FOUR DEAD, 11 HURT IN VIOLENT AREA CAR WRECKS

BY BETTY WILLIAMS

Roden must have some bounding virtues such as unselfishness and generosity.

He went to Amarillo Saturday to attend a board meeting of the Panhandle Press Association.

He called a couple of times, from Oklahoma City and from Enid. He keeps saying something about business holding him back.

He had the same feeling at Sunday morning. I would thought the Good Lord would be merciful had he allowed one of the choir to open his mouth.

He had intended to be my little personal chuckle got control. And, of course, in the choir, there was no one in anyone's mind where it from.

He was surely well represented at the Don Cossack Chorus in Lubbock Friday night. He had something to do the show being free.

He was arguing with Tom Hill and Jack Lacy that the chorister "The Lord's Prayer" of the only two number-ones in English.

He and Tom say it was strict arrangement and inter-ference. I can't believe anyone do that on purpose!

Cat Tackle Lee To Miss Title Clash

Littlefield's Wildcats will lay all their chips on the line here Friday night when they battle Levelland for the District 1-AAA championship.

The battle, scheduled for 8 p.m. at Wildcat Stadium, is expected to draw a full house.

The winner will get a crack at the state playoffs.

That's the big incentive for Coach Gene Mayfield's crew, although a victory over arch-rival Levelland may be incentive enough.

Lobos Seek Revenge The Lobos, on the other hand, will be seeking revenge for Littlefield's spine-tingling 13-7 victory last year.

The Lobos thought they had the better club. It pained them more when Littlefield advanced all the way to the state semi-finals before going down before eventual State Champion Garland.

Littlefield will go into Friday night's clash without one ace in the line.

Tackle Wallace Lee, a confidence-building, hard-hitting line-man, definitely is out with a banged-up leg.

Mayfield says the 190-pound tackle won't even suit out. Lee was hurt in the Wildcats' 6-37 victory over Dumas last week.

The Littlefield coach answers a question about the game with two words: "I'm scared."

Levelland's Coach Johnnie Hickman said earlier in the week that all his boys are expected to be ready for the clash.

Most observers figure the battle as a tossup, although Littlefield's stock went down with the news that Lee will be out.

Similar Results All games with common opponents show similar results. In district play, the Wildcats topped Phillips, 13-7. Hereford 33-6 and Dumas 42-12.

Levelland whipped the same clubs, Phillips by 13-7, Dumas by 42-7 and Hereford by 42-19.

The clubs had two other common opponents. Littlefield edged Brownfield by a touchdown and so did Levelland. The Wildcats lost to Plainview by a touchdown, while Levelland went down by a (Continued on Page 3)

Flapjacks will be the order of the night Friday from 5 to 7:30 p.m. when the local Lions Club will hold its annual pancake supper.

Some 500 persons are expected for the event, to be held in the Littlefield High School cafeteria. About 600 attended last year's supper.

Advance ticket sales are going well, Lion Kenneth Wade said Wednesday. Most of them will be sold at the gate, however, he said.

Boone To Study Grand Jury Plan

County Judge Pat Boone Jr. said this week he will do some more investigating on his own before he makes his mind up on a proposal for a juvenile officer in Lamb County.

"By my own investigation," Judge Boone said, "I hope to find out what the experience with juvenile officers has been in other counties I have recently learned about."

Judge Boone's comments came after a Lamb County grand jury recommended last week that the county employ a combination juvenile officer and juvenile probation officer.

The grand jury, in a report to District Judge E. A. Bills, said it had found a "need for" such an officer in Lamb County.

Judge Boone, in the midst of a study of the proposal when asked for comment, said he'd like to check operations in other counties "against ours."

That might determine, he said, "whether juvenile officers can be a really functional part of law enforcement in a county this size."

"I'd like to check Dawson County," he said. "They got into a mess on it. I also want to check Lubbock. I understand they have a juvenile council, where the juvenile officer is just a part of a large program."

"Hockley County," he said, "has had good luck. Before we went into it, we would want to be sure we would have as good results as there."

He said that if "a juvenile officer could come in and keep kids off the street and counsel them, the right sort of man could do a lot here."

County Attorney Curtis Wilkinson, commenting earlier, said he'd like to see a combination man—juvenile and adult probation officer—for Lamb County.

In the past, the sheriff or another officer usually has been appointed for adult probation work, and law enforcement officers don't have time to handle such a job, Wilkinson said.

# Area May Get Cotton Cut 1959, Fortenberry Says

CK—Texas High Plains producers face a drastic cut in 1959 of more than 10 per cent if present laws are maintained, W. O. Fortenberry, president of the Plains Cotton Growers, Inc., said today in a report on cotton acreage.

average cut of 32 per cent from 1957 and 1958 allotments. Actually the percentage reduction taken by the larger growers will vary widely from state to state as some states require a much greater acreage to meet minimum requirements. The 13 million acres of cotton in 1959 does not take into consideration the Soil Bank acreage reserve. The present Soil Bank Act was applicable for 1957, 1958 and 1959 seasons. Appropriations to finance the program, however, are made annually. Should appropriations be made to extend this program to 1959, cotton acreage planted might be reduced another 2 to 3 million acres.

Under these circumstances, the passage of corrective legislation in 1958 is unquestionably essential if the cotton industry is to have a future in the United States. That is why the Plains Cotton Growers are supporting the proposed ACPA cotton, bill and why we think every cotton producer should support," Fortenberry said.

To meet the requirements for the Silver Award he has made four ratings. These are Vocational, Physical Fitness, Outdoors and Emergency Service. He has earned these after twenty-one months of service.

The publicity chairman, Mrs. John Vrabel announced that at the December meeting the program will be a film entitled "A Desk for Billie" about a little girl of migrant parents and her struggle for education and a better life for herself and how different teachers helped her along the way.

In October of 1956 he earned the Bronze Award and last June received his Gold Award.

# Chemical May Solve Texas' Water Evaporation Problem

ABILENE—Recently conducted tests on a chemical used as the base of many cosmetics may provide an effective solution to West Texas' water evaporation problems, an article in the November issue of "West Texas Today" says.

## Views From Pleasant Valley

The P.V. Gun Club met at the Community Center Tuesday night with Roy Shoemaker in charge of the business session.

The chemical, hexadecanol, has proved effective in reducing water evaporation by as much as 45 per cent, the article in the monthly publication of the West Texas Chamber of Commerce says.

John Inman acted as secretary in the absence of the secretary. It was voted to have a "turkey shoot" on Nov. 23 and 24th. Turkeys or hams are to be given to the winners.

Tests conducted by the Southwest Research Institute in San Antonio, under the auspices of the Southwest Water Evaporation Research Council, have shown the chemical to be highly effective when spread over the surface of a lake or other reservoir to form a "lid" that prevents evaporation.

Shoemaker and Inman are to take to Lubbock to buy shells for the shoot.

The tests were started over two years ago in an effort to reduce the evaporation that causes a loss of nearly as much water each year as is used in domestic and industrial consumption.

Members present for the meeting were Tommy Bickell, Leroy Hicks, John West, Dewitt Preure, Merrill King, Inman and Shoemaker.

Explaining that the evaporation process occurs when water molecules become highly active, as a result of a rise in the temperature of the water, and finally move so rapidly that they leave the reservoir, the SWRI scientists state that the chemical cover acts as a "lid" to prevent the molecules from escaping in the form of water vapor.

Mrs. Leroy Hicks and Mrs. Jack Calhoun were in Amherst Friday afternoon where Mrs. Hicks was consulting a physician there.

When spread over the water's surface at a thickness of about one ten-millionth of an inch, hexadecanol becomes completely tasteless, odorless and colorless, the article says. The Public Health Service has certified that the chemical is harmless to human beings and experiments have proven it to be harmless to plant life, animals and fish.

Mrs. E. K. Angeley and children spent last weekend in Carsbad, N.M.

Water which would otherwise be evaporated by the sun can be saved at an estimated cost of half a cent per thousand gallons, researchers say.

Mr. and Mrs. T. B. Dyer of Springlake were recent guests in the J. W. St. Clair home.

If the film is spread apart by a boat, swimmer or wave action, it almost immediately rejoins to continue preventing evaporation.

Charles aMrtin was consulting a physician in Muleshoe Thursday, due to an infected hand.

### Army Reserve Offers Tryouts For Marksmanship Program

Army Reserve units and reserve personnel within the Fourth U.S. Army area will be offered additional opportunities to participate in the 1958 competitive marksmanship program according to an expanded plan announced by the United States Continental Army Command.

Previous try-outs for the Fourth Army Reserve rifle and pistol teams were limited to a composite selection by military districts of the five states included in this command.

New criteria call for a ten-man rifle team and an eight-man pistol team from each reserve unit of company level within the five districts. Inter-unit competition from company or similar organizations through regiment will determine top scoring individuals to form the district entry teams for the Fourth Army Area Matches.

Selected district rifle team members must include at least two individuals who have never participated as a team member in an equivalent match within the active Army. Pistol teams must include a minimum of one who has not participated in Active Army matches.

Aside from team members to represent a limited number of Army Reserve units, individual entries from districts will be determined by the Fourth U.S. Army Command.

Final rifle team for participation in Army Area Matches of six firing members, a captain and a team are additionally selected an officer-in-charge, administrative assistance and a smith.

Results of the Army Area matches will determine the one rifle and one pistol team to represent the Army in the Fourth U.S. Army Area National Matches held at Camp Perry, Ohio. The eight individuals selected for proficiency in marksmanship will be in the service rifle. Six such individuals with the service pistol chosen as entrants.

IN 58 DAYS A '58 PLYMOUTH RAN 28,000 MILES—EQUAL TO  
**MORE THAN TWICE AROUND THE WORLD**

AND IT DROVE EVERY INCH OF THE WAY!

We know this car was tough. We designed it that way. That's why we weren't afraid to give Plymouth the toughest test run of all time... with all America as the "track."

We didn't coddle this Plymouth. Didn't create it and ship it carefully from place to place. Instead, we aimed it out of Los Angeles one rainy morning and sent it through a course that ran 28,000 miles through 37 states.

The time limit? Only 58 days. A thousand miles a day!

The equivalent of 6 years' driving compressed into little more than 8 weeks!

Three times this Plymouth crossed the Rockies. Three times it wound its way up and down across the country... passing through more than 1200 cities and towns. Whipping over turnpikes... creeping through city traffic... arrowing down super-highways... looking its way through 500 miles of rutted detours. And when the drivers turned the key to end the marathon, it still looked, ran and rode like new.

This is what lasting value really means. The ability to take everything that American roads and weather can dish out—and come up grinning. Why don't you give Plymouth a test drive yourself—today? You'll see what we mean.

That's the Plymouth "stuck"... and just look at that route! Every possible road and weather condition. Plymouth ran every inch of that murderous route 3 times in just 58 days. What greater proof of lasting, built-in sturdiness!

Star of the Forward Look... **Plymouth** ahead for longer!

# Littlefield Choirs Slate Busy Schedule

*The A Cappella Choir*

## Activities Planned For Rest Of Year

Members of the Littlefield schools' choral department have a busy schedule in front of them.

Director Hugh Ellison's group, fresh from their annual fall concert here about two weeks ago, will sing Monday at a high school assembly.

Scheduled to appear on the program are the Boys, Girls and A Cappella choirs.

The next night, two of the high school's ensembles—the Six Teens and Triad Aires—will sing at the District FFA banquet here.

Next on the agenda for choir members are the all-state choir tryouts in Lubbock Dec. 6.

It's not all work and no play for the choirs, however. They'll sponsor an appearance of the West Texas State Choir here in assembly Dec. 11.

An appearance of the McMurry College Choir is scheduled sometime later.

The A Cappella Choir will sing before the local Rotary Club sometime in December, tentatively set for Dec. 12 or 13.

Then all the high school choirs will come together for a Christmas assembly Dec. 20.

The Seventh and Eighth Grade choirs will present a Christmas assembly about the same time at the junior high school.

In January, tours are planned for one or two of the choirs. Those who don't make the first tour will go on another sometime in April.

The choirs' next full-length concert will be Feb. 10 in the high school auditorium.

Tentative plans call for some recording at the Norman Petty Studios in Clovis in March, along with the Interscholastic League Choir Meet in Plainview the same month. The year will be topped off with a variety show featuring all choirs here May 12.

### World Population Figures Show Communist Advances

The new world population figures calculated by the United States Bureau of Census are food for sober thought, from the viewpoint of Communist domination.

The Census Bureau estimates there are 2,500,000,000 people in the world. Half of these are in four nations, the mainland of China, India, Russia and the United States. Red China is the largest with 382,603,000 people. India is next with 383,953,000, followed by Russian with 202,580,000. The United States is well behind in fourth place with 169,800,000.

More than 785,000,000, in Red China and Russia, are directly under Communist rule. India, although claiming neutrality, is sympathetic toward the Communists and in a global war could be expected to aid only the Reds. Among the big four in population, the Reds have an enormous edge on the free world.

Add to these millions the peoples in the Balkan countries which are Red-ruled, Poland, East Germany and the Communist nations of Southeast Asia. Add, too, the foothold that Russia is getting in the Middle East, especially Syria, and the situation becomes serious for the free world.

Nearly half of the peoples of the world are under direct Communist rule or co-operating with them.

The figures show impressively how our own ineptness in foreign policy is now coming back to haunt us.

### Meat Preferences Change

We Americans, to propound a truism, are meat eaters on a grand scale. Our annual per capita consumption runs round 160 pounds more than in any other comparable country. The figure is only exceeded in some of the smaller nations whose economies are based on meat, such as Australia and Argentina.

However, despite the old principle that "pigs is pigs" our preferences in meat do change, and substantially so. What has happened in the last 16 years was recently described by E. E. Broadbent, livestock marketing specialist at the University of Illinois.

We eat much more beef per capita—85 pounds last year as against 55 in 1940. Veal, too has found increasing public acceptance, to the tune of a 30 per cent increase in the same period of time. And consumption of poultry and eggs has shown substantial gains.

Contrariwise, lamb and mutton have slipped down the ladder. Last year's per capita buying of these was 4½ pounds as compared with 6½ pounds in 1940. Pork was declined from 73 to 67 pounds for each of us. In this connection, Mr. Broadbent believes that pork's loss of favor is due to its high ratio of fat to lean. He advises farmers to recognize changes in consumer preferences for meats and plan their production accordingly.

Wise farmers watch trends and do that. For the great American meat industry will and must give the consuming public the cuts and types it wants, where and when it wants them.

### Tax Man Sam Sez:

Most folks don't worry about how much income tax they owe until it's too late to do something about it. Cash basis farmers, businessmen, and even individuals can affect the amount of tax they pay during the year on a small scale the same as a lot of big corporations do. The corporations simply plan their business to make a sale during this year or next, or on the other hand, to incur an expense for this tax year or the next. Since most taxpayers are on a cash basis, it may not cost you very much to pay the preacher a lot more for the rest of the year than you ordinarily would if you have a lot of income or are going to itemize your tax deductions for the year. On the other hand, you may want to wait until January 1 and just give the preacher enough to get by on until next year since you can better afford a tax contribution for the next tax year than you can for this one. It is certainly worth thinking about from not only paying the preacher angle, but from all income and expense angles. A study of your tax instructions may be advisable.

### Farm To City Trend Jumps

It isn't difficult to visualize the plight of American cities after reading the latest figures from the United States Census Bureau on farm-to-city migration. The figures indicate laborers, and plentiful job opportunities in cities.

Federal and state officials should take heed of the Census Bureau figures and be willing to help the cities solve their problems of growth.

Between April, 1956, and April, 1957, farm population dropped from 22,257,000 to 20,396,000, a spectacular drop of 1,861,000. Reason cited are farm mechanization replacing that in one year, one out of every 11 farm dwellers in the United States moved into a city.

### Highlights and Sidelights From Your State Capitol

By VERN SANFORD  
Texas Press Association

AUSTIN—Texas' lawmakers are striving hard to forge a new tool for dealing with police powers, insofar as school segregation-integration problems are concerned.

Proposed is a "last-resort" law to be used, presumably, in situations where threat of federally-enforced integration is met by strong local opposition. It would allow the school board to shut down the school until "the earliest possible time when peace and order can be maintained without the use of occupation by military forces."

Gov. Price Daniel's call also asked that the law provide (1) that state aid; accreditation, salaries, etc., not be affected by the closing (2) that school boards may transfer local pupils and (3) that the attorney general be authorized to assist local school districts in contesting integration suits in federal court.

Though Legislative operating funds ran out over the weekend, both House and Senate decided against a "crash" program to enact the bill overnight. Strong opposition was not foreseen, however.

FISCAL HANGOVER—Lawmakers who return for the next regular session January, 1959 face a daunting "atmosphere" with a \$22,000,000 deficit.

Last summer State Comptroller Robert L. Calvert predicted the deficit would end this two-year period with a \$8,000,000 deficit. His latest estimate doubles that figure.

Calvert revised his figures after voters this month approved a constitutional amendment upping state pension payments.

Legislators already are skating on the edge of financial embarrassment in their day-to-day operation. Fund for their salaries, expenses, etc., was down to about \$45,000 when the last session ended. With costs running about \$11,000 a day, they were due to start drawing this week on the governor's deficiency fund, earmarked for "emergencies."

But the real calamity, as many legislators see it comes year after year when they will have to find a way to glue the "busted" budget together again. Most agree, gloomily, that it means new taxes.

NO "FIDELITY" BUT—Legislators' comments on the laws passed during the first special session ranged from "monstrosity" to a shoulder-shrugging "better than nothing."

But they did pass—all five that the governor asked.

Spokesman for the governor admitted he wasn't exactly "thrilled" with the watered-down water bill, but that he would accept it in a public statement Governor Daniel commended the lawmakers for their accomplishments.

Briefly, the new laws do this:

1. Set up a water planning division to do research on Texas water resources and report to each regular session. No authority to draw up a statewide plan was conferred, and the appropriation was cut from a recommended \$1,200,000 to \$900,000. Water Board was given authority to negotiate for state water storage in federal reservoirs—with legislative approval.
2. Require registration of those who seek to influence legislation "by direct communication" and reporting of expenditures over \$50.
3. Require registration of those who, for pay, represent others before state agencies.
4. Set up a commission to study Texas law enforcement and report to the next regular session.
5. Appropriate money for a building for the State Insurance Department.

WHAT NOW?—Senate rejection of the appointment of William A. Harrison as insurance commissioner put that department in a quandary.

Without an administrative head, the department cannot conduct even routine business; nor can it pay its employees. Members of the Insurance Board asked Atty. Gen. Will Wilson for guidance.

Under the Constitution the Senate has the authority to pass on all appointments made by the governor to constitutional offices. It does not, however, pass on the appointments of various state boards within their departments.

When the Insurance Department was re-organized last spring, the new law authorized the governor to appoint Insurance Board members and the board to appoint a commissioner. But it was specifically written into the law that the Senate would have confirmation power on the board's appointment of a commissioner.

Senate approval the governor's

appointments to the board, but turned thumbs down on Harrison. A former assistant state auditor, Harrison had been serving in the \$20,000-a-year post since early last summer.

Board members asked Wilson's opinion on (1) Does the Senate have the constitutional authority to pass on a board appointment and (2) if so, what'll we do until we can find a new commissioner?

"NO URGENCY" — Insurance Department is being beset by the Senate from another quarter as the investigation into a delayed report continues.

Senate committee questioned two department officials on why three months elapsed between receipt of an unfavorable report on Preferred Life of Dallas and department action on the matter.

Paul D. Connor, assistant commissioner, said he saw "no urgency" in the report since it did not involve insolvency. E. B. Kelley, chief examiner, said he didn't think there was "anything significant" about it.

Earlier, the man who made the examination said he had found evidence of illegal stock manipulation involving some \$94,000.

COTTON RAINED OUT — Unusually rains probably have cost Texas cotton farmers some \$100,000,000, says Agriculture Commissioner John White.

Rain kept harvesters out of the fields, said White, and greatly

cut the quality of the cotton still on the stalks. "It's a real economic blow to many farmers who had prospects of the first good cotton crop in several years," White observed.

SHORT SPORTS—Sen. William T. Moore of Bryan is president pro tempore of the Senate for the second called session. He succeeds Sen. Searcy Braecwell of Houston.

One of the things for which Texans can be thankful this year is that there will be only one Thanksgiving. Governor Daniel proclaimed the Texas holiday of Nov. 28, same as the federal holiday. . . . Governor Daniel has asked President Eisenhower for emergency federal aid for Jefferson, Bell, Orange and Fayette counties, recently hit by floods and tornadoes. . . . A senate-passed bill clears the way for getting land for a Texas Employment Commission building just north of the Capitol. Bill would increase the site-buying appropriation from \$350,000 to \$1,100,000. Probable location now is occupied by a Lutheran Church.

### Philosopher Fights Boom By Dozing In His Chair

Editor's note: The Sandhills Philosopher on his Johnson-grass farm apparently has gotten his mind off Russian satellites and back to inflation. He's as much an authority on one as the other.

Dear editor: I found two copies of some newspapers out here yesterday afternoon alongside the road by my farm where somebody had dropped them from his car and judging by the ants in them, they'd been used to wrap up a picnic lunch, and I thought you'd like to know that one of them was a copy of the Lamb County Leader, and the other a copy of the Fort Worth Star-Telegram and I examined them both carefully and found exactly fourteen ants in each one, which proves that when it comes to being anti-pro, there's not much difference in newspapers.

But what interested me, after I'd shook the ants out, was an article in the big daily about two Senators on a special committee in Washington to investigate inflation.

According to one of them, Americans should be allowed to have more spending money, as he claimed the factories in this country aren't producing as much as they could and would if the people had more money to spend. The only thing is, he didn't say

where the extra spending is coming from.

According to the other, just the trouble, the people too much money to spend in turn produces inflation. He said if we had more money, it would bid higher for things which would only produce inflation.

Now I'm not smart enough to settle this argument, but I like to say that while the latter Senator can command a wife he has enough money to have a different type wife, while the other can't furnish her with money, he's got to wait for a Senator until he can get a lot more money and said the actor could run the Senate and run her house and a lot smoother than the Senator. She also added that I'd have more cash maybe if I had more, but anyway I'd like to see the more you make and the more you can spend the more you can buy to the high cost of and I'd appreciate it if you can en around here understood.

What the women of the try ought to understand is when a man is doing in his he's not loafing, he's fighting.

Yours faithfully,  
J. A.

**About Your Health**

**Parents Should Realize Danger Of Common Cold**

"Parents, more than anyone else, are responsible for setting a good example to their children in safety practices."

J. O. Musick, general manager of the Texas Safety Association, made this statement, today, in behalf of TSA's current program to develop healthy safety attitudes.

"Parents often treat children as if they were deaf, dumb and blind," he said. "They don't realize that children have keen minds and pick up their first habits, good and bad, from their parents. This is especially true of safety habits."

"Truly, safety begins at home and parents should be sure their actions set the right pattern of safety practices for their children to follow."

He also said that parents themselves are often victims of their own carelessness, or are responsible for accidents to their children through failure to stress safety measures in their own behavior around children.

"Many parents," he said, "will drive carelessly, jaywalk or use unsafe tools around the home, in the presence of their children. Yet these mothers and fathers will scold their children for doing the same thing."

Musick reminded parents that past National Safety Council figures indicate that more than 16,000 children under 14 years of age will die in accidents of all types this year — unless better safety education is provided in the home.

"It simply doesn't add up," he said. "If parents want to do right by their children, they must set a good example in everything they do. If they want to instill in their children the necessary precaution of the list of scheduled acci-

cautions which will keep them safe, they had better inventory their own safety habits.

"Be safe parents," Musick declared, "and you'll have safe children."

**Homecoming At Wayland Set Dec. 13**

PLAINVIEW — Wayland Baptist College defies superstition this year when the 1957 homecoming celebration begins at 10 a.m., Friday, Dec. 13, with a chapel address by Ernest Craig, El Paso Craig, assistant general agent for Aetna Life Insurance Company's El Paso division, is former Wayland student, dean of men, instructor and coach. Last January he was elected to serve on the El Paso city council for a two-year term.

Unique aspects of this year's homecoming are the coronation of the queen Friday at 7 p.m.; the high school band contest Saturday afternoon; and the dinner for former students at 5 p.m. Saturday. The later two events are being sponsored by the Association of Former Students according to C. L. Beard, Plainview, president. A business meeting of the former students will be held during the evening dinner.

Former students will form the judging committee for both the parade floats and the dormitory displays, which will be designed along the theme of "The Fabulous Forty-Eight."

"All My Sons," by Arthur Miller, will be presented by the Wayland Speech Club Friday following the coronation. Henry Eason is the director.

Following the 11 a.m. parade there will be a western-style barbecue Saturday noon on the campus grounds. This will give way to the dedication of another link in Wayland's "Memory Walk," a Future Pioneers Parade of the children of former students, a talent show and a bonfire.
