Anton Youth Eyes Future Following Heart Surgery The future looks bright to 16-year-old David Buchanan,

Anton, a cheerful youngster who, until last month, had lived all his life under the shadow of worsening heart condition which his family and friends always had considered incura-

David, son of Mrs. Christine Buchanan, had open heart sur-gery at Children's Medical Center, Dallas, July 20th and today he and his family are still awed at the miracle of this relatively new and daring type of surgery which doctors believe completely cured David of the congenital heart condition he has had

since birth. The junior-to-be at Anton High School was out of the hospital several days after the operation and already is per-colating at normal efficiency. Only this time he hopes for considerable improvement over what has always been a restricted life for him. Doctors say that in a short time he should, through normal growth, completely catch up with his heart and within a year should

In most instances, it takes a month to prepare for the operation and it rarely is performed as an em-ergency, since the hospital must be given time to reserve opbank must have time to schedule the drawing of at least 10 pints of blood from line donors on

the day of the operation.

When David had this operation after "marvelous" cooperation and help from state and county officials who arranged for payment of the heavy expenses, a team of four doc-tors, an aneathesist, and elec-trocardiograph operator work-ed together. The operation lasted more than four hours.

In open heart surgery, the chest is opened and the arteries and veins are attached to the heart-lung machine which does the work for the heart and

David's sister, Linda Sue, 17. and brother, Donnie 15, suffered the anxiety of the operation through with their mother, but after it was known that all was well, they had to chide David a little. "Maybe now you can do your part of the hard work ar-ound here." Donnie said.

One may be sure that David will be so happy about his new freedom that he will be more than glad to do his part of the hard work

Downtown Improvers Get Word on How It Has Been Done

Grand Junction, Colorado to remodel its downtown business district were outlined Saturday to Littlefield's Downtown Improvement Committee and other local interested persons.

Joe Lacy, city manager of Grand Junction, spending the past weekend in Littlefield with his family at the invitation of Dr. Bill Orr and the local com-mittee, comferred with the Lit-tlefield group during an extended luncheon session.

The committee met to view a slide presentation depicting Grand Junction's downtown redevelopment and beautification project from its inception to its fruition. This program brought Grand Junction to the attention of communities throughout the United States and several foreign countries plus an All-American City award.

presentation Lacy threw the floor open for questions. He stated that the Grand Junction project required the cooperation of property owners, tenants, the government, the chamber of commerce and the entire citizenry. This cooperation came. said Lacy, because the people realized that the economic sta-

City Adds 23 Streets For Paving

Initial steps were taken Tu-esday for the inclusion of 23 streets, representing about 50 blocks, to the city's street

paving program.

A resolution to include the streets passed its first of three required readings at a special session of city council. A public hearing for involved property owners has been sum-moned for 5:30 p.m. Sept. 10 at city hall.

The total amount to be assessed property owners along the 50 blocks has been estimated at \$159,865,25. The project provides for 1 1/4-inch asphaltic concrete surface with a six-inch caliche base. Streets included in the new

resolution are East Seventh. Galveston, Hilbun, Ash, Beech, Reed, Bell, Latham, Elms, Jones, Central, Griffin, Davis, Bridges, Dellas, Basin, Austin, Phelps, Morse, Wicker, Dillon, Duggan and Duncan, A detailed description of the streets, or portions of streets included in the proposed project, is pub-lished in today's leader.

Grades one through eight will register Monday, on the first regular day of the Whitharral

school year.
Sims said all parents and citizens of the Whitharral district are invited to a general assembly to be held Monday, starting at 9 a.m. in the school cafe-

torium. School buses will run for the first time on Monday and the school lunchroom will serve meals for the first time on the same day. Lunch prices will be the same as last year, 30 cents for grade school and 35 cents for high school. One change in the lunch room for this years, Sims said, will be that a student purchasing his meal in the lunch room will be allowed to drink all the milk he desires at mealtime without any

extra charge. Sims said the Whitharral school faculty is complete for the 1964-65 school year, as well as all other school personnel. Members of the schoool board are Ed Johnson, president; T. C. Wade, Don Redding, V.G. Simmons, Clifford Williams. Clifford Throckmorton and Rafe

Anti-Bollweevil Funds In Appropriation Bill

Representative George Mahon advises that he was able to secure the full \$1 million for the campaign in West Texas against the advance of the bollweevil in the agricultural appropria-tion bill which passed the House and Senate last week, Farmers have agreed to match the federal funds. The program was strongly supported by the Plains Cotton Growers, the area-wide Boll Weevil Committee and other farm organizations.

The agriculture money bill was scheduled to be signed by the President this week, In addition to the boll weevil money. it contains planning funds for the construction of five laboratories designed to explore ways of reducing the cost of U.S. Cotton production, making it more competitive with snythetic fibers and foreign cotton, One of the laboratories will be at Texas Technological College or at the Experiment Station north of Lubbock,

The bill also included the full budget estimate of \$14,744,000 for the Great Plains Conserva-

tion Program which is important in the Southwest.

Mahon pointed out that the agricultural weather service which began last year in the South Plains area in a limited way would be expanded to cover more counties this year as a carrying funds for the weather lieu of \$1,000 bond. service which was also ap-

vice funds this year for the pro-gram announced by the Department of Agriculture to make the micronaire on cotton a determining factor in the amount of the support loan for cotton, Con-gress was dissatisfied with the way the matter was handled by the Department and decided to withhold action on the program this year.

Under the proposed micronai-re system for cotton loan, there would be a discount on low micronaire cotton and a premium on high micronaire cotton. The greatest area of production of low micronaire cotton is in Texas, especially in West Texas,

Mahon said that it was generally agreed that the micronaire was an important factor in evaluating cotton and that West Texas cotton farmers should keep in mind that the time is approaching when the micron-aire will be taken into account in fixing the amount of the support loan. When this happens, in order to avoid losses, West Texas cotton growers will be confronted with the difficult

Quality Peaches Are Available For Housewives

COLLEGE STATION -- This year's peach crop of an esti-mated 3 million bushels is reported to be the best in years,

quality-wise.

Pick a peach, but please don't pinch or poke, says Mrs. Gwen Clyatt, Extension Service Consumer marketing specialist. Ripeness is your clue, Peaches

must look good to be good. Quality peaches are firm, mature, well-formed and free from decay and injury. Peaches have yellow skins and flesh, so look for creamy-to-gold color under the red blush, Red blush alone is not a sign of ripeness, for the amount of blush varies according to peach variety. Avoid hard peaches with green background color, for they're immature, lack flavor and will never ripen pro-

Keep full-ripe peaches in the refrigerator, the specialist suggests. Consumers will recall that a pound of peaches -or three medium size peaches-yield about 2 cups sliced pea-For an eight-or-nine inch pie, 2 pounds of fresh peaches are required.

Caddo Wheat **Shows Good** At Dimmitt

The reports came from every section of Texas, Dr. Atkins said, and practically all reported Caddo yields were equal to or better than those of other varieties grown on their farms. Yields ranged from less than 15 bushels per acre to a high of 84,3 bushels. The high yield was produced under irrigation near Spearman in the upper Panhandle and compared with a yield of 76.1 bushels per acre for Improved Triumph on the

Bill Card and Carl Bray, Waco, were guests of Mr. and Mrs. Floyd Morton, Martha and Virgil, Sunday.

Mrs. G.P. Ponder has as her guests this week, Mrs. J.A. Leckleter, Prescott, Ariz.; Mr. and Mrs. Paul Grant, Clovis, N.M. and Mrs. Pat Jennings.

COLLEGE STATION -- TWenty Texas producers of certified seed wheat like the new variety Caddo. The 20 received foundation seed of the new variety in the fall of 1963 and have just reported on their 1964 harvests to Dr. I.M. Atkins. small grain section leader of the Texas Agricultural Experi-

ment Station. same farm

On a Castro County farm near Dimmitt, Caddo produced 57 bushels per acre as against'42 bushels for Kaw. The 20 growers reported an overall average of 33 bushels for Caddo against a 29 bushel average for other varieties grown on the

The growers also told Dr. Atkins they liked the agronomic characteristics of the new wheat. Seven said it produced more forage for winter grazing, the same number said it had stronger straw than the other variety grown and six said it was more hail resistant. On one farm, Caddo was damaged only 8 percent by hail compared with 17 percent for

Several of the growers told Dr. Atkins their Caddo had higher test weight per bushel and that it rusted less than other varieties -- two very important considerations when selecting a desirable variety of wheat for planting.

Caddo was developed by Dr. Atkins and Dr. Kenneth B. Porter, Texas Station agronomists in cooperation with the U.S. Department of Agriculture. The agronomists pointed out that be-fore the seed of the new variety was released to growers. tests in Texas and over the Southern Great Plains area gave Caddo a rating of excellent on yield, test weight, quality and resistance to leaf rust. It is also widely adapted, including areas in Central Texas, they

although halfback Larry Coffman re-injured his ankle on the final play of the scrimmage and is being held out of activity this week. Some four or five other varsity candidates are on the ailing list, but none of their ailments are considered serious. Steve Lewis missed the Tuesday drills with a cold, but returned to action Wednesday.

Howle said the Wildcats will slack off from heavy activity the balance of this week, in preparation for the Saturday scrimmage. A cutdown in the two-a-day drills for the full squad of candidates is planned for next week, with emphasis being placed on such special detail work as kicking, punting, etc.

It is anticipated that several followers will accompany the team to Andrews Saturday. Another scrimmage, against Canyon, is booked for next week as the Wildcats will then begin to step up their tempo for the Sept. Il seasonal opener against Borger.
