THE COUNTY SEAT NEWSPAPER

WHEELER BOYS STATE

Passion Post No. 138 American Legion is sponsoring Arganbright at Boys State.

Group of 18 boys who will attend.

American Legion Lone Star will convene at the State of Texas at Austin from June 11. The program in Illinois in 1934. It is operated by the National American Legion.

It is a plan for training in the functional aspects of a program of the American Legion.

It is restricted to white boys who are juniors during school term in a senior high school, and who have not attended Boys State.

Boys State will perform functions as real life in the everyday activities of the boys. They will elect their officers in accordance with regular election procedures. They learn the duties of city, county and state. Each boy learns to be a citizen.

SAVINGS BONDS TA LAGGING

County residents had only 18.3 per cent of savings bonds for through April, according to county chairman.

FIRST BAPTIST CHURCH HOLDS BIBLE SCHOOL

The First Baptist Church of Wheeler is conducting a vacation bible school. The school started last Monday and commencement exercises will be held this Friday evening in the church auditorium at 8 o'clock. Cakes and cookies will be served to the children and parents.

There will be a picnic for the children at 11:30 Friday morning. Teachers in the school by groups are: Cradle Roll; Mrs. May Tucker, Nancy Brown, and Mrs. Melvin May.

Nursery Dept.; Mrs. G. A. Martin, Vera Brickey, and Mrs. H. E. Cole.

Beginners; Mrs. Roy Ford, Mrs. Donald Reeves, and Mrs. Bill Chapman.

Primary Dept.; Mrs. Cotton Williams, Wilma Hefley, Mrs. K. D. Ford, Mrs. DeWard Wofford, and Mrs. J. C. Moore, Jr.

Junior Dept.; Mrs. Geo. Gandy, Donald Wayne Gandy, Mr. Ambercombe, Mrs. Cecil Martin, Mrs. J. Smith, and Mrs. Floyd Davidson.

Intermediate Dept.; Mrs. Loyd Lewis, Mrs. Bob Douthit, Mrs. Florence Dodd, and Mrs. Joe Weatherly.

General workers in the school include: Mrs. Harold Loyd Lee, Harry Wofford, Mrs. John Holcomb, Mrs. Harry Wofford, and Mrs. Ebb Smith.

The public is cordially invited to attend any of these sessions, a spokesman for the group said this week.

LEGISLATURE HAS ADJOURNED

Officially, Texas' 55th Legislature is now in the history books. But the changes will provide grist for the 56th session and determine how many 55th legislators will survive for the 56th.

Biggest issues of the past five months were water, segregation, reform measures, teacher pay, and insurance. Here is part of what the lawmakers did.

They passed a proposed constitutional amendment for a \$200 million bond issue to help local governments build dams and reservoirs. They failed to pass another amendment for a \$100 million bond issue to buy water storage space in federal reservoirs, despite a last minute effort.

They passed a teacher pay raise. Legislators with Gov. Daniel's help found, after raking and scraping, enough money to give each public school teacher a \$399 a year raise. It meant recalling two other money bills.

Aside from the big issues, scores of not-so-major laws will cause Texans to change their way of doing things. Here are a few:

A "SCRATCHED BALLOT" is the only legal way to vote in future elections. No more choice between scratching and checking.

City officials can be elected for four years instead of two years if voters okay a proposed constitutional amendment. Individual cities would then have to adopt the four-year plan.

Auto license tags will cost 10 per cent more. Highway Department to use the extra funds to share 50-50 with cities and counties, the cost of right-of-way for new roads. Previously cities and counties have had to bear all land costs.

The Governor's signature is still pending on many bills, of course, but vetoes are not expected on any of the above.

In addition this legislature passed literally hundreds of "local and uncontested bills."

In addition this legislature passed literally hundreds of "local and uncontested bills."

Community Box Supper Friday, June 7th

The Briscoe Community will hold a box supper at the high school gymnasium on Friday evening, June 7th, at 8 o'clock. The proceeds of the gathering will be used for the advancement of Scout activities in the community, both Cubbing and scout units will participate in the proceeds.

A spokesman for the community affair announced this week that the public was invited to attend and bring boxes or anything of value they wished to donate to the cause. The items will be sold by Shelby Pettit and all proceeds will go to the Scout fund.

REFERENDUM ON WHEAT QUOTAS SLATED JUNE 20

A referendum of wheat farmers will be held on June 20, to determine whether or not marketing quotas for the 1956 wheat crop will be effective, according to Albert Marshall, office manager of the Wheeler ASC.

If two-thirds of the farmers vote in favor of quotas, all producers with more than 15 acres will be subject to quotas and any excess wheat will be subject to quota penalties.

Price support at a national average of \$1.78 per bushel will be available to producers who do not exceed their farm acreage allotments.

If quotas are not approved, there will be no quota penalties, acreage allotments will remain in effect, price support will be available at 50 per cent of parity for producers who comply with their farm wheat allotments. Fifty per cent of parity applicable to the 1958 crop is estimated to be \$1.18 per bushel, Marshall said.

"This is an important election because the farmers themselves make the decision on marketing quotas. All producers who have an interest in a farm with more than 15 acres of wheat in the Acreage Reserve Program are eligible to vote," the ASC office manager said.

Farmers will be notified at a later date of the polling places in their locality.

New Growers July 1 is the final date for filing applications for new growers 1958 wheat allotment, Marshall said. Application forms are available at this time and must be filed with the Wheeler County ASC office not later than July 1.

Preservation of Cotton History Final date for signing MQ-31, which is the form for the purpose of preserving 1957 cotton history is July 1. "It is to the producers advantage that this form be signed," said Marshall. "By preserving their cotton history, farmers also preserve the county's history," he pointed out.

Sagebrush and Shinnery June 10 is the deadline for spraying sagebrush and shinnery under the 1957 ASC program. Farmers who plan to do this work with the assistance of the ACP program must sign applications before the work is started, and

4-H GIRLS TO ATTEND CAMP

4-H Club girls who are going to District Camp are Saundra Meek, who will represent the 4-H Council, Violet Fillingim and Barbara Worley. They will be accompanied by Miss Vara Crippen.

Saundra has been a club member for six years, is a co-chairman of the Wheeler County 4-H Council, and with her partner, Ruth Fillingim, won in the County and District Dairy Foods Contest. They will represent the District in the Dairy Foods Team Demonstration.

Violet has been a member about four years, has entered the Dress Revue, and Bake Show every year, and has always entered one of the other contests for which she is eligible. She won in the county Dairy Foods Individual Demonstration, but she was not old enough to enter the District Contest.

Barbara Worley has been a member for three years, has been a good leader in her club. She won in the County Share-The-Fun Festival and placed fourth in the District Contest.

Barbara Worley has been a member for three years, has been a good leader in her club. She won in the County Share-The-Fun Festival and placed fourth in the District Contest.

VACATION BIBLE SCHOOL DRAWS LARGE CROWDS

The Vacation Bible School at the Wheeler Church of Christ has been drawing large crowds this week. They have had approximately 100 in average daily attendance at the school. Classes are being conducted for adults and all age groups to the pre-school children. Minister E. M. Borden reported this week.

Brother G. B. Stanley, Minister of the Church of Christ at Shamrock, has been helping out with the school daily. Mr. Hiltbrunner, also of Shamrock will teach the adult class the remainder of the week. The school convenes at 9 o'clock each morning and runs for 2 hours daily. It will continue through next week.

The public is invited to attend the school and study the Bible with the classes, a spokesman for the group stated this week.

POPPY DAY IS BIG SUCCESS

Mrs. Helen Sabbe, president of the local chapter of the American Legion Auxiliary, this week announced that the Poppy Day held here last Saturday was a big success. She reported more than 550 poppies were sold during the day.

The poppies sold here this year were made by veterans in the hospital at Kerrville. A thousand poppies were ordered. They cost the Auxiliary \$35.00. The sale brought in \$66.18, leaving a profit from the sale of \$31.18. Of this amount \$10.39 was sent to the State Headquarters for use of Veterans widows and children. The remaining \$20.79 stays in Wheeler for local use. The \$35.00 paid for the poppies goes to the veterans who made them in the VA hospital at Kerrville.

Mrs. Sabbe expressed the thanks of the Auxiliary to the public for their cooperation in making the Poppy Day sale a success. Also to the following women and their children who handled the sale and canvass of the community: Mmes. Florine Beatty, Glenda Henderson, Cora Hyatt, Gay Burton, Parilee Mitchell, Mary Moore, Cora Garrison, and Helen Sabbe.

The president also expressed appreciation for the fine work of Mmes. Kathleen Garrison and Mary Ann Bradstreet at the poppy table set up on the west side of the square in Wheeler.

MRS. THOMPSON SERVICES HELD

Funeral services for Maggie Thompson, 59, life-long resident of Mobeetie were conducted Sunday afternoon at 2:00 at the Methodist Church in Mobeetie. Rev. C. R. Copeland local Methodist minister officiated with Rev. Gene Grace, Mobeetie Baptist pastor assisting.

Mrs. Thompson died Friday, May 24 about 10 p.m. after a lingering illness in her home of her son, Warren Thompson at Amarillo.

Maggie Lee Totty was born at Mobeetie, May 4, 1898. She is preceded in death by her husband, John A. Thompson, who died October 31, 1949 and a son who died in infancy.

Surviving are a son Warren, four sisters, Mrs. Euna Cantrell of Miami, Mrs. Martha Ward of Boston, Mass., Mrs. Alma Seitz and Mrs. Ann Trimble, both of Mobeetie; one brother, Frank Totty also of Mobeetie, and three grandchildren.

Interment was in the Mobeetie Cemetery, beside the husband and daughter. The direction of Dunel-Carmichael Funeral Home.

Births

Mr. and Mrs. Buck Jones of Amarillo are the parents of a girl born Monday, May 27. She weighed 7 pounds and 8 1/2 ounces. The maternal grandparents are Mr. and Mrs. Buster Black. The paternal grandparents are Mr. and Mrs. Owen Jones, all of Wheeler.

Darville Atherton who has been in an Amarillo hospital was moved to an Oklahoma City hospital for observation.

NOTICE

Lost, or strayed! One ball park bag. Anyone knowing the whereabouts of this essential piece of equipment please contact Bill Owen or George Gandy. The drag is a regular county-type implement used to smooth the playing field at the ball park. As the season is opening next week the park personnel are in urgent need of the implement.

A FEW TORNADO SAFETY RULES

To know what to do when a warning is received, or a tornado is sighted, may mean the difference between life and death. Chief Observer R. J. Holt, Jr., said this week. Here are a few simple rules that should be remembered and followed when the two long blasts of the fire siren announce the approach of a storm or one is observed.

There is no universal protection against tornadoes except caves or underground excavations. When time permits go to a storm cave. The cave should be kept for use and equipped with an air vent and a pick and shovel.

If you are in open country move at right angles to the tornadoes path. If there is no time to escape, lie flat in the nearest depression such as ditch or ravine. Watch for rising water.

If in a city or town seek inside shelter if no cave is available. STAY AWAY FROM WINDOWS. The southwest corner of the ground floor or basement is usually the safest place. People living in brick or stone houses should seek other shelter. If time permits cut off the electricity, gas, and water services. Open windows on the north and east sides of the house to help equalize pressure. Standing against the inside wall.

COUNTY YOUTHS TO GET DEGREES

Two Wheeler County students are among those to receive degrees at Texas Tech's exercises in Lubbock on June 3. Commencement exercises will be at 8 p.m. at Jones Stadium. The two students are Troy Dean Jones, Allison, Animal Husbandry; and Linton Carrol Lackey, Kelton, Agriculture Education.

Convair Vice-President August C. Esenwein of Fort Worth will be commencement speaker. The Baccalaureate sermon will be delivered at 8 p.m. Sunday, June 2, in Jones Stadium by Dr. Granville T. Walker of University Christian Church, Fort Worth.

Summer Homemaking Being Offered Here

All high school girls who have had at least one year of homemaking and who have not previously had two sessions of summer homemaking may make one half credit by taking summer homemaking during the month of June, stated Mrs. Gordon Whitener, homemaking instructor.

Individual conferences with the girl and her mother have been scheduled for Friday, May 31st and Monday, June 3rd at the homemaking cottage. On Tuesday, June 4th group sessions will begin.

Two rooms of the homemaking cottage will be redecorated and curtains made for each room. Each girl will also do work in her home on a selected home experience.

Several adults have requested at least a day workshop on some of the newer methods or short cuts in sewing. This is trying to be worked up with the Singer and Necchi machine companies. Further notice will be given at a later date in regard to this.

Twenty two girls so far have signed up to take summer home making. Two field days have been scheduled at the last of June for each girl to see what the other person has done and an over night picnic and camping trip at the C. J. VanZandt place is being planned said Mrs. Whitener.

Mr. and Mrs. Tom Whitson and daughter of Amarillo visited with her parents, Mr. and Mrs. Marvin Pierce and attended Commencement Exercises Thursday evening.

Mr. and Mrs. Donald Barber and son of Amarillo have made their home in Wheeler.

SOFTBALL PLAY STARTS MONDAY

Announcement was made this week that the first softball game of the season would be played here next Monday evening at the City Park. One league has been organized in the county and will play two games each week in Wheeler if the weather permits. Thomas Garage team will meet the El Paso Natural Gas team here Monday at 8 p.m. in the softball park.

In the local, Kiwanis sponsored play, more players are needed in order that teams can be formed. To date only two full teams have entered. These two teams are girls teams. Not enough boys, women, or men have signified interest in the play to get one team set up in each bracket.

If you are interested in playing softball this summer please fill out this form and hand or mail same to Thurman Rives or Bryan Swaim.

4-H DISTRICT CAMP JUNE 3

Three boys and three girls will attend the District 4-H Camp at Camp Don Herrington, South of Amarillo. Those attending are Jim Teegerstrom, Sondra Meeks, Bob Martin, Ronnie Cantrell, Violet Fillingim and Barbara Worley, along with county extension agent Miss Vara Crippen and Bryan Swaim.

The camp starts June 3 & lasts through June 5th. It will be divided into four groups which will be rotated in order that each person may attend all functions of the camp.

Activities will be: Electricity, Safety, 4-H Records, Presenting 4-H to the Public and extra activities include: rifle shooting and care of the rifle, nature study, volleyball, baseball, swimming, and lamp and extension cord making.

On Monday night they will have a stunt or talent show night requiring each county to put on a stunt, this will be followed by a party each night of the camp.

STORM CELLAR ABOUT READY

Chief Observer R. J. Holt, Jr. this week announced that the GOC storm cellar located on Cemetery Hill was nearing completion. He said that the steps had to be completed and the forms removed, before the cellar was ready for use.

Chief Holt expressed the thanks of the GOC for the donation of the vent for the cellar by L. D. Beasley and the \$5.00 donation by John Hodges. He stated that other donations to help pay for the cellar would be appreciated by the storm watchers.

The cellar is being built to give the men protection while they are on duty watching clouds to give warning of a threatened severe storm. The local group has put in more than 400 man hours this spring in that capacity in the Wheeler Community.

The group of workers include: Sheriff Bus Dorman, Deputy John Topper, Mrs. Dorman (on the radio) Chief Holt, Joe Rogers, Joe Weatherly, Roy Ford, Adrian Risner, Earl Barnes, Buster Callan, Dudley Callan, Bob McNeil, Bob Douthit, Thurman Rives, Bryan Swaim, Harold Loyd Lee, W. L. Jolly, N. D. Ware, Jr., J. D. Beatty, Bill Chapman, Delmar Thomas, Donald Reeves, Chester Lewis, Harrison Hall, and Chas. Slemmer.

LOCAL NEWS ITEMS

Mr. Harold Nash underwent surgery in Pampa last week. She returned to her home Sunday.

Mr. and Mrs. Haskell Weatherly spent the first part of the week in Amarillo with their daughter, Mrs. Charles Pond, who is in the hospital.

Orb Pond and family from near Vernon spent the first part of the week with friends and relatives in Wheeler.

Mr. and Mrs. Amos May and Mr. and Mrs. H. H. Herd spent Sunday afternoon in Pampa with Mr. and Mrs. Charles Harris.

COUNTY-WIDE X-RAY CLINIC IS SCHEDULED

Free chest X-rays will be offered to every adult resident of this area 15 years of age and over in an effort to find all unknown cases of tuberculosis in this area.

The TB Division of the Texas State Department of Health will bring a huge mobile X-ray unit to Wheeler County, offering the free service one day each at Wheeler, Mobeetie and Shamrock. Bob Douglas, manager of the Shamrock Chamber of Commerce, has been named county chairman. He announces the following schedule:

Wheeler - Monday, June 24, 8:30 a.m. until 5:30 p.m. in the office of Southwestern Public Service Company.

Mobeetie - Tuesday, June 25, 10 a.m. until 4 p.m., at the school building.

Shamrock - Wednesday, June 26, 8:30 a.m. until 5:30 p.m., in the Matt Lewis building, 300 North Main Street.

"It is important that every adult be X-rayed if a really successful job of searching out hidden tuberculosis here is to be done," Douglas said. "Although tuberculosis has no obvious symptoms in the early stage, the X-ray can show up the slightest damage to the lungs by the disease."

He expressed confidence that the public spirit of Wheeler County citizens would be shown in 100 per cent cooperation with the program to control the spread of tuberculosis.

"This is a community enterprise in which everyone of us has a stake. We all want to be sure that we aren't endangering our own health and that of those near us. By cooperating in the chest X-ray program, we will be protecting the health of the community and striking a blow in the world-wide fight to defeat tuberculosis."

Joe Rogers has been named chairman in charge of the program in Wheeler, and Buck Scribner is handling plans in Mobeetie. Charles Slemmer has been named publicity chairman at Wheeler and Mobeetie.

1170 COUNTY RESIDENTS ON WELFARE ROLL

Four hundred and three Wheeler county families numbering 1170 persons are now receiving butter, cheese, dry milk, rice, beans, corn meal and flour from the government, free of charge.

The so-called "surplus commodities" program, operating in Wheeler County since May, 1955, is costing county taxpayers approximately \$500 per month.

Those facts were released by County Judge Clarence Morris at the request of Shamrock and Wheeler newspapers with whom complaints have been lodged that the welfare program is proving too expensive and should be abolished.

In Texas the program is optional with cities or counties, its purpose being to make U. S. Department of Agriculture commodities available from distribution to needy persons. It is administered by the State Department of Public Welfare with participating cities and counties helping defray costs.

Any person having resources of as much as \$300 or income of as much as \$60 per month is not supposed to be eligible to receive the free commodities. That is the maximum income level and any figure lower than that may be set by the sponsoring city or county.

Any two people in a family having resources of as much as \$450 are ineligible to participate, with

Civil Defense Man Rescues Drowning Boy, 3, from Ditch

A three-year-old boy in Waterbury, Conn., was saved recently from drowning by the training and quick action of a civil defense worker.
Richard Lawson, a Waterbury civil defense worker, spotted young George McLean as he tumbled while playing into a water-filled, seven-foot-deep sewer excavation.
Aided by a friend, Lawson fished the boy out of the ditch and then applied artificial respiration for 10 minutes before he responded to treatment.
In addition to first aid training, Lawson also has taken the basic civil defense rescue training course.

Lawson

Newsletter From Your CONGRESSMAN WALTER ROGERS

The hearings on the new Harris-O'Hara gas bill commenced this week. You will recall that the old gas bill, the one that was passed by the Congress last year and sent to the White House, was vetoed by the President. You will also recall that he stated the bill was a good bill and one that was needed, but that he was vetoing it because of arrogance on the part of some of the proponents of the legislation. I thought then, and I think now, that was a pretty lame excuse for penalizing hundreds of small producers and land owners, and forcing them under the dictates and controls of a centralized federal bureau in Washington. Nevertheless, the veto stuck, and the small producers and land owners were kept under the boot heel of federal bureaucracy.
During the elections last year the Administration led these people to believe that if Mr. Eisenhower was reelected as President, gas legislation, freeing these people from federal domination, would be advocated, sponsored and promoted in and through the Congress and signed by the President. It was openly and notoriously advertised that this Administration was vigorously opposed to the philosophy of federal price control of a commodity, that it was basically opposed to concentration of power

Love's Labor Often Lost By Gardening Enthusiast

"Picture wall" of ponderosa pine windows lets garden lover see fruits of his efforts from his easy chair.

If you work hard at keeping your lawn and garden in good shape, have you ever suddenly dropped your tools, mopped your brow and wondered: "Who am I doing all this for, anyway? Me or my neighbors?" It's true that all too often neighbors or strangers passing by are able to enjoy the beauty of a well-manicured lawn and colorful plantings more than the home-owners who slave over them.
The reason for this is blank walls and inadequate windows in many homes. The answer is a wall of windows looking out on the most attractive portion of the grounds.
The owner of the home in the photograph has taken full advantage of a scenic setting by installing sliding windows of ponderosa pine in a long row sweeping along the sides and across the corner of the living-dining area.
This arrangement virtually brings the lawn and garden inside, permitting the family to enjoy them while dining or relaxing in the living room.
Windows of ponderosa pine come in many stock styles, shapes and sizes that are ideal for "picture walls" such as this one.

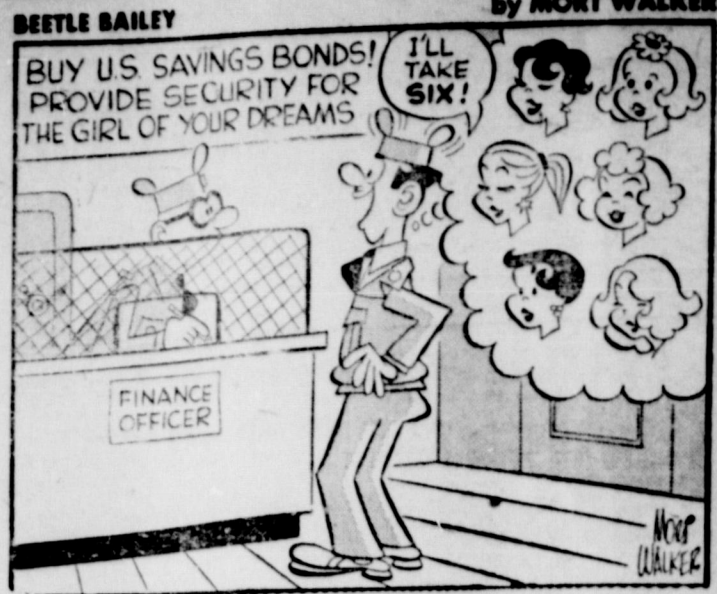

in the national capital and against centralized government. Taking the Administration at its word, many people bought what has turned out to be a "pig in a poke".
The gas bill that is before us is not the gas bill that was passed last year and which the Administration indicated it favored. The new gas bill, supposedly agreed to by the Administration, is a limited federal control bill. In other words, the Administration took the position that it had changed its philosophy about federal domination and was willing to accept centralization of government and concentration of power in a federal bureau with certain limitations. Those of us who have staunchly defended the sovereign rights of the states through the years and have vigorously opposed the continuing encroachment of federal bureaucracy, looked upon the bill with many misgivings. We were not consulted or conferred with in the preparation of the measure, nor were we given opportunity to present proposals in keeping with our fundamental principles concerning federal pre-emption of all the rights of the people. However, we did realize we would have an opportunity to present clarifying and corrective amendments to provide safeguards under the circumstances. We proceeded with the hearing in good faith.
It was the first witness who appeared before the Committee who dropped the bombshell. The witness was Mr. Charles Kendall, a career employee of the Office of Defense Mobilization (MOD). This agency is an arm of the White House. Mr. Kendall appeared as a witness for ODM and the Bureau of the Budget - another arm of the White House; in fact, the right arm. It had been expected he would announce the position of the Administration in support of the legislation which had been prepared and drafted after consultation with, and full understanding of, Administration forces. He testified that the Administration was in support of the legislation only upon the condition that it be amended in two respects. It was this condition that constituted the bombshell, because the two amendments insisted upon by the Administration, with the other terms of the bill as written, would actually leave the small producers and landowners in almost the identical position in which they were placed by the Supreme Court, if not worse. In other words; these small producers and landowners would be under the absolute and control of a bureau of the federal government.
I must confess that the action of the Administration was not a great surprise to me, because it is in keeping with what has been done on several other occasions. The "powers that be" are daily preaching the Constitution of the United States, the sovereign rights of the states, opposition to centralized government, cutting down on federal bureaus and federal spending, reduction of powers in federal agencies, and the return of rights of the several states. Yet almost every action and practice engaged in by the Administration powers has been contradictory to the philosophies they have advertised. Their position on the gas bill is no different from the position they have taken in many labor matters, in civil rights matters, in numerous tax matters, as well as their support of the doctrine of pre-emption that permits the federal government to actually take over any government field it enters.
The devotion concerning the gas bill simply amount to this: If the Administration can force the adoption of its proposed amendments, the measure will, in effect, set up a basic governmental principle of federal price control and physical control of a commodity. Once such a conception is underwritten by the Congress of the United States of American, there's nothing to prevent its spread from gas to milk, to shoes, to bread, or to any other commodity in which the people, under the Constitution, have the basic rights of private property ownership. There is deep suspicion that some of the political advisers of this Administration have conceived the idea that by this approach the bill will be made so unpalatable it will be defeated, and that it will not be necessary

for the President to take a stand on the subject and either sign or veto a gas bill. If this is the plan, it amounts to an advance veto by the Administration's political advisers.

LEGAL NOTICE

CITATION
STATE OF TEXAS
 Y ELLEN CULLIS, HEIRS, UNKNOWN AND LEGAL REPRESENTATIVES OF MARY CULLIS; THE HUSBAND OF MARY CULLIS; ALL PERCEIVING ANY OR INTEREST IN NORTHWEST QUARTER (NW/4) OF SECTION 70, BLOCK 13, H&GN RR CO. SURVEY, WHEELER COUNTY, TEXAS, UNDER VIRTUE OF THE EXISTENCE OF FROM MRS. FRANCES GORDON TO HER DAUGHTER MARY ELLEN CULLIS; PURPORTING TO THE SAID NORTHWEST QUARTER OF SECTION 70, BLOCK 13, H&GN RR CO. SURVEY, WHEELER COUNTY, TEXAS, AND TO BE IN AFFIDAVIT OF MRS. FRANCES GORDON DATED MARCH 2,

1936, RECORDED IN VOLUME 89, PAGE 593, DEED RECORDS, WHEELER COUNTY, TEXAS;

GREETING:
 You and each of you are hereby commanded to appear before the Honorable 31st Judicial District Court of Wheeler County, Texas, at the Courthouse in Wheeler, Texas, at or before 10 o'clock A. M. of the first Monday after the expiration of forty-two days from the issuance hereof, same being Monday, the 1st day of July, 1957, and make written answer to the plaintiffs' original petition filed in said Court on the 6th day of March, 1957, said suit being Cause No. 4666, wherein Jay Gordon, James J. Gordon, Helen Gurley, Minnie Gill and Gordon Barnes of the title to the following described land and premises located in Wheeler County, Texas, to-wit: All of the Northwest Quarter (NW/4) of Section No. Seventy (70), in Block No. Thirteen (13), H&GN RR Co. Survey, Certificate No. 2/295, Wheeler County, Texas, save and except an undivided one-fourth interest in and to all of the oil, gas and other minerals in and under and that may be produced from said land, as conveyed to Park T. Grimes by Frances R. Gordon in mineral deed dated May 12, 1934, recorded in Volume 80, Page 534, Deed Records, Wheeler County, Texas; plaintiffs' title also now being subject to outstanding oil and gas lease to E. K. Caperton, lessee; plaintiff alleging additionally that plaintiffs have title under the three year statute of limitations prescribed by Article 5507, the five year statute of limitations prescribed by Article 5509, and the ten year statute of limitations prescribed by Article 5510, all of the Revised Civil Statutes of Texas; that the defendants actually own no interest therein and any apparent interest should be removed as a cloud upon plaintiffs' title; and seeking recovery of the title to the land and premises above described, together with the removal of any apparent cloud upon the title of the plaintiffs, costs of suit and general relief.

Mrs. Frances Gordon to her daughter Mary Ellen Cullis purporting to convey the said Northwest Quarter of said Section 70, Block 13, H&GN RR Co. Survey, Wheeler County, Texas, and referred to in affidavit of Mrs. Frances Gordon dated March 2, 1936, recorded in Volume 89, Page 593, Deed Records of Wheeler County, Texas, are defendants.

The nature of said suit is as follows:
 Said suit is an action in trespass to try title as defined by the Statutes of the State of Texas and prescribed by the Rules of Civil Procedure of the State of Texas, alleging ownership in fee simple by plaintiffs Jay Gordon, James J. Gordon, Helen Gurley, Minnie Gill and Gordon Barnes of the title to the following described land and premises located in Wheeler County, Texas, to-wit: All of the Northwest Quarter (NW/4) of Section No. Seventy (70), in Block No. Thirteen (13), H&GN RR Co. Survey, Certificate No. 2/295, Wheeler County, Texas, save and except an undivided one-fourth interest in and to all of the oil, gas and other minerals in and under and that may be produced from said land, as conveyed to Park T. Grimes by Frances R. Gordon in mineral deed dated May 12, 1934, recorded in Volume 80, Page 534, Deed Records, Wheeler County, Texas; plaintiffs' title also now being subject to outstanding oil and gas lease to E. K. Caperton, lessee; plaintiff alleging additionally that plaintiffs have title under the three year statute of limitations prescribed by Article 5507, the five year statute of limitations prescribed by Article 5509, and the ten year statute of limitations prescribed by Article 5510, all of the Revised Civil Statutes of Texas; that the defendants actually own no interest therein and any apparent interest should be removed as a cloud upon plaintiffs' title; and seeking recovery of the title to the land and premises above described, together with the removal of any apparent cloud upon the title of the plaintiffs, costs of suit and general relief.

KIWANIS NOTES

A group from Pampa and two other visitors, one from Fort Worth, the other from Wichita, Kans., attended the weekly meeting of the Wheeler Kiwanis club this week.

Announcement was made that the first scheduled softball game of the season would be played Monday evening, June 3 at the local park.

An inter club visit with Pampa is being scheduled for Friday, May 31. If you can make the trip you are urged to be at the courthouse not later than 11 a.m. Friday morning. Transportation is available for all who want to make the trip.

A program in film on the Oil Industry was enjoyed by all present.

Demonstration On Out Door Cookery

Our door cookery was the subject of demonstration, May 7, when the Briscoe H.D. club met at the club house to try out the new metal grill, recently made and set up on the club house lawn. Essje Finsterwald and LaJuana Puryear were the capable demonstrators, having attended the training given by Miss Vera Crippen on April 29. They grilled a complete meat, and served twelve members. The menu consisted of barbecued meats, new potatoes, bread, and banana jum, a tossed salad, butter and iced tea. Each member brought the meat she wanted to eat, which included: pork, beef, chicken and venison. Each was barbecued in the same sauce, though some was wrapped in foil, and some on the grill. The grill was made by Clarence Zybach and Porter Rogers at a material cost of \$5.00. They donated their time. The club really appreciates their work and we say "Thank You" so much for a job well done.

Club gave two 42 parties in April with good attendance. They had four work days at the club house and painting and papering of the interior was done. Venetian blinds were also put up and the cabinets finished. Part of the lawn was levelled and sodded. Those present for the meeting Tuesday were: Essie Finsterwald, LaJuana Puryear, Berniece Ramsey, Josie Lee, Anna Zybach, Katy Finsterwald, Jane Kiker, Vera Filington, Irene Zybach, Lou Dean Douthit, Willene Waters, and Adna Rogers.

Next meeting will be May 21, when Mrs. McCarroll will be the hostess. Jane Kiker will bring us a "Study of Family Diets."

Left-Handedness Does Not Fit Into Right Handed World

(EDITOR'S NOTE — H. M. Wiley of Wheeler, president of the Wheeler County School Board, who is himself left-handed, has long contended that left-handedness is not inherited — that it is a part of one's culture and is learned after birth. He believes that through proper training, left-handedness can, and should be, prevented. Mr. Wiley was able to present his views to many readers in an article in the May issue of The Texas Outlook, official publication of the Texas State Teachers Association. The article, quoting Mr. Wiley, was written by Wanda Allen Belzung, assistant editor of the Outlook. The article follows.)

This is a right-handed world, with almost all implements of everyday living designed for the right-handed person: scissors, can openers, pencil sharpeners, typewriters, fishing reels, do-it-yourself tools, and infirmity.

And, of course, the knife, fork, spoon and coffee cup are always on the wrong side of the plate to the left-handed person. One left-hander was heard to say he felt like giving extra generous tips when a waitress, observing that he was left-handed, reversed the table setting for him.

CITY DRUG

Amid growing controversy, the following questions provoke disagreement among many who study and write about left-handedness.

Is left-handedness inherited? Is it wrong to encourage a child to use the right hand in preference to his left?

What responsibility rests on parents and teachers in training a child to be right-handed?

Should retraining ever be undertaken?

H. M. Wiley, president of the Wheeler County school board and himself a left-hander, made a survey of left-handedness in the Panhandle to seek the answers. He checked and classified more than 4,000 information slips, interviewed scores of people with information on the subject, and studied more than 1,000 questionnaires answered by classroom teachers.

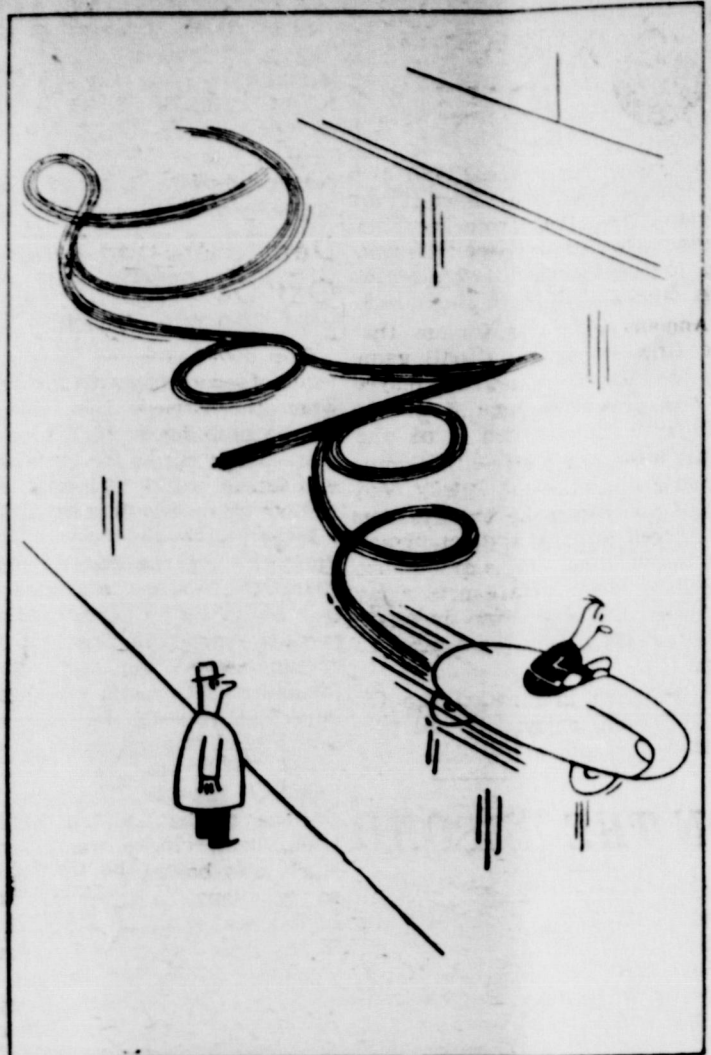

His thorough study has aroused new interest in the problem.

The results of the intensive survey, says Wiley, indicate these two conclusions: left-handedness is increasing alarmingly, and it is not inherited. It is a part of one's culture and is learned after birth. Through proper training by parents, left-handedness can be prevented, Wiley says.

The old concept of handedness, still widely believed today, has come under criticism from some recognized authorities. It states that handedness is governed by Mendel's laws of inheritance and remains fixed.

After studies in 1917-22, Dr. June Eita Downey, a psychologist of national repute, estimated that five per cent of the population was left-handed. Those who believe

Heedless Horsepower by O. Soglow

80% of the fatal accidents in 1956 occurred on dry roads.

that handedness is inherited hold that this "fixed" percentage still applies today.

However, Wiley's survey, made in 1955, reveals that in the area he studied the percentage of population which is left-handed had increased to approximately ten per cent.

The survey included 17,662 pupils in the elementary school grades of Amarillo, Borger, Pampa, and all of Wheeler County. Also, a survey was made of 3,955 teachers and students who registered for the summer terms at East Texas State Teachers College, Texas Technological College, and West Texas State College.

Assisting in the survey were college registrars, superintendents, principals, and classroom teachers.

Results of the study of the elementary pupils show that 9.3 per cent were left-handed. With a low of 8.7 per cent in the sixth grade, the percentage rose to 9.58 per cent in the first grade, an increase of almost one per cent during the six years. In schools of some localities, the percentage ran as high as 23 per cent.

It was the survey among the 3,955 teachers and students attending summer school at the three state colleges which brought out the most interesting comparisons.

In filling out the questionnaire, the participant was asked to give his age and whether he was right- or left-handed.

Here are the results, broken down into age groups of the participants:

1. Of the 631 born during the years 1892 to 1917, 5.4 per cent stated they were left-handed.

(Wiley says: There is a wide difference in percentage figures at the different colleges. For example, only four per cent of those (ages 38 to 63) attending summer school at Canyon and Lubbock, in a "newly settled" area, were left-handed; while at Commerce, in "Deep East Texas" and an "old-settled" area, seven and one-half per cent were left-handed.)

2. Of the 167 born during the years 1918 to 1921, 11.4 per cent were left-handed.

(Wiley says: These were the years

of the First World War, followed by a serious depression. Living under strain and tension, parents failed to give children proper hand training.)

3. Of the 526 born during the years 1922 to 1928, only 5.3 per cent were left-handed.

(Wiley: We had fought a war to end war. The depression had passed; tension has eased. Parents gave their babies more and better attention.)

4. Of the 843 born during the years 1929 to 1931, 8 per cent were left-handed.

(Wiley: The big depression had its beginning in 1929. Unemployment and low prices plagued our country. Living conditions in some cases became intolerable. The per cent of left-handed shows an increase of almost three per cent during these early depression years.)

5. Of the 297 born during the year 1932, more than 12 per cent were left-handed.

(Wiley: The year 1932 is set apart for contrast. The people were in the depths of the depression; savings were dissipated; real and personal property was being sold at incredibly low prices. Mother left baby with grandmother or a paid keeper to "work out." A dollar a day was not an uncommon wage. Children received little or no special attention.)

6. Of the 1,486 born during the years 1933 to 1940 9.7 per cent were left-handed.

(Wiley: As the depression years tapered off, the war in Europe began. Also, the theory of inheritance began to gain acceptance. Many mothers, not knowing what to believe, hesitated between the two opinions until their children were positive left-handers and retraining was impossible.)

From the survey statistics, Wiley concludes that during periods of stress and tension, training in handedness is neglected, and neglected training is the sole reason for increase in left-handedness. This is proof positive, Wiley says, that our handedness is not inherited.

Left-handers have difficulty adjusting to a right-handed world.

as everyone knows. But it's especially evident to teachers who must help the left-handed child in his struggle to write legibly.

The student has to push instead of pull in pen. At every turn and step he must conform to social usages by deliberately using his right hand even though it is awkward for him to do so.

Schools, too, are designed for the right-handed. The widened arms of desk chairs are on the right; class illumination frequently comes from the left; handwriting is taught with a natural slant for the right-hander.

Dr. Lawrence T. Dayhaw, professor of psychology, University of Ottawa, in the November, 1953, issue of Education, writes: "In such a world when he joins the great competition which is life, the left-handed child is confronted with a double task: (1) that of learning the same skills and information as the right-handed child; and (2) the additional task of overcoming the handicaps —" which he finds in a right-handed world which everything is designed for the convenience of the right-handed.

In his campaign to persuade parents to "train" their children to be right-handed, Wiley quotes reputable authorities of today who substantiate his belief. Left-handedness is not inherited like blue eyes or red hair, he maintains, but is a culture taught us, or learned by us in infancy. The mother or nurse is responsible for our left-handers.

The Journal of the American Medical Association in its May 22, 1954, issue (page 415) reports: "Right-handedness should be encouraged and left-handedness discouraged after about the first year. The infant has no definite sidedness, either left or right; he is ambilateral, not ambidextrous, and both sides are inept.

"A one-sided pattern begins to emerge at about 18 months and continues to develop for many years as one-sided skills are learned. Since our culture (customs, fashions, etc.) is right-sided, the child should be encouraged to right-sidedness from the very beginning. According to this view, it is wrong to let the child choose for himself, as there is a 50 per cent chance that he may accidentally select the wrong side."

In referring to this quote, Wiley likes to emphasize that the words "from the very beginning" mean the parent should begin training for right-handedness from the moment the infant can grasp an object, and should always place the object in the infant's right hand.

If left-handedness is learned when the child is an infant, does Wiley's "training campaign" have any connection with teachers who

first contact the child in kindergarten or elementary school?

Wiley points out that retraining has no place in the public schools. "The child should have a preferred hand long before school age. If a child, however, reaches school age with no preferred hand, the teacher should make a right hander of him unless he is mentally or physically handicapped. First grade teachers should make a study of the problem, as it must be approached with understanding."

If the child is a confirmed left-hander, Wiley says, teachers' and parents' efforts should be directed toward making him an efficient and contented left-hander, as there are many things more important in the life of a child at this age than handedness.

Thomas Hilton Clemens of Kelton recently received his degree in entomology from Texas A&M College.

80 ACRES IN YOUR GARAGE

ELECTRICITY BRINGS THE PASTURE TO THE COW

Fantastic, No! Latest innovation of the application of electric power actually brings the pasture to the cow, and dairymen in many sections of Texas are using the machine for supplemental feeding. The magic equipment is a cereal grain "incubator" which grows grass 6 to 8 inches in six days.

Secret of the installation, called a Herbage machine, is in the use of electric heat pumps for accurate temperature control and a practical application of hydroponics. Hydroponics is the cultivation of plants by placing the roots in liquid nutrient rather than in soil.

The cereal grains are pre-soaked, allowed to drain, then put in trays and racked like a file cabinet. With proper control of heat, humidity, light, and chemically treated water, seeds sprouted and a phenomenal growth is completed in days.

The experience of dairy using this machine shown that 20 pounds dry per cow will increase milk production from 20 percent and but content 2 to 3 points. of the forage has been \$8 to \$12 per ton. An production in a 40 cow equals that of 80 acre farm land, the planting spaced to yield 800 pounds of forage daily.

Blankenship Dairy, Amarillo, is putting a 20 foot machine through paces at this time. This machine has 120 trays grain baskets per tray produces grass for 40 and will produce over tons of grass per year.

Heat and circulation is controlled by units attached to sides of incubator building. These units have whipped the mold problem which plagued the earlier models of the machine.

Mr. A. Q. Blankenship, Blankenship Dairy, Amarillo, inspects a crop of five day old grass. Lower left, two baskets show grass and root development after 6 days of growth.

If applicant can qualify financial assistance will be given by Co. for expansion of full time position with above average income. Include phone in application. Wheeler, Box 187. 25-1tp

California Home Projects Losing 'Development' Look

In California, huge developments of new homes are escaping the "faceless factory town" look so common to home developments in many other parts of the country.

A large share of the credit for this goes to bolder uses of color by builders guided by skilled color stylists.

One of the West Coast's leading color consultants, Miss Margaret Hargreaves, of South Pasadena, explains:

"The first rule in our book says that a tract must look like a community and not like a development after the houses are occupied and the signs are taken down."

Color Responsible

Miss Hargreaves, who has color styled thousands of homes in the Los Angeles area, says "the door was opened to developments which look like communities when builders began turning to color stylists for professional help."

"Builders had learned that varying architectural styles and elevations, curving streets and the like weren't enough. Bright, tasteful color also was needed to get away from the 'tract'."

To achieve an integrated community, Miss Hargreaves says, she uses "color engineering," a process by which three harmonizing colors are chosen for each house—one for the roof, another for the siding, and another for the trim.

"If the siding color is sharp," Miss Hargreaves says, "I prefer to use a subdued accent color. I like a deep tone in the asphalt shingles, a stronger color on the siding, and a lot of white on the trim."

Roof Color First

"The roof color is selected first, since it is the common denominator in color styling a single home or an entire development," she says.

She explains this by pointing out that the roof normally is the largest visible area, "whether seen on a single house or as a part of the development from a moving car. You need color here, you see, to keep individual houses from being lost in a sea of rooftops."

Most of the colors used by Miss Hargreaves are muted, or grayed. "This prevents them from looking garish under the bright California sun," she says.

Miss Hargreaves

Wednesday Study Club Has Recent Meeting

The Wednesday Study Club completed the year with a one o'clock luncheon at Nora's Cafe on May 23rd, with Mmes. Harold Nash, R. Wm. Brown, Nelson Porter, and Frank Walker as co-hostesses.

The tables were laid in white and decorated with arrangements of beautiful roses from the gardens of Mrs. George Porter and H. M. Wiley.

Mrs. Harry Wofford, club president, acted as toastmistress. The invocation was given by Mrs. H. M. Wiley. Piano selections were rendered during the dinner hour by daughters of the club members. These guest performers were: Mary Holt, Marilyn Nash, Jane Dee Wofford, and Elizabeth Wiley. The program was concluded with a beautiful story, "Mansions in the Sky," given by Mrs. C. J. Meek.

Mrs. Paul Millet, daughter of Mrs. Geo. Porter was a guest with 22 members of the club present.

HOME OWNERS' QUESTION BOX

Q—Will insulation in the floors above a crawl space make the floors warmer? If so, how can I get it to stay in place?

A—Thick mineral wool batts or blankets installed between the floor joists will keep cold out of the floors. The batts or blankets can be held in place by lengths of "chicken wire" stapled along the joists.

Q—How can decals be removed from a wall when repainting?

A—An electric iron or broad-based soldering iron over a wet cloth usually will peel decals off quickly.

Q—Our home, which was built about 15 years ago, has a nearly flat roof. Now the roof is weathered and needs replacing. Is there any material we can use that is more colorful than the original dull black roof and will give good service?

A—If the roof slopes at least two inches in each horizontal foot, asphalt shingles can be applied by a method developed especially for low-slope roofs. The asphalt shingles are available in practically every color imaginable and will give long-lasting weather protection as well as exterior color. Incidentally, houses built low to the ground appear taller and larger if the roof is covered in a light color.

Pride-Trimble Vows Read In Wheeler

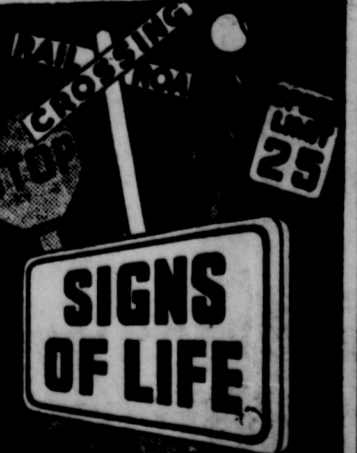

Miss Patricia Ann Pride, daughter of Mr. and Mrs. M. E. Pride was married Saturday afternoon, May 25th to Duane Trimble, son of Mr. and Mrs. Lee Trimble, Shamrock, in a ceremony read by Rev. Carlton Thomson at the First Methodist Church in Wheeler.

Miss Peggy Pride served her sister as maid of honor. She wore a dress of blue and white polished cotton made with a fitted bodice and bouffant skirt, with white accessories.

Mr. Joe Landrum served as best man.

The bride was attired in a dress of blue sheer fashioned with a bouffant skirt and short jacket, with white accessories.

Following the ceremony, a reception was held in the bride's parent's home. The house was decorated with pots of red and white roses.

Mr. Trimble is a graduate of Wheeler High School and attended one year of school at Denton. Mr. Trimble attended school in Shamrock.

The couple have made their home in Albuquerque, N. M., where he is employed with Southwestern Bell Telephone Company.

Family Get-Together Held In City Park

A family get together was enjoyed by the Miller family Sunday, May 26 in the local park. Brothers, sisters, daughters, sons and grandchildren of Mrs. Earl Miller attended. They had not seen one sister, Mrs. Emil Oehmigen, of Sacramento, Calif., for forty years.

Those attending were: Mr. and Mrs. Troy Miller, Tulsa; Mr. and Mrs. Clayton Callan and daughter, and Joe Miller, all of Pampa; Mr. and Mrs. Earl Miller and Mr. and Mrs. Elmer Miller, all of Sweetwater, Okla.; Mr. and Mrs. Billie Burrell of Perryton; Mr. and Mrs. G. B. Anderson and girls, and Mr.

and Mrs. Charles Brittan and family, all of Fritch; Mrs. Leola McCuiston of Canyon; Mr. and Mrs. Russell Barker of Shamrock; Mr. and Mrs. Emil Cehmigen of Sacramento, Calif.; Mrs. Cora Bentley and Mr. and Mrs. Aurba Bentley and Carl, all of Canadian; Mr. and Mrs. William McCuiston, Mr. and Mrs. Thomas Patterson, Mr. and Mrs. Emmett Gibbins, Jerry and Janas Rasco, and Mr. and Mrs. Albert Anderson, all of Borger; Mrs. Katy Ray Summers and Gary and Mrs. Summers grandmother, all of Breckenridge; Mr. and Mrs. Jim Goodwin of Dimmitt; and Mr. and Mrs. J. M. Liles, Mr. and Mrs. Pete Beard, Mr. and Mrs. Martin Callan, and Mrs. Minnie Blote and children all of Wheeler.

These also visited Mrs. J. A. Callan, who is in the hospital.

Carolyn Sims, daughter of Mr. and Mrs. Lyndon Sims is visiting her sister, Mr. and Mrs. T. E. Haddock, Jr., in Lubbock this week.

Avery Miller of Texas City, formerly from Wheeler, visited Saturday with the Clyde Johnsons.

Use printed advertising... the short cut to bigger and better results in your business.

Insulation Cuts Cost of Installing Air Conditioning

An air-conditioned home needs thick insulation in its ceiling, walls, and floor to make air conditioning practical, economical, and completely comfortable, according to one of the nation's leading researchers in the field of home comfort.

Prof. John R. Watt, of the University of Texas, told an audience of air conditioning engineers and members of the National Association of Home Builders that:

"Every dollar's worth of insulation you install will cut an equivalent amount off the cost of air-conditioning equipment. A well-insulated house will save about \$80 on equipment costs."

Studies have shown that thick mineral wool also reduces the costs of air conditioning by lowering operating expenses.

The effectiveness of mineral wool in making homes easier and more economical to air condition lies in the fact that tiny "dead air" spaces are trapped in the wool. This "dead" air blocks the passage of heat keeping summer warmth out of the house.

As an aid to winter comfort and economy, mineral wool works the other way around, keeping heat inside. Owners of existing houses who plan to install air-conditioning systems, or who want to gain more economy in winter heating, can install batts or blankets of mineral wool themselves in accessible ceiling and wall areas. Walls, ceilings and floors that cannot be reached by the home-owner can be filled with mineral wool by professional installers who blow the insulation in by air pressure.

House Needs Spring Check

Spring is traditionally house cleaning time, but it also should be house inspection time. A house takes a lot of punishment from winter's blasts—punishment which can result in costly damage.

This is especially true of the roof, which is a home's first line of defense against snow and ice. The weight and movement of snow and ice often can start serious trouble, especially if the roof is an old one.

A good time to check the roof is in the spring after the first heavy rain. Look at the underside of the roof deck, check the rafters carefully, and look closely at areas around the chimney and soil stacks.

Any signs of dampness may mean the roof is leaking. It is wise then to call in a reputable roofing contractor for a professional inspection. Perhaps the dampness is caused by condensation and your attic simply needs more ventilation. But if the cause is a leaky roof, you may need a new one right away to prevent costly interior damage.

Don't be surprised if the roofing contractor doesn't offer to patch up the leaks. Reliable contractors know that patching an older roof is false economy, since a weathered roof generally has worn out uniformly. One leak means more will be coming.

In most cases, a roof of asphalt shingles can be applied directly over the old material, saving the expense and mess of removing the worn roofing. Home-owners who find they must re-roof also can spruce up the appearance of the house with one of the many colors available in asphalt shingles.

Ed Parsley of Goodwell, Okla., spent the week end with his parents, Mr. and Mrs. Frank Parsley. He returned to Goodwell where he plans to find work.

Pine Panel Door Keeps Youngsters Out of Dutch

Keeping a watchful eye on her children without having them underfoot in the kitchen is a problem most mothers have faced. Here's one solution—a panel door of ponderosa pine cut in half to form a Dutch-style entrance to the kitchen. A shelf on top of the lower half makes a serving counter at meal times.

A Dutch door also makes an attractive, practical front or rear entrance door. It has the advantage of keeping youngsters inside while the upper half is left open for ventilation. It also permits the housewife to talk to callers without inviting them into the house.

Panel doors of ponderosa pine that can be converted to a Dutch-style door are available as stock doors from building material dealers.

Dutch-style doors also can be used effectively on a child's room, or play room. With the bottom half closed, the youngster can be confined without feeling imprisoned.

Many families use the Dutch door as a novelty entrance to a recreation room, or as an opening onto a patio.

NEWS ITEMS OF 20 YEARS AGO

The Allison Girls win in Basketball Tournament. Fifteen teams competed in the tournament. This was the sixth annual tournament at Allison, and the Allison sextette has won first place each year. Allison lassies comprising the starting lineup of the championship team are, Gunter, Jones and Hayes, forwards; Traylor, Richardson, and Dillon, guards. The girls club is coached by John Peoples, is one of the most outstanding teams in the state. They have won 12 straight games this year and have not been defeated.

Fire of undetermined origin destroyed the High School Gymnasium at Briscoe early Thursday night. Mr. and Mrs. J. H. Richards entertained at a dinner party. Their guests were, Mr. and Mrs. Cudley Richards and daughter and son, Mrs. Charley Young and daughter, Junita, Mr. and Mrs. Robert Ray Richards, all of Tahoka, Mr. and Mrs. Bradley Steward of Shamrock, Mr. and Mrs. W. E. Collins, Mr. and Mrs. E. H. Herd and daughters, Marie and Maurine, Mr. and Mrs. Ernest Dyer, Mrs. Roy Esslinger, Majorie and Dorothy Jean, Mr. and Mrs. V. B. Hardcastle, Howard James and Joe Ann, B. D. Hutchison, Lucille, Robert and Dorsie.

Four generations of Hamptons ate dinner in the home of Mr. and Mrs. Wade Hampton, on the Stiles Ranch. Besides Grandad Hampton, his son Charlie, his grandson, Gilbert Hampton, and great-granddaughter little Linda Hampton. Grandad Hampton is one of the oldest timers here, having settled in Wheeler County back in 1898 or 99.

Dr. V. N. Hall left Thursday for Albuquerque, N. M., where he is to report for duty as dentist for C. C. Camps in the West. He is to travel from one camp to another, covering a wide area. He will spend about two weeks in each area.

Chester Lewis improves mail service, by installing a stove in the lobby of the post office.

Mr. and Mrs. George Dunn celebrated their golden wedding at their home in Mobeetie Sunday. The observance was featured by a dinner for relatives, and gathering of friends and neighbors in the afternoon. Relatives who were dinner guests were: Mr. and Mrs. John Dunn and family, and Earl Dunn, of Mobeetie, Mr. and Mrs. Ernest Lee of Wheeler, Callers during the day were, Mrs. Nathan Hunt and Maurine of Mobeetie, Emily Lou and Junior Ahler, and Mr. and Mrs. Clarence Robison of Wheeler, and Mr. and Mrs. Ed Johnson, of Mobeetie.

Briscoe personals: Among those on the first grade honor roll are: Juanita and Iris Clepper, Nelda Bess Barry, Mozelle Wilson, Fay Francis, Ruth Puryear, Reta Faye Aderholt, Irma Jean Lee, and Bobby Rex Zybach. Second grade,

\$50 additional resources being allowed for each person over two in the family.

There have been complaints lodged with local newspapers that several people who are receiving these free groceries do not qualify for them according to the above standards.

County Commissioners Court administers the program with the county judge in charge of most of the "paper" work. One must meet requirements laid down by the State Department of Public Welfare and the County Commissioners Court to get on the eligible list; then the roll is checked every six months and if the economic status of a client has improved enough to make him ineligible, his name is supposed to be taken off the list.

During the month of February the following quantities of commodities were distributed to 1185 persons: 2,022 lbs of butter, 2,562 lbs. of cheese, 4,869 lbs. of dry milk, 1,962 lbs. rice, 2,842 lbs. of beans, 5,160 lbs. of corn meal, and 3,520 lbs. of flour.

In March the following quantities were distributed to 1,132 Wheeler county residents: 1,941 lbs. of butter, 2,492 lbs. of cheese, 4,729 lbs. of dry milk, 1,890 lbs. of rice, 2,728 lbs. of beans, 4,985 lbs. of corn meal and 5,930 lbs. of flour.

Wood Windows Offer Advantages To Home Builder

Ask most any builder why he installs wood windows in his homes and he's likely to come up with reasons like this:

1. Ponderosa pine, the wood used for most high quality windows, doesn't conduct heat. As a natural insulator, it eliminates condensation on sash and frames.
2. Wood does not rust and is not corroded by salt air or chemical fumes.
3. Most windows of ponderosa pine come in units, with weatherstripping installed and frame and sash fitted together at the factory. This reduces labor costs to the builder and assures easy operation.
4. New buildings settle slowly, often throwing windows and doors out of line. Windows of ponderosa pine can be readily adjusted to operate smoothly.
5. Wood takes any decorative finish, paint or stain, and can be redecorated when color schemes are changed, inside and out.
6. Wood doesn't readily transmit sound. Rattling due to vibration is kept at a minimum and operation is quiet.

SOAP SAVES PAINT

Outside painted walls that are dingy and discolored don't always need repainting. Washing with soap and water often can restore their freshness. Use a scrub brush on a small area to check the results of washing. If you're satisfied start at the bottom and work your way up. After washing rinse with clear water, using a hose.
