pupils are given the opportunity to take courses for which they are best suited. It should also be brought to their attention that employers generally are not going to put ouitters in responsible positions.

The year or two that it takes to finish high school may seem like a lifetime to a teenager but a little self-discipline during this period will, in most cases, pay off in future happiness and earning ability. Learning self-discipline, learning to give up immediate pleasures for long range happiness, is probably a lot more important to ones future success than is the additional education that one gets by remaining in school.

RAISE FOR 4,725,000

Some 4,725,000 persons now receiving Old Age and Survivors' insurance checks under Social Security, will receive hikes in Mid-Week Servicespayments, beginning October 3, the Federal Security Agency has announced. Total monthly Social Security payments will rise from \$168,400,000 to \$190,500,00, it was said.

This increase represents 13% increase to retired workers and their families and to dependent survivors of workers. Persons now getting monthly benefit payments need take no action to get the increase, since the increase is automatically provided by a new law passed in the recent session of Congress.

Republicans have charged that the Administration timed the Social Security increases to coincide with the election this year and the Democrats have retorted that the raises were provided by Congress and did not represent a political effort.

Whichever is true, the fact that 4,725,-000 persons receiving Federal old age and survivors' insurance checks are getting increases on the eve of the election might have some effect. The \$22,000,000 to be added to the monthly payments is likewise certain to be felt in the business world. The economic effects, however, will not be realized in time to exert any influence on the November 4th
