Hershel (Red) Ramsey, who recently resigned his post as head football coach at San Angelo high, has accepted a position as head of the sports department at Ragsdale Sporting Goods store in San Angelo, according to Hugh Weich of the San Angelo paper.

A crowd of 12,000 is expected for the game. The Treasury statement said the partial repayment is proof of the efficacy of the measures taken to protect the peso value at 8.65. These included prohibitions on many imports. Also, the rate made foreign goods expensive here and cheapened Mexican exports in foreign markets. The canine experts point out that, long after some of the pups have ridded themselves to the leaping, clusive insects, the memory is apt to linger on and the dog is likely to lay around and respond to an irresistable urge to scratch.

It's a habit with the dogs, the same as smoking or griping over taxes is with you and I. And, that habit may be no more attractive to him than puffing at a fact or vinging the bluss over

Scratching yields a certain satisfying sensation with most dogs, the same as it does with a lot of human beings. It helps him to pass the time, of which he has a lot.

When the feeding dish is deficient in proper belance of protein, carbohydrates, fats, minerals and vitamins, one of the first areas of the dog's anatomy to feel the penalty is the skin, Again, dry, flaky skin oftentimes results. If the four-legged creature happens to get too much meat and fats, the skin's oil glands are overworked and produces a greasy condition, which would cause him to attack with hind leg and tooth.

Sir Henry was the first high commissioner for Egypt under the protectorate established by Britain at the outbreak of World War I. It was during this period of strained Anglo-Egyptian relations that he wrote to Sheriff Hussein of Mecca the letters which are credited with persuading the Arabs to join the allies against the central powers. Since then these letters have bed a center of controversy because the Arabs claim McMahon promised them lands, including Palestine - a claim which Britain

Well, there was no hand kissing, and my

idience lasted an hour and a quarter. In that time his highness gave the British a lashing which I couldn't even begin to write in my dispatch, because no censor would have passed it. And what the sultan said also voiced the view of his people.

At that time the maintenance of good re-

lations with the Arab peoples was a para-mount issue for England, While Sir Henry was doing his utmost to better the feeling in Egypt, Britain also was straining every nerve to foster friendship with the neighboring Arab peoples.

OF COURSE THE MAGIC NAME OF that time was Lawrence of Arabia, the Briton whose diplomacy had so much to do with winning the natives over, The reputation of this mysterious figure was so great that the British spoke of him in tones of near reverence, I recall one time in military headquarters in Cairo my guide suddenly balted and said to me in a husbed voice as though he were speaking of the king of England:

Today is the beginning of a new year, but not the end of the first half of the Iwentieth century, or the beginning of its second half. Hal Boyle of the AP wrote

an interesting piece on it a day or two ago, telling how he put his foot in it by remarking that "the Twentieth Century reaches the halfway mark January 1."

That is, of course, inaccurate,

Boyle's correspondents were quick to tell him. All authorities agree that the Twen-tieth Century began on January 1, 1901; so January 1, 1950, is still 365 days away

from the midway mark.

Boyle still thinks it sounds crazy, and a lot of other people may feel the same way about it; however, it is really quite simple if you look at it from the right angle. The Nineteenth Century was not

In either case, Soviet Russia would be likely to start contemplating its own navel,

Boyle points out. The non-expert citizenry thought the Nineteenth Century ended on December 31, 1899, and celebrated accordingly in spite of the protests of the experts that they still had a year to go.

If they vote in February, they will certainly not know what is to be done about Marshall aid even this year, much less next year and there-after. There are momentous decisions now in the making which must affect Britain, ahe Euro-pean continent, the Commonwealth and Asia. But in this country the issues to be decided have even defined and decided within the Truman administration. With our own election impending it would be a miracle if Congress were given clear enough leader-ship to debate and settle the great issues before it recesses

In any event, the chances are

this summer. Yet the British people will be arguing in the dark unless they know what we mean to do about Marshall aid in the third year and in the fourth and last year. And what we mean to do after that to close the gap between the exports which the rest of the world needs from us and its capacity to earn the dollars to

pay for our exports.

The real problem of Britain is now masked because, on the one hand, Britain receives Marshall aid from America, on the other hand, because she is paying out an equivalent amount to the holders of the sterling balances. bolders of the sterling balances. Britain receives about \$1,000,000,000 of "unrequited" imports from North America: she delivers about \$1,000,000,000 of "unrequited" exports to India, Pakistan, Egypt, Iraq and some European countries.
