Car Wreck Takes Life Of Shamrock Lad Tues. Night

Billy Don Cantrell, son of Mr. and Mrs. Herbert Cantrell of Shamrock, was fatally injured late Tuesday night when the automobile, a 1951 model Mercury, in which he was riding went out of control and overturned on State Highway 152 near Mobeetie. The accident occurred less than an hour before the end of Billy's 18th birthday. Van Skidmore, 17 years old, son of Mr. and Mrs. Ben Skidmore of Shamrock, was at the wheel of the family car when it went out of control. Skidmore suffered a broken pelvis and a head injury. His condition is believed to be serious but not critical. Sheriff Bus Dorman and Deputy Charles Mixon said the accident occurred when the car slipped off the road near the approach to a bridge over Sweetwater Creek, about 3 miles south of Mobeetie. The driver regained the road, then apparently lost control. The car swerved across the highway sliding some 300 to 400 feet before crashing into the bridge approach and then doing a complete flip landing on its wheels. Cantrell was thrown out of the car. Officers found him alive but unconscious when they reached the scene. He was pronounced dead on arrival at a Wheeler hospital. The car was demolished. Skidmore was extricated from the wreck and taken to Wheeler for first aid. He was moved to a Shamrock hospital Wednesday morning. Billy Don was a junior in Shamrock High School. Survivors besides the parents include a sister, Mrs. Irene Howell of Colorado; and two stepsisters, Connie and Jeannie Young, both of Shamrock.

Mr. and Mrs. L. C. Laffin of the Wheeler Radio and Refrigerator Service are announcing a special "Opportunity Days" selling event at their store in a large advertisement on another page of this week's Times. They are offering many items of nationally advertised and nationally known merchandise at greatly reduced prices. They invite you to stop by their store and look over these bargains.

Visitors in the Perry Riley home recently were: Mrs. M. C. Crabb and son, Mark, and Miss Jennie Riley of Amarillo; Mrs. James H. Riley of Canyon; Miss Joy W. Riley from Vernon and Mr. and Mrs. David Hollis from Austin.

We'd also like to point out the fact that this rain fell naturally and without the aid of the so-called "rain makers."

Each of the 4-H contestants cordially invites everyone to attend the dress revue and observe their accomplishments, note their progress and share their success!

The Hibler Implement Co., International Harvester dealer here, has just received the first McCormick Farmall Super M, the new model which is described as the "world's most powerful all-purpose tractor." The tractor is now on display at the Hibler Implement showroom.

The new Farmall Super M has 21 percent more power and faster field speeds than the famous Farmall M which it replaces," says Mr. Hibler. "It will handle a regular four-bottom moldboard plow easily in practically all conditions and plow more than 20 acres in a 10-hour day."

To illustrate its large work capacity, Mr. Hibler mentioned what the Super M will do on several other field jobs. The Farmall Super M, he says, will cover up to 50 acres a day with a 10-foot tandem disc harrow and have plenty of power to handle a peg-tooth harrow or ground roller at the same time. Field tests indicate that it will drill small grain at the rate of 65 acres a day and cultivate up to 60 acres a day with four-row equipment.

All mounted implements that fit the Farmall M will work on the new Super M. The tractor has hydraulic control for mounted equipment and can be equipped with hydraulic Farmall Remote-Control for trailing machines. The new model also features self-energizing, double-disc brakes and a comfortable hydraulic seat, making it surprisingly easy to handle and comfortable to ride.

The Super M can be equipped to use gasoline, L-P gas or distillate. A similar model—with the same power, speed and other features—has also been introduced, according to Mr. Hibler. It is known as the Super MD and is equipped with a full diesel engine. At the same time, International Harvester has announced two new standard wheel models in the McCormick Standard Super W-6 and the diesel-powered Super WD-6.

McIlhany's Store Has Special Window Trim
Have you seen the exciting window at McIlhany's Store this week? The theme of the window is taken from Fieldcrest's national magazine advertising. Window arrangements are by Mrs. Joe Tilley and Miss Blanche Grainger. The window display is part of the McIlhany's participation in a National Fieldcrest Week program.

ANNUAL 4-H DRESS REVUE TO BE SATURDAY

The Wheeler County 4-H Club girls worked hard the past few weeks in order to have nice garments to model at their annual 4-H Dress Revue which is being held Saturday night, April 27th, at 8:00 o'clock, in the Wheeler Grade School Auditorium. Mrs. Frances B. Stanton, County HDA, pointed out this week.

The classes of garments entered are: Aprons; Blouses; Skirts; Skirts and Blouses; School Dresses; Sun Dresses; Dressy Dresses; and Tailored Outfits.

First, second and third places will be judged on all classes. Personal grooming and poise will enter into the scoring of the girls as she models her costume in one of the above named classes.

A winning girl over fourteen years of age will be eligible to go to the District Revue, and if lucky will go to state. Only six girls from District I will go to state as contestants. Two 4-H delegates will be chosen to go to state. Three girls, who are thirteen years or older will be chosen to go to District Camp at Canyon, May 26-29. The latter is made possible by the Wheeler County Farm Bureau.

Each of the 4-H contestants cordially invites everyone to attend the dress revue and observe their accomplishments, note their progress and share their success!

LOCAL WOMEN WILL OBSERVE H. DEMO WEEK

Wheeler County club members will join Texas home demonstration club women in observance of the seventh National Home Demonstration Week, April 27 to May 3 announces Mrs. Frances B. Stanton, Wheeler County home demonstration agent who works with the Texas Agricultural Extension Service. The theme, "Today's Home Builds Tomorrow's World," was adopted for the first national week in 1946 and is now accepted as the theme for home demonstration week.

Home demonstration work is that part of the Extension Service that deals with the home. Of the 3,107 counties in the United States, Alaska, Hawaii and Puerto Rico, 2,565 counties employ one or more home demonstration agents and assistants, a total of 3,600. Of this number, 255 are in Texas.

During the week the more than 41,000 Texas members in 2,023 home demonstration clubs will observe the week by informing the public on the work offered by the organization. Special effort will be made to organize new clubs and secure new members in old clubs. The aims and purposes of home demonstration work will be publicized through editorials, news stories, special newspaper editions, radio programs, educational exhibits and tours of result demonstrations.

Mrs. Stanton points out that in keeping with the theme, home demonstration agents and club women are planning to highlight the fact that home demonstration work aids families in developing and maintaining those qualities valued in a democracy. A successful home is dependent on a well-informed homemaker who helps the family develop pride in making the home comfortable, attractive and inspiring. A special effort is being made to interest younger homemakers to planning and action are making a lasting contribution to community improvement and rural living.

D. A. HUNT IS CANDIDATE FOR COUNTY JUDGE

D. A. Hunt, former Wheeler County Judge, this week authorized the Wheeler Times to announce his candidacy for the office of county judge subject to the wishes of the voters in the democratic primaries which are to be held in July and August. "After due consideration and much urging on the part of friends and acquaintances, I have decided to make the race for County Judge of Wheeler County, a post which I held from January 1939 through December 1944," Hunt stated.

"Since retiring from my post as judge, I have operated the funeral home here and eating establishments in Pampa. My wife and I made our home in Pampa from the time we sold the funeral home until about a year ago when we moved back to Wheeler," Mr. Hunt pointed out.

"I think my record, as your county judge previously, speaks for itself, and I believe that I have kept pace with the changing circumstances concerning county business and administration in such a manner as to be well qualified to fill this important post for I am asking," he continued.

"If the people of Wheeler County see fit to elect me as their county judge, I promise fair and faithful discharge of the duties of the office with due respect to all parties concerned," Mr. Hunt stated.

"I shall do my best to personally contact all the voters of the county between now and the first primary election July 26, but if I do not see you I earnestly solicit your vote and support," Mr. Hunt concluded.

**SCHOOL SUPERINTENDENT:
HIS PROBLEMS**

A commission of nine prominent educators, headed by Dr. Virgil Rogers, Superintendent of Schools at Battle Creek, Michigan, has completed a two-year study of the American School Superintendent. This study is to be considered in detail by the Adminis-

trators' Association this month in Boston. The position of the school superintendent is both challenging and hazardous, according to the report, which pointed out that growing attacks on the public schools, together with pressure by various community groups, have produced this result.

The report notes that the clear-cut contrast in organized community influence is between groups who represent property interests and groups who primarily desire improved and expanded services from the schools. Some property interest groups are opposed to spending any more money for schools whether it is needed or not. Some of the service groups favor expanded services without apparently realizing that somebody has to pay the taxes.

Religious prejudice is very often blamed for differences of opinion about school policies. "Some think that those who oppose expansion and improvement in public schools want to weaken public education and strengthen parochial schools," according to the report. "Others who are supporting large parochial schools feel they are carrying a double school burden which somehow should be relieved. The superintendent is frequently accused of being controlled by one or the other whatever he does. When he appoints some one to a position, the Protestants fear control, the Catholics call it bias, the Jews cry prejudice, and the Negroes claim discrimination, if the appointee is not one of their group."

If the school superintendent makes a speech and stresses the value of individual initiative he is, very often, accused of spreading Republican propaganda. On the other hand, if he refers to social values, he is branded as a New Dealer.

If the superintendent tries, through the education program, to develop among the students a consciousness of the United States as a world leader, he is labelled an internationalist. If he fails to do this he is a reactionary nationalist.

Of course, school superintendents are also faced with inadequate funds and lack of qualified professional assistants.

The report concludes by pointing out to the school superintendent that he has a challenge to make the community realize that the public schools must be responsive to the needs of the whole community and that co-operation is the only way to achieve common goals. If he handles his job properly, "the superintendent as a community leader can put together the forces for good which exist in every community and translate them into constructive effort for the community."

All of us are interested in knowing something about the man who is charged with meeting these increasing burdens. Well, here is a statistical composite of our school superintendents in the nation. A forty-eight-year-old married man with between five and six years of college preparation and twenty-five years of experience in school work receiving an annual salary of from less than \$3,000 to more than \$30,000 and working almost sixty hours a week at his duties.

A film actor, married and divorced five times in three years, came to the registrar with his sixth bride. It was the same registrar who had married the actor on the previous occasions.

After the ceremony the actor reached into his wallet, but the registrar waved the money aside. "Not this time," he said "This is on the house."

Homemakers who use greased paper to prevent breads and cakes from sticking in the baking pan should remove the paper immediately after the product is removed from the pan. Paper also scorches easily and should not be used when high temperatures are required for the baking job.

SCHOOL BANQUET

The P-TA honored the members of the Mobeetie Schools with a formal banquet April 15 at the Methodist Church. Members of the basketball and football teams, those taking part in Interscholastic League work, faculty, P-TA president and wife, Mr. and Mrs. Jack Miller; vice-president and Mrs. Mayme Patterson and Rev. and Mrs. A. D. Moore were honored guests. After a delicious meal of baked ham and all the trimmings, a program was enjoyed by all with Mrs. Mayme Patterson acting as

Master of Ceremonies. Mr. Jack Miller opened with the welcome which was followed by the response from Student Council President, Bill Leonard. Some of the high school girls sang a song and Mrs. J. H. Scribner recognized all the guests. Mr. L. R. Reeves then made a short talk and the program was closed by all singing the school song. The students wish to take this means of expressing our thanks for a wonderful banquet.

KIWANIS NOTES
By Dr. C. C. Merritt

There were three guests at our meeting Monday. John B. Wilkinson of Pampa, Darris Egger and Grady Adcock of Miami. Grady brought the program in which he told us about his trip to Israel the new four year old nation of Israel. This was an interesting talk and the club appreciated it. Darris proved himself a good boy in arranging this program for us. We were glad to learn that Watson is doing nicely and will soon be on his feet and in his place again at the table. Herman, too, is improving and that is good news. Well, all I can say about the softball diamond is: take a look and you will see that the electric poles are going up and that gives us the good feeling that some day the whole project will be finished and then we can sit back and watch the games. Chances are the more patriotism a person wears on his sleeve the less he has in his heart.

DAIRYMEN WILL FACE MANY NEW PROBLEMS

Coming of warm weather brings with it new problems for the dairyman. Higher bacteria counts are sure to show up in the milk unless precautions are taken. Unless precautions are taken, counts can be caused, says R. Johnson, from flaws in the milking procedure, milking unclean and unhealthy cows, using poorly cleaned utensils and cans and unclean attendants. The specialist warns that cooling facilities are adequate for a rapid job of cooling milk.

It is not too early to start a fly control program. The location of breeding places is of great importance in keeping under control. Manure should be spread on fields and all lots well drained as a part of the program. Control hornflies, dairy should be treated with sprays or washes containing five-percent methoxychlor. Such treatments are usually effective.

WEEDS SHOULD BE KEPT OUT OF PONDS, LAKES

There are a lot of ponds and tanks—more than 150,000—on Texas farms and ranches that could be utilized for producing fish. Many of these tanks have been stocked with fish but where good fish pond management practices haven't been followed trouble is often caused by heavy growths of pond weeds. According to R. E. Callender, specialist in wildlife conservation for the Texas Agricultural Extension Service, these growths can be controlled.

He points out that pond owners should remember that pond weeds under control are beneficial. They provide excellent habitat for water insects and tiny crustaceans which are valuable fish food. They also provide hiding places for the smaller fish and he suggests that such growths not be completely eradicated from the fish ponds.

Generally, he says, pond weeds are of two types, submersed and emergent. The mosses make up the first group and the second is composed of plants which are rooted and grow from the shallow bottoms usually around the edges of the pond. They grow principally above water and include lotus, lily pads, cattails, bulrushes and other similar plants.

In ponds or tanks where moss growth is not excessive, Callender says, a good fertilizing program will aid in controlling moss. Fertilizer increases the growth of plankton in the water and thus causes a murking which is often heavy enough to prevent sunlight from penetrating the water. Without sunlight, the mosses make

And finally, says Burlison, now is the time to plant a sudan or a sudan-coupea mixture for summer grazing. Plant one acre per cow and use plenty of fertilizer. July pastures depend on action in April and May.

little growth and often die. Therefore, says the specialist, a fertilizing program is a two-in-one deal—improves the food supply for fish and slows down underwater moss growth.

Callender recommends the use of sodium arsenite for controlling the excessive growth of moss in ponds. Best results have been obtained when the chemicals was used during the months of April, May and June or before the moss takes over for the year. One gallon of the four pound strength sodium arsenite should be used to each 20 to 30,000 cubic feet of pond water. Mix the chemical with an equal amount of pond water and apply it to the surface of the pond with a compressed air type sprayer.

The chemical is poisonous and livestock should be excluded from the pond area for a least two weeks, says Callender. Care should be exercised when the spray is being mixed and sprayed and if the chemical gets on the skin, it should be washed off immediately, warns the specialist.

The chemical works rather rapidly and should the oxygen supply in the water become depleted, due to the decaying vegetation, Callender says, rapid stirring of the pond with outboard motors will help correct the situation.

For control of the emergent plants, he recommends cutting or pulling. He adds that research work is now being done on the use of chemicals such as 2,4-D and ammate sprays.

Callender urges pond or tank owners who plan to start a pond weed control program to contact their local county agent for complete details on how best to do the job.

SENIOR NEWS

The seniors are very glad six-weeks are over, for you see we only have four more weeks of school providing we are exempt from our final tests.

We were very sorry to lose our sponsor, Mr. Paddock, who has helped us so much this year. Our new sponsors are Mr. Teague and Miss Wiley. We appreciate their help very much.

The senior play "Let Me Out of Here" will be presented on Tuesday night, April 29 at 8:00 p.m. at the Wheeler High School Gym. The play is a three act comedy that will supply plenty of laughs for everyone. Bring the family and enjoy all the laughs that will be available that night. We would like to thank Mrs. R. Wm. Brown who is helping us with the play.

SENIOR ON PARADE

Anita Underwood was born at Wheeler, on January 1, 1934. She

started to school her first school year at Wheeler and has been a student here ever since. She had a minor part in the 8th Grade play.

In high school she has been a member of F.H.A. 2 years. She played the part of a married daughter in the Speech Play; the part of a social climber in the junior play; and the part of a strict landlady in the senior play. During her junior year she entered the extemporaneous speaking contest in Interscholastic League, winning first place at District and second place at Regional.

Her hobby is cooking and plans to enter business school after graduating. I think she will make a very efficient secretary some day.

JUNIOR NEWS

The juniors are working very hard on the Junior and Senior Banquet which is to be given May 2. We are trying our best to give as good as possible.

GOSSIP

Martha Lou, why so happy these days. Martha Lou's boy friend went to church with her last night.

Beverly, who have they been teasing you about. Could it be these boys that have been flying around here. Huh!

Margie and Georgia, why did you all want Wheeler to play Briscoe so bad Monday. Margie, what's happened to all of your boy friends? (Eddie said).

Billie, did you and LaVeta have fun Saturday night? Billie, you and Hoot are going together a lot these days.

Cathed, why so sad lately? Is it girl trouble or is it car trouble? Esther, do you really like J. S.? Say this sounds like it could be Jerry Scully. Am I right?

Harold, how are you and the 8th coming along? Are the preachers getting you down? Pearl, do you really like to tease someone?

Yolanda, you really have a time in History don't you? How are your grades coming along? I hear they are pretty low.

The sophomore class wishes to express their deepest sympathy to Punkie Martin. We are very sorry about the death of your grandfather.

We are also sorry about Barbara Mitchell's father.

Cellophane tape is a marvelous kitchen accessory. Lots of uses for it! Use it to mend small tears on cook books, plastic aprons, food pages, etc. Recipe cards will last longer when edged with it. Easy, too, to tape shelf paper in place.

Before you refresh your summer curtains with a tint bath, remember to launder them first to remove all spots, mend them, if necessary, and choose an all-purpose dye which is guaranteed to work on all types of fabrics—synthetic or not.

Crisp up salad greens after washing by wrapping in a clean cloth. Or, if there's time, place in a bowl and refrigerate for an hour or two.

There's a good reason for storing eggs with the large ends up — it keeps the yolks centered. Incidentally, have you seen those handy plastic containers especially designed for refrigerating eggs?

A taste of Spring is a salad made of cottage cheese and diced pineapple, served on crackling lettuce and topped with this scrumptious real mayonnaise dressing: combine 1/2 cup real mayonnaise, 2 teaspoons confectioners sugar and 1/2 cup fresh strawberries, hulled and crushed.

Lace-nylon, silk and cotton, domestic and imported—is a bigger hit than ever in the fashion field this Spring and summer.

FRESHMAN NEWS

Elmer, were you sick Friday night?
Lonnelle, don't you like to sew? Jimmie, won't anyone talk to you in Mrs. Householder's class?
Pat, who was riding in two different cars Saturday night?
Red, where did you live before you came to Wheeler?

Only
a TENTH

"What shall I render unto the Lord for all His benefits?" (Psalms 116:12). Every man of earnest and serious mind must ask himself this question as he meditates on the goodness and the Grace of God toward him. We want to do what is right in our every association with God and man. The Government takes as its proper share at least twenty per cent of every man's income. WHAT IF GOD SHOULD REACH DOWN INTO YOUR LIFE AND MINE AND TAKE WHAT REALLY BELONGS TO HIM? How much would be left for us? Have you raised corn? Or did you and God work together in making the corn crop? And just which of you put more time and energy into the process? Have you "struck" oil? Who spent centuries creating the oil and holding it in the underground lake until you came along? Is the oil really all yours? What is God's share? YOU AND GOD ARE PARTNERS IN THE OIL BUSINESS: WHAT IS HIS PORTION?

Jesus Christ is our revelation of the generosity of God who has been the eternal Giver, enriching us with every sort of good thing. From the day of the first creation God has been at work with and for man. Each of us represents in his body and in his soul the everlasting toil of God, who truly wants to make us His children and who desires us to join Him in making an ever better world for His sons and daughters to live in. JESUS IS OUR PATTERN OF WHAT A MAN CAN GIVE TO HELP IN THE PURPOSE OF GOD. HOW MUCH DID JESUS GIVE BACK TO GOD?

Jewish and Christian people have agreed that we ought to give at least a tenth of our income to God and His Church for the carrying on of His redemptive program. A tenth will not necessarily discharge all our debt, but it will show a sense of deep gratitude. Everything is His, even the cattle of a thousand hills and the abundant harvest from the fields. He gives us everything which makes life abundant. Our ideal is to join in the prayer, "Take my life and let it be consecrated, Lord to Thee." Let's be good partners with God. Let us be His co-workers. MAY WE GLADLY GIVE BACK TO HIM AT LEAST A TENTH OF WHAT HE SO FREELY GIVES US."

Our Church Page Is Published With the Hope that More People Will Go to Church. It Is Paid For by Business Firms and Individuals Who Believe We Should Attend Religious Services Regularly.

At this last meeting of this year the officers and committee

chairmen gave their annual reports.

Two goals were set by the P-TA for this year. One to buy chairs for the school which have been bought and the other to buy a time clock for the gym. The treasurer reported \$249.05 was in the treasury to pay on the clock.

The organization voted to have a box supper in the near future to raise more funds for the clock.

Officers were elected for next year and are as follows: Mrs. Clyde Meek, president; Mrs. Herbert Finsterwald, vice-president; Mrs. Doyle Standlee, secretary and Mrs. Barney Burgess, treasurer.

After the meeting adjourned all went to the Homemaker Cottage where the social committee served cake and punch.
