk about upon their return from this trip.

### Back to Normal!

Texasians, Texas—If you are in a serious condition of health when I arrived at middle life and as I had heard of so many being wonderfully benefited by Dr. Pierce's Favorite Prescription at that age I decided to try it. It proved to be the proper medicine a P. & I cannot praise it too highly for the benefit I received, or it relieved my aches and pains—saved me a lot of suffering, and set me in good health which I still enjoy.—Mrs. C. E. Klipp, 307 Oak St. All druggists. Tablets or liquid. Send 10c to Dr. Pierce's Invalids' Hotel in Buffalo, N. Y., for a trial box of the tablets and write for free literature.

### ATTENDING SHERIFFS CONVENTION

Mr. and Mrs. Frank House, Mr. and Mrs. J. O. Tammitt and Jess Slaughter left this morning for Austin to attend the annual convention of the Texas Sheriffs Association. The convention opens tomorrow and will continue for a three day period.

### An Oil Play Seems Scheduled For East Howard

The Finding of the Lime 130 High in the L. C. Harrison Test Responsible for Same

### May Mean New Field

A Scramble For Leases And Royalties In the Vicinity of the Well Is Now On

While there are new developments in connection with the L. C. Harrison oil well on section 9, block 30, township 1 South there is a marked activity in leasing and royalty deals in that section. Finding the lime 130 higher than in any other tests in that area is responsible for the brisk leasing activity in eastern Howard county.

The litan pools with production secured around 2900 feet is only a few miles east of the Harrison test. The Magnolia had a small producer in the O'Daniel well to the southwest, and gas showings have been secured in the Laurel Oil Company's test to the northwest. Then too, it is not a great many miles to the Chalk field as the crop lies, and so far the connection between the litan and Chalk pools has never been defined.

It would certainly open up a vast territory for development if this test is brought in a commercial producer.

### College Football In Big Spring

Big Spring folks will have an opportunity of witnessing the first game of college football ever played in Big Spring next Saturday on this date the Simmons University team of Abilene will clash with the Sul Ross Normal team of Alpine. A fast game is predicted.

### Poultry Exhibit Howard Co. Fair

By CLAUDE WINGO, Chairman Poultry Exhibit, Big Spring and Howard County Fair

Howard County has the world skinned for real assets when it comes to raising poultry. We have a high dry climate suitable for poultry. We do not have extreme cold to contend with, feeds can be raised in abundance and we have a good local market. With the new storage plant under construction we should be able to handle a much greater bulk than at present. That man who has a few cows, that really give milk and lots of milk and some hens that lay eggs, does not suffer when the worms eat the cotton up.

So much for that. Now to our poultry exhibit in our County Fair. If you have any poultry at all you should plan to enter a coop or two. You will help others to see the good points in really good poultry. Howard county has some turkeys, if you own them plan now to enter a good gobbler and a good hen.

In the chicken line we want chickens of all breeds: Layers—White Leghorn, Brown Leghorn, Anconas, Manarcas, Meat Type—Orpington, Brahma, Buff Cochin.

Dual Purposes—Winedotties, Rhode Island Reds, Plymouth Rocks.

Start for the Fair now. Select the birds you expect to enter. See that these birds are well fed, see that they are free of all bugs, see that there are no scales on their feet and legs, their heads and beaks must be trim and clean. If you would have prize winners, some day or two before the show wash each bird. Clean the plumage, heads, feet and legs, use water and good soap, see that the soap is all rinsed off.

Write to Poultry Division of the Fair and tell the Superintendent just how many "coops" and the breed of the birds you will enter.

### New Post Office Building Plans Being Prepared

A. S. Page, postal inspector in charge of leasing quarters for the Post Office Department in this district was a visitor in Big Spring Saturday.

Mr. Page was here to confer with Postmaster E. E. Fahrenkamp and Wm. Fisher who is to erect a building for use as post office quarters. It is expected that the new building can be completed in time to enable the post office to be moved before the big Christmas business next December.

### Conference At El Paso For An Air Route

El Paso's call for an organization to get the government to establish a southern transcontinental air line includes San Francisco and Los Angeles.

Invitations have been sent out to these two, along with those of towns in the west Texas trade territory, Arizona and New Mexico, to be represented at the meeting, which will be held here October 6.

The objective of this is to perfect an organization, when the government will be requested to call for bids on the proposed air route.

Towns invited here are Dallas, Ft. Worth, Big Spring, Sweetwater, Midland, Odessa, Pecos, Cisco, Deering, Lordsburg, Douglas, El Paso, Yuma, Phoenix, Tucson, El Centro, San Diego, Florence and Ajo.—El Paso Herald.

### VALUES DUE FOR ADVANCE

It hasn't been but a year or two since you might have purchased lots by the dozen at \$50 around here in Big Spring. You are lucky now to secure the same lots for less than \$500 each, and it won't be long now until they are asking \$1,000 per each.

### Traveller Of Oil Towns Sees Large Prospects

Another boost for Big Spring's magnificent development given today by D. D. Cantrell, visiting advertising specialist in the city on business.

"I have made nearly every town in the country but this has the greatest possibilities of I have seen so far," he said in dictating the future activity.

Cantrell is making a special West Texas for an Eastern business concern along with other duties.

### Skating at Miller Rink Every

Skating, a sport that has many followers in Big Spring will be held for the winter season at Miller's Skating rink on the north of Big Spring, this night. This will be good news to all those who enjoy this sport.

The floor at the rink is in shape plenty of skates are on hand and everything is in readiness. Every Thursday night will be "skating night" so those who get up parties and come to enjoy the fun can always find a big time every Thursday night.

### Baby Health Contest

A Baby Health contest will be held in connection with the Howard County Fair on October 10 and every mother who will be asked to enter her baby in this test. All babies whether healthy or inclined to be sickly are eligible.

This contest will be under supervision of Miss Jane Public Health nurse, who is temporarily assigned to duty in Howard County.

Give the stranger a square. Number the houses and some street signs so they can find their way about the city.

### DIZZY Lost Appetite

Mr. M. F. Fink, of Harrisburg, N. C., says: "It must have been fully twenty-five years ago that I began taking Black-Draught regularly. "I was in town one day, and while talking to a friend I stooped over to pick up something. When I straightened up, I felt dizzy. I spoke to him about this and how I had not felt like eating. "My friend told me to take some Black-Draught. I knew my mother had used it, and so I bought a package. When I got home, I took a good, big dose, and the next night, another. In a few days I felt much better. "A good many times I have had this dizziness and a bad taste in my mouth, or head-aches, and then I take Black-Draught and get better. I do not have to take it very often. We buy from five to seven packages a year." Try it!

**BLACK-DRAUGHT** For Constipation, Indigestion, Biliousness

### HIS PROBLEMS are yours!

Announcement is made today of the opening of a dry cleaning plant in connection with the Big Spring Laundry company, according to Frank King, manager.

### EAST THIRD STREET BAPTIST CHURCH REVIVAL

An exceedingly good crowd was assembled last night with the best of interest and spirit shown for the services.

Our pastor delivered one of the best messages of the Revival, but that is not all, he makes every night's sermon just a little better than the previous so don't wait until the next week to come but come and show the pastor and us that you are a regular attendant.

Be sure and be there if possible for our group prayer meetings which start at 7 o'clock promptly; come and help us in some real honest prayer for the Lord.

After church services Bro. James Glascock and Miss Clema Erablin were united in Holy Wedlock officiated by the pastor, Rev. B. S. Hughes.

We extend our greetings and friendship to the newlyweds.

Come early and help Bro. Nance carry the singing through. A fine leader and singer for our church.

We also have some good instrumental entertainments come and see.

### Moody Denies He Is To Support Herbert Hoover

AUSTIN, Sept. 26. (AP)—Governor Moody today reiterated his statement he was supporting the entire Democratic ticket and characterized the report from the East that he will support Herbert Hoover as untrue.

The editor sent a telegram to the editor of the New York Herald and Tribune asking him to correct reported story that the Texas executive would support the Republican presidential nominee.

Mrs. Lonnie Glascock and two sons have returned from a visit in Corsus Christi.

### Water Resources North Of City To Be Tested

A. K. Merrick Farm Northwest of City Is To Be the Scene of This Test

### Many Wells Planned

Analysis of Water Shows It to be Suitable and Equal in Purity to City's Supply

For many years A. K. Merrick has been arguing that a water supply sufficient to meet the needs of Big Spring could be secured on his place northwest of Big Spring, but up to the present he has been unable to interest the City or any individual in the plan of making a test to determine the amount of water that might be secured from a prolonged and thorough test.

Mr. Merrick has just about completed arrangements to have a thorough and exhaustive test of the water resources made.

This is something our entire city is interested in for it is shown that a goodly supply is available some of the worries of our city will be eliminated.

While Big Spring has an ample water supply for a city twice the present size of Big Spring there is a likelihood of becoming much larger and in that event it will be necessary to seek a greater supply than can be developed on the present city owned lands.

The tests to be conducted on the Merrick land will be interesting and we all hope the test proves the existence of a large water supply.

### Proprietors Of New Firm Are Planning Opening

A. Eron of Corsicana, and A. Jacobs of Borger, are in the city today to complete plans for opening their new dry goods establishment in Big Spring.

Their place of business to be known as the "Betty Lee Shoppe" will be located in the new Allan business block at the corner of East Third and Runnels street.

They expect to hold their opening as soon as the building is completed, sometime after the first of October.

### Child's Health Conference To Be Held At Fair

Babies Between the Ages of Six Months and Five Years To Be Given Examination

### October 5 And 6

Miss Iva Jane Lytle, Itinerant Nurse From the State Department of Health In Charge

Something new and different that will be conducted in connection with the Howard County Fair this year, will be a Child's Health conference. Miss Iva Jane Lytle, Itinerant nurse of the State Department of Health will be in charge and babies, between the ages of six months to five years, will be given examinations.

The dates of the fair are Friday and Saturday, October 5 and 6 and these are the dates on which the examinations will be given.

To make clear to those interested in the Children's Health conference, we will endeavor to explain just what a health conference is, the purpose, etc.

### Definition and Purpose of a Children's Health Conference

What is a children's health conference? This is a conference of physicians and mothers to determine the development and present condition of children brought by their mothers for examination. It includes a careful physical examination of each child, in which the child is weighed, measured, and compared point by point with the normal child in order that the mother may see where she is succeeding, where she is falling, and how she may secure better results.

The examination is noncompetitive and no score card is used. A children's health conference is not a contest or a clinic. It is intended neither for the child of exceptional development nor for the sick child, but rather for the great mass of children who, though apparently well, are yet rarely found free from defect. The discovery of such defects at an early stage, when they may easily be remedied by proper hygiene or medical care is the chief aim of the conference. No medical advice is given. If defects are found which need medical treatment, the mother is advised to consult her own physician or a specialist.

The conference physician enters on a special record sheet the result of his examination and a summary of his advice to the mother and gives her a copy of this record.

Purpose of a children's health conference—The primary purpose is educational.

1. It points out to the individual parents ways in which they may improve the care of their children. Held in connection with a child-welfare exhibit on the care of babies and young children it makes clear the practical application of the principles shown in the exhibit.

2. It is also a practical demonstration to a community of the value of keeping the well child well by periodic examination of babies and young children. It corresponds to the medical inspection of school children. In communities where the latter is already established a conference brings to the attention of local physicians, nurses and parents the importance of preventive measures in the earlier years of childhood.

3. The conference may be a potent means of stimulating public interest in infant and child hygiene. The organization of infant-welfare or milk stations, establishment of a public health nursing service either in the town or the country, etc., often follow the holding of such conferences.

(For suggestions as to exhibits and other program features to be combined with a children's health conference, see Baby-Week Campaigns (revised edition) pp. 73-85, 89-92, U. S. Children's Bureau publication No. 15; also Child Welfare Exhibits: Types and preparation, pp. 4-13, 19-46 U. S. Children's Bureau publication No. 14.)

Age-limit of a conference—The conference may be limited to children under school age—that is, any baby or child under the age of 6 years free from communicable disease may be considered eligible for the conference.

In some cases, especially in communities where it is desired to demonstrate the value of medical inspection of school children, children of all ages up to 14 years may be admitted for examination.

Safeguarding a conference—The most important consideration in arranging a conference is to provide conditions which are safe and comfortable for the children.

The bringing together of a large number of children always involves the risk of spreading infection, which is especially great at the time of any general epidemic, such as one of measles, whooping cough, infantile paralysis, grippe or any other contagious disease. Where such an epidemic is present, or where there is any special reason to fear one, it is better to omit the conference altogether. At any rate, in such cases the local or State

### City Planning Needed, Dallas Man Tells Meet

E. A. Wood, City Planning Expert Outlines System of Planning Modern Cities

### Lauds Big Spring

Big Spring Men at Noon Luncheon Today Hear Latest Move to Civic Betterment

City planning is the biggest problem confronting the American public today, E. A. Wood, Dallas man said in an address to a gathering of the Big Spring men at a noon luncheon today at the Methodist church basement.

Mr. Wood, in outlining the methods of city planning was the principal speaker of the occasion. Approximately 70 were in attendance.

The speaker placed the system of civic planning under four departments, streets, public utilities, parks and playgrounds, and zoning. Of these he said, zoning has proven the most important and is being accepted by nearly every city in the United States of any size. All but 12 of the very largest cities have adopted this plan, while 142 towns of from 1,000 to 10,000 population have already zoned themselves under the regulations.

### No Street Changes

"Everything has changed vastly in the past 25 years except our system of street laying," Mr. Wood declared. "With proper city planning and street laying, public utilities are able to do more effective work in electric and sewage systems."

"With shorter working hours and more hours for recreation we have today a higher type of American citizenship," the speaker said in pointing out the importance of parks and playgrounds. "Parks also tend to beautify and enhance the value of adjacent real estate."

"Zoning is the most popular factor in city planning. You can't mix residential, industrial and business sections in a community. Each must be properly zoned."

### Ideal Location

"Big Spring is ideally located for a large city," he added. "You have many problems confronting you, but the foundation is an ideal one."

Following the speech, Mr. Ward, representative of the Portland Cement company, presented figures proving the values of concrete roadways and how they have improved over former styles.

"An engineer planning a road today must see the future type of traffic and try to meet the demands of development," he asserted. "Wider tires, heavier trucks and faster autos have greatly changed types of travel. Concrete lessens the problems of maintenance."

J. F. Wolcott, as chairman of the meeting, introduced the speakers.

### EMPIRE GAS AND FUEL CO. SEUDS ANOTHER

The Empire Gas and Fuel Co has spudded its No. 1 Clay, its second test to start within a week, in the southeastern portion of Howard County. The location is 350 ft. from the south line and 1870 feet from the East line of section 127, block 29, Waco and Northwestern survey.

Remember the County Fair October 5 and 6.

public health authorities should be consulted before a conference is arranged.

At all times, even in the absence of any epidemic, great care should be taken to prevent the spreading of infectious diseases at a conference. This can be done if certain precautions are observed. Every effort should be made to prevent the crowding together of a large number of children. This can be accomplished if the children are examined by appointment only, the appointments being made in advance. Not more than two or three children, with their mothers, should be admitted to the waiting room at the same time. It has been the experience in the past that when appointments are not made, and the conference is a popular one, the conference rooms are sometimes crowded with mothers and babies awaiting their turn; many of them after remaining several hours, go home without the examination. It is obvious that such conditions are very undesirable.

Moreover, children suffering from contagious diseases or those who have recently been exposed to the should not be eligible for the conference. This fact should be made known in all the publicity material. In addition a nurse should be given the duty, at the conference, of looking over every child as it is brought in and excluding all those with any evidence of contagious disease, including bad colds. Haggis-Donaghan Wedding

Miss Marie Donaghan and Addison Harris were quietly married at the Baptist parsonage here this morning, the Rev. Geo. F. Brown pastor of the Baptist church reading the marriage vows.

The couple will make their home in Big Spring.—Midland Telegram.

### Crawford Bellboy Finds Many Smiths In Lobby; None 'AI'

"Calling Mr. Smith."

A bellhop in the Crawford Hotel was winding his way through the crowded lobby in a frantic search for "Mr. Smith" last night bent on nailing him with a flying tackle should he find the right man.

In response to the call a dozen Mr. Smiths rushed forward and almost wrecked the youthful servant in the stampede, only to be turned away when the hon informed them he wanted "Al Smith."

And when the Smiths were all checked up the boy realized there must have been a mistake.

"Aw, that guy ain't here," he grinned as he returned to the desk.

### J. A. Berry Opens Audit Business Here

Berry and Berry is the title of a new firm in Big Spring and they will give auditing and business service to all those in need of same.

J. A. Berry and E. J. Berry are associated in this new business and they will have offices in the West Texas National Bank building in the same space with the E. J. Berry agency. Complete audits and efficient systems can be installed by these experts.

When in need of such services, the Messrs. Berry invite you to call for their services.

Dr. Chas. W. Deats of Dalhart visited relatives and friends in Big Spring this week end.

### A Wet's Reason For Voting Dry

Otto H. Kahn a member of the international banking house of Kuehn, Loeb and Co. though a "wet" gives his reason for voting for Mr. Hoover. Mr. Kahn believes Hoover will make some changes in the Volstead law—such changes being in favor of liberalizing this act. Here's what he says:

As respects prohibition and the Volstead Act, he finds himself "more in accord with the expressed views of Governor Smith than with those of Mr. Hoover." But he does not see how, "with a Congress constituted as it would be under the Democrats, Governor Smith would be able, if elected President, to make his views effective." But, "knowing Mr. Hoover to be both able and courageous I have no doubt that, if elected, his experience in the actual administration of the Volstead Act will lead him to recommend to Congress suitable changes in its provisions. And I am convinced that such changes will be—and to be effective must be—not in the direction of increased stringency, but of increased liberality."

We should keep pegging away on the proposition to secure a cotton seed oil mill for Big Spring. We might find some corporation willing to establish such a needed plant in our city. The market for much of the product of such a mill can be found right here in West Texas.

Give your lungs a little exercise Saturday, go to that football game and yell for the under dog.

### Big Spring Looks Good To Visitors From Missouri

Mr. and Mrs. James Luthy, Gilbert I. Butterfield and Mrs. Luthy's secretary, Miss Lena Hagerman of Lebanon, Mo., spent three days here this week with Mr. and Mrs. J. J. Butterfield. They were enroute to Coolidge, Ariz., where they will spend the winter.

G. I. Butterfield is very much impressed with the future outlook for Big Spring, and is considering returning here and putting in a telephone exchange. He said Big Spring looks mighty good to him and offers many wonderful opportunities.

Mrs. Luthy is president of the Fruit Growers' Association in Missouri, and has the distinction of being the only woman to hold this kind of a position in her native state.

### AMOUNTS THAT COUNT

George—"It isn't the amount of money that a fellow's father has that counts here at college."

Gene—"No, it's the amount of the father's money the son has."—Detroit News.

Oysters are in season again. They are extremely valuable as a source of various minerals needed by the body. Like other fresh fish, they supply iodine, and should be eaten when possible if other sea foods are hard to get. If you like fried oysters dip them in egg and bread crumbs, and then let them stand a while to harden the coating before frying.

Herald want ads get results.

# We're not trying to "kid" you about TIRES

We think we know a lot about tires. We're dumb if we don't—we've been at it long enough.

But if what we believe about Goodyear Tires is not so—we're simply kidding ourselves, not you.

If a tire goes bad on you—that's bad. But if the tires we sell go bad—we're ruined. Our money, our reputation, our credit, our standing in this community, our chances for future success—everything is gone if what we sell you isn't the best your money can buy.

There are a lot of good tires on the market today, some not so good and some that are just plain "no good."

But among them there is some one best and we think we have it. We think the Goodyear is The World's Greatest Tire. Millions of car owners have found to their satisfaction that year in and year out Goodyear Tires run farther and last longer.

More people ride on Goodyear Tires than on any other kind.

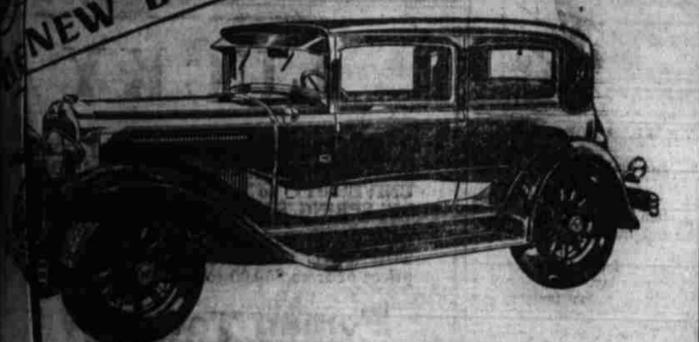

More Goodyears have been made and sold each year, for more than ten years, than any other kind.

We're not trying to "kid" you — you should be using Goodyears.

**TWELVE MILLION RADIO SETS IN USE**

A survey made on January 1 shows that at that time there were in use in the United States seven and one-half million standard radio receiving sets and enough more crystal sets to bring the total up to twelve million sets. Allowing five persons to the family, this makes a radio audience of one-half the people of the United States.

**TOO EXPENSIVE**

Jack: "So your father demurred at first because he didn't want to lose you?"  
Ethel: "Yes, but I won his consent. I told him that he need not lose me. We could live with him, and so he would not only have me, but a son-in-law to boot."  
"H'm! I don't like that expression 'to boot'."—Ex.

**PROGRESS**

In the good old days, a man could go out and get rousing drunk, and in the morning when he woke up with a splitting headache, he would put his hand to his forehead and say, "Gosh, I wish I were dead." Nowadays a man goes out and gets rousing drunk and in the morning when he wakes up with a splitting headache he is dead!—Ex.

**DISGUSTING**

Whoever is elected and whatever the effect on our future history, it is a fact that the present presidential campaign has sunk to about the lowest depth any such event has registered in recent decades. We must go to Old Hickory Jackson's time for comparable pietyunishness.

Mr. Hoover is accused of having taken a drink with Clarence Darrow; Mr. Curtis is said to have taken a drink from a hipflask at the Pimlico racetrack in Maryland; Mr. Smith is said to have been drunk at the Syracuse fair in New York State.

Isn't it all silly?  
Senator Bruce of Maryland, one of the loudest and longest (and wettest) talkers in the senate, put out the Hoover-Darrow story. It was promptly denied, even Chairman Raskob of the Democratic national committee saying that of his own knowledge Hoover does not drink and does not permit liquor in his home. Then the Maryland senator brought out the Curtis hipflask episode—based on the word of an obscure lawyer. A woman told the story that Smith was drunk at Syracuse whereupon the testimony of reliable persons and the evidence of the photographer's art were brought into play to give it the lie.

It is all very sickening, very silly. Such tales fall short of their object—which is to damage the candidacy of the victims. It will fail in that. The American people love fair play, and they are not going to lend a sympathetic ear to such disgusting lies. It is enough to make us all pause in amazement at the shameful depth to which our national campaign has degenerated.

**GOLF FOR EVERYBODY**

Democracies have a happy way of passing luxuries along to the plain people. The motor car, once a ritzy symbol, is a common necessary today. Everybody owns a talking machine, a radio, wears silk stockings, and has access to the pleasures of the possession of the select. Golf, perhaps, is a perfect symbol of this democratization.

There are more than 200 public golf courses in some 150 American cities distributed in 38 of the States. Last year nearly 6,000,000 rounds were played on these courses. The fees charged are modest and the links practically self-supporting. One city made a profit of \$130,000 from its three courses.

Most cities have the aviation idea now, and well for them that they have. But an airport is not yet so necessary as a municipal golf course. Nor is the former more truly a community project than the latter.

Golf has made amazing strides in recent years. It is now a more nearly universal game than any other American sport. All ages and both sexes play the game. The rich have their private courses. There are thousands of private golf clubs. But the man of moderate means is preempting the game, and is looking to the community to provide the play space. It is likely that in a few years hence will find no city in the country without its public golf course—Fort Worth Star-Telegram.

**FARM PRICES TOO LOW**

"In case prices continue at the present low levels, the total income to Texas farmers is likely to be no larger than that of 1927," declared Bernard Nichols, editor of the Texas Business Review, issued monthly by the Bureau of Business Research at the University of Texas, in a recent summary of the agricultural situation.

"Favorable crop prospects are largely offset by lower prices so that the outlook can be said to be only fair," he continued. "Fall sowing of wheat is well along in many districts, and a considerable part of the corn crop has been gathered. Most of the tame hay is in the stack. Cotton deteriorated less than was expected during August. Bolls are opening rapidly and harvesting is general. Texas ginnings to September 1 were 843,000 bales, against 925,000 bales for the same period in 1927. Insects and disease are causing some loss.

"Farm prices for the major crops were lower. Corn and oats declined several cents a bushel and wheat is selling at the lowest price in several years. Cotton fell \$5 a bale."

"I don't suppose you know of nobody who don't want to hire nobody to do nothing, don't you?"  
"Yes, I don't."—Ex.

**HELPING THE RETAILER**

The assertion of the Department of Commerce that the small merchant has an assured position is hardly necessary, in spite of the advance of the chain store idea. For in every community the ratio of the chain system to the independent retailer is still relatively small. But the independent merchant will be interested in the fact that the Department of Commerce wants to be of service to him and has issued a bulletin to explain that it can.

What the department believes will keep the independent retailer in business as an important cog in the business of every community needs can be done as effectively by the small merchant, and sometimes with closer adaptation to the demand, than it can be done by chain systems with mass buying. But the requisite of retail success is intelligent buying and unless both small and large business enterprises have it they are liable to go to the wall.

It is in dissemination of information as to the retailer who has no financial resources for independent research regarding his business that the department believes it is able to serve him. To live up to its promise, the department is studying retail distribution and marketing. Its survey has disclosed profit leaks through handling unprofitable items or soliciting unprofitable trade.

The Domestic Commerce Division of the department is now prepared to make researches and answer queries on credit and delivery, markets measurement, store location, store planning, educating and sales force, co-operative advertising, department leasing, and vehicular traffic congestion.—Dallas News.

**PRO-LAW FOR THE POOR**

While she is making a tour of the country addressing assemblies of clergymen and assailing the candidacy of Governor Alfred E. Smith, Democratic nominee for the presidency, Mrs. Mabel Walker Willebrandt, Assistant Attorney General in charge of prohibition enforcement, is under fire for playing politics in her gestures for prohibition enforcement. News dispatches from Washington last week brought notice that Congressman Celler of New York announced that he would bring charges against her on the floor of the House of Representatives unless she proceeds to prosecute a well-known vice-president of a railroad for violation of the liquor laws. Representative Celler charged that the case against the prominent railroad executive had received no attention since his private car, liberally stocked with liquor, was seized at the Pennsylvania station in New York.

The same news dispatches charged that Mrs. Willebrandt had directed a spectacular series of prohibition raids in New York following Governor Smith's nomination but had paid no attention to the liquor situation in Chicago, Philadelphia and other cities where violations are far more flagrant than they are in New York. In Philadelphia, it was said, conditions had grown so bad that the mayor of the city was forced to declare war on the open saloons.

**EROSION WORKS IN A HURRY**

Ten thousand years for nature to form twelve inches of fertile soil! From the rocks of the earth's crust and the organic matter of plants and animals, nature gradually builds up land and covers it with a protective covering of grass. Man destroys this protective covering in bringing the land under cultivation, and nature tears down in fifty years that which she has required 10,000 years to accomplish. Such is the rapid and ruinous effect of erosion.

Some people believe that in soil erosion, what one farm loses another farm gains. However, water sweeping over land picks up soil as a mixture of sand, silt, and clay. These elements are mixed in such a way as to give a crop-producing soil. But when the water drops its load of soil farther down the hill, it puts down the heaviest load first. In other words, it drops the sand first and the clay last. It gives one farmer pretty nearly all the sand, and another almost pure clay. If water laid soil down in the same form in which it picked it up there might be something to the idea that what one farm loses another gains. But it does not do that. It picks up a mixture of sand, clay, silt, separates them out, and deposits the different elements separately. A farmer can't use sand or clay; he wishes them mixed and seasoned with a dash—yes, several dashes—of organic matter. So soil erosion usually means loss of soil and plant food any way you look at it.—The Progressive Farmer.

**PLAN TO BUILD PROPERLY**

While it may not be necessary to jump into the city planning proposition too strong just at this time, it is certainly in order to give the problem some consideration. We should look into the future and make some plans now so that new industries may be accommodated in the sections of the city set aside for them, so that residential districts while protected from the encroachment of business and factories will not restrict the growth of these two necessary features of a city.

Now it is time to do this for if no plans are formulated the city will have residential, business and factory districts intermixed in a way to prove detrimental to each. You build a house according to a plan, and it is just as necessary to build a city along approved plans if we avoid many costly errors.

**CAR WITH BACK SEAT RESERVED**

A British inventor has designed a new car, with the back seat facing the rear. This seems like a good idea. Passengers can not do any back-seat driving, they are spared worries about the road ahead, they can get a better view of the scenery, and they are not blinded by the light of other cars rushing toward them at night. Hurrah for the reserved seat!

**OUTOUR WAY**

**MOM'M POP**

By Cowan

**DID YOU EVER STOP TO THINK**

By EDSON R. WAITE  
Shawnee, Oklahoma  
While in Oklahoma City I dropped down in the Chamber of Commerce to see the president, Ed Overholser. There is no use for me to tell you who Ed Overholser is, as every chamber of commerce man in the United States knows him, and at some time or other some of his speeches or writings have been used by most of them in their own organizations.

Ed Overholser is one of the queerest Chamber of Commerce men in the United States. He never mentions his own town's name—he works for the state of Oklahoma. He even goes further than that, he works for what he calls the Southwest; that area lying west of the Mississippi river, south of the Missouri river, east of the Rocky Mountains and north of Old Mexico and the Gulf. Ed says that whenever the Southwest is prospering his town will get its share.

Another queer thing about his preaching—he says the Southwest contains only one fifth of the area of the United States but produces from 25 per cent to 50 per cent of nearly all the raw material produced in America. For instance, the Southwest produces 53 per cent of all the cotton of the United States, 82 per cent of all of the broom-corn, 63 per cent of all the oil, 40 per cent of all the zinc, 41 per cent of all the lead, and almost half of the winter wheat.

Ed says the fastest growing section in the United States is his Southwest, and while modestly prevents him from saying anything about his own town, its building permits have run \$9,028,767.00 in the last six months and there are \$25,000,000.00 worth of projects financed for his coming year, which

includes a 25 story hotel, a \$10,000,000 railroad station and equipment 200 miles of hard surfaced roads and other things in proportion.

Ed won't talk politics or religion in connection with his Chamber of Commerce work as he says they have no place in a Chamber of Commerce but he admitted to me before I left the office that he wasn't at all agitated about the political situation, because the best or worst president of the United States ever had could not stop the development in the Southwest that is now on the program, and that the political and financial power was moving to the west so fast that neither Tammany nor Wall Street could much longer retain their power over things political or financial. So, to use his own expression, "What do we care?"

Argentine newspapers state that 320,750,000 gold will be shipped from Buenos Aires to New York on the first available boat.

**WEATHER FORECAST**

Louisiana—Rain tonight and Friday.  
Arkansas—Cloudy, local rains east portion, cooler north portion tonight and in south portion Friday.  
Oklahoma—Cloudy tonight, cooler part cloudy Friday.  
East Texas—Rains tonight and Friday.  
West Texas—Cloudy probably rains.

**GAINES COUNTY COTTON POOR**

The president of the Comanche Bank, just back from his ranch in Gaines county. He was through the center, the best cotton in West Texas and it will take from 30 to 35 acres to make a bale. This is another year like 1923 he says.

Miss Rebecca Hill of Comanche after a few days visit with Mr. and Mrs. W. B. Currie left this morning for her home.

F. H. E. & Moody's Roberts E-3 In For 2,000 To 3,000 Bbls.

Henshaw Oil Corporation Setting Two 27,000 Barrel Tanks So Well Can Be Drilled In

Estimates up to 5,000

The Zoch-McCamey Wildcat at 2780 Feet Is Reaching Interesting Depth

BY S. F. BALENTINE

NEW DRUMRIGHT, Glasscock County, Tex., Sept. 24.—This morning the F. H. E. Oil Company and Moody, drilled their Roberts E-3, into the top of the pay at a depth of 3042 feet. The hole filled with oil immediately. The production estimates range from 2,000 to 3,000 barrels daily. This location is in the northeast corner of the north-west quarter of section 136, block 29, and is a direct offset south to Cosden & Company's No. 1 Roberts.

This company's No. D-4 in the southwest corner of the same quarter is standardizing at 1600 feet. Their No. E-7, in the northeast corner of section 136, is rigging up rotary. This test will be an offset south to Cosden's No. 4, which is in the southeast corner of section 129. Cosden's No. 4 is drilling below 2800 feet, with the eight inch set below 1000 feet. The F. H. E. and Moody's E-3, offsetting Amarrado's No. 1 Roberts, on the west, is drilling below 2100 feet this morning.

In the Henshaw area on the west side of the field, the Louisiana Oil and Refining company's test in the southwest corner of the northeast quarter of section 3, block 32-2 south, is shut down for water at 1235 feet this morning. The Taylor-Link, in the southeast corner of the southwest quarter of the same section is drilling below 1600 feet.

This morning the Henshaw Oil Corporation bought two 27,500 barrel steel bolted tanks, which will be set on their 100 acre lease, on which Henshaw brought in the first gusher well of the field on August 4. The steel for the tanks will be on the lease the last of the week. According to Bob Taylor, representing the Haten Tank Company, of Ponca City, Okla., through whom these Columbia tanks were purchased, "this is the first time in oil history that bolted tanks of this size have been used on a lease."

"The steel rings have have full salvage as they can be used on tanks down to a 5000 barrel capacity," according to Taylor.

The Henshaw well in section 6, will be drilled in as soon as this tankage is ready. This well has been standing at a depth of 2210 feet, two feet in the pay. There is a

what production this test will make when drilled in, many have placed estimates as high as 5,000 barrels daily.

The Zoch-McCamey wildcat, in the center of the north line of section 15, block 30, W&NW survey, Sterling county, 15 miles southeast of here, along Highway No. 9 was drilling at a depth of 2780 feet in broken lime last evening. This test is reaching an interesting depth.

Concerning the Delphian Society. There have been some differences of opinion and misunderstandings about increasing the membership of the Delphian Chapter.

The following communication has been sent out and is valuable information from the Chapter Department, for the Big Spring chapter:

"We are very much surprised indeed to receive the information contained in your letter of September 16th, in connection with your chapter. Our surprise was not in connection with the election of a president to succeed herself, because that is done very often in some of our chapters. We do feel, however, that no president should hold office for more than two years.

"Our surprise was occasioned by the fact that you have people attending your chapter who are not Delphian members in any sense of the word. The mere possession of text material does not carry with it the right to attend Delphian chapter meetings. Regardless of whether this possession of text comes by right of purchase or gift this fact does not entitle the person to attend chapter meetings. There is no institution of learning in the country that we know of that will allow persons to attend its classes just because they have the text used in these classes.

Under the circumstances the only thing that we can do is to mark your chapter as an inactive Delphian chapter until such time as it has remedied this condition. In the first place, the chapter has violated its constitution and by-laws by allowing these people to come in as members, and not only take part in the chapter work, but even to elect them to office. If the chapter will go over their constitution and by-laws they will see where they have made a mistake."

TO RECOGNIZE CHINA GOVT. U. S. extends recognition to Nationalist Regime in China as De Jure government.

Booster Trips In County Will Advertise Fair

Programs Planned by Chamber of Commerce Committees First Trip Is Friday Night

Booster trips to rural communities surrounding Big Spring are planned for the next week as one of the many publicity methods in advertising the Howard County Fair, October 5 and 6, according to steps outlined at a meeting of members of the agricultural and trade extension committees of the Chamber of Commerce here last night.

The first four will be made to the Highway community Friday night this week, it has been announced. An interesting program of motion pictures and speakers is being prepared.

A large number of Big Spring business men are to accompany the boosters on the trips.

Farmers' Gin Co. Starts Today As First Test Is Made

After two busy months of building and placing new equipment, the Farmers' Gin Company of Big Spring got under way today in full swing. The plant, however was not run to capacity as several tests were still being made on the new machinery.

According to C. H. Gordon, plant superintendent the gin has a daily capacity of 60 bales of cotton and employs approximately six men.

The gin which is housed in a newly constructed building is completely equipped with new and modern machinery.

ROAD NOTICE TO LAND OWNER

In the matter of the Petition of J. D. Hanks and others for a public road in the County of Howard THE STATE OF TEXAS To Mrs. S. D. Moore, W. H. Moore of Dawson county, Texas, Minnie S. Veal, Carrie Slaughter Dean of Dallas county, Texas, Lone Star Cattle Co., Corporation, of Lubbock County, Texas, J. S. and I. S. Clay of Dawson county, Texas, W. F. Armstrong of Taylor county, Texas, J. B. Slaughter of Lubbock county, Texas, Wm. C. S. Stearns of Glasscock county, Texas, Della S. Wright, Dallas county, Texas, J. A. West, C. E. West and J. Z. West of Dawson county, Texas, Nellie Slaughter DeLoache of Dallas county, Texas, S. W. North Investment Company, whose residence is unknown

TAKE NOTICE, that the undersigned Jury, appointed by the Commissioner's Court of Howard county, Texas, to lay out and survey a public road as petitioned for by J. D. Hanks and others, beginning at the Northeast corner of Section 25 in Block 34, Township 3-North, thence Eastward along section line to the point where the North boundary line crosses the North boundary line of Section 25 in said Block 33, Township 3-North or Sections 20 or 29 in Block 32, Township 3-North and to assess the damages resulting from the establishment of said road, will, on the 26th day of October A. D. 1928, in discharge of our said duty, meet upon the following premises to which you or at least one of you have some kind or claim, to-wit: the North halves of the following sections, to-wit: Sections 25, 26, 27, 28, 29 and 30 in Block 33, Township 3-North of the Texas & Pacific Ry. Co., surveys, and the South halves of Sections 19, 20, 21, 22, 23 and 24 in Block 33, Township 3-North of the Texas & Pacific Ry. Co., surveys, all of said land in Howard county, Texas, and will then and there proceed to assess any damages to which you, or any of you may be entitled on account of the laying out of said public road, and you are hereby requested and required to produce to us a statement in writing of the damages, if any claimed by you, or any of you, and all evidences which you, or any of you may desire to offer in relation to such damages, and do and perform such other acts as may be necessary and lawful in the premises.

IN WITNESS WHEREOF, we have hereunto set our hands this 24th day of September A. D. 1928.

J. C. ALLRED, CHAS. SHORTE, WILLIS PAGE, E. H. WOOD, O. A. SHORTE, Jurors 3-4t

LOOK ME UP! I am now operating a filling station and small store five miles South of Brady, where Highway No. 9 and the Coleman road meet. When down this way, I invite all of my friends to come and see me. I'll be delighted to show you where to do deer hunting.

Dairying And Poultry Raising To Be Stressed

These Dependable Income Producers Should Be Encouraged and Promoted In Our County

Put Co. on Cash Basis

A Farmer Can Get the Cash When He Delivers His Eggs and Milk Products

Here we have an example of the danger of the depending almost entirely on one crop, and that the most uncertain crop of all, cotton. Many men have worked hard all year and right now they can't tell you whether or not they are going to make enough cotton to pay the cost of raising the present crop. And it is pretty much this way every year. A man has to be pretty much of an optimist to play the game of a cotton farmer. He is always expecting to hit it lucky, make a big crop and sell at a high price, but when he makes a big crop every cotton farmer in the South follows suit and the price is forced down. And the years the price of cotton is high cotton crops are so spotted that only half the growers are lucky.

There are other crops far more dependable which should be substituted for cotton, and these are the products of poultry and dairy cattle. It is not reasonable that a man can quit cotton and jump into poultry raising and dairying and make a fortune right from the start. It is necessary to start on a small scale and grow into poultry raising. Many a fellow gets discouraged and loses money at this game because they start on too large a scale before they learn this specialized industry.

The County Agent and Home Demonstration Agent, will prove helpful in promoting poultry raising and dairying in our county. They will gladly aid all who wish to embark in these lines.

With the establishment of a cold storage plant in our city and also the establishment of a creamery a much better market will be available for milk, butter and eggs here in the future.

With the establishment of a cold storage plant in our city and also the establishment of a creamery a much better market will be available for milk, butter and eggs here in the future.

With the establishment of a cold storage plant in our city and also the establishment of a creamery a much better market will be available for milk, butter and eggs here in the future.

New Post Office Quarters By Dec. 15

A few changes in the new post office floor plan suggested by A. S. Page, lease inspector for the Post Office Department and E. E. Fahrenkamp Postmaster are now being worked into the plans and specification by the architects, Peters Haynes and Strange and it is expected the contract for the remodeled building and addition will be awarded this week.

Mr. Page announced the next fixtures and equipment had been ordered for the Big Spring office. It is reasonably certain the post office can be moved into the new building between the first and fifteenth of December.

Sells \$40,000 Oil Leases

L. C. Harrison returned Sunday from Fort Worth where he sold \$40,000 worth of leases in the area adjacent to the well he is drilling in eastern Howard County. He sold \$25,000 worth for L. C. Denman and the balance included leases he owned.

In addition to making these sales he purchased an interest in the royalty of two sections of land from Mr. and Mrs. D. A. Rhotan.

Sells Lot on Scurry Street For \$1,500

C. M. Grissom last week sold to O. Y. Miller, the lot at the corner of East 10th and Scurry Street, consideration \$1,500. The deal was made through the Stripling Land company.

Well On City Property Now Drilling At 401

The test well on the City Waterworks property south of Big Spring is now drilling below the 401 foot depth. A fifty to sixty barrel well was paused up at the 300 foot depth. This was water however.

AMARILLO OIL MAN VISITING BIG SPRING

C. Pearson land man for the Texas Oil company with offices at Amarillo, is in Big Spring looking over the Howard county field. He makes no statement relative to probable operations of his company here.

Mr. and Mrs. Jim Ellis and baby spent Tuesday in Abilene, where they attended the West Texas Fair. They report the races, polo games and other events are the best Abilene has ever staged, and those who miss this fair are going to miss a treat.

Attorney and Mrs. D. I. Watner of Borger, Texas, have been visitors in Big Spring the past several days.

Herald want ads get results.

Constable Here Gets Prominent Man As Deputy

W. D. Hall Well Known Oil Field Officer, Joins Howard County Forces

W. D. Hall, well-known Arkansas and Texas peace officer, has joined the department of Constable Day, Howard county, as deputy constable, it was announced today.

Hall, who has been identified as an officer in a number of oil field towns, is not only well acquainted with the various characters but with the types that are attracted by oil booms. Constable Day believes with the aid of Hall he and other Howard county officers will be able to lessen law violations and keep undestables from looting in this vicinity.

Before coming to Big Spring, Mr. Hall was connected with law enforcement departments at El Dorado, Arkansas, Breckenridge, Tex., Wink and Pyote. He has always been known as a congenial yet fearless officer.

Seek Pipeline Right Of Way For Refinery

Negotiations are under way for the securing of a right of way for pipeline by the Great West Refining and Pipeline company which is to be in operation here soon.

Reese Allen, president of the company, was in Big Spring Saturday preparing for the pipeline survey from the Howard county field to the refinery and seeking an open right of way.

The Great West Refinery is located three miles East of the city. Temporary offices are maintained at 912 Johnson street.

The Cosden refinery and the W. E. Johnson refining plant are also in the same vicinity.

Fumigation Plant Gets Test Today Under U. S. Order

El Paso Compress Co. Fumigation Plant Pronounced Ready For Regular Operation

With government inspectors standing by to pass judgment on the experiment, the fumigation plant of the El Paso Compress and Fumigation company was given an initial test this morning.

Two of the three fumigation tubes were in operation and bales of cotton were inserted on small cars running in and out of the tubes on tracks. The small tube was given an experimental test Saturday with a number of samples.

G. C. Bond in charge of the United States Department of Agriculture station here, personally inspected the work today and pronounced the plant ready for regular operation.

The two larger tubes have a capacity of 130 bales of cotton each, a change being made every two hours. The process requires 20 minutes for the introduction of fumigation gas when the tubes are closed and one hour and 40 minutes for the fumigation effects after the gas has completely filled the tubes.

The smaller tube is merely for the fumigation of samples and household goods which are to be shipped outside this area.

Since the issuance of regulations by the U. S. Department of Agriculture recently, effecting the preparation and shipment of cotton in this area, the fumigation plant has been installed here to comply with requirements for eradication of the pink bollworm.

This agricultural district of which Mr. Bond has charge has 46 gins and two fumigation plants. Big Spring has seven of these gins and one fumigation station. The other plant is at Lamesa and will soon be in operation.

By fumigating each bale of cotton as it is being prepared for shipment the war against the pink bollworm is greatly aided.

Miss Cora Ashley who underwent her appendix Sunday morning, is an operation for the removal of reported to be getting along nicely.

C. H. Nowell Dies In Emporia, Kansas

Many friends in this city will be grieved to learn of the death of C. H. Nowell, who passed away at his home in Emporia, Kansas last night. Mr. Nowell has been ill the past week suffering from a heart disorder.

Mr. Nowell made his home in Big Spring several years, and his many friends here will be saddened to learn of his going. Surviving are his wife, three daughters, and one son. Funeral services will be conducted tomorrow and he will be laid to rest in Emporia, Kansas.

Winkler Officer Sees Big Spring

More words of praise for the amazing growth of Big Spring and its adjacent field and field towns was given Sunday when Frank J. Rutledge, Winkler county deputy sheriff, and a party of friends visited Howard county on a tour of inspection.

"Big Spring has certainly grown since I first knew the place," the deputy asserted. "It is already by far the best city in West Texas."

### Mrs. Ella Rodeck Buys Beauty Shop

Mrs. Ella M. Rodeck has bought of Mrs. Abwell the Lulu Mae Beauty Shop, better known as the Orchid Beauty Shoppe in the Lester Fisher Building. Mrs. Rodeck took possession of the shop this morning. Efficient operators in all lines of beauty culture will be employed at the Orchid Beauty Shoppe. Mrs. Rodeck is an experienced operator well versed in this business and she invites all of the young ladies and women of the town to give her a trial.

### DISTRICT COURT NOVEMBER 5 TO 20

District Judge Fritz R. Smith has announced a special term of district court to be held in Big Spring, beginning November 5th. Jurors for a two weeks term will be summoned. The men whom I have seen succeed best in life have always been cheerful and hopeful men, who went about their business with a smile on their faces and the changes and chances of this mortal life like men, facing rough and smooth alike as it came.—Charles Kingsley.

### Wildcat Tests Big Attraction Past Week

Harrison Well Southeast of Coahoma and Zoch Test in Sterling County Hold Attention

### Henshaw Area Active

Several in Producing Area of Field About Due In Coyle Taps Pay at 2900 Feet

BY S. F. BALENTINE

NEW DRUMRIGHT, Glasscock county, Tex., Sept. 22.—The attention of the oil fraternity, during the past week, in the Howard-Glasscock area was centered more on several wildcat tests than on the development of the field. The Zoch et al test in northeast Sterling county; the Harrison test southeast of Coahoma; the Taylor-Link and the Louisiana Oil & Refining Company tests north of the Henshaw producer on the western extension area of the field was the attraction. In the field proper nothing of importance developed. Several wells should be completed in the deep line pay this coming week.

The Zoch et al wildcat test in the center of the north line of section 15, block 30, W&NW, survey, Sterling county, is being watched closely. The well yesterday, was drilling below 2845 feet in lime. The surface elevation at this location is reported as 2547 feet with the line topped at 2063 feet. This well is about 15 miles southeast of Drumright, just across the line in Sterling county.

The Harrison et al wildcat, in section 9, block 30-1-south, southeast of Coahoma caused some stir the early part of the week when a report was circulated that the line was found higher than in the area, four miles northeast, where the California Company has production. The surface elevation of the Harrison test, according to elevations given by the South West Engineering Company, is 2321 feet, with the dolomite line topped at 1845 feet. If those figures are accurate, then the line is 476 feet above sea level.

The information secured by the writer on three wells drilled by the California Company in section 6 block 28-1-south, four miles northeast of the Harrison test, indicates that the line in producing wells runs more than 100 feet higher than in the Harrison test. The California Company No. 1 Foster, 230 feet each way from the southeast corner of section 6, completed August 22, 1924, shows a surface elevation of 2405 feet, with the line reported topped at 1810 feet, or 595 feet above sea level. The same company's No. 2 Foster, 1650 feet from the south line and 990 feet from the west line of section 6, reports a surface elevation of 2409 feet, with the line topped at 1800 feet. This well swabbed 240 barrels after a shot of 300 quarts, from 2785 to 2900 feet and is now producing about 60 barrels. It is the largest well of this area. This well was completed February 28, 1923; the same company's No. 5 Foster, 3219 feet from the south line and 690 feet from the west line of section 6, completed July 12, this year, swabbed 100 barrels from 2781 to 2900 feet after a 300 quart shot. The elevation at this location is 2380 feet with the line running about 600 feet above sea level. This information may not be entirely accurate but it is about the same as is being carried by the geological departments of several major companies.

In the producing area of the Howard-Glasscock field the F. H. E. Oil Company and Moody have the six inch cemented at 2310 feet in their No. E-3 Roberts which is an offset to Coeden & Company's No. 1, same company's No. D-3 Roberts set the eight inch at 1600, moving in cable tools.

Coyle et al, in the northwest corner of the east half of the northwest quarter of section 194, set the six inch at 2936 feet. They rath-er-ly ahead and report that the pay was topped at 2060 feet. Merrick and Bristow, offsetting Coyle to the north, drilling at 1800 feet. Schermerhorn Oil Company's No. A-1 Roberts, in the northwest corner of the south half of the northeast quarter of section 137 set casing at 2320 feet. This well will test the 2300 foot pay for production. Amerada's No. 3, Roberts offsetting the Schermerhorn on the north was better than a 600 barrel producer from the 2300 foot pay. However, they are carrying it on down to test the 3,000 foot horizon. They are underreaming today at 2710 feet.

In the Henshaw area on the west side of the field, the Taylor-Link was shut down today at 1508. This test is in the southeast corner of the southwest quarter of section 3, block 32-2-south. The Louisiana Oil & Refining Company's test, in the southwest corner of the northeast quarter of the same section, is drilling at 1220 feet. These are the two advance wells of the field and are being watched with a great deal of interest.

Henshaw is moving in cable tools to complete his test in the southwest corner of the east half of the southwest quarter of section 135. This well was drilled to a depth of 2922 feet last year, to test the 2500 foot horizon. The deep line pay should be found here at 2940. The surface elevation is 2900 feet with

### Piggly Wiggly No. 2 Opens Saturday

Piggly Wiggly store No. 2, located on Pecan Street opened with a bang Saturday and experienced a first day of exceptionally good business.

With a steady patronage throughout the day, customers continued to visit the new store from early morning until late at night. A special demonstration of coffee added to the many opening attractions.

LeRoy Merrick is in charge of Piggly Wiggly No. 2 which offers the usual attractive lines of groceries and meats.

### Machinery For New Milk Plant Enroute Here

Snowwhite Creameries Inc. to Install One of Largest Milk Plants in the State

### Capacity 1,000 Gal.

This Will Furnish Local Market for All Sweet Milk Obtainable in Howard County

With machinery and additional equipment already on the road from the factory, installation of one of the largest milk plants in West Texas will soon be under way by the Snowwhite Creamery Company, according to E. L. Galloway local manager.

The milk plant, which is expected to be in full operation by Oct. 10, will be in connection with the ice cream plant now in operation here. The aggregate cost of new equipment and rearranging the present plant is estimated at \$50,000.

According to Mr. Galloway the milk plant when completed will have a daily capacity of more than 1,000 gallons of sweet milk and 500 gallons of buttermilk, an output large enough to handle all of Big Spring and surrounding territory if needed.

In view of this production the Snowwhite company will be in the market for all whole sweet milk obtainable from this locality and will be in a position to buy the next two years' milk output in Howard county.

Approximately 10 men will be employed by the new milk plant. One wholesale and 2 retail trucks will be in operation to serve the community.

C. R. Cross, an experienced dairyman and a graduate of the A. and M. College of Mississippi, will be in charge of the milk plant while Mr. Galloway is to continue in charge of the ice cream manufacturing department.

The Texas Coca-Cola company, which has quarters in connection with the Snowwhite, is moving to a new location.

### Frank R. Greene Is To Drill On The Furr Ranch Soon

We Learn Today That Another Wildcat To Be Drilled In The Eastern Portion of Howard

### Has Large Block

This Test Will Be About Two Miles West of L. C. Harrison Test

Frank R. Greene, independent oil operator who was one of the men responsible for developing the Clay oil pool is to drill a well on the Furr ranch in the eastern portion of Howard county. He has made a deal with Frank W. Jones holder of the lease on a large block of acreage in that section.

The test will be about two miles west of the L. C. Harrison test well on section 9, block 30, township 1 South which has been the center of interest since the finding of the lime much higher than in other tests in that portion of the county.

Mr. Green expects to start drilling operations in the very near future.

### Dr. Chas. W. Deats Wins 2nd Place

Dr. Chas. W. Deats, while attending the West Texas Dental Association in Sweetwater, entered the Trap Shooting contest, held for the dentists, and Charlie, who claims to be anything but a professional "shooter" won second honors. Dr. Sloane of Dallas, who is recognized as an expert Trap Shooter, came out with top honors in the contest.

Dr. W. J. Lloyd of Pinalaview who had been attending the West Texas Dental Association in Sweetwater, spent Sunday in this city with relatives and friends.

The lime topped at 2050 feet. This test is more than a half mile west of the Sun Company's No. 1, Section and should be a good producer from the deep pay.

### Dallas Man Gets Contract For New Modern Ice Plant

Herman Brans, Construction Engineer and Contractor, Awarded Contract For Ice Plant

### To Cost \$100,000

Construction of a modern ice plant, to be built at an estimated cost of \$100,000, is being started at the corner of Owen avenue and the East highway, bearing all evidences of being one of the largest ice manufacturing plants in this section of Texas.

The plant is being built by E. R. Brinker and E. L. Ashcraft well known business men of Sulphur Springs, Texas.

Herman Brans, construction engineer and contractor of Dallas, has been awarded the contract for the new building. Mr. Brans has been in the city the past three days arranging for materials, says work will be completed within the next six or eight weeks. The Markham Jones Lumber company of Big Spring will furnish lumber for the building.

Fully equipped with modern machinery and the latest in ice manufacturing facilities, the new plant will be a credit to Big Spring and all of West Texas. The estimated production will be of sufficient volume to supply the needs of the city and adjacent vicinity.

The owners, Brinker and Ashcraft, feel that the steady growth of the city of Big Spring justifies an up-to-date ice plant and that their establishment here will be another public service.

### J. W. Skipworth Of Lamesa Gets Wood Contract

New Building On East Third Street To Be Erected By Lamesa Contractor Now Finishing Allen Building

J. L. Wood has awarded the contract to J. W. Skipworth of Lamesa, for the erection of a handsome new brick building, on his lot on East Third street, adjoining the new King Chevrolet Building. This will be a one-story brick structure, 25x100 feet, with a plate glass front. The estimated cost of the building is given at \$40,000.

Several different firms have figured on renting the building but up to date no one has secured a lease. Work on the building will be started immediately, according to Mr. Wood.

Mr. Skipworth, contractor, who received the contract to build the handsome new two-story brick building for J. W. Allen at the corner of East Third and Runnels street, that is now nearing completion, knows his business, and Mr. Wood made no mistake in giving him the contract for his new building.

Mr. Wood, who is a newcomer in Big Spring, has invested much in Big Spring real estate and believes that our city has a wonderful future.

### This Is H. B. Arnold Speaking

Time is, in our youth I expect we heard "Mary had a little lamb." I am not in the lamb business, but have a nice stock of tanks, and storage tanks, and still selling aeromotor windmills.

Steel flues made to order and jobs of sure-enough good stove pipe.

If in need of anything in my line it might be to your interest to drive over to my place in the west part of town and take a look around.

If you need a windmill, you will never regret buying an aeromotor. I have one on the pump in my yard for about four years, and it has only been oiled three times.

H. B. ARNOLD, 1-21p.

### Old Timer Business Visitor Here Friday

D. P. Strayhorn of Snyder, Texas, was a business visitor in Big Spring Friday. Mr. Strayhorn, who was formerly a resident of Big Spring at one time owned large land interests in this territory. Mr. Strayhorn still owns several choice residence lots in the Cole & Strayhorn Addition. This addition was named for D. P. Strayhorn and W. H. Cole, who at one time owned practically all of the land in that section of town.

Mr. Strayhorn stated that he got a wonderful growth in Big Spring since his last visit here, and is delighted with the prospects of the Big Spring country.

Dr. W. E. Hardy, Dr. C. D. Baxley and Dr. E. H. Hoppel who attended the West Texas Dental Association in Sweetwater last Friday and Saturday returned home Saturday night.

### Condor Oil Co. Of Big Spring To Start Test

Equipment Installed To Aid In Eradication of Pink Bollworm

With all equipment in readiness, the fumigation plant of the El Paso Compress and Fumigation company, which has been installed to aid the eradication of the bollworm, will be in operation Monday according to H. E. Reiss superintendent.

A government inspector will be on hand Monday morning to inspect the fumigation system and watch the first test.

The fumigation plant is in connection with the compress and warehouse and has been installed to comply with restrictions of the pink bollworm district.

Mr. and Mrs. H. G. Castle and son, H. G. Jr., are in the city visiting relatives and friends.

**Handwriting of Dead Man**

"Above all things, would he have the American people believe that a political party with that record in office could look upon it with satisfaction? Does Mr. Hoover want the people to believe that he looks back with satisfaction upon that record? It will not satisfy the American people to have him pass that question on the chairman of the Republican national committee; nobody can answer that but himself."

Governor Smith said he was fully aware that almost all the oil lease disclosures were before the American voters in 1924. Since then, however, he recalled that the Supreme Court had rendered its decision "placing its condemnation of these wicked transactions" and the people have learned on the authority of the highest court of the land "that these oil leases were the product of official corruption."

In addition the Democratic nominee said it had been developed since the last presidential election "that the chairman of the Republican national committee secured from the beneficiaries of the oil lease at least \$260,000 in Liberty Bonds," to help liquidate a campaign deficit of some \$1,800,000.

**Are People Callous?**

"It was the handwriting of a dead man," the Governor went on, "that disclosed to the people of the United States to whom these bonds were offered. They were offered to the Republican Secretary of the Treasury in an amount of \$500,000. The Secretary of the Treasury was unwilling to be a party to this fraud and instead contributed \$90,000 to the Republican national committee and rejected the bonds."

"But this much must be said, that the Senate committee in search of information as to these bonds could have gotten it from the Republican Secretary of the Treasury long before it was forced out, had he been disposed to aid the Senate of the United States in laying bare this wicked conspiracy against the American people."

"It stands admitted in the record that for a period of years the Republican Secretary of the Treasury concealed from the Senate investigators his knowledge of the manner in which these bonds were being put into the treasury of the Republican party."

The Republican party in 1904, Smith concluded, "judging from the election returns, must have convinced the American people that guilt in the oil lease transactions was personal and that it ran against the party."

**Tribute Paid to Walsh**

"Unless we are willing to accept this theory," he went on, "we must take another, which to my mind is unbelievable: It is that the people of this country are callous about these things."

The Democratic standard bears

paid tribute to Senator Walsh and his colleague, Burton K. Wheeler, who is up for re-election, for their part in disclosing official wrongdoing. Both were on the platform in the Shrine Temple as he delivered his speech.

Smith also declared that Josephus Daniels as Secretary of the Navy in the Wilson cabinet, "stood four square" for the preservation of the oil resources of the nation, and made this inquiry based on the supposition that betrayal of public trust had taken place in the Wilson administration.

"Would not the Republican party make glorious campaign material of it," he asked, "insist that the American people believe it to be the record of the Democratic party claim it to be legitimate campaign matter, offer it as an abundant reason for the defeat of the Democratic party and the return to power of their own party?"

"Could anybody in his wildest imagination believe that the Republican managers would be prepared to say that if such guilt, clearly proven, had existed under the incontestable administration of President Wilson, it should be regarded as personal and in no way charged against the Democratic party?"

"Nobody believes that," he added. "Nobody thinks it."

**Awards Contract For New Home**

Harry Hurt has awarded the contract to L. V. Latson, contractor and builder for the erection of a handsome new residence in Fairview Heights on South Runnels St. Work on same was started this week and good progress is being made.

**Contract To Be Let Next Friday**

The contract for the remodeling and addition to the building which is to be used as the new postoffice building will be awarded at the office of the architects Peters Haynes and Strange in this city at two o'clock Friday afternoon September 28th.

**Directors Meet At Noon Friday**

The directors of the Chamber of Commerce will meet at noon hour Friday in the basement of the Christian Church. As important matters are to be considered a full attendance is expected.

If all the new wildcats rumored to be started in Howard county get underway this Fall things will be getting rather lively in our county. Tracing down these rumors is just about impossible so we will be compelled to wait for the development to get underway.

Courtesy of the Domestic Science Department, Perfection Stove Company.

**WELL, girls, you've helped me keep my cook,"** said Mrs. Foster to the assembled members of the Kitchen Club. "Martha told me the other day she was going to leave, and I asked her if she wouldn't stay through today, as you were going to come over and help me dress up my kitchen. I haven't heard a word since about her going. And she's been planning some of her own dishes for you all day. You must help me to make the kitchen pleasant, so I can keep her."

The Foster kitchen was, if the truth be told, gloomy enough to make any cook dissatisfied. And, at that, it would probably have been an average sort of kitchen, a few years ago, before women began to get their eyes open about the possibilities of kitchen decoration. Dingy walls, dingy floor, black stove, dull brown cupboards, two left-over chairs—all these in a room with the cold, harsh light of a north exposure!

Any psychologist could have told Mrs. Foster that the sunniest disposition must change to bad temper in such surroundings. For color has a real and definite effect on people. Its influence for good or bad is just beginning to be realized. And we may hope that as our kitchens grow more colorful, both our cooks and ourselves will come to enjoy more greatly our stay in them.

"Make your own sunshine by using yellow curtains."

**LEAVES FROM NANCY'S KITCHEN CLUB NOTEBOOK**

As Mrs. Foster's kitchen has a north exposure which she can't very well change, we suggested that she get sunshine into the room with color. This is the color scheme we worked out: Deep cream walls, yellow curtains, floor painted golden tan with bright-colored linoleum rug, white porcelain enamel oil stove, yellow

table with white porcelain enamel top, kitchen cabinet and cupboards in golden tan, refrigerator, white.

**Color for the Cook, Too!**

Mrs. Foster said she was going us one better; as she was going to beautify her cook, too, with chintz aprons in brilliant Bower designs. That's a good idea, to make yourself or your cook part of the color scheme! If the kitchen is in solid colors, flowered aprons may be used. If the kitchen decorations are in large flowers or figures, plain colors will be better for the aprons. "Set" the colors in salt water before washing the aprons, and they will keep their brilliance much longer.

"Now the pot can call the kettle green!"

**Colored Pots and Pans**

Mrs. Foster is planning to make the rounds of the hardware and furniture stores to find kitchen vessels that will harmonize with her new color scheme. I have seen them in the most gorgeous yellows and greens and reds and blues, as well as gray and white which will look well with any color.

**New Toaster**

I want a toaster like Mrs. Foster's. It's the only one I ever saw that will toast four slices of bread evenly over one burner of an oil or gas stove. It has a tray that catches all the crumbs.

**Butterscotch Tarts**

1 cup brown sugar  
1/2 cup of butter size of an egg  
Yolks of 2 eggs  
3/4 cup sweet cream  
2 tablespoons flour  
Teaspoon of vanilla

Cook all ingredients together until mixture thickens. Line muffin tins with pie crust. Bake crusts separately. Fill with butterscotch mixture, top with meringue made with whites of two eggs and three tablespoons of sugar. Brown meringue in slow oven.

**Iced and Frosted Coffee**

Martha served us the tarts with iced coffee which she made with a half-cup of coffee, a half-cup of milk and a half-cup of cream to each glass. Whipped cream on top. Frosted coffee is made in almost the same way, but has only half the amount of coffee and twice the milk with a tablespoon of light cream beaten up in it before serving.

R. L. Price was a business visitor in Dallas, over the week end.

**\$40,000 Hospital Contract Is Awarded**

Modern, Fireproof Hospital To Be Erected At Corner of Main and Ninth Street

**Work Started at Once**

Drs. Bivings and Barcus Award the Contract To Eastman and Taylor of San Angelo

Contract was awarded to the Eastman & Taylor Construction Company of San Angelo today for the erection of a \$40,000 hospital for Drs. Bivings and Barcus, Big Spring physicians.

Eastman and Taylor were the lowest bidders out of eight contractors.

Work is to start immediately and must be completed by January 1, according to the contract. The hospital will be at the corner of Main and Ninth streets.

Contractors who submitted bids were: James T. Taylor of Fort Worth; Suggs and Dunlap, Abilene; R. D. Bates, Big Spring; Sampson Construction Company, Lubbock; C. S. Otis, Abilene; H. H. Shell, Lubbock; J. M. Morgan, Big Spring; and Eastman and Taylor, San Angelo.

**Two Story Structure**

The hospital, constructed of brick and concrete, is to be a two-story building, 34x84 feet. The base will contain a heating plant, dining room and kitchen, and a detention room.

The first floor will be occupied by a waiting room, doctors offices, examination room, nurses quarters, X-ray room, laboratory and ambulance room.

**To Have Elevator**

Eight patients rooms and two wards will be on the second floor of the building. A linen closet, utility room, operating room and sterilizing room will also be on the second floor. The rooms will be

**Ward County Judge Ready To Open New Tourist Camp Here**

Judge E. J. Beckham, former justice of the peace in Ward county and prominent citizen of West Texas will soon be ready to open his new filling station and tourist camp four miles south of Big Spring on the San Angelo highway.

The judge is building a first class establishment with which he plans to serve tourists to and from the oil field and southern points. Everything will be up to date and furnished comfortably.

While in office at Poyote, Judge Beckham earned the respect of all who knew him. He sees much in the future of Big Spring and in establishing his new business is leaving public life behind.

**McMurtry-Moody Motor Co. Opens Here**

The McMurtry Moody Motor Co. has opened a new used car business in Big Spring on the lot just across the street from the Douglas Hotel on Runnels Street. McMurtry and Moody are auto dealers of Breckenridge Texas and will continue to operate their business in that city. Mr. E. H. Moody will be manager of the Big Spring business.

This company handles only the highest class of used cars such as Buicks and Chryslers.

They invite the public to come and see what they have to offer.

Texas ranks first among the state in number of ice manufacturing plants and number of persons engaged to the industry. The annual production is valued at \$25,000,000.

The building is to be equipped with an elevator and a silent electrical system.

Peters, Haynes and Strange, of Big Spring, are the architects.

**Contractor With 1,000 Horses To Locate In City**

Acc Carlton, One of Largest of Contractors Moves Headquarters From Wink

Acc Carlton one of the largest teaming and trucking contractors in the Texas oil fields, is moving to Big Spring from Wink, where he has been located since the start of Winkler county activity.

The increase in development in Howard county and Big Spring has prompted Mr. Carlton to become stationed here with headquarters in this city.

Mr. Carlton returned today from Wink with his family and plans to become a resident here.

Included in the stock and equipment of Carlton's teaming and trucking enterprise are 1,000 draft horses, one of the largest group of animals in the country.

Carlton's corral, headquarters and yards are located just North of the Planters Gin.

Since moving to Big Spring he has been awarded several attractive hauling contracts in the field.

**Western Union Increases Force**

Business with the Western Union Telegraph Company continues good and they are adding more employees to their present large force.

Two clerks have been added the past thirty days, and one or two additional operators are going to be needed immediately. At present the Western Union office numbers seventeen, including messengers.

A Simplex receiving machine is to be installed in the Western Union office here Saturday.

Herald want ads get results.

**World Oil Co. Will Resume Drilling Soon**

Drilling operations on the World Oil Company's wildcat test well on the L. S. McDowell ranch, 20 miles south of Big Spring are to be resumed soon. Work has been held up while some abstracts of title were being perfected in connection with some small tracts in the drilling block.

This test is now down to a depth of 2360 feet and is to be drilled to the contract depth of 3200 feet.

**Sousa's Band To Play In Abilene October 18**

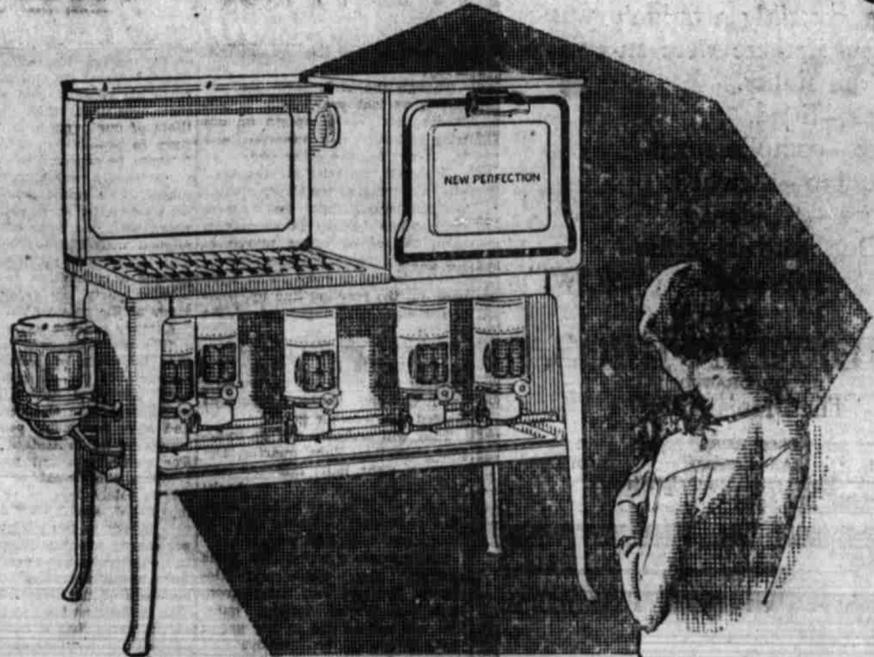

ABILENE, Sept. 24.—Sousa's band, making its first appearance in West Texas, will be heard here twice on October 18th at the Simmons University auditorium in concerts sponsored by the Cowboy Band of Simmons University. Sousa and his band have already started on the Golden Jubilee tour which is taking them across the continent.

An unusual feature of the engagement here is an afternoon matinee for children only. According to the plans of the local management this concert will be given at prices ranging around fifty cents for the benefit of children, and an audience of two thousand youngsters is expected to take advantage of this unusual offer.

This is Sousa's fiftieth year as a band leader and he is celebrating it with the Golden Jubilee tour. He will make only a few stops in Texas.

West Texas ranchmen are going to be kept busy this fall fighting to prevent heavy losses due to prairie fires. It will be necessary to prepare fire guards around every pasture to avert a disaster.

here's the first really beautiful oil range!

**new** Full porcelain enamel, snow-white. Compact design. Grouped burners. Built-in live heat oven. Accurate heat indicator. Swift, clean heat. One of 24 new models. priced \$17.50 to \$154.

HERE is a new stove that you are going to want, just as sure as you see it... A beautiful, swift-cooking oil range in snow-white porcelain enamel! The first stove to offer beauty and cooking speed with the safety and economy of oil.

Your dealer now has it on display. Even if you aren't ready to buy, come and see it. Come and watch it cook.

This beautiful Perfection is one of 24 splendid new mod. all light-colored, swift-cooking, convenient. All finished either in porcelain enamel or in Perfectolac, a new, durable lacquer never before used on stoves.

Come and see these new models. One of them—probably the range—is going to be exactly what you want in your kitchen.

EASY WAY TO BUY. Your dealer will demonstrate these new models for you, and if you wish it, he will no doubt be glad to tell you how you can take any one of them home and use it as you pay for it.

WALTER VASTINE, Manager

### Melvin Pittman Coach Doing Good At Anson

The Anson High School football team known as Anson Tigers held the powerful Abilene Eagles to a 7 to 0 score in a fast game yesterday. Melvin Pittman a Big Spring product is coach of the Tigers, and he seems to be making good. The Eagles, one of the fastest and best teams in the state, seemingly would have walloped a team from Anson, but Pittman is giving his boys the proper training and shows them how to stay in there and fight. Watch this team this season. They'll make a record and Pittman will be making a record for himself.

It is estimated that 3,000,000 persons outside of Texas are engaged in industries directly dependent on or connected with Texas cotton.

### TOO MUCH RAIN FOR THEM

We are about to lose one of our most prominent citizens, J. B. Harding is planning on hiking Westward. He says this country is just too rainy to suit him. He said he came here because they had too much rain back East.

Any little old factory we can secure will tend to insure future prosperity. While oil development may continue for years we know it cannot last forever, and factories are going to keep us moving when the oil development slackens.

Opportunities are here in unlimited number but they are not going to force themselves on anyone. We know many of our citizens have been making plenty of money right along since Big Spring began to grow—and then we know others who are not making a dime despite all the advance in values.

### College Game To Be Played Here Saturday

Simmons University and Sul Ross Football Teams Prepared To Meet On Local Gridiron

### Work And Power.

Local Fans Given Opportunity To Witness a Real College Football Game at Home

ABILENE, Sept. 25.—With only a few days left in which to prepare for the Sul Ross Teachers, whom they meet at Big Spring on September 29, the Simmons University Cowboys began this week to stress an offense with which to cope with the Alpine team. Expecting no easy time with the Teachers, the Cowboys realize they must have more team work and power Saturday than they used last week in noising out the Decatur Baptist College aggregation.

Training this week stressed offense more than at any time previous. The defensive work in last week's game was very acceptable, but the less said of the way the Cowboys advanced the ball against the junior college eleven, the better.

The Cowboys attempted to uncover very little, of course, and punted many times on first down, using only three offensive plays during the game. Still it will take more than an airtight defense and one pretty pass to beat the Sul Ross outfit, and training this week shows that Coach Bridges knows it.

Defensive stars showed up in last week's game in spite of its dullness. Among these were new men too, especially Tittle, guard, of Merkel and Gollightly of Marlin center. Tittle nosed out two letter men at the last minute to get the starting assignment and his playing Saturday justified Coach Bridges' selection. Built up a great deal like Melvin Pittman, erstwhile star from Big Spring, one of the greatest linemen that ever wore the Cowboy uniform. Tittle promises to some day exhibit playing ability somewhat akin to Pittman if he polishes up a bit.

Coach Bridges will be able to throw a heavy line against the Teachers that forebodes disaster to their attempts through the forward wall. Averaging nearly 190 from tackle to tackle, the Cowboy line has been schooled in the art of defense for the past two weeks and looked almost impregnable Saturday.

Though the ends are not as strong as last year, there is still Moore this year's captain on one wing and some new material fighting it out for the other end.

Backfield material is the most plentiful thing in the Cowboy camp. Besides having four letter men, Bridges has a dozen promising new men, several of whom played in the game against Decatur. Sims of California and Harvey of De Leon were on the starting line up. Sims called signals during most of the contest.

Bridges will probably take 25 men on the trip to Big Spring. The starting line up is an uncertainty, but it will probably be the same as started the Decatur game.

They will probably line up something like this: Sims, quarter; Davenport, right half; Sanders left half; Harvey full or lineback; Moore and Griggs, ends, Smith and Pearce, tackles; C. Daniel and Tittle guards, Gollightly, center.

This includes five new men, Sims Harvey, Griggs, Tittle and Gollightly. The rest are letter men—Hyde and Walter, veteran quarters will see service in the game. Hyde is one of the Cowboys best runners. Jennings and Ribbie veteran linemen will no doubt be put in during the contest. Others who may see service are: Sims, center; Bennet and Culpepper, tackles; Halle Daniel, letter man, Andrus and Gregg, letter man, ends; Sellers, Britton, Kuhn and Clark backs.

We have many folks now looking us over and almost without exception they find Big Spring a much better place than they were expecting to find. They say it is building more substantially than any other oil town in the entire country.

The football fans are in their glory this week with an opportunity afforded to attend two big games in this city. Clyde tackles the Steers Friday and Simmons and Sul Ross play a game Saturday afternoon.

Mrs. M. E. Barrett who has been spending the summer in California with relatives has returned home. Her son Walter Harrett accompanied her to this city for a visit.

Many fruits other than apples can be made into good vinegar. The United States Department of Agriculture has a bulletin on the subject.

Be sure to save some products of arm and garden for that Howard County fair which is to be held in Big Spring October 8 and 9.

### Governor Moody Pollard, Marrs Refuse To Sign

A Pledge That They Will Support the Nominee of the Democratic Party

### Favor Modification

Moody Suggests a Committee To Draw Up Substitute Statement To Be Signed By Democratic Nominees

AUSTIN, Sept. 24 (AP)—Governor Dan Moody, Attorney General Pollard, and other State officials have refused to sign the statement prepared by the State Democratic Campaign Committee and sent out from Dallas pledging to support all the nominees of the Democratic party. They expect to issue an appeal somewhat more subdued than the one prepared by the regular Democrats urging all Democrats to vote the ticket straight in November.

At the meeting yesterday State officials who are nominees for reelection failed to agree to sign campaign committee statement sent from the Dallas headquarters to be signed. Instead Governor Moody is suggesting that Attorney General Pollard, State School Superintendent S. M. N. Marrs be named as a committee to draw up substitute statement. Eliminating some of the wording criticized in the statement. Just what part of the statement is objectionable can not be learned definitely. Governor Moody and Attorney General Pollard are not in favor of the campaign committee statement as it stands.

State Treasurer W. W. Hatcher, and Commissioner of Agriculture George Terrell are in favor of signing anything calling for the solid support of the straight Democratic ticket.

Newspaper men were not admitted to the session and the conferees were reticent about exactly what took place. Each of them has received from W. A. Thomas, state Democratic campaign manager at Dallas, a copy of the statement proposed to be issued to the Democratic voters with the signature of all state Democratic nominees.

One portion of the statement provoking differences of opinion here reads:

"Some members of our party seem willing to desert it on the eve of the conflict for the control of our government because Governor Smith's personal views upon the policy of prohibition do not coincide with their own. If members of the party who believe in prohibition desert its standard bearer when his views do not agree with their own upon this issue, then those of our party who do not believe in prohibition cannot, in all fairness, be expected to support the party when a prohibitionist is nominated. The result would be that we would enter every political campaign with one wing of our party aligned with the opposing party. The Democratic party would thus become a prohibition or anti-prohibition party, according to the views of the presidential nominee."

Another passage says:

"We call attention to the fact that hundreds of thousands of members of the Catholic church have been and now are faithful members of the Democratic party and have for many years loyally supported its Protestant nominees. For members of our party to encompass the defeat of Governor Smith, solely because of his religious belief, would work an irreparable injury to the party as it will necessarily alienate every Catholic. It would make them feel that they were undesirable and unwelcome members of the Democratic party. This is the first time in the history of our party that it has been urged that our nominees should be defeated because of his religious convictions. If Protestant Democrats refuse to vote for the nominee because he is a member of the Catholic church, then members of that church can just as consistently oppose all Protestant nominees upon religious grounds."

W. A. Thomas, manager of the State Campaign Committee stated that nominees of the Democratic party may word their appeals for votes for the entire ticket in any fashion they see fit and these will be issued to voters along with those of the State Campaign Committee proposed. This statement was made after reports of dissatisfaction of Governor Moody, Attorney General Pollard and State Superintendent of Schools, S. M. N. Marrs found with the text of the appeal the committee has asked all Democratic nominees for state office to sign.

Who would dare say that he wished he might live again in the "old days"? Why, we remember when even the lowly banana was a novelty to the youngster who lived "way out in the country, not having the opportunity of going to town more than about two or three times a year. Who would become excited over a banana nowadays?

Mrs. J. T. Bell and children, Jean and Helen and Mrs. Wm. DeBlinger and daughter, La Fern spent the week end in San Angelo.

### West Texas Is Promised Land

Possibilities Anaxos Oil Men From California and Montana

Afforded a new slant on the petroleum industry, they said, owing to the wonderful possibilities they see in West Texas, two Californians and a Montanan—all leading figures in the oil business in their respective sections—left San Angelo Saturday night for their homes.

They were: John O'Neil and Harry Morse of Los Angeles, attorneys as well as operators, and Bland Catlett of Great Falls, Montana, a ranchman who also deals in oil. They made an extensive tour of the West Texas fields, part of the time in company with Floyd C. Dodson of Ricker and Dodson of this city, and were as favorably impressed with the future of San Angelo as with the possibilities in the vast area tributary to it. All likely will return later and may invest in this territory.—San Angelo Standard.

### A REAL FOOTBALL GAME

Make your plans now to attend that big college football game in Big Spring next Saturday afternoon.

The Simmons University team from Abilene and the Sul Ross team of Alpine will be the contenders. Bring your friends.

H. L. Rix is having the former B. C. Rix home on Main Street remodeled and rearranged and is converting same into a spacious apartment building.

### THEY GROW ONE VARIETY OF COTTON

One variety of cotton is enough for one community to grow, is the consensus of opinion of 530 Collins county farmers assembled at McKinney recently to discuss cotton standardization plans and to organize growers from 14 communities to market their one variety cotton. That these men have been profiting by concentrating on the production of a single variety is revealed in reports to County Agent Roy Saunders last year showing that growers of standardized cotton averaged 1-4 bale per acre while the county average was 1-7 bale per acre. The reports also show that standardized cotton brought a premium over other cotton, which according to local cotton men, amounted to \$7 to \$10 per bale at McKinney.

Speaking for the cotton spinning industry James McDowell, a spinner of Bedford, Massachusetts, praised the community cotton standardization work of the Extension Service and declared that it must be followed by an inexpensive marketing plan whereby farmers will be paid according to the quality of their cotton in some such way as it is handled by the present cotton cooperatives. "Spinners," he declared, "must cooperate by paying more attention to the grades of cotton they buy, for the raw cotton represents one half the cost of the finished fabric." The speaker asserted that America's place in the cotton growing depends on Texas where it is possible to grow the best cotton in the world.

### BEATING THE ONE CROP PLAN

There will be more inducement for cotton farmers to turn to poultry raising and dairying when the new order goes into effect. In the past it was necessary for the farmer to find a market for eggs, poultry quite discouraging to trudge all over town trying to dispose of a few dozen eggs or a few pounds of butter.

When the new cold storage plant begins the practice of sending wagons through the territory to collect cream, milk eggs etc. it means the market is going to be brought right to the farmer's door. This is going to be an encouragement for many more to produce the products for which there is ready market and for which the cash is paid right at your door.

Howard county folks can then get on a cash basis. A few good milk cows and several hundred pure bred hens ought to bring in enough cash to provide an ordinary family with a nice monthly income.

As long as oil development continues Howard County lands will be blanketed with oil leases and this lease money is certainly mighty easy to accept. This is the case of the land producing a revenue without any effort on our part.

W. D. James of Dallas, district superintendent for the Western Union Telegraph Company, is in the city for a few days. He is here to superintend the per-route system plan for messenger service.
