T. WADE POTTER ASKS RE-ELECTION COUNTY ATTORNEY

T. Wade Potter makes announcement this week of his candidacy for re-election to the office of County Attorney of Lamb county, subject to the action of the citizens as expressed in the coming July Democratic primary.

Mr. Potter states that during his past incumbency of the office his one effort has been to faithfully perform his duties in a straight forward business-like manner, giving his very best in an endeavor to be a satisfactory public servant. Of his success in this direction he claims considerable assurance from the favorable comment which has come to him during the past from citizens all over the county, and also, from the many who have urged him to seek the office for another term.

Mr. Potter is a graduate of the Cumberland University, law department, Lebanon, Tennessee, and prior to moving to Lamb county was connected with the law firm of "Smith, Dedman, Potter & Smith, of Fort Worth.

As an attorney, Mr. Potter has proven himself to be a man of analytical mind, keen intellectually, of mature judgement, and capable of the most minute discrimination in legal technicalities. He is aggressive and industrious in his profession, enjoys a lucrative and growing private law practice, and eminently worthy of public trust in the office to which he seeks re-election.

ELLIS TO LEVELLAND

J. Spencer Ellis, who has been with the Stokes-Alexander drug store, this city for the past 14 months, was this week transferred to Levelland where he will have charge of the Alexander Drug Co., store.

Allen Berry, formerly with the Levelland store has been transferred to the store in Littlefield.

The strongest test of will power is to refrain from putting on imaginary brakes when someone else is driving.

NOTICE

The Lamb County Leader has discontinued combination rates with all other newspapers and periodicals.

Development of Alaska Hastened by New Highway

Col. Samuel Hill of Seattle, famous international capitalist and promoter of good roads, is behind the project to build the connecting link between British Columbia and Alaska which will make a continuous motor road from Mexico to the Far North. The road will pass through the Peace Portal which stands on the international boundary line. The Reindeer meat industry in Alaska is being fostered by the Government which owns great herds which serve as food for the Eskimos.

"JIMMY'S WIVES" ALL SET FOR THURSDAY AND FRIDAY

The final rehearsals have been held for the Lions club play, "Jimmy's Wives," according to Miss Kate Ranson, director, who states that everything is in readiness for a big time. Everyone is urged to attend. It is stated that C. J. Duggan's Follies will be well worth the price of the entire show.

G. H. BOSTICK IS OUT FOR SHERIFF AND TAX COLLECTOR

In this issue of the Leader G. H. Bostick makes announcement of his candidacy for the office of Sheriff and Tax Collector of Lamb County, subject to the favorable action of the voters at the coming Democratic primary.

Mr. Bostick is a native Texan, now 38 years of age. He was born in Hamilton county, this state later moving to Oklahoma, living in the vicinity of Eldorado, Oklahoma for 23 years. He has been a citizen of the South Plains for the past seven years, and of Lamb county for the past two years, owning a farm in the county where he now resides, and located on the Spade lands about seven miles northeast of Littlefield.

Mr. Bostick states he has had considerable experience as a peace officer; that for 14 months he was city marshal at Eldorado, Oklahoma, after which he served as deputy sheriff in Harmon and Jackson counties, that state for a period of seven years. Since coming to Lamb county he has served as City Marshal in Littlefield.

He states that his past life is an open book for the public to read, and anyone who desires is welcome to investigate his past record. Several citizens now living in the county, he states have known him during the past 15 to 25 years.

Mr. Bostick says he is an ardent believer in "one law for everybody," and in law enforcement. He hopes to personally see every voter within the county and urges their favorable consideration of his candidacy.

CLAY PUMPREY LOSES AUTO AND GARAGE IN FIRE SATURDAY

Clay Pumprey, local agent for the Santa Fe, suffered a heavy loss Saturday about noon when his garage, at his place in the High School addition, were his Buick coach was stored, was consumed by fire.

The loss on the car was estimated at \$500.00, on which he carried no insurance, and only \$75.00 insurance was carried on the garage.

The fire truck was rushed to the scene, but due to the flames being so far under way firemen were unable to render much aid in saving the burning structure; however, adjoining residences were probably saved the hazard by their efficient work.

Numerous Stunts Employed by Autoists In Cleaning Windshields During Cold Weather

The cold weather of the past week has brought out numerous devices among motorists who venture out with their cars or among business men who were forced to use their gas buggies in business transactions.

One motorist was noticed burning a candle on the inside of his windshield and the glass was kept nice and clear. A mixture of alcohol and glycerine rubbed on the windshield glass had the commonest usage, some wiped the glass with kerosene and found it lasted from 10 to 20 miles.

A few visited the garages and purchased some of the regularly manufactured concoctions for clear vision under foggy circumstances. One ingenious autoist rigged up a pipe which ran from under the cowl of his car into the cab, transferring the heat to his windshield. Another found that by cutting an onion across the grain and dipping it into salt then rubbing it on the glass, he got clear vision for 15 or 20 minutes. But perhaps the smartest idea advanced was by the fellow who left his car in the garage and walked.

CITY COMMISSION ORDERS MORE PARALLEL PARKING

At a meeting of the City Commission held Tuesday night an ordinance was passed prohibiting the parking of vehicles on the north side of Third and Fourth avenues, which is on the north side of such streets occupied by the Post Office, First National Bank and Rumback bakery, on Fourth street, and the Arnett Motor Co., and Higginbotham-Bartlett lumber yard on Third street.

In the future parking on XIT and LFD Drives, which are the streets immediately on each side of Main street, must be of the parallel type.

Vehicles handling U. S. mail are permitted to park in front of the Post Office while loading and unloading mail.

Full details of this ordinance are published in this issue.

CITY PROPERTY DAMAGED BECAUSE OF COLD SPELL

H. J. Gibbs, superintendent of the city waterworks, is encountering much trouble during the cold weather, due to frozen water pipes over the city, which have inconvenienced about 100 homes.

Many telephone calls have been coming into the city office for the past 10 days reporting trouble with frozen pipes, as the result of the cold weather.

City officials announce that in most cases the service lines, and not mains, were frozen. Several meters were broken, due to the frozen water.

Several residents, in efforts to thaw out service lines, are building fire around the meter boxes, thereby damaging, and, in some instances destroying the meter. In such cases the resident will be held responsible for the city property and those going into the meter boxes by breaking the lids are subject to fine and damages for same, will be charged on their water bill, states Mr. Gibbs.

Those who are having trouble are asked to call the city office and a man will be sent to determine the cause.

In several instances the ground has been found to be frozen to a depth of 20 inches, and until the weather is more favorable than it

COMMERCIAL BODY DISCUSS MANY IMPORTANT ITEMS

By Secretary J. W. HALE

Tuesday's Chamber of Commerce Luncheon was attended by 24 members. After an excellent meal, the reading of the minutes of the last meeting and the report of the Secretary, the President called for a discussion of the membership drive.

The drive was to have taken place Tuesday morning, but owing to the weather it was postponed until Friday morning. So Friday morning at nine-thirty o'clock the Littlefield band will give a concert on the streets, and when it shall have finished the fire whistle will be turned loose and immediately afterwards the members of the Lions Club and the Rotary Club will meet in the Chamber of Commerce office, get their list of names and start for a thirty minute drive.

It was unanimously agreed that the most pressing need of the hour is a new modern hotel for Littlefield, and that some means of securing that hotel must be found.

The Road to the Hale County line is assured, so reported the Good Roads Committee.

All the organizations of the City are planning for a general cleanup for Littlefield soon.

The Littlefield College has sufficient money raised already to build the first unit of the Administration building. So we can expect the school to go over big now and by the beginning of the next term be all we had hoped for.

The Chamber of Commerce is the only organization that has for its only purpose the building of Littlefield and making it a better place in which to live. So every man who wishes to have a part in that great work should be a member.

Those who are without wahter will be obliged to depend upon some other source until the ground thaws enough for it to be possible for adjustments to be made.

Help keep Littlefield clean!

AMERICAN LEGION ORGANIZATION IS PLANNED JAN. 30

Following a preliminary meeting held last week, another meeting has been called, to be held at the Ritz theatre, Thursday, 7:30 p. m., January 30, for the purpose of re-organizing the "Richard New" post of American Legion.

The post was first organized here in 1921, but after a couple of years died out. Ex-service men are now anxious to revive it, and all who have seen service in the World War are urged to attend the coming meeting.

Richard New, for whom the Littlefield post was named, was at one time employed in the Street & Street general mercantile store, later becoming foreman for the Yellow House ranch, located southwest of Littlefield. He left Littlefield May 20, 1918 for Camp Bowie, sailing for France the following July, as a member of the 146 regiment, 36th division. He was killed on the Champaign front in the Muse-Argonne offensive, October, 1918.

Members of the first Legion organization here were as follows:

Frank Tipton, Joe Savage, Arthur Mueller, J. T. Street, J. M. Pope, Arthur P. Duggan, Roy Campbell, W. D. T. Story, A. Litch, Bill Pemberton, P. W. Walker, T. L. Mathews, Rue Roberts, Collie Bryany, Paul Partsch, W. V. Tolbert, Roy Smith and Kay Arnett (deceased), Jack Johnson, Bill Pollard, Dick Beisel, Ben Smith and Arbie Joplin.

It is stated there are now about 300 ex-service men in Lamb county, 150 of that number being located in Littlefield vicinity. Every ex-soldier of the World War is urged to attend this meeting.

NEW SWITCHBOARD INSTALLED HERE BY ST. TELEPHONE CO.

Telephone business, as well as all other lines of business in Littlefield, is making rapid strides, according to reports from the local office of the State Telephone Company.

An estimate of 75 telephones have been added to the city during the past year and many new lines have been added to the city as well as a number of new lines to points west. Lines to Muleshoe and Clovis have been built the past year.

A new switchboard, with 300 plugs, has recently been installed in order to give more satisfactory service to the patrons.

Walter Kinney, special switchboard man for the company, with headquarters at Lubbock, was here last week assisting with the work of the local office.

The company contemplates building more toll lines in the near future.

GET CAR AND BOOZE IN SUNDAY P. M. RAID

Officer L. A. Ratliff is holding a 1928 model Chevrolet coach, also three one-half gallon jars and one pint of whiskey which he captured last Sunday afternoon in the negro section of town.

Two negroes were in the car as the officer approached, but made good their escape.

Don't let the mail order houses deceive you.

**...ced in Voluntary Manner Is
...e Beneficial Than When Under Coercion**

S. W. STRAUS,
American Society for Thrift

practices of thrift should be taken voluntarily. Seldom if is good accomplished when efforts are made to compel others to be thrifty. The only approach to thrift is educational. Those who are to profit by adherence to this simple virtue must first be convinced in their own minds that it is essential to their welfare and progress.

come of efforts to force habits of thrift, upon others.

The executive heads of a large business organization, believing they were doing their employees a favor made an arbitrary arrangement by which a certain percentage of each person's salary was to be withheld for saving purposes.

Although the plan was originated with the best of motives, it proved unsuccessful. The apparent paternalistic attitude was resented by the rank and file of the organization. Later, the plan was discarded and a voluntary arrangement was substitut-

ed. Each person on the payroll of the concern was then permitted to order a certain percentage of his salary withheld. These savings were administered by the company's officials and the plan developed into success.

Even in school savings bank work, loud protests frequently are provoked when efforts are made to COMPEL the children to deposit certain fixed amounts.

The practices of thrift include a considerable amount of discipline and sacrifice. Most of us are willing to undergo these severities when self-imposed but we rebel when efforts are made by others to compel us to submit to them.

These are timely suggestions because around the beginning of the year much thought given to the development of thrift societies and organized savings work. It should be borne in mind that all such activities will succeed only when their impulses are inspirational.

FIRST BAPTIST CHURCH

The new officers and teachers of the First Baptist church Sunday school will be in charge Sunday morning at 9:45, and Rev. Joe L. Grizzle, pastor of the church requests that every pupil be present to meet the new officers and teachers and welcome them into their duties.

The regular morning preaching service will begin at 11 o'clock and the evening service will begin at 7:30 o'clock.

The B. Y. P. U. will begin at 6:30 o'clock, preceding the church service. Dr. J. D. Rowan, evangelist, will be here February 8th, to begin a revival meeting.

Dr. George Burnett, of Nashville, Tennessee, will be here February 13-14 and 15 to conduct a school of Missions.

An Unpleasant Subject

All of the functions of life are not pleasant to consider. Perhaps this is why some mothers refuse to think that such symptoms as restless sleep, loss of flesh, lack of appetite or itching nose and fingers in their children, can be caused by round or pin worms. Many mothers have proven, however, that a few doses of White's Cream Vermifuge, that cure and harmless worm expellant, will make these symptoms disappear. You can get White's Cream Vermifuge for 35 cents per bottle from Stokes-Alexander Drug Company

**Lfd Athletics Stage
A Rally to Beat Out
The Five at Anton**

The Littlefield, Athletics led by the brilliant Lacy staged a flashy rally in the closing moments of the game in the Anton Gym Tuesday night to beat out the fast five from that city by the close score of 23-20. The little fellow by the name of Crouch proved to be a thorn in the side of the big and powerful Athletics, and it was his goal shooting that kept his team in the lead throughout the major part of the contest.

Due to the severe cold weather the crowd was kept away but the Gmy was well filled with both Littlefield and Anton boosters that were well repaid for their effort spent to come out to the game, and future games with Anton promise some sport for all those concerned.

The Athletics have been going through a slump but snapped out of it and showed some beautiful team work and fast floor play. Stone and McInturf for the Littlefield five were effective in getting the ball close to the basket, and in placing Lacy in a good position to score which he did with accurateness. Davenport was playing his usual game at the pivot and guard position, ably assisted by the versatile Kuykendall.

Couch of the Antonites was easily the star of the game, and is considered one of the best the locals have been pitted against this year. Lacy of the Athletics was close in behind him with individual scoring, making 11 of the Athletics markers.

The Athletics meet the big Clovis Iron Men here on the local court the first part of next week, and Clovis and Anton the latter part of the week

Snake Meat as Human Food
Snake flesh is regularly eaten by many savage tribes. The flesh of most snakes is white, chicken-like and wholesome, it is said. It is occasionally eaten and enjoyed by civilized people who are free from the traditional prejudices associated with snakes.

AN ORDINANCE No. 42

AN ORDINANCE making it unlawful to park any automobile or other vehicle on the North sides of Third and Fourth Streets in the City of Littlefield; requiring that all parking on XIT Drive and LFD Drive must parallel with the curb; and fixing a penalty for violation thereof.

BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF LITTLEFIELD, TEXAS:

SECTION 1. That it shall hereafter be unlawful for any person to park any automobile or other vehicle at the curb on the North side of Third Street between XIT Drive and LFD Drive in the City of Littlefield, Texas. The curb referred to in this section is the curb on the South sides of Lot No. 16 in Block No. 16 and Lot No. 16 in Block No. 17 in said City.

SECTION 2. That it shall hereafter be unlawful for any person to park any automobile or other vehicle at the curb on the North side of Fourth Street between XIT Drive and LFD Drive in the City of Littlefield, Texas. The curb referred to in this section is the curb on the South sides of Lot No. 16 in Block No. 24 and Lot No. 16 in Block No. 23 in said City. Provided however that carriers of United States mail shall have the right to park their vehicles carrying such mail at the curb in front of the post office while unloading and loading such mail.

SECTION 3. That it shall hereafter be unlawful for any person to park any automobile or other vehicle

in the City of Littlefield, Texas, angle with the curb on either side of XIT Drive, or at an angle with the curb in either side of LFD Drive and all parking of automobiles and other vehicles on said XIT Drive and LFD Drive in said City shall parallel with the curb on the thoroughfares.

SECTION 4. Any person violating any provision of this ordinance shall be deemed to be guilty of a misdemeanor and upon conviction shall be fined in any sum not less than one Dollar nor more than five Dollars.

SECTION 5. Any ordinance heretofore passed by said city in violation of the provisions hereof is hereby repealed.

SECTION 6. This ordinance shall be in full force and effect immediately after passage and publication according to law.

PASSED AND ADOPTED by the unanimous vote of the City Commission of the City of Littlefield, Texas this the 14 day of January 1930.

OTTO JONES,
Mayor, City of Littlefield, Texas

ATTEST:
W. G. STREET,
City Clerk.

THE STATE OF TEXAS
COUNTY OF LAMB
CITY OF LITTLEFIELD

I, W. G. Street, City Clerk of the City of Littlefield, Texas, hereby certify that the above and foregoing is a true and correct copy of the Ordinance No. 42 passed and adopted by the City Commission of the City of Littlefield on January 14, 1930.

Witness my hand and seal this the 21st day of January 1930.

BIG CORPORATION BELIEVE IN NEWSPAPER ADVERTISING

Nearly all of the large corporations in America are strong believers in newspaper advertising and each year appropriate a large percentage of their revenues to that purpose. In proportion to their volume of business, many of them spend several times as much as the largest advertiser in Littlefield.

Advertising keeps a firm's name before the public. It is a means of education, and means increased business. It is largely through advertising that big companies become BIG.

During the year 1929 sixty-nine percent of the total advertising carried in the columns of the Lamb County Leader was classed as foreign advertising. Most of these advertisers have already renewed contracts for space with this paper for the year 1930. They believed in advertising and that they got satisfactory results in this paper is evidenced by the fact of their desire to continue it. It certainly pays to advertise!

AGED MATRON EXPIRES

Mrs. Roxie Ann Trussell, age 73 years, died at the home of her daughter, Mrs. J. A. Johnson, at Enochs, Wednesday of last week.

Funeral services were held Thursday afternoon and interment was made in the Amherst cemetery. Hammons Brothers, undertakers, were in charge of the arrangements.

PRESBYTERIAN AUXILIARY

The Presbyterian auxiliary met at the home of Mrs. Ray Jones, January 21st. Ten members answered the roll call.

A committee to interview the church societies as to federated meeting every fifth Monday or Tuesday, reported the idea was received and plans are being made for first meeting in March or April.

Mrs. Miller gave a very interesting lesson "Why National Missions."

Refreshments were served to the following members: Mrs. E. A. Bills, Mrs. Mike Brewer, Mrs. J. S. Hilliard, Miss Lula Hubbard, Mrs. Ray Jones, Mrs. Irwin Miller, Mrs. L. M. Touchon, Mrs. Harry Wiseman and Mrs. Wm. J. Fulton by hostess and sister, Miss Lula Graham.

Mrs. M. V. Cobb will be hostess to the auxiliary next Tuesday, January 28, and Mrs. Hilliard will have charge of the Bible study.

Uncle Eben

"I has been told," said Uncle Eben "dat fine feathers don't make fine birds. I knows by 'perience dat a chicken is no use for a Sunday dinner till it has been picked."—Washington Star.

Busy Young Man

The busiest young man in Concordia has three girls on the string, repairs his own motor cars, belongs to a new lodge, is one of the champion pool players, and has 23 creditors to dodge.—Concordia (Kan.) Blade.

ELEMENTS OF PROGRESS

When cities and towns go ahead, their advance is commonly due not so much to favorable locations and fortunate circumstances, as to the manifestation of certain characteristics by their people, such as the following: The leadership of a group of men and women who are willing to give some share of their time to work for business advance and community improvement.

A spirit of enterprise on the part of the business men, a willingness to attempt new undertakings and make constant improvements in their service.

An absence of the carping and knocking spirit that chills public spirited effort in many communities. Two of these characteristics call for good leadership, and two call for co-operation from the whole population. When the people are generally willing to co-operate with community movements, the strong and wise leadership is apt to appear.

If all our subscribers would pay in advance this month we would believe in Santa Claus ourselves.

SOD HOUSE CLUB

The Sod House Club met Tuesday-afternoon of last week at 2:30 with Mrs. Jim Aldridge. A very interesting outline of the years work was given by Miss Mashburn. Several new members were added to our roll extending the roll call to 21. After a brief discussion of the year-book refreshments were served.

The next meeting is to be in the home of Mrs. E. L. Nutall, January 28th, at 2:30. The subject for this meeting is literature. The roll call is to be answered with the name of your favorite magazine and reasons must be given for your choice. Each member is to bring 25 cents to pay for the year-books which will be given out at this meeting.—Reporter

STORK SPECIAL

Mr. and Mrs. Lloyd Robinson are in receipt of announcement that "Clifford Franklin," infant son of Mr. and Mrs. W. S. Kerr, Hereford, has arrived to make his home with his parents at that city.

Mrs. Kerr will be remembered as Miss Ruth Craddock, former teacher in the Littlefield schools.

All politicians will tell you that the way to please the public is to say nothing, but say it wisely.

There are still some people in the United States who think that the farmer lives off the fat of the land.

Advertising that does not show in its text or typography that it is paid for must be marked as an advertisement. All local advertisements remain in this paper for the time specified or until ordered out. All notices, matters not by whom nor for what purpose, if the object is to raise money by admission fee or otherwise, is an advertisement and when sent in for publication must be paid for at the regular advertising rate per line for each issue printed.

Obituaries, cards of thanks, and resolutions of respect will also be charged for at the same rate.

Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of the Littlefield Leader will be gladly corrected upon its being brought to the attention of the publisher.

In case of errors or omissions in local or other advertisements, the publisher does not hold himself liable for damage further than the amount received by him for such advertisement.

Political Announcements

The Lamb County Leader is authorized to make the following announcements for office, subject to the Democratic Primary, July 26, 1930.

For County Clerk:
A. H. McGAVOCK

For County Treasurer:
M. M. (Jimmie) BRITAIN
MISS BESSIE BELLOMY

For County Tax Assessor:
ROY GILBERT
A. A. WHYTE
EDWARD N. RAY

For Sheriff and Tax Collector
J. L. (Len) IRVIN
J. H. BOSTICK

For County Attorney
T. WADE POTTER

For Commissioner, Precinct 4:
LLIS J. FOUST

For Commissioner Precinct 3:
C. E. STRAWN

For Public Weigher, Precinct 4
A. L. PORTER

COAL—\$1 A TON

New York papers are making much over a secret locked in the brain of an Austrian chemist whose name was recently paid to this country by an American citizen with the understanding that he was to reveal to the American a secret formula whereby a fuel equal to coal can be made out of water and coal dust and sold profitably at \$1 a ton.

The Austrian changed his mind and refused to write out the formula after reaching the U. S., and now the American has secured an injunction to prevent him from disposing of it to anyone else.

But the balance of us are about as unlucky as the American who paid the man's fare, since the secret of cheap fuel can't do us any good so long as it's a secret.

There isn't any law to force it out of the man's brain, of course. But maybe if some way could be found to get the Austrian to Littlefield for a little while we could devise some method of worming it out of him. We'd be tempted to do a lot of things in this community for a dollar-a-ton coal.

You can't make eggnog from the stuff they sell nowadays. Most of it would hard-boil the eggs.

TAX DODGING

If any set of people get big money in any easy and pleasant way the moving picture stars are those people. The rest of us flock to see them, admire and applaud them—and shower our dimes, quarters and half-dollars into their big fat purses.

If anybody should feel grateful it is these movie favorites who started out with nothing and now, after a little delightful play, have their mansions and their millions. The public has given them fame and fortune and yet it seems some of them are unwilling to bear their share of the public expense.

Uncle Sam accuses them of cheating on their tax returns and is suing several of them for thousands of dollars. It is a pitiful exhibit of some of the lower qualities of human nature. And, to make it all the worse it is noticeable that a rather large proportion of the accused are foreign-

ers who came here with nothing and now have everything.

It is time for them to feel the strong arm of the law.

LIVE AND DEAD TOWNS

Here are two questions often asked by residents of towns like Littlefield: "What is the difference between a live town and a dead town?" and "How does one community earn the reputation of being enterprising while another's called stagnant?"

Both towns may look the same, and both have the same natural advantages—yet one has the reputation of being dead and the other alive. As we see it the difference lies in the attitude of the citizens themselves.

A live town is one in which there are plenty of men and women ready to take hold and put over any worthy community enterprise, and a dead town is one in which every man is selfishly engrossed in his own affairs to spend any time on community matters.

That answers both questions—now you fit the answers to your individual efforts and see if you don't notice an improvement in your own community before 1930 has run its course. The way to keep Littlefield a live town is for every one to get on the job and stay there.

Verment man who dug up a skunk from its winter hiding place has been fined \$10 and a few cents.

THE AMERICAN HOG

Now that 1929 has passed into history and we are being flooded with reviews of every description, it will be of interest to Littlefield people to learn that the great American hog is the only thing that kept our farmer friends out of the poorhouse last year.

Chicago stockyards officials have recently sent out some interesting figures, and these show that the hog offset losses on sheep and cattle during the past 12 months. There was a decrease of \$7,000,000 in cattle revenues from 1928, while sheep showed a total decrease of \$500,000 on the year. But along came the hog and increased revenues \$18,000,000 above those of 1928, or more than double the drop shown by both cattle and sheep.

We should go on and give a lot more figures showing how farm products in this country ran into the millions of dollars during 1929, and how prices in a lot of instances could have been far more satisfactory. But we just want to pay this tribute to the great American hog and stop there. We just want to show that when it comes to keeping the wolf from the door, and keeping the door of the poorhouse closed, the hog is in a class by himself, no matter how many uncomplimentary things may be said about the way he conducts himself around the trough along a-bout meal time. May his tribe never decrease.

The recent snows in Littlefield section are gratefully received. The season in the ground is now all that could be asked for and forecasts another bumper crop this year.

The City Commission is to be commended in the passage of an ordinance requiring parallel parking on some of the streets and no parking at all on one side of some others. Now let every autoist assist in keeping the ordinance.

The man who will live in a progressive town and not contribute some of his time and money to its leading organizations working for the town's advancement is not the most desirable citizen, to say the least.

Talking about when the Gas company will be ready to give service here seems to be the favorite past-time now. The recent cold weather has delayed it about two weeks, but if it turns off pleasant now, service may begin the middle of February. Oh boy!

Without discussing the merits or demerits of "chain business," it is clearly evident only a short time until chain farms will be common occurrences. It means for greater efficiency in production and considerable reduction of overhead costs, resulting in a larger margin of profit. The Littlefield section would be an ideal one for such an enterprise.

Lamb county located in a section where the cotton and wheat belts lap, is in a strategic position for faster increase of wealth than other counties not so favorably situated. These are two leading cash crops in the United States. Wheat furnishes an early cash return and should be planted in much larger acreage than it has been. There is much land in this section well adapted to its growing.

PAVEMENT PICKUPS

Reading that the average Littlefield man speaks about 12,000 words a day, J. H. Ware says he knows now why some men speak of their wives as above the average.

"If they keep on making laws at the present rate," says Herbert Martin "it will soon be simpler to tell people what they can do instead of what they can't do."

"Any man who had a balance left after the Christmas holidays," says Clay Pumphrey is either a miser or a mighty fine financier.

According to Everett Whicker garages are all right but they'll never be as popular as the livery stables when it comes to congregating and settling the big questions of the day.

LITTLE LEADERS

If it wasn't for dancing a lot of boys and girls around Littlefield wouldn't know what perspiration is.

It isn't instinct that makes a Littlefield mother kiss the back of a baby's neck. It's appreciation of a clean spot.

The only thing that irritates a Littlefield man more than the dullness of his razor is the sharpness of his wife's tongue.

Believe it or not, but the Littlefield man who seems a five ton truck down town isn't much more than a trailer at home.

Gold leaf is beaten so thin in Germany it takes 250,000 sheets to make an inch. Almost as thin as they cut ham in restaurants in Littlefield.

Some young folks around Littlefield mother kiss the back of a baby's wedding while others invite anybody who is apt to bring along a present.

The Littlefield charties says it will not help poor people who have autos. Good gosh! They're the ones who need it most.

Nowadays young people around Littlefield don't think anything of kissing and the older folks don't think much of the kind of kissing they do, either.

SOME SNAP SHOTS

Wall Street is no place for a thin-skinned man. He gets skinned too often.

After a reckless driver has burned up the road it's still there—but he may be missing.

You'd very seldom read in the papers of a divorce if it was as easy to stay in love as it is to stay in debt.

Funds for prohibition enforcement are the intake for the upkeep of the downput of the output.

A Cleveland man married a Texas woman by telephone, and he'll probably wish more than once that the line had been busy.

There's nothing more useful than money, but when it turns people's heads it's about the most useless thing in the world.

When the average Littlefield man finishes paying his taxes he is ready to believe there's a lot of truth in the old statement that "every man's home is his castle."

A lot of us would be more interested in that South Pole land Byrd has discovered if he could bring it up here where it could be used for parking purposes.

According to fashion rumors, we are heading back to the time when what a girl wore underneath was nobody's business.

A Hiawatha, Kan., flapper hands out this advice to her sisters who are undecided about wearing long skirts: "Let your chassis be your guide."

One out of every 1,000 people are put in jail, says a government report. That doesn't sound like nearly enough.

Our idea of a spunky woman is the Littlefield wife who can tell her husband where to find the needle and thread when there's a button off of his shirt.

The Family DOCTOR BY JOHN JOSEPH GAINES MD GOOD AND BAD

It is a beautiful thought, that, everything in, on, or about this old earth we live in, is good for us in one way or another. It is one of the most comforting facts imaginable, when we appreciate it fully.

A certain article of food or drink may be decidedly harmful under conditions—and positively beneficial under others. If a man is in good health, he does not need aconite, strychnine, or mercury; but, when the fever must be controlled, the shattered nerves restored, the body freed from infection—then we appreciate these valuable agencies at their true worth. We would not be safe without them.

Everything we see, feel and appreciate, is good for something sometime, place, or for somebody. This is a thought worth keeping in mind constantly. The family doctor is a trained thinker. He of all people is besieged daily with anxious queries about human systems that have been thrown out of gear, presumably by something not good for them.—when in reality, there is no such thing!

The doctor knows that it is not the article, but the excessive indulgence of it that does the wrecking. He knows that, used to the exact point of need, nothing makes one sick. He knows, as every thinking man knows that nothing a man may eat, drink, or smoke, can possibly do harm, if not indulged to excess; I wish you would underscore that, please. Potatoes are as capable of killing a man as coffee, and have killed as many I have no doubt, if the truth were known. A very eminent specialist told me recently, that to eat three baked potatoes "the size of a goose egg" daily would harm as certainly as the smoking of three cigars. It

Dangerous Business
Our stomach and digestive systems are lined with membranes which are delicate, sensitive and easily injured. It is dangerous business, then, to use medicines containing harsh drugs, salts or minerals, when we are constipated. In addition to the possibility of injuring the linings of our digestive system, these medicines give only temporary relief and may prove habit forming. The safe way to relieve constipation is with Herbine, the cathartic that is made from herbs, and acts in the way nature intended. You can get Herbine at Stokes-Alexander Drug Company

is the excess, and not the particular thing that makes partaking deadly. The wisest man, in my opinion, is the one that knows precisely where to draw the line in eating, drinking, and smoking. I have not met him up to this time. When I find him, I shall congratulate a perfectly healthy man. I am more afraid of excess than I am of the orthodox devil; that's not science—it's truth.

GAS ORDINANCE No. 41

AN ORDINANCE ENTITLED AN ORDINANCE REGULATING GAS PIPING APPLIANCES, FIXTURES AND APPARATUS IN ALL BUILDINGS AND STRUCTURES OF GAS CONSUMERS, IN THE CITY OF LITTLEFIELD, TEXAS, AND THE INSTALLATION, CONSTRUCTION, RECONSTRUCTION, ADJUSTMENT AND REPAIR THEREOF, PROVIDED FOR BONDS TO BE GIVEN BY THOSE WHO DO SUCH WORK, PROVIDING FOR PENALTIES AND DECLARING AN EMERGENCY.

BE IT ORDAINED BY THE CITY COMMISSION OF THE CITY OF LITTLEFIELD, TEXAS:

SECTION 1: That the City Plumbing Inspector and his assistants be and they are hereby authorized, empowered and directed to supervise all gas piping, appliances, fixtures and apparatus whether now or hereafter existing, placed in or in any manner connected in any building or tent, or structure of any character, whether used for business or residence purposes, in the City of Littlefield, and the installation, construction, reconstruction, adjustment and repair thereof and to see that all the rules and regulations of said City of Littlefield with respect thereto are properly complied with and to inspect all such gas piping, appliances, fixtures and apparatus and the installation, construction, reconstruction, adjustment or repair thereof whenever and so often as they shall deem it desirable or necessary, and to do so in order to prevent fires, accidents or injuries to persons or property, and the said City Plumbing Inspector and his assistants be and they are hereby authorized, empowered and directed to cause all such gas piping, appliances, fixtures and apparatus and the installation, construction, reconstruction, adjustment or repair thereof to be such as not to cause fire or accident or injury to life or property and any and all such gas piping, fixtures and apparatus now existing as well as the installation, construction, reconstruction, adjustment and repair thereof shall be subject to the foregoing inspection and supervision.

And it is further ordained that no gas appliance, fixture or apparatus, either for heating, illuminating or hot water heating, be installed until type of said gas appliance, apparatus or fixture has been approved by the City Plumbing Inspector or his assistant.

SECTION 2: That the said City Plumbing Inspector and his assistants shall be subject to order and direction of the Mayor and City Commission of the City of Littlefield, and they are hereby vested with full authority to enter any building or premises or structure, subways, or other places, either public or private, at any time in the discharge of their duties, and to pass upon and decide upon questions arising under the provisions of this ordinance or any rules and regulations passed or any rules and regulations already adopted or hereafter to be adopted by the Mayor and City Commission of the City of Littlefield as to any such gas piping, appliances, fixtures or apparatus.

ing, appliances, fixtures or apparatus or the installation, construction, reconstruction, adjustment and repair thereof or relative to the materials used therein, whether the same be the original construction and erection or in any alterations or repairs thereof.

SECTION 3: No person, firm or corporation shall enter upon the installation, construction, reconstruction, or repair of such gas piping appliances, fixtures or apparatus or any change thereof, (Nor shall any such person, firm or corporation undertake for any other person, firm or corporation, the adjustment thereof) until the said individual, firm or corporation shall have secured a license as hereinafter provided and shall have executed and delivered to the City of Littlefield a good and sufficient bond in the sum of Two Thousand Five Hundred (\$2,500.00) Dollars having thereon two or more sureties approved by the Mayor and City Commission of the City of Littlefield, one of which said sureties shall be a surety company duly authorized to do business in the State of Texas, conditioned for the faithful performance of all such work entered upon or contracted for in strict accordance and compliance with the terms, requirements and provisions of this ordinance and such further and future ordinances of the City of Littlefield as may be hereafter passed. Said bond shall be further conditioned that such person, firm or corporation shall without additional cost to the person for whom the work is done, remedy any defect therein due to faulty workmanship or incorrect construction or due to the faulty material furnished or used by such person, firm or corporation, and that such person, firm or corporation shall reconstruct or repair such work to the satisfaction of the City Plumbing Inspector of the City of Littlefield at any time within one year after the construction, repair or installation thereof, and after forty eight (48) hours notice from the City Plumbing Inspector to reconstruct or repair the same. In the case of gas leaks of any nature, upon order of said City Plumbing Inspector or any of his assistants, the gas shall be cut off immediately from the premises forthwith without notice and likewise the said City Plumbing Inspector or any of his assistants may in the interest of the public safety order the gas supplied to any customer shut off immediately without notice. The said bond shall for all the foregoing purposes be in force for one year after any such work in the installation, construction, reconstruction or repair of such gas piping is done and one recovery shall not exhaust said bond but said bond shall be a continuing obligation against the sureties thereon until the entire amount thereof shall have been exhausted. In case the bond therein provided for shall be decreased on account of any recovery which may be obtained or arising out of the violation of any conditions of the same, the Mayor and City Commission shall require, upon notice of such fact, an additional bond to be given by such person, firm or corporation in accordance with this ordinance in any amount sufficient when added to the unexpired amount of original bond to be at all times equal to the sum of \$2,500.00. The City of Littlefield, may for itself or for the use and benefit of any person injured or damaged by reason of failure to repair any defective gas piping or any defective installation, construction, reconstruction or repair thereof or for the failure or refusal by any person, firm or corporation to pay any of the fees required by this ordinance, maintain suit on said bond in any court having jurisdiction thereof or suit may be maintained thereon by any person injured or damaged by reason of any breach of any of the conditions of said bond. The bond herein required shall expire on the first day of January, next following the date of approval of such bond by the Mayor and City Commission and thereafter on the first day of January a new bond in form and substance as herein required shall be given by any such person, firm or corporation to cover all such work as shall be done during the year beginning on such January 1st.

That upon approval of said bond by the Mayor and City Commission the individual, firm or corporation desiring to do such work shall secure from the City Secretary of the City of Littlefield a license which shall run until the first day of January next succeeding its issuance unless sooner revoked and shall not be transferable. In the event of the dissolution of any company or partnership holding such license, the member retaining such license shall be required to renew the bond herein provided for before doing any such work provided herein. That the names of each and every member or representative of any firm or corporation obtaining the license shall be given to the Secretary of the City of Littlefield and all such names shall be inserted in said license.

The person, firm or corporation obtaining such license shall pay to the City Secretary of the City of Littlefield the sum of Twenty-Five (\$25.00) Dollars as an annual license fee therefor, provided that if said license is issued after January of any year the license fee shall be the proportionate remaining part of such year computed from the first day of the month in which the same is issued.

SECTION 4: The size of the pipes shall not be less than called for in the following tables:

FOR GAS LIGHTING

- 1/2 in. Pipe, Not more than 26 ft. for 3 lights.
- 3/4 in. Pipe, Not more than 30 ft. for 4 lights.
- 1 in. Pipe, Not more than 50 ft. for 20 lights.
- 1 1/4 in. Pipe, Not more than 70 ft. for 35 lights.
- 1 1/2 in. Pipe, Not more than 100 ft. for 60 lights.
- 1 3/4 in. Pipe, Not more than 150 ft. for 100 lights.

2in. Pipe, Not more than 200 ft. for 200 lights.

FOR GAS RANGES

1in. Pipe not to exceed 70 ft to point of opening.

AUTOMATIC WATER HEATERS

No. 3 Water Heater, 1in. Pipe, Not to exceed 70 ft. to point of opening.

No. 4. Water Heater, 1 1/4 in. Pipe, Not to exceed 100 ft. to point of opening.

No. 6 Water Heater, 1 1/2 in. Pipe, Not to exceed 100 ft. to point of opening.

No. 8 Water Heater, 2in. Pipe, Not to exceed 125 ft. to point of opening.

FOR INSTANTANEOUS WATER HEATERS

1in. Pipe, not to exceed 70 ft. to point of opening.

1 1/4 in. Pipe, Not to exceed 100 ft. to point of opening.

The following specifications must be strictly adhered to in piping houses:

For 1 Fire or opening 1 1/4 in. Pipe from Main to point of opening.

For 2 Fire or opening, 1 1/4 in. Pipe from Main to First opening and 1 in. to second opening.

For 3 Fires or openings, 1 1/4 in. pipe to first opening, and 1 in. pipe to second and third and fourth openings.

For 4 Fires or openings, 1 1/4 in. pipe to first opening, and 1 in. pipe to second and third and fourth opening.

For 5 Fires or openings, 1 1/4 in. pipe to first, and second openings, and 1 in. to the third, fourth and fifth openings.

For 6 Fires or openings, 1 1/4 in. pipe to first, second and third openings and 1 in. pipe to the fourth, fifth and sixth openings.

For 7 Fires or openings, 1 1/4 in. pipe to the first, second, third and fourth and 1 in. to the fifth, sixth and seventh openings.

For 8 Fires or openings, 1 1/4 in. pipe to the first opening, 1 1/4 in. pipe to the second, third, fourth and fifth openings, and 1 in. pipe to the sixth, seventh and eighth openings.

For hot air furnaces, boilers, etc., using burners having two or three air mixers, 1 1/4 in. pipe.

The same with four or five mixers, 1 1/2 inch pipe; for larger installations, approval or size shall be secured from City Plumbing Inspector.

Air mixers must not be placed in air tight ash boxes, but where a free blow of air can reach them at all times.

By the Term "OPENING" as used in this ordinance, is meant the point where the pipe comes through the floor or baseboard to the appliance.

Service pipe from main to Building must be 1 1/2 inch inside diameter or larger, no pipe less than 1 inch inside diameter will be permitted on horizontal run.

Vertical pipes or risers in two and three story buildings must be 1 inch inside diameter or larger, depending on the number of fires or openings.

The use of Bushings or Plugs is prohibited. Use as few elbows as possible; elbows not absolutely necessary will be condemned. When impossible to get through an obstruction such as a beam offset the pipe rather than use elbows.

For large buildings the plans for piping shall be taken up directly with the City Plumbing Inspector before any pipe is installed. All piping for fixtures with a great number of burners on them will have to be made larger accordingly.

Gas is never to be supplied from a smaller pipe to a larger one.

Pipes must be free from obstructions.

White lead or other joining material should be used sparingly as not to clog the pipe and only the male threads doped.

The riser must be extended to a point within 18 inches of the proposed location of the meter, and to right of same at least 20 inches above floor.

Meter should not be located near furnaces or ovens; locked in compartments or placed in any other position where they will be accessible or liable to injury. Under no condition will a fitter or plumber or other person disconnect any meter, connect to or disturb piping between main and meter.

When, to accommodate different tenants, one or more meters are desired in a given building, the gas supplying company will set as many meters as there are separate customers but unless for specific reasons and where special permission is granted by the Plumbing Inspector a separate service line must be laid from the property line to each meter.

Union and valves must not be used in concealed work, but long threads, if necessary, should be used.

Long runs of horizontal pipe shall be firmly supported at short intervals by metal fasteners to prevent sagging.

All branch outlet pipes shall be taken from the sides or tops of running lines, never from below.

Bracket pipes shall be run from below when practicable. Drop extensions must be supported with at least three supports, one under pipe at drop, one across between cap and ell or bend and one half-way between drop and main pipe. All supports are to be 3x1 or larger lumber. Two supports must be used for all bracket extensions, one directly under riser ell and one half-way between ell and main supply pipe.

House pipes must be so run and covered as to be readily accessible. No cast iron fittings smaller than 3 inches are to be used.

No individual, firm or corporation shall enter upon the installation, construction or reconstruction of any work provided for herein until a permit has been issued by the Plumbing Inspector, covering each installation or addition to be made, and when required by said City Plumbing Inspector plans and specifications for the proposed work must be filed with him before the permit is granted or during the progress of said work; provided, however, the City Plumbing Inspector may issue a general permit to any individual, firm or corporation owning or controlling any building for a term not exceeding three (3) months from the date thereof, authorizing minor alterations or changes, but such permit shall be revocable. No permits will be required for the repair or adjustment of gas piping appliances, fixtures and apparatus.

Section 5. When the plumber or fitter has completed the system of piping and has full drop and bracket extensions and heater openings firmly and permanently fastened, he shall test the piping and if found tight file a written application for tests with the City Plumbing Inspector, and the City Plumbing Inspector or one of his assistants will call and inspect the piping and witness the test, and if the City Plumbing Inspector or such assistant finds the piping tight and sizes and work in accordance with the provisions of this ordinance, the City Plumbing Inspector or such assistant will issue and deliver proper certificate to such effect.

The Piping must be tight under a pressure of ten inches of mercury column or fifteen pounds air pressure. This test will be made before the fixtures are hung and appliances connected and before the piping closed in. The use of gas fitter's cement for repairing leaks is strictly prohibited.

All gas using appliances shall be connected up solid. No rubber or metal tubing will be permitted.

An additional piping of outlets installed after a certificate is granted must be reported for inspection and test.

No gas fitter, plumber or other person doing work in any house or structure shall conceal any of said gas piping until certificate of inspection is issued and inspection card attached to said piping.

Running service lines under buildings between curb and meter location is prohibited.

Gas service lines shall not be laid in the same ditch with water or sewer lines.

No riser or elbow will be permitted on any yard service line, trench must be dug on level with curb stop or main except in case of high terraces. In which case special permission may be granted by Plumbing Inspector to make offset bends.

All yard service pipes must be 1 1/2 inches under surface of ground.

SECTION 6: If any person, firm or corporation shall fail or refuse to remedy any defects found by the City Plumbing Inspector or his assistants in any work, provided herein, within seventy-two hours after notice to do so, the City Plumbing Inspector shall not issue any further permits to such person, firm or corporation until said defects are remedied; or if it is shown that said person, firm or corporation is incompetent to do such work, then the license of such person, firm or corporation shall be subject to forfeiture by the Mayor and City Commission. The Mayor and City Commission may forfeit the license of any person, firm or corporation for violation of any of the provisions of this ordinance or such future ordinance of the City of Littlefield as may hereafter be passed; provided, that the forfeiture of any such license shall not in manner affect the liability of the principal or sureties on the bond of any person, firm or corporation for any work herein provided for previously done by any such person, firm or corporation; also, provided that in the event that the license of any person, firm or corporation issued under the terms of this ordinance is forfeited for any violation of this ordinance or other ordinances of the City of Littlefield, pertaining thereto, said person, firm or corporation shall not be granted another license for the period of one year after the date of the cancellation of previous license.

SECTION 7: Any and all gas piping, fixtures and apparatus or material, which may at any time become defective and in the opinion of the City Plumbing Inspector or his assistants likely to cause leaks, fires or accidents or to endanger persons or property, shall be condemned by the said City Plumbing Inspector or his assistants and when, in his opinion, it is deemed necessary in order to prevent such accident or danger, said City Plumbing Inspector, or his assistants, is hereby authorized to disconnect such gas piping, appliances, fixtures and apparatus, or to cause the service of gas to such consumers to be discontinued until the person or persons owning or using such gas piping, appliances, fixtures, apparatus or material shall cause the same to be put in safe condition and tested and approved by the City Plumbing Inspector.

When any gas piping, appliances, fixtures, apparatus or material of any nature whatsoever has been in any manner disconnected and rendered inoperative by the City Plumbing Inspector or the service discontinued, as set forth in the foregoing provisions, it shall be unlawful for any person or persons to in any manner reconnect the same or cause the same to be reconnected to any supply of gas or to use the same as a part of any gas piping system until they have been put in safe condition and a certificate of acceptance has been issued by the City Plumbing Inspector.

SECTION 8: In every gas installation all piping and attachments must be of at least such capacity as will supply gas up to the full maximum requirements of all appliances contemplated to be connected thereon according to the requirements of this ordinance.

No gas piping, appliances, fixtures or apparatus, or the installation, construction, reconstruction or repair thereof, for which a permit is issued shall be put to use or connected to any supply of gas until inspected and accepted by the City Plumbing Inspector.

All applications for inspections will be held at least twenty-four hours after the same are filed. It is required that said individual, firm or corporation or his or its representa-

tives shall personally inspect every installation before a card for inspection is filed and that all work for which the inspection is asked shall be complete.

Application for re-inspection must be made out on new cards the same as the original application, stating whether the first second or third inspection. Telephone or verbal requests will not be considered.

When any gas piping, appliances, fixtures or apparatus is found to have been installed without a proper permit or not in accordance with the provisions of this ordinance, the City Plumbing Inspector, or his assistants is hereby authorized and empowered to prevent any supply of gas thereto or to the consumer until such permit has been secured from the said City Plumbing Inspector and such work inspected, and approved.

Application for inspection shall be filed with the said City Plumbing Inspector, and recorded in a book kept in the office for that purpose. A fee of One Dollar and Fifty Cents (\$1.50) shall be charged for the first inspection and One (\$1.00) Dollar each for the second and third inspection on condemned installations.

Before any such gas piping, appliances, fixtures, or apparatus constructed or furnished under permits hereafter granted shall be approved, or any certificate of acceptance of the same be granted, the said work must be complete, and in compliance with the provisions of this ordinance.

Plumbers or gas fitters shall consult gas company for the location of meter before starting job. The plumbers or gas fitters shall be held responsible for any changes in meter risers installed in locations not authorized by gas company.

SECTION 9: Any gas installation not especially covered by this ordinance must be approved by the City Plumbing Inspector.

SECTION 10: All powers conferred by this ordinance upon the City Plumbing Inspector are hereby likewise conferred upon his assistants and such assistants and each of them may likewise exercise all such powers.

SECTION 11: That any person, firm or corporation who shall violate

any of the provisions of this ordinance, or who shall fail to comply with the requirements of this ordinance, shall be fined in any sum not exceeding from One to One-Hundred (\$1 to \$100) Dollars, and each and every day's continuance of any violation of the provisions of this ordinance shall constitute and be deemed a separate offense. That in case of any such violation of the terms or provisions of this ordinance by any corporation the officers and agents actually in charge of the business of such corporation or the person or persons actually performing the work for such corporation, shall be subject to the penalties herein provided.

SECTION 12: An emergency is hereby declared to exist. By reason whereof it is necessary for the immediate preservation of the Public peace, health and safety of the Citizens of Littlefield, Texas. That this Ordinance take effect from and after its approval, passage and publication.

Passed and approved by unanimous vote, this the 14 day of January 1930.

OTTO JONES, Mayor

Attest:
M. G. STREET, Secretary.
Published Jan. 23, 1930.

BOY SCOUTS PROSPERING

The \$5,300 debt of the Boy Scouts organization in the South Plains area has been reduced to \$1,000, according to a statement just given out by Rev. L. G. H. Williams, president.

The report also shows an increase in troops from 19 to 31, scoutmasters from 17 to 28, and Boy Scout membership from 385 to 554.

Littlefield contributed \$461.50 toward wiping out the indebtedness.

Odd Biblical Error

The "Vinegar Bible" was the name given to an edition of the Bible published at Oxford, England, in 1717. It was so called because of a printer's error. The head line over Luke 22 contains the word "vinegar" for "vineyard."

Over a Billion Deadly Germs in a Single Drop of Water

Germs are so small that there may be as many as one billion, seven hundred and thirty-one in a drop of water. Just a few of these tiny germs get into your blood and you will be in bed for weeks. Cause the loss of a limb and poisoning—may even kill. That most dreadful of all, lockjaw.

When you see no dirt in water, it means that it is clean. The only safe way to do, is to thoroughly purify, no matter how small. Borosone, to kill the germs that dust it with Borosone hasten the healing. Liquid Borosone, 30 cents, 60 cents, \$1.20 Borosone Powder, 30 cents, and can be had at the Standard Drug Company

COLLEGE NEWS

The second mass meeting called for January 16th, was snowed out again. However, nine members of the Board of Directors were present, which constituted a quorum. Those present were E. L. Martin, Eden, Texas, R. B. Whittenburg, Bunker, Texas, John Atchison, Stanton, Texas, C. L. Williams, Eden, Texas, and R. L. Gattis, J. W. Emfinger, D. L.

Shelton, R. F. Duckworth, R. C. Conner, of Littlefield, Texas. Plans for continuing building and operation of the school in general were adopted, of which we will have more to say in the next issue of the Leader. There is a quiet, more serious and studious attitude on the part of the students this week on account of examinations beginning Tuesday afternoon and continuing throughout the week. The prospects for an increased enrollment for the second semester, which will begin Monday, January 27th, are fine.

The high school Joy Maker's Club gave an interesting and entertaining program Friday night, and several visitors, in addition to the student body, enjoyed the evening. After the program indoor games were enjoyed by all who stayed. The Espanol Club had an interesting and helpful program on Mexico, its people, their customs, etc., last Thursday afternoon. The club will not meet again until January 30th. E. K. Kitching, Math., teacher, has been quite ill, but is improving now and will soon be at work again.

JUNIOR STUDY CLUB

The Junior Study club met Wednesday evening at the home of Mr. and Mrs. T. S. Sales with Miss Lula Graham as hostess. "Literature of Early Texas," was the subject for the lesson led by Miss Gladys Wales.

A business session was held where in election of officers was made for the new club year, as follows; President, Miss Gladys Wales; Vice-President, Miss Thelma Killough; Secretary, Miss Dahlia Hemphill; Treasurer, Miss Corrine Wright; Reporter, Miss Tommie Killough; Federation Secretary, Miss Sybil Glenn, Executive board members, Misses Gladys Wales, Gladys Porter and Lucille Killough, and Parliamentarian, Miss Erma Simmons.

Refreshments, consisting of sandwiches, corn flake dainties and coffee, were served to the following: Misses Ruth Mathews, Corrine Wright, Gladys Wales, Sybil Glenn, Fannie Weaver, Gladys Porter, Thelma, Lucile and Tommie Killough, Dahlia Hemphill, Mesdames, T. S. Sales, F. G. Sadler, Ray B. Jones and the hostess.

METHODIST REVIVAL STOPPED BY FLU AND THE WEATHER

The Methodist revival, which was being held here, was indefinitely postponed Monday evening on account of the illness of Rev. R. B. Freeman, who was conducting the services. He is confined to his home due to a severe case of the flu.

R. E. Huston, of Dallas, who has been choir director for the meeting filled the pulpit at the Saturday evening, Sunday services and Monday evening services.

Later: Rev. Freeman is reported much improved, and states that he will be in his pulpit next Sunday for regular preaching services.

Friendship's Failings

We never know the true value of friends. While they live we are too sensitive of their faults; when we have lost them we only see their virtues.—Hove

Lake at High Altitude

Workers Conference To Be Held in First Baptist Church Here

The West Plains Workers conference will be held at the First Baptist church here Monday evening at seven o'clock and Tuesday beginning at 10 o'clock continuing until four. At noon Tuesday a lunch will be served in the church basement by the ladies of the church.

A number of visiting ministers and laymen will be present and a splendid program has been arranged for the occasion. L. W. Jordan, choir director for the church, will be in charge of the song services. Monday evening Rev. C. A. Joiner, pastor of the First Baptist church, Mulleshoe will make a talk on, "Purpose and Value of the Monthly Workers Conference," and the sermon will be delivered by Rev. Vernie Pipes, of Plainview.

Tuesday morning Missionary O. D. Johnson, of the Brownfield association will lead a round table discussion of, "The Work of the Associational Missionary." Rev. Cal McGhee, of Sudan will speak on, "Southern Baptist and the Modern Age." The morning sermon will be delivered by Rev. Hughes, of Leveland.

The afternoon program will be composed of a talk by Rev. Roy A. Kemp, pastor of the Tabernacle Baptist church, on, "The Value of Sunday School and B. Y. P. U. Training Courses." Talks will be made relative to the work of the W. M. U. by several of the members of the organization.

A board meeting of the W. M. U. will also be held.

A large attendance is expected at the conference and much preparation is being made to make the occasion a success.

Summing It Up

Our troubles come from trying to put the left-hand boot on the right-hand foot.

SHERIFF'S NOTICE OF SALE OF REAL ESTATE

THE STATE OF TEXAS) COUNTY OF LAMB) WHEREAS, by virtue of a certain Order of Sale issued out of the District Court of Lamb County, Texas, on a judgment rendered in said court on the 26th day of December, 1929, in favor of W. A. Turner and against Van B. Clark and Mattie Lou Clark and being No. 445 on the docket of said court, I did, on the 6th day of January, 1930, at 10 o'clock A. M. levy upon the following described lots, tracts and parcels of land lying and being situated in Lamb County, Texas, as the property of and belonging to the said Van B. Clark and Mattie Lou Clark, to-wit:

All of Lot No. Ten (10) and the West One-half (W. 1/2) of Lot No. Eleven (11), in Block No. Forty-nine (49), in the town of Littlefield, Lamb County, Texas.

AND NOTICE IS HEREBY GIVEN, that on the 4th day of February, 1930, the same being the first Tuesday in said month, between the hours of 10 o'clock A. M. and 4 o'clock P. M. on said day, at the courthouse of said county, in Olton, Texas, I will offer for sale and will sell at public auction for cash, all the right, title and interest of the said Van B. Clark and Mattie Lou Clark in and to said property.

Dated at Olton, Texas, this the 6th day of January, 1930. LEN IRVIN, Sheriff of Lamb County, Texas. January 9, 16, 23 1930.

GUY STANTON, Manager

LITTLEFIELD, TEXAS

A NEW AGE OF LUBRICATION BEGINS WITH THIS NEW MOTOR OIL CHARACTERISTIC:

"Penetrative Lubricity"*

CONOCO Alone Has this New Characteristic

Since the discovery of the wheel, lubrication has been a necessity and a problem. The first rude barrows which pre-historic men built, needed lubrication, and one of the brighter tribesmen began rubbing the axles of his primitive cart with raw animal meat.

With Watt's invention of the steam engine in 1763, metal-on-metal friction resulted. Then it was that animal and vegetable oil lubricants became definitely unsatisfactory. Their tendency to leave corrosive deposits ruled them out.

Mineral Oils Are Discovered
After the drilling of the first oil well in 1859, mineral oils became commercially successful. Because petroleum was plentiful and was free from gumming and corroding tendencies, it rapidly supplanted animal and vegetable oils.

But since 1901 there have been practically no changes of fundamental importance in refining motor oils.

Now since 1901, think of the changes that have been made in motors! Probably the make of car you drive today was not even manufactured in 1901. Certainly its needs for oils are far more exacting!

The Development of Germ Process
Foreseeing that ordinary mineral oils would eventually fail to meet the increasing strains put

upon them, Wells and Southcombe, two British scientists began a study of the problem which occupied 16 years. The result of their efforts was the isolation of the Germ Essence—a property that provides increased "oiliness" when introduced into mineral oils. These processes were patented and Continental acquired them exclusively for North America. *This Continental brings you the first and only fundamentally better oil of the century!*

Germ Process and Penetrative Lubricity

The Germ Process adds one startling characteristic to CONOCO Germ-Processed Motor Oils. It enables them to penetrate metal surfaces! This means that an enduring oil film actually penetrates all working parts and clings under all conditions. In starting when 40% to 60% of motor wear occurs . . . in speeding when any failure of the film is fatal to motor life, remember this—the permanence of this film precludes any possibility of metal abrasion. The germ-essence naturally adds greater "oiliness" and we call that lubricity. So we have Penetrative Lubricity as the outstanding characteristic of this new oil.

When will you begin using CONOCO Germ-Processed Motor Oil?

THE FOUR AGES OF LUBRICATION

7 Years B. C. to 1763
Animal Fats for Wood-on-Wood Friction

1763 to 1859
Vegetable Oils and Animal Fats for Metal-on-Metal Friction

1859 to 1918
Petroleum discovered and used—not as "oil" but does not corrode

GERM-PROCESSED OILS 1929
The first fundamentally better oil of the Century!

* Means—Slipperiness, smoothness, freedom from friction; also the property that diminishes friction, as the lubricity of oil, coupled with the unique ability to penetrate metal surfaces.

CONOCO GERM-PROCESSED MOTOR OIL

PARAFFIN BASE

POLITICS WILL BE BIG SHOW FOR THE 1930 TEXAS VOTERS

If all predictions are anywhere near correct this will be one of the hottest election years the voters have ever seen. State officers, as well as county will be elected. There will also be eighteen Congressmen elected and the old political pot has begun to boil already. Below is the political calendar for the year and every voter should keep this for future reference. Pay your poll tax now so that you may be in position to use your vote in July.

Jan. 31—Last day for payment of poll tax or to otherwise qualify by obtaining voting credentials.

June 2—Last day for candidates for state offices and district offices, in districts containing more than one county, to file requests to have their names on the ballot.

June 9—Meeting of state executive committee.

June 1—Last day for county and precinct candidates and district candidates, in districts composed of only one county, to file requests to have names placed on ballots.

June 15—County executive committee meets to determine the order of names on ballot and estimate expenses of election.

June 23—Last day for candidates to pay assessments for their share of expenses incident to holding election.

June 26 to July 1—Candidates must file their first report of campaign expenses not more than 30 or less than 25 days prior to date of primary.

June 26 to July—Time for voters who are absent from county to appear before notary public and request ballot.

July 14—Primary committee meets to prepare ballot.

July 14 to 18—Candidates must file second statement for campaign expenses.

July 16 to 23—Time for voters who intend to be absent from county on date of election to appear before clerk and vote an absentee ballot.

July 22—Four days prior to day of election all voters living in a city of ten thousand inhabitants or more who have moved their residences within city or from without the city to the city, must report to the tax collector.

July 24—Day upon which county Clerk shall send absentee votes to the presiding judges of the respective voting precincts.

July 26—Primary election day polls open at 8 a. m. and close at 7 p. m. Precinct conventions are held to elect delegates to county convention.

Aug. 2—County executive committee meets to canvass results. County conventions are held.

Aug. 5—Last day for candidates to file third report of expense.

Aug. 11—State executive committee to canvass returns.

Aug. 23—Date of second primary. District convention meets to canvass returns for district candidates.

Sept. 1—Meeting of state executive committee.

Nov. 4 General election.

Nov. 14—Candidates should file report of expenses with the county judge.

The republicans will be required to hold a primary on July 26, the same day the democrats nominate their candidates. Under Texas law parties that poll more than 100,000 votes for governor in a general election are required to hold primaries. It will be the second time Texas Republicans have ever held a primary.

HOW A WIFE CAN MAKE MONEY SELLING BOOZE

For the married man who thinks he cannot get along without a drink the following is suggested as a means of freedom from the bondage of the bootleggers:

Start a saloon in your own home. Be the only customer. (You will have no license to pay.) Give your wife ten dollars to buy a gallon of whiskey, and remember there are 69 drinks in a gallon. Buy your drinks from no one but your wife, and by the time the first gallon is gone she will have \$23.50 to put in the bank and \$10.00 to start business again. (She can throw in two drinks on the house.) Should you live ten years and continue to buy booze from her, and then die with snakes in your boots, she will then have enough money to bury you decently, educate your children, buy a house and lot, marry a decent man and quit thinking about you entirely.—Contributed.

And to Little Purpose
"Our ancestors warn us against hatred and contention," said Hi Ho, the sage of Chinatowa. "Just as their ancestors, from time immemorial, warned them."—Washington Star.

This Girl Can Shoot!

Nevada Talhelm, a student at the University of Kansas, made the perfect score of ten bullseyes in the Intercollegiate Girls' Rifle Match.

METHODIST MISSIONARY

Methodist church met in regular session. The Missionary society of the

Methodist church met in session Monday afternoon. Misses Van Clark and W. as joint hostesses, at the all members present.

Mrs. A. G. Hemphill was the lesson, and those who were: Mesdames B. L. Neely and R. A. Davis.

PERSONAL ITEMS

C. E. Moore, was here Tuesday, from his home in the Fieldton community.

Jew Cook was here Tuesday from his farm, nine miles north of Littlefield.

William Wingfield and Fulton Jones made a trip to Lubbock, Saturday.

Sidney Pace is having his residence remodeled, three miles northeast of Littlefield.

L. D. Rochell spent the weekend in Amberst, visiting his parents, Dr. and Mrs. Rochell.

W. E. Alexander is adding an addition to his residence, seven miles northeast of Littlefield.

Eodius Wilson was called to Davidson, Oklahoma, Monday, on account of the death of a relative.

A. Schmidt is having a small residence erected on his farm three miles west of town.

Jack Bishop of Lubbock, was a guest in the home of Mr. and Mrs. Fred Hoover, Sunday. He is a student in the Tech. college.

Miss Mary Robertson who has been teaching at the Littlefield college, has accepted a position as teacher of English in the High School.

A. L. McCarty, who has been making his home on the Spade land, seven miles east of Littlefield, has moved to his new home 10 miles south of town.

U. S. Delmont, of Lamesa, who is having a two story brick duplex erected in the Delmont addition, which adjoins the Cole addition on the north, is contemplating erecting several residences in the new addition in the near future. A restriction will be set on all buildings to be erected within its limits.

Mrs. Fannie Williams and son, Ray who have been visiting in the home of Mr. and Mrs. W. H. Garner, left Monday for their home at Pawhuski, purchased a farm on the Spade lands Oklahoma. While here Mrs. Williams, who is a sister to Mrs. Gardner, and her son will return in the near future and make his home on the farm.

Too Much Hurry
Many people who are in too much of a hurry to arrive, will find only what they took along. — Woman's Home Companion.

CHOICE BITS OF NEWS FROM OTHER TOWNS NEAR HERE

Levelland
Building permits here last year totaled \$200,000, and there is much new building already contemplated for 1930.

Major H. Ridgers has installed a 52,000 egg capacity incubator here. The political pot has begun boiling in Hockley county, a number of citizens have already cast their hats into the ring, and indications now point to a lively campaign this spring.

Levelland now has nearly 1,000 pupils enrolled and all buildings are being taxed to their utmost capacity for student accommodation.

Lee Crowover, prominent citizen of the Whitharral community has announced for Commissioner of Precinct Four.

The First National Bank, this city in its recently published financial statement, shows deposits of \$486,657.97, a fine indication of the prosperous condition of this section.

Sudan
The First National Bank, this city, in its recently published financial statement showed resources totaling \$507,265.34. Sudan and community was never in a more prosperous condition.

Sudan citizens are greatly pleased with the road now under construction by Commissioner C. A. Daniel. It leads north from Highway No. 7 across the sandhill section to Highway No. 28 west of Earth post office. When completed it will be a great convenience to the people of this section coming to Sudan for business and other interests.

German Hospitality
In one of the most famous and most comfortable hotels in Germany guests are consulted about their beds before the beds are made up, says London Answers. A list of questions is provided, and if after answering these the guest does not sleep well, it is not the fault of "mine host."

Tax of Ingenuity
Somebody has figured out that inventors receive from their inventions an average income of \$37.25 a week. And then they have to invent a way of living on it. — New York Evening Post.

BAILEYBORO NEWS

The recent snows falling in this section have assisted materially in putting a fine season in the ground. Farmers who have been doing some plowing between spells say the ground pulverizes in an excellent manner and they are looking forward to a good crop this year.

Last Saturday night a home talent play, "The Old-Fashioned Mother" was given, the proceeds going for paying of the girl's basket ball suits. It was real interesting.

There have been twelve new families to recently move into the Baileyboro community, and several more yet to arrive in the near future. Several of these new comers have already begun carving out their homesteads and erecting houses and barns. Some of the homes have been equipped with modern electric and carbide systems.

The enrollment of the Baileyboro school is now 125 pupils and more new ones are expected to enter shortly.

Sunday school and young peoples meeting are held here every Sunday. We are anxious to keep the attendance at 100 each Sunday.

People of this section are very musically inclined and plans are now being discussed for a singing school to be held here.

No Indian "Treasures"
The bureau of ethnology says it frequently has inquiries regarding buried treasures. These burial places are reported as marked either by stones arranged in rows or some other natural objects or by markings on rocks. On investigation it is generally found there is nothing in them of any value. The Indian never acquired the conception of either individual or tribal wealth and did not have treasure.

Magnification
Natural scientists tell us that the familiar buck shot if magnified 10,000,000 times would be as large as the earth; and that an atom magnified 10,000,000,000 times would be less than three feet in diameter.

Plants on Ocean Floor
Except where waves and currents are too violent the floor of the ocean from the high tide level to a depth of about 600 feet is largely covered with plants, chiefly of the kind known as algae. — Gas Logic.

Advantages in Having Lambs in Late Winter

There are advantages in having ewes drop their lambs in January and February. Lambs coming at this time of the year will be big enough when turned on pasture to make good gains on grass and can be ready to market in May or June. The market price for lambs is usually good, early in the summer before any great number of lambs are being shipped in from the range states. Early lambs which are of good size when they go to pasture also are better able to resist stomach worms and can be marketed before there is much loss from this pest.

Live Stock Squibs

Silage can be fed to every class of live stock, but for dairy cows it is well nigh indispensable.

If you want to force them to market use the self-feeders right through and let them gain as fast as they will.

The common mixture of oats and corn half and half, and prairie hay is not a good ration for fattening lambs.

Pigs will do well on corn alone, for a while, and then they stop growing. It lacks some of the growth-making elements and needs to be balanced with feeds like milk, buttermilk, tankage and alfalfa.

With all costs considered, silage can be made at a cost of from \$5 to \$6 per ton, and it is worth from \$8 to \$12 as a stock food.

Calves which are being fattened during the winter must be well fed to be ready for market in the spring or early summer.

A "bog hole" around the water trough is very undesirable and should be guarded against. This is the purpose in having a concrete platform around the trough.

Just think! This is going to be our OWN HOME!

The couple in the picture above are very happy. They are looking at the home we have just completed for them, and feel a glow of pride. You, too, may own your own home. It's easier than you think.

Now is a good time to stop paying rent and get into the ownership class. We furnish everything from plans to paint—the very best of building material—and all on exceedingly reasonable terms. Ask us to explain to you.

Women to Visit World War Dead

Gold Star Mothers and Widows Will Go to Europe in May.

Washington.—In May, 1930, 12 years after the long lines of olive-garbed American soldiers marched across the battlefields of France, a thinner line of Americans will follow along paths which end in eight cemeteries where sleep 30,791 American soldier dead. There will be no martial music to announce their coming and no banners waving a challenge to a foe. Some of these pilgrims will be bent with age and will falter along the paths where once their sons walked so confidently strong, even though time has done much to smooth the way.

The United States government is making it possible for these mothers and widows to visit the graves of their heroic dead.

The office of the quartermaster general was given charge of the pilgrimages when congress passed a bill, on March 2, 1929, directing the War department to make the necessary preparations for the voyages.

In the cemeterial division Maj. John T. Harris and Capt. A. D. Hughes are arranging the details, while the many contact problems between the War department and the widows and mothers are being worked out by Miss Stowell, of the cemeterial division of the quartermaster general's office.

Month Allowed for Trip.

Between May 1, 1930, and October 31, 1933, the pilgrimages for groups will be scheduled as nearly as possible to suit the wishes of those who are going. It is expected that most of the 11,500 mothers and widows will go. More than half have already signified their intention to make the journey, and most of them wish to go as early as possible in 1930. The pilgrims will sail on American liners, and it is expected that about a month will be taken for each trip.

The government will pay every expense from the time the pilgrim leaves her home until she is back again. At New York a staff of managers will take charge of the assembled group for each trip and will see that every comfort is provided. Among the assistants that will accompany each group will be guides, physicians, nurses and interpreters.

The itinerary for each person will be arranged. She will be given descriptive material relating to the particular cemetery which she will visit. Her hotel reservations will be arranged in the town most convenient to the cemetery where her son or husband is buried.

30,791 Graves in Eight Cemeteries.
In the eight cemeteries where are buried American dead in European soil there are 30,791 graves of American soldiers, sailors and marines who died in the World war. Of this number 2,140 have been identified.

There are 70 isolated graves under the care of the United States government called "do not disturb" cases. These graves have been left alone because relatives wished the soldier to be buried where he fell, as in the case of Quentin Roosevelt. There are approximately 20 "special" cases in which a soldier of foreign extraction serving under the American flag was buried in his native land because his relatives so desired.

All of the graves will be visited by either mother or wife because many have both mother and wife who make the pilgrimage. The War department reported on December 1 that 6,500 of the 11,500 eligible wives

and mothers had accepted the government's invitation. The mothers and widows who would not be considered eligible to go at the government's expense are those that have visited the graves at some previous time. A widow would not be eligible to go if she has married again.

Cemeteries Beautified.

The eight cemeteries—six in France, one in Belgium and one in England—are kept with great care. Landscape gardeners have placed plants and flowers for decorations, and in the center of each cemetery at all times floats an American flag. The graves, laid out in rows, are marked by white marble headstones which have replaced the temporary ones of wood. Only two types of headstones are used—the cross for the soldier of Christian faith and the shield of David for those of Jewish faith.

On each headstone is inscribed the soldier's name and rank, the organization in which he served, the date of his death and the state from which he came. The inscription on the graves of the Unknown Soldiers is "Here rests in honored glory an American soldier known but to God."

Because the officers of the cemeterial division of the quartermaster general's office are working unceasingly on the slightest clues that may reveal the identity of the Unknown Soldier, many identifications are being established. By the time the pilgrimages are nearing a close it is expected that many of the "Unknown" will have been identified. The cemeterial division works in co-operation with the American Graves Registration office in France.

Sometimes only a word on a scrap of paper has led to a search that ended in establishing the identity of the soldier.

Recoveries Also Made.

Recoveries, as well as identifications, are constantly being made. In 1929 nearly 50 recoveries were made, and of that number 14 were identified, while 12 of the "Unknown" graves were identified. In the last six months there have been seven recoveries and four identifications, showing that the work of looking after the World war dead has not ended.

Another work in connection with the cemeteries that is progressing is the completion of the chapels being established in each cemetery. The American battle monuments commission estimates that the chapels in Flanders field cemetery and Brookwood cemetery will be finished by the time the pilgrimages start. Those of Aisne-Marne, Oise-Aisne, Somme and Suresnes will be completed in another year, and those in the St. Mihiel cemetery and Meuse-Argonne cemetery will be completed by May, 1932. In each chapel are inscribed the names of the men who are buried in the respective cem-

eteries. The chapels will also bear record of the 3,869 soldiers who are unknown or who were accounted "missing."

Pilgrims to Land at Cherbourg.
The pilgrims will be routed on steamers that will take them to Cherbourg, France, for debarkation. Those who expect to visit the Brookwood cemetery in England will debark at Southampton or Plymouth, and will remain in London, from where it is easy to travel to Brookwood. The other pilgrims will go to Paris and from there to the towns nearest their destination.

The largest cemetery of the eight is the Meuse-Argonne, which is about 250 kilometers from Paris. Because of that great distance the visitors may be quartered in a hotel in the small town of Romagne-sous-Montfaucon, in the department of the Meuse, about 45 kilometers from Verdun. In the Meuse-Argonne American cemetery are buried 14,167 Americans.

In the Oise-Aisne cemetery are buried 5,993 American soldiers, sailors and marines. The small town near this cemetery are Seringes-et-Nesles and Pre-en-Tardenois in the department of Aisne. The cemetery is approximately 110 kilometers from Paris.

St. Mihiel Third in Size.
The St. Mihiel, which is third largest, is 310 kilometers from Paris. Here are buried 4,148 Americans. The St. Mihiel is near the small town of Thiaucourt, in the department of Meurthe-et-Moselle. It is 45 kilometers from Nancy and 47.5 kilometers from Verdun.

There are 2,268 Americans buried in the Aisne-Marne cemetery, near the village of Belleau in the department of Aisne, which is ten kilometers from Chateau Thierry, a town of about 8,000 inhabitants. This cemetery is 95 kilometers from Paris.

The Somme cemetery contains about 1,828 American soldier dead. The cemetery is in the department of Aisne and is near the village of Bony. It is three kilometers from Let Catelet, 17 kilometers from St. Quentin and 154 kilometers from Paris. St. Quentin, a city of about 56,000 inhabitants, probably will be the pilgrims' headquarters.

1,500 in Suresnes Cemetery.
In the Suresnes cemetery there are 1,500 American dead. The cemetery is about 12 kilometers from Paris and is accessible by taxicab or train.

The Brookwood American cemetery, in the county of Surrey, is 28 miles from London. In this cemetery there are 437 American soldiers.

The smallest cemetery is Flanders field cemetery, where are buried 398 Americans. It is within a short distance of Waergem, Belgium. It is 40 kilometers from Lille and 13 from Courtrai.

Egyptian Women Have No Choice in Husbands

Washington.—Egyptian women have started a movement for "equal rights," but have failed so far to gain the right to choose their own husbands or to overcome other traditional barriers to emancipation, according to Wilbert B. Smith, senior secretary of the Y. M. C. A. in Egypt, who was in Washington recently to confer with local Y. M. C. A. officials.

A recent court decision, he states, upheld the contention that a single woman of marriageable age has no legal right to the disposal of her own person in marriage, this being the prerogative of the senior male member of her family.

K. U. Fraternity Houses Profitable to Burglars

Lawrence, Kan.—With four burglaries reported within a period of ten days, fraternity and sorority houses on Kansas university campus are having a hard winter. The Delta Upsilon fraternity and the Alpha Omicron Pi, Pi Beta Phi, and Chi Omega societies reported thefts.

NEWS REVIEW OF CURRENT EVENTS

Center of Stage in Capital Held by Prohibition Enforcement.

By EDWARD W. PICKARD

PROHIBITION was again the dominant topic in Washington, displacing the tariff and the naval conference in London. Somewhat hurried by political pressure, the Wickersham crime commission made a preliminary report and in submitting it to congress President Hoover made recommendations for legislation designed to facilitate enforcement of the dry laws. Then the fireworks started.

The commission's report was thus neatly summarized by the Boston Herald:

"In effect Chairman Wickersham and his associates say: 'Whether the Eighteenth amendment and the Volstead act are wise legislation or not, we do not choose to say. The law is here. Conditions in the courts and elsewhere are such that enforcement under ideal conditions has not been responsible. Set up some new machinery for enforcement, try it a while and ultimately we may have something to say on prohibition as prohibition. We defer judgment meanwhile.'"

The four major recommendations made by the commission were:

Unification of enforcement under the Department of Justice.

Machinery for speeding up prohibition cases in the federal court.

Codification of all statutes relating to prohibition.

Amendment of Volstead act to facilitate prosecution of padlock injunctions.

Here is what President Hoover asked of congress:

Reorganization of the federal court structure so as to give relief from congestion.

Consolidation of the various agencies engaged in prevention of smuggling of liquor, narcotics, other merchandise and aliens over our frontiers.

Provision of adequate prisons and reorganization of parole and other practices.

Specific legislation for the District of Columbia.

Legislation to give United States court commissioners enlarged powers in minor criminal cases.

Transfer of prohibition machinery from Treasury department to the Department of Justice.

IN THE HOUSE these recommendations were referred to the several committees especially concerned, and there was an apparent disposition to push the administration measures through in quick time; but it was thought they would encounter much opposition in the senate. The constitutional lawyers in both houses were prepared to fight especially the commission's plan to permit United States commissioners to handle petty prohibition cases on the ground that it deprived citizens of their constitutional right of trial by jury. Mr. Wickersham explained that this was a misapprehension, the plan merely assuring the defendant a speedy trial with the right to appeal to another court in which he would be tried by a jury.

The wets in the house organized for the coming battles by electing J. Charles Linthicum of Maryland leader of the bloc. Previously Representative James M. Beck of Pennsylvania had declined the post, explaining that while he opposed the prohibition law, he believed it to be "the manifest duty of the administration to enforce it."

Representative La Guardia of New York made a surprise attack on the

dry when he raised a point of order on the prohibition provisions of the pending Treasury department appropriation bill and offered a resolution to declare the Eighteenth amendment inoperative. La Guardia set forth the proposition that only ten of the state legislatures ratified the Eighteenth amendment within seven years, as required by its third section. The others, he said, ratified merely the joint resolution, which later became the constitutional article. Hence, he argued, the amendment and its enforcement legislation automatically died three years ago.

ALL this hullabaloo coincided with the tenth anniversary of the advent of national prohibition, and at the same time the Anti-Saloon league opened its twenty-fourth annual convention in Detroit. The leaders of the organization announced plans for raising a "war chest" of \$50,000,000 for use during the next ten years and said they were determined to rout utterly the organized forces that seek repeal or modification of the Eighteenth amendment and the Volstead act. General Superintendent F. Scott McBride in his address assuming a rather remarkable knowledge of the Creator's ideas, declared "The league was born of God. It has been led by Him and will fight on while He leads."

Dr. A. J. Barton, chairman of the executive committee, said: "The Anti-Saloon league is the most hated and feared organization in America. The wets are more and more amazed at the strength of our organization. In a plying and patronizing way they announce that we are dead or at least moribund. The wish is father to the thought; they know that we are very much alive."

ON THURSDAY the senate, by a majority of ten votes, rejected the proposal of the Republican regulars for an increase in the sugar tariff. The amendment of Senator Harrison of Mississippi forcing the retention in the tariff bill of the existing rate of 1.75 cents a pound on Cuban sugar, was adopted, 48 to 38. The finance committee had proposed a rate of 2.20 cents on Cuban sugar and the bill passed by the house put the rate at 2.40 cents.

The Western Independent Republicans, who combined with the Democrats to knock out of the Republican bill all rate increases except those on agricultural products, split on the sugar duty. Senators Borah of Idaho and Norris of Nebraska, leaders of his bloc, were among those voting against an increased rate.

GOVERNOR GREEN of Michigan, acting on recommendation of Arthur D. Wood, commissioner of pardons and paroles, has commuted the sentences of the five victims of the state's former "life for a pint" law, reducing their terms from life imprisonment to 7 1/2 to 15 years, in conformity to the amended statute. The sixth sentenced under the former law committed suicide in his cell.

Oscar G. Glander, Michigan's commissioner of public safety, announced that the state police would be provided with fast automobiles equipped with machine guns and tear bombs to stop run running between Detroit and Chicago. The officers will wear bullet proof vests.

In Providence, R. I., a special grand jury called to consider evidence in the slaying of three men aboard the rum runner Black Duck by coast guardsmen reported to the Superior court that, after thorough investigation, it had found no indictment.

SECRETARY OF STATE STIMSON and the rest of the American delegates to the naval limitation conference landed at Plymouth Friday morning and were speedily carried up to London. There Mr. Stimson spent several hours in conference with Prime Minister MacDonald, and on the

two following days he talked confidentially and at length with Premier Tardieu of France and Dino Grandi, Italian foreign minister. Presumably these conversations did much to clear the way to a tentative agreement in the conference, which was to open Tuesday.

To the advance guard of the newspaper correspondents from all over the world Mr. MacDonald said Great Britain would propose the abolition of battleships and submarines, not with any great hope of obtaining total abolition, but in the strong hope of securing a drastic reduction in these forms of armament and their possible extinction after a term of years. He favors reduction by categories rather than global tonnage, but France and probably Italy are committed to the latter plan and it is believed the United States is ready to accept it. The French and Italian delegations were reported still far apart on the question of naval parity. However, fair minded observers in London were convinced that all five of the delegations were sincere in their desire to obtain results of real international value and that while each of them would insist on adequate national defense, all were against the principle of armed supremacy. Therefore there is reason for optimism.

DELEGATES of the allies and of Germany in the conference at The Hague finally reached an agreement on the several questions of sanctions and formulated two declarations on the subject to be part of the Young plan protocol, the way to the signing of which was thus cleared. Germany agreed that in case she wilfully defaulted any of the Young plan provisions any creditor nation might appeal to the court of international justice and if that court gave an affirmative decision, the creditor power or powers should resume "full liberty of action." That, of course, means the possibility of armed intervention or occupation, and both the Germans and the British hesitated to sign it, but this was necessary to prevent utter failure of the conference. Paul Moldenhauer, German minister of finance, had already promised that the Reichsbank would participate in the financing of the world bank for reparations, though Hjalmar Schacht, president of the Reichsbank, had fought stubbornly against this. Agreement was reached on the date of German payments, the fifteenth of the month, as demanded; on the moratorium question, with the proviso that at the end of any period of suspended payments the amount of money becomes payable immediately; and a special advisory committee to determine whether Germany's economic life is endangered and action is asked.

THROUGHOUT much of the Mississippi and Ohio river valleys flood conditions were increasing until they threatened to be the worst in years. Vast areas of farm land were inundated and many towns were isolated. Southern Indiana especially suffered, and extremely cold weather added to the distress, there and elsewhere.

The severest storms of the winter swept over the North Central states, and the heavy snowfalls extended even to Portland, Ore., and southern California. Still worse in destruction of life and property were the great gales that prevailed in England and northern Europe. About fifty persons were killed and many injured, the majority of deaths being due to the foundering of vessels.

GROVER CLARK returned to Piquette from a six weeks' inspection trip in the Wei river district on behalf of the China International Famine Relief and reported that thousands of persons are dying daily from famine and exposure. (© 1930, Western Newspaper Union.)

"Lucile is the Happiest Girl"

So many mothers nowadays talk about giving their children fruit juices, as if this were a new discovery. For over fifty years mothers have been accomplishing results far surpassing anything you can secure from home prepared fruit juices, by using pure, wholesome California Fig Syrup, which is prepared under the most exacting laboratory supervision from ripe California Figs, richest of all fruits in laxative and nourishing properties.

It's marvelous to see how bilious, weak, feverish, snallow, constipated, under-nourished children respond to its gentle influence; how their breath clears up, color flames in their cheeks, and they become sturdy, playful, energetic again. A Western mother, Mrs. H. J. Stoll, Valley P. O., Nebraska, says: "My little daughter, Roma Lucile, was constipated from babyhood. I became worried about her and decided to give her some California Fig Syrup. It stopped her constipation quick; and the way it improved her color and made her pick up made me realize how run-down she had been. She is so sturdy and well now, and always in such good humor that neighbors say she's the happiest girl in the West."

Like all good things, California Fig Syrup is limited, but you can always get the genuine by looking for the name "California" on the carton.

Too Much Emphasis Put On Declaration of Age?

The demand of public officials that the citizen declare his age on every pretext is a piece of obnoxious bureaucracy. You do not need to tell your exact age in order to vote. The women saw to that in short order. But you must tell it in order to obtain a motor vehicle license.

Two million persons in the next few months will need to write down their ages for the perusal of license bureau clerks or any traffic officer. The plea that this is necessary for police purposes is ridiculous. Identification can be made by other means in emergencies. A crook who was trying to "beat" identification would not be greatly distressed by this requirement.

Dr. Charles E. Jefferson of the Broadway Tabernacle church, spoke out two years ago against age requirements on passports, licenses and the like. If more would speak out, a change to a proper basis would be speedy.

Persons might be required to state if they are "of age." But that is sufficient.—New York American.

Clean Kidneys By Drinking Lots of Water

Take Salts to Flush Kidneys If Bladder Bothers or Back Hurts

Eating too much rich food may produce kidney trouble in some form, says a well-known authority, because the acids created excite the kidneys. Then they become overworked, get sluggish, clog up and cause all sorts of distress, particularly backache and misery in the kidney region, rheumatic twinges, severe headaches, acid stomach, constipation, torpid liver, sleeplessness, bladder and urinary irritation.

The moment your back hurts or kidneys aren't acting right, or if bladder bothers you, begin drinking lots of good water and also get about four ounces of Jad Salts from any good pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to flush clogged kidneys and stimulate them to activity; also to neutralize the acids in the system so that they no longer irritate, thus often relieving bladder disorders.

Jad Salts cannot injure anyone; it is a delightful effervescent lithia-drink which millions of men and women take now and then to help their kidneys and urinary organs and often avoiding serious kidney troubles.

Deserved Leniency

In traffic court at Fort Worth, Texas, an elderly woman who had a "ticket" bestowed on her for failing to observe a boulevard stop sign, told the judge that the city street department's activities in the vicinity of her arrest had made the thoroughfare so bumpy that her glasses were shaken off and she could not see the "Stop" sign. "Case dismissed," said the judge; "that's a new excuse, and I always dismiss for new excuses."

Dash With Passport

After a girl left Enniskillen, Ireland, on a train for Derry to catch a liner bound for America recently, her friends discovered that she had forgotten her passport. Her brother mounted a motorcycle and speeded the 60 miles, arriving with the passport two minutes before the tender left the wharf.

Who Was the Original Buffalo Bill?

DEATH OF BILLY COMSTOCK

THE GREAT BUFFALO-KILLING MATCH

COLONEL CODY ("BUFFALO BILL")

By ELMO SCOTT WATSON

ASK the average American who was the original "Buffalo Bill" and the chances are that he will answer without hesitation "Why, William F. Cody, of course." And therein he will be wrong, for there were at least two other men, who earned that title and were known by it, before William Frederick Cody made it famous throughout the civilized world. This does not mean that Cody did not deserve the title, for he won it away from one of the others, fairly and squarely, in one of the most spectacular contests ever staged on this continent. But it does not detract any from his fame to pay tribute to the prowess of these other two and to set forth their claims to having been the "original Buffalo Bill," even though Cody was the greatest "Buffalo Bill," with all that that title implies.

The man from whom Cody won his title by "right of conquest" was William Comstock, a celebrated guide, hunter and one of the favorite scouts of General Phil Sheridan during the Indian war on the southern plains in 1867-69. Comstock is one of the "mystery men" of the frontier, in that but little is known of his early career. Public interest in him has been revived recently by the Wisconsin State Historical society, as shown by the following story sent out by the University of Wisconsin news service:

Some Wisconsin town is entitled to considerable fame as the birthplace of William Comstock, a pony express rider and Indian scout who was a comrade of Buffalo Bill during his romantic pre-circus days. Comstock is known to have been born in Wisconsin and to have left early to go west and become a daring scout.

The state historical society, according to Charles E. Brown and Alfred O. Barton, Madison, is anxious to learn where he was born, who his relatives were, and from what part of Wisconsin he went west.

Colonel Homer Wheeler, formerly of the Fifth cavalry, who knew Comstock when he was chief scout and interpreter at Fort Wallace, Kan., devotes part of a chapter of his book "Buffalo Days," published by Bobbs-Merrill, to Comstock. He is the authority for the statement that Comstock was "born in Wisconsin of good parentage and left home at an early age and was one of the original pony express riders at the time Cody and Wild Bill were similarly employed. He was the first owner of the Rose Creek ranch, situated on that stream, about eight miles from the post."

During his service at Fort Wallace Comstock had gained such renown as a buffalo hunter that for some time he had been known among the officers there as "Buffalo Bill" Comstock. In the meantime, William F. Cody, who had done some scouting for the troops at Fort Ellsworth and Fort Fletcher, had been offered a job as hunter by the Goddard Brothers, who had contracted to feed the laborers who were building the Kansas Pacific railroad

west along the Smoky Hill river. Cody proved himself a skillful hunter and filled his job so well that one of the workers made a jingle about him which went as follows:

Buffalo Bill, Buffalo Bill,
Never missed and never will;
Always aims and shoots to kill
And the company pays his buffalo bill.

His fame as a buffalo hunter was spread by the officers at Fort Hays and came to the attention of the officers at Fort Wallace who believed that their "Buffalo Bill" Comstock had more right to that title than the Fort Hays officers' "Buffalo Bill" Cody. So they raised their share of a purse of \$500 to be given to the winner of a buffalo killing contest between Cody and Comstock. Soon posters began to appear in the stations along the new railroad which read as follows:

GRAND EXCURSION
to
FORT SHERIDAN
Kansas Pacific Railroad
BUFFALO SHOOTING MATCH
for
\$500 A SIDE
and the
CHAMPIONSHIP OF THE WORLD
between
BILLY COMSTOCK (The famous scout)
and
W. F. CODY (Buffalo Bill)
Famous Buffalo Killer for the Kansas Pacific Railroad.

Since the Kansas Pacific railroad was arranging the excursion, it was perhaps natural that it should give the title "Buffalo Bill" to its hunter. But their confidence in him was soon justified. The match was held 20 miles east of Fort Sheridan where buffalo were plentiful and the prairie was level enough for the great crowd of spectators (including Mrs. Cody, who had come on an excursion train which had been run from St. Louis) to see the chase. Cody was mounted on his famous hunting horse "Brigham" and armed with his equally famous needle-gun "Lucretia Borgia." Comstock used a Henry rifle which shot faster but did not hit so hard.

Having located a herd of buffalo, the two men rode into it, followed by referees. The herd split, with Comstock chasing one bunch and Cody the other. Cody soon had his bunch running in a circle and he dropped 38 of them, all within a small space. Comstock, who rode at the rear of his bunch shooting them down, killed 23 but they were scattered over a route of three miles. After a short rest another herd was sighted and again Cody was the winner by a score of 18 to 14.

The third run of the day was the occasion for a spectacular stunt by Cody. He took the bridle and saddle off Brigham, dashed into his bunch of buffaloes and shot down 12 more, then drove the last directly toward the wagons from which his wife and some of the other spectators were viewing the match. When the great beast was less than 50 yards from the wagon he sent it tumbling to the earth as the grand finale of the hunt. His final score was 69 to Comstock's 48. Cody continued to hunt for the Kansas Pacific until it reached Sheridan and in the space of 17 months he killed 4,280 of the animals, an additional reason for his right to be known as the champion buffalo slayer of the plains.

A few months after this match Comstock's career came to a tragic close. While out on a scouting expedition on Walnut creek with Lieutenant Beecher (later killed at the battle of the Aricares or Beecher's Island in eastern Colorado), Comstock and Grover

were ordered to visit the camp of Chief Turkey Leg of the Cheyennes, who was a special friend of both scouts, on the headwaters of the Solomon to learn if any of his people had taken part in a murderous raid in the Saline valley. Their reception was very cool one and finally Turkey Leg told them that they had better leave, since his young men were greatly excited and he could not control them.

Accordingly they started out, accompanied by the chief's son and six other young warriors who professed the deepest friendship for the scouts. But in the midst of a friendly conversation some of the braves fell quickly to the rear and opened fire. Comstock fell from his horse at the first fire, instantly killed. Grover, badly wounded, also fell to the ground. Then, using the body of his dead comrade to protect himself, he opened fire on the Indians and quickly drove them out of range. For the rest of the day he held them at bay. Then under cover of darkness, he managed to escape and reached Fort Wallace two days later, half dead from the pain of his wound and the exhaustion of his long journey.

Nor was Comstock the only one to have a claim to the title of "Buffalo Bill," prior to Cody's. "Nearly thirty years later, after the name had rocked the arena in every capital in Europe and America, a rival claimant was brought forward as the original possessor of the title," writes Richard J. Walsh in "The Making of Buffalo Bill," published by Bobbs-Merrill last year. He continues:

He was William Matthewson of Wichita. It was said that in 1850, the year of the great drought, when grasshoppers darkened the Kansas skies and fell on the crops as thick as a blizzard, Matthewson had gone out to kill buffalo, sending back wagonloads of meat to feed the starving settlers. And in their gratitude they dubbed him Buffalo Bill.

"How did William Cody happen to call himself Buffalo Bill?" an interviewer asked Matthewson.

"Well," he replied, "you see Cody worked for me when he was a young fellow. I reckon he had begun to read Indian stories and see how much was to be made by that kind of a reputation, and he was always fond of talk and show. I never was any hand to wear my hair long and go swaggering around the country blowing about what I had done. Cody knows he had no real right to the name, but if he wants to show off as a dime novel hero, I have no objection."

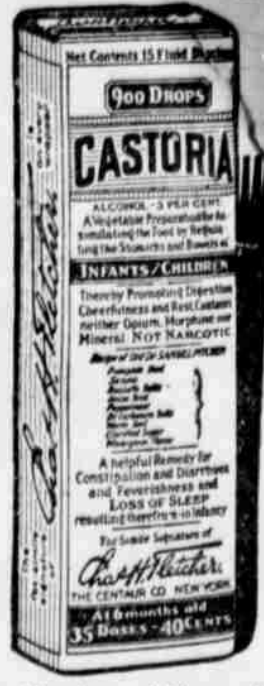

The querulous outbreak shocked and grieved the public of 1894. Reporters hurried to quiz Cody about Matthewson. He replied: "I never laid eyes on him and of course never worked for him. But this is the first intimation I have ever had that any reputable person other than myself has ever claimed the title of Buffalo Bill. A few years ago there were as many claimants for my name as there were wild yellow flowers that gave their name to the state. It reminds me of a portion of a sonnet finishing: But as fondly loves on to the close, As the sunflower gives to his God as he sets."

The same look he gave as he rose. The aptness of the quotation was not made clear by the interviewer.

Considering that in the sixties the plains were black with fifteen million buffalo and that thousands of men were killing them, it was not strange that many a nickname was based on the magic word. There was Buffalo Jones, there was Buffalo Chips, and there were other Buffalo Bills.

"But Cody seems to have won the title fairly," says Walsh in conclusion, and then tells of the famous contest with Comstock, after which "the referees declared Cody winner of the prize money, and, by the same decision, as he claimed, finally confirmed his right to be known as Buffalo Bill."

The upsets of Children

All children are subject to little upsets. They come at unexpected times. They seem twice as serious in the dead of night. But there's one form of comfort on which a mother can always rely; good old Castoria. This pure vegetable preparation can't harm the tiniest infant. Yet mild as it is, it soothes a restless, fretful baby like nothing else. Its quick relief soon sees the youngster comfortable once more, back to sleep. Even an attack of

colic, or diarrhea, yields to the soothing influence of Castoria. Keep Castoria in mind, and keep a bottle in the house—always. Give a few drops to any child whose tongue is coated, or whose breath is bad. Continue with Castoria until the child is grown! Every drugstore has Castoria; the genuine has Chas. H. Fletcher's signature on the wrapper.

Nature has its "headaches next day" as well as man. A storm is its headache.

To receive the keys to the city, one has to make a speech. Nothing in the world is free.

How A College Athlete Keeps Himself Well

BOB DEMING of Colgate, claims that a sensible method of health has really made life a pleasure for him. Mr. Deming writes that at first he could not believe this simple thing was the cause of his buoyant spirits. Finally, however, he had to admit that it was Nujol which was keeping him well, besides giving him, as he says, "five times the vitality."

Robert O. Deming, fancy diver on Colgate University Swimming Team.

"Believe me," he says "having free and regular bodily elimination makes all the difference in the world to a diver as well as to any other athlete. I can't afford to be nervous, sluggish, or depressed while diving. It just isn't done! I would like to urge any one, whether they think they are in good health or not, to give Nujol a try-out. It certainly can't do any harm, and I'll bet it would make them feel a hundred per cent better. It's worth trying!"

Mr. Deming has just about told

the whole story. He is right in believing that Nujol contains no drugs, no medicines of any kind. It is tasteless and colorless as pure water. It is simply harmless internal lubrication, which your body needs as much as any other machine. Regularly as clock work, Nujol cleans out of your body those poisons which we all have, and which make us low in our minds, tired, headachy, and below par.

The way for you to find out how much better Nujol will make you feel is to try it for a few days. You can get a bottle in a sealed package at any drug store. It costs only a few cents, but it makes you feel like a million dollars. Do you know how many thousands of people keep themselves well and happy just by using Nujol? Why shouldn't you feel well all the time? You can! Get yourself a bottle of Nujol today!

Many a politician has been short-circuited while engaged in wire-pulling.

It sometimes happens that a man doesn't get in bad because he is a coward.

Any COLD

That cold may lead to something serious, if neglected. The time to do something for it is now. Don't wait until it develops into bronchitis. Take two or three tablets of Bayer Aspirin as soon as you feel a cold coming on. Or as soon as possible after it starts. Bayer Aspirin will head off or relieve the aching and feverish feeling—will stop the headache. And if your throat is affected, dissolve two or three tablets in a quarter-glassful of warm water, and gargle. This quickly soothes a sore throat and reduces inflammation and infection. Read proven directions for neuralgia, rheumatism and other aches and pains. Genuine Bayer Aspirin is harmless to the heart.

WINTER BIRDS

you know, is fat, and birds very fond of it. All winter long of the birds stayed around, because a little girl named Cary put suet in a tree for the birds. By all flocked around the lilac where the suet had been placed on two branches.

"Are you going south this winter?" Mrs. Blue Jay.

"Don't believe I am," said Mr. Nutt.

"One of my friends told me of a bird in this neighborhood who suet and bread crumbs all through the winter, so he is here."

"Are you going to move to this neighborhood and stay here?" Mr. Nutt.

"Am I," said Mrs. Blue Jay. "I'm not going south this winter. I stay up here."

"There are so many birds that go south that it would be nice for the birds in these parts if a few stayed all the time."

"The birds all agreed and decided to form a suet club—and all members would live near the tree where Cary put the suet for them."

"Don't you think the little ones will be too?" asked Mr. Nutt.

"No," said Mrs. Blue Jay. "You hardly call them little now, do you?"

"That's so," said Mr. Nutt. "The same with our little ones. I forget that they're really quite grown up."

"The Blue Jay children flew along at this moment."

"Dear me, how they have grown," Mr. Nutt. "In just the same way as a grown-up will say this to a child."

"The Blue Jay children were much surprised, but of course they couldn't say anything. They did wish, though, that older birds would not keep such foolish things in so grand a way."

"Very soon the Nutt children flew along, and Mrs. Blue Jay told them how they had grown, too!"

"By all found it a tiresome speech, very soon a voice was heard not far off singing:

Chick-a-dee, chick-a-dee, chick-a-dee, and Mrs. Blue Jay called out: "Come to the club. Join the Suet Club."

"Chickadee and her family flew to the lilac bush and when they

Why is music cheaper on Sunday during the week? Because during the week you get it by the piece, on Sunday you get it by the choir (y).

Laid it to the Pup
Hard, age three, is the possessor of six-months-old brindle bulldog, up to mischief, so is Richard. One day mother found her young cake in a deplorable condition. Richard was hurrying away, mother halted him with, "Sonny, you been in this cake?" Richard looked up innocently and sweetly: "Mother, it's that dog again." Sunnyside News.

GEOGRAPHY CHANGES ARE MADE IN 1929

Boundary Settlements and Some Strife in Year.

Washington.—Important boundary changes, many settlements and some conflicts occurred during 1929.

A summary by the National Geographic society shows shifts of boundaries, populations, and sovereignties of the past year.

"Important events in the field of world real estate," says a bulletin of the society, "were the establishment of the Vatican city, the settlement of the Tacna Arica question with a division of the territory between Chile and Peru, the Mukden government's pledge of alliance to the central Chinese government at Nanking, the challenge to Russian railroad control in north Manchuria, Great Britain's approval of a plan to turn Iraq from a mandate into an independent nation, and the coup d'etat in Yugoslavia by which ministerial government was replaced with a dictatorship administered by the king."

South American Adjustments. "Marked progress in settling irritating boundary questions was made in South America. In addition to the Tacna Arica settlement, war in the Chaco region between Paraguay and Bolivia was checked by mediators. The mediators studying the question of which side was responsible for the clash have asked permission of the respective nations to pursue the inquiry deeper into the larger question of a possible boundary. Brazil is busy settling boundary questions on all sides."

Coincidentally with the declaration of dictatorship in Yugoslavia the name, Kingdom of the Serbs, Croats and Slovenes, was stricken out and the provincial boundaries were redrawn. Along the Rhine, the allied forces of occupation were cut down, 25,000 soldiers having been withdrawn in the last few months. With the evacuation of Wiesbaden, all British troops have left the Rhine, Basel, Switzerland, on the upper Rhine, was selected as home of the new international bank. Land-bound Czechoslovakia acquired a seaport in 1929 by purchasing port rights from the free city of Hamburg, Germany. Poles are reported to be buying up land of many Germans who are migrating to Germany proper from East Prussia, the German province separated from Germany by the Polish corridor.

"Little Monaco staged a Granatnikian revolt by which the indignant citizens (who pay no taxes) won additional constitutional rights from the reigning prince. On the northern limits of France the autonomy movement in Alsace was frowned upon by the government."

Saar Case Still Pending.

"The Versailles treaty calls for a final decision on ownership of the Saar and its iron mines by a plebiscite in 1935. This plebiscite may be abandoned if Germany and France can reach a preliminary agreement which is now a subject of discussion."

Premier Briand publicly launched the "United States of Europe" plan at Geneva. Economic welding of the continental nations is going on rapidly through the development of industrial cartels which serve to puncture tariff walls.

"In Asia, the Manchurian question, precipitated by the seizure of the Chinese-Eastern railway and the expulsion of Soviet railroad managers, may soon be settled."

"The United States and Canada signed a treaty permitting increased diversion of water from Niagara Falls for power development. In Central America the United States has assigned a corps of engineers to survey the route for the proposed Nicaraguan canal connecting the Caribbean sea and the Pacific. Guatemala and Honduras are trying to reach an agreement over the disputed El Cinchado territory."

"New territory was added to world maps by the discoveries of the Byrd expedition. Commander Byrd claimed for the United States Marie Byrd land, which lies outside territories to which Great Britain has advanced claims. In the Antarctic, also, Norway occupied an island in the Rørdal Amundsen sea for a whaling station, naming it Peter I Island."

"In the Arctic the Soviet government publicly proclaimed its ownership of Franz Joseph land. Norway has now definitely occupied Jan Mayen island, north of Iceland, and on the island Norway has established a meteorological station. Svalbard and Jan Mayen have been included under the new official name Svalbard."

Peiping Residents Object to Cow's Stomach Subject

Peiping.—Residents on "Cow's Stomach street" (Niu Tu Tsu) in Peiping have decided that in modern China the name of this street should be changed. They have petitioned the municipal authorities, asking them to change the name of the street to "Big Praying court," as more suitable to the glories of their district.

Adventurous Seal Shot Nibbling Decoy Duck

Melford, Conn.—The hunger of an adventurous gray seal which ventured in Long Island sound, far from the haunts of its kind, cost its life when it attempted to nibble a wooden decoy here. Frank B. Brown, who was waiting for winged prey, shot and killed the mammal.

SCHOOLBOY WINS BOUT WITH BEAR

New York Lad Catches Bear During Recess.

Ellenburg Center, N. Y.—Twelve-year-old Owen Le Claire of this village has shown local hunters something in the way of a novelty by capturing alive a 52-pound bear.

It all happened in this way: The Bigelow school had let out for recess one afternoon when young Owen spied a bear in a nearby piece of plowed ground. Two other boys and a little girl of ten years responded to the discoverer's hunting cry, well known in these parts, and together they started the memorable chase which ended in the capture of the bear.

The bear put on full speed ahead to evade the wild, unarmed pack of pursuers. It became entangled temporarily in a barbed wire fence, but before the youthful horde was upon it it managed an escape and fled over a small stream. Owen caught up with young brain at this point and hopped upon its back. He was hested in the encounter at the price of most of his clothes, but continued his attack.

Bruin climbed a tree, followed closely by the Le Claire boy, who had paused only long enough to pick up a piece of stray wire. The boy wound the wire around the bear's neck and anchored it to a limb of the tree, after which he descended for more wire.

Attaching the second piece to the leg of the struggling cub, the boy climbed down and pulled the animal after him. Once on the ground it became a contest of endurance. But the feeling of conquest was upon the boy and he won.

Once home he was offered \$50 for the bear. His reply was, "Not after that 'rassie.' I ain't gonna sell it." The bear, still in an ugly mood, was put into the Le Claire barn.

Laboratory-Made Snow to Aid Meteorologists

Los Angeles.—A discovery expected to be of value in the study of meteorology has been announced by Dr. John Mend Adams, associate professor of physics at the University of California. It is the making of snowflakes in his new laboratory in the physics building, on the new campus. While the task may seem comparatively simple, yet Doctor Adams began his work six years ago, entering a field which up to that time had not been touched by scientific investigation.

The apparatus used in the successful production of the white crystals includes a little glass tube, surrounded by bottles of gurgling water, a thermos jar, long coils of wires and rubber tubing, a cooling apparatus and a resistance instrument. As the snow crystals are formed they drift down upon a black cloth, properly cooled to preserve them for a sufficient time to allow for a microscopic study and for photographing.

Binds Himself for Life to Gain \$295 for Study

Portland, Ore.—His lifetime filed with service for \$295 in cash is what Robert W. Nealey, twenty-one-year-old orphan offers some benefactor, taking his tip from olden times, when apprentices were bound to their employers. Nealey wishes to study electricity. A school which he has picked out asks for \$295 for a three-month course. "If anyone will put me through school, I'll be his slave for the rest of my life," declares Nealey. "I'll continue the study of electricity if he desires, or do anything else."

Wild Animal Market in Slump, Hagenback States

St. Louis.—The business of supplying wild animals for zoos has slumped in the last few years, according to Lorenz Hagenbeck, junior member of the Carl Hagenbeck company of Hamburg, Germany, who visited St. Louis recently. "Only monkey sales are increasing in volume," he said.

Tea Consumption Grows

New York.—Cream for Uncle Sam's tea this year will keep a herd of more than 600,000 cows busy day and night and 500,000,000 pounds of sugar will be dropped into the nation's teacups. In the last five years Uncle Sam has practically doubled his tea consumption, and its use is continuing to increase.

Buried Under Snow Six Days; Dog Lives

Toronto, Ont.—You can't keep a good dog down. Concord Rockets, famous champion English setter, was struck by a train, hit on the head by a section hand who thought he was humane, and dropped in a ditch for dead.

For six days Rockets lay beneath a snow bank. They found his body, rushed him to a hospital where he was fed brandy egg-noggs and given a blood transfusion. Rockets was able to stand on his hind legs soon after.

WAGE FIGHT TO SAVE ANCIENT COURTHOUSE

Donors' Heirs Want St. Louis Landmark Left.

St. Louis, Mo.—Although St. Louis' stately old courthouse, where the only decision freeing a slave was ever returned, will soon be abandoned, it may still be retained as an historic landmark, even though it will be stripped of its official dignity.

The courthouse, which was once "the best in the west," has been replaced by another, a bigger and better one, and now official St. Louis is about to forget the old edifice.

The heirs of the donors of the site where the old courthouse stands, however, are not so forgetful, and with an array of legal talent among them, they are preparing to recover the property, which their ancestors once gave to the city.

Properly Given in 1822.

The recovery of the property, though valued at more than \$1,000,000, is not for commercial possibilities. Instead the descendants of the once owners of the ground want to insure the old structure against the possibility of its being razed.

The site, which is to be the basis of the suit for the recovery of the property, was given to the city of St. Louis in 1822 by two leading citizens of that period, J. B. C. Lucas and Auguste Chouteau. In assigning the property to the city they specified that it should always be used for the site of the County court.

Legal opinions advanced on the case differ. Some believe that the property can be recovered because it will not be used in the future. Others point out that it was given to the city for use as a County court—and St. Louis is no longer a county. They claim that the suit should have been instituted when the city and county were separated.

The Dred Scott Case.

This structure has housed the administrators of justice for over a hundred years, and decisions made within its walls have played an important part in the affairs of the city as well as the nation.

Its steps were once used as an auction block for slaves, and in one of its chambers the slave Dred Scott was adjudged a free man.

The Dred Scott case drew national attention, since it was a test of the claim of a negro that because his master had taken him to a territory where slavery was prohibited he was a free man and could not be inherited as a chattel upon his master's death.

An upheaval among the ranks of slave owners was felt when the court upheld the negro's contention, but the case was carried to the state Supreme court and the decision was reversed.

The negro was then sold to a New Yorker from the steps of the court which had a short while before made him free. With his sale to an owner where he would have to be transported Dred Scott took his case to the federal District court and then to the United States Supreme court in vain.

Accuses Daughter of Fraud in Mortgage Case

Boston.—A mother accuses her daughter of gross fraud in a bill in equity filed recently in the Middlesex Superior court at East Cambridge. Mrs. Alice S. Parker of Everett, through her attorney, Jennie Lottman Barron, asserts in a bill of complaint that her daughter, Mrs. Fannie A. Moses and the latter's husband, Samuel R. Moses, both of Everett, fraudulently obtained a discharge of a mortgage on land in Everett through deceit practiced on her, and asks the court to set the discharge aside.

The mother says that about September 24, 1925, her daughter obtained title to land at Kenwood road and Shute street in Everett, giving a promissory note. Mrs. Parker recites that on certain representations made to her a few months ago which constituted fraud, she executed a discharge of the mortgage she held. She further says no consideration was ever paid her for discharging the mortgage, and asks the court to enjoin her daughter and her daughter's husband from transferring the land. The case will come up for a hearing later.

Corpse Wished on Man by Snow-Bound Cortège

Lafayette, Ind.—Harry Golden, who lives six miles west of here, has a blizzard guest who is silent, contented and easy to entertain, but Golden was trying recently to oust the visitor. The guest is the corpse of Warren Trickey, sixty-nine.

Twenty friends laced Warren in a hearse and, riding in six automobiles, started to bury him in Painesville. The snow drifts tarooned the funeral. The corpse was lifted out of the hearse and carried into Mr. Golden's parlor, the nearest shelter. After a long struggle after 72 hours in the snow blockade, they left the remains of Mr. Trickey behind.

Man's Tobacco Bill

New York.—Although he spends his life enveloped in them, man spends less for his clothes than he does for tobacco.

The average American buys 1.57 suits, 1.8 pairs of shoes, and a ribbon-band or so less than two hats yearly. More than a billion dollars every year is spent by men in this country for clothes. They pay more than that to smoke, chew and snuff.

Improved Uniform International Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Member of Faculty, Moody Bible Institute of Chicago.)

Lesson for January 26

STANDARDS OF THE KINGDOM

LESSON TEXT—Matthew 5:1-48 (Print vv. 2-5, 17-20, 42-48). GOLDEN TEXT—Blessed are the pure in heart for they shall see God. PRIMARY TOPIC—How Jesus Preaches Us to Live. JUNIOR TOPIC—Jesus' Standard of Life and Service. INTERMEDIATE AND SENIOR TOPIC—Accepting and Following the Highest Ideals. YOUNG PEOPLE AND ADULT TOPIC—A Christian According to Christ.

I. The Characteristics of the Subjects of the Kingdom (vv. 1-12). These characteristics are set forth in the nine beatitudes.

- 1. The consciousness of spiritual poverty (v. 3). "Poor in spirit" means to come to the end of self in a state of spiritual beggary. 2. A profound grief because of the spiritual insolvency (v. 4). The mourning here is because of the keen consciousness of guilt before a holy God. 3. A humble submission to God's will (v. 5). This is the outgrowth of mourning over spiritual insolvency. 4. An intense longing to conform to the laws of the kingdom (v. 6). The one who has received the righteousness of Christ as a free gift follows after the purity of character which expresses itself in deeds of righteousness. 5. Merciful (v. 7). The subjects of the kingdom now take on the character of the King. Because of the mercifulness of Christ, His followers will be merciful. 6. Purity of heart (v. 8). Since the King is absolutely pure, the subjects who enjoy fellowship with Him must have heart purity. 7. Peacemakers (v. 9). The subjects of His kingdom not only have peace, but follow after that which makes for peace. 8. Suffering for Christ's sake (v. 10). The world hated Christ, the King; therefore those who reflect His spirit in their lives shall suffer persecution (II Tim. 3:12). 9. Suffer reproach (v. 11). To have all manner of evil spoken against us for Christ's sake is an occasion for glorying.

II. The Responsibilities of the Subjects of the Kingdom (vv. 13-16).

- The world is in utter darkness because of its corruption. The subjects of the kingdom are to live such lives as to purify and enlighten. Their responsibilities are set forth under the figures of salt and light. 1. Ye are the salt of the earth (v. 13). The properties of salt are (1) Penetrating, (2) Purifying, (3) Preserving. Since salt only preserves and purifies in the measure that it penetrates, so Christians only as they enter into the life of the world can preserve it from decay. 2. Ye are the light of the world (v. 14). This world is cold and dark. In this darkness the devil has set many pitfalls, and the subjects of the kingdom should so live as to prevent the unwary from stumbling. 3. The Laws of the Kingdom (vv. 20-45). 1. As to deeds of righteousness (v. 20). The deeds of the subjects of the kingdom must spring from Christlike natures. 2. As to sanctity of life (vv. 21-28). The duty of the subject of the kingdom is to conserve and sustain his own life and the life of others. Rash anger is heart murder (v. 22). 3. As to organized life (vv. 27-32). The family is the unit of society. The two awful sins against the family are (1) Adultery, (2) Divorce. 4. As to oaths (vv. 33-37). Whatever is more than the simple form of affirmation or denial comes of evil. 5. As to behavior toward those who do not recognize the laws of the kingdom (vv. 38-45). (1) Not revengeful (vv. 39, 40). Turning the other cheek after being smitten, means, after one insult, permit another without revenge. (2) Willingness to do more than is required (v. 41). If compelled to go one mile, go two miles with the one thus compelling you. (3) Be charitable (v. 42). Our hearts should always be open, ready to give to all. (4) Love enemies (vv. 43-45). Love to them consists in: a. Blessing them that curse us. b. Doing good to them that hate us. c. Praying for those who despitefully use us.

Chief Food

Wheat was evidently intended to be mankind's chief food, for it will grow over a wider area of the earth's surface than any other plant. There are over 1,000 varieties, suitable to different climates and soils.

The Explanation

"I've known several old maids," writes a correspondent, "but not one was a good cook. Why?" The obvious explanation is that good cooks are seldom old maids.

Coal Miner Becomes Poet

Robert Crawford, who was a miner in the coal fields of Scotland until crippled at his work, has become one of Britain's favorite poets. Some of his best work just has been published in a volume entitled "In Quiet Fields." Speaking of Crawford, Walter de la Mare said, "His poems prove once more how amazingly a real gift can triumph over circumstances."

Is Your Rest Disturbed?

Deal Promptly with Kidney Irregularities. IF bothered with bladder irritations, getting up at night and constant backache, don't take chances. Help your kidneys with Doan's Pills. Used for more than 40 years. Endorsed the world over. Sold by dealers everywhere.

50,000 Users Endorse Doan's: John Greener, 29 N. Sheridan Ave., Indianapolis, Ind., says: "I was troubled with backache, the kidney secretions were bad and contained sediment. I felt tired out and had no energy. Doan's Pills put me in good shape and I have used them several times with good results."

DOAN'S PILLS

PISO'S for COUGHS

PISO'S gives quick, effective relief. Pleasant, soothing and healing. Excellent for children—contains no opiates. Successfully used for 65 years. 35c and 60c sizes.
