... line structures are ten-

tatively planned in Hemphill and Washita counties. These will be large earthen dams large enough to impound lakes covering, at peak stages up to 300 or 400 acres—comparable in size to the area of Lake Marvin.

According to plans, lakes will not be held at capacity level. Dams will be built with flood gates and spillways so that release of water can be controlled, and the aim is to maintain a steady flow of water in the Washita River with no flooding at any time. A large amount of water will be permanently impounded behind the dams, however, and a chain of lakes extending through out the Washita River watershed will be created.

This program is strictly voluntary on the part of landowners, Brock pointed out. Ownership of land will not be affected. The local districts will seek easements on the land to be covered by dams and lakes; and the local districts, through their boards of supervisors will have the responsibility for maintaining the dams and controlling the water use, but the lakes thus created will be private, not public.

Water from the lakes may be used for irrigation purposes, subject to control of the local Soil Conservation Districts. The lakes may be stocked with fish or used for recreation purposes if the landowners so desire.

The tri-county committee headed by Clark Mathers has already contacted the landowners in this area who will be affected by the program, and is now preparing to secure easements for dam sites. Personal letters are also being sent from the local SC districts to landowners, explaining the program and advising them that survey crews will be working in the area soon.

Three different crews will cover

the project area—a sediment crew, hydrologists and engineers, and the over-all watershed planning crew.

The preliminary surveys will determine what can and should be done, Brock said.

"This is a joint venture between the U. S. Soil Conservation Service and the local Soil Conservation Districts," the chairman explained. The SCS will foot the bill for all earth moving, and construction of dams and spillways. The local districts are obligated, in turn, to carry out soil management practices and individual landowners in the watershed will be expected to cooperate by controlling siltation and run-off on their land.

More than a quarter of a million acres of land in the Washita watershed in Hemphill, Roberts and Wheeler counties will be affected by the program. Most of it, 238,000 acres, is in Hemphill county. About 6,000 acres lies in Roberts county, and about 10,000 in Wheeler county.

Nearly half a million acres of land is in the Upper Washita watershed in Texas and western Oklahoma.

Part of the Washita watershed control program has been completed in Oklahoma—on the Sandstone Watershed project southeast of Cheyenne which was accomplished in 1953.

But the present plan includes the entire Washita River watershed in its scope.

Soil Conservation engineers estimate that over a 50-year period the watershed project will save a minimum of \$120 for every \$1 spent on it.

The man who knows when to keep still should be given a prize for having a fine command of language.

The road to success runs up hill, so don't expect to break any speed records.

It generally a chain of circumstances that shows up the weak link in a man's character.

WHEELER FARM BOYS AND GIRLS SHOW CALVES AT STATE FAIR

(Continued from page 1)

All calves were sold except the George Harris calf and he brought his back home to feed for other shows.

Adult leaders attending along with the boys and County Agent and agriculture teacher were Mr. and Mrs. Irvin Hink and Mr. and Mrs. Joe Henderson of the Kelton community. Mr. and Mrs. Lindsey McCasland attended Thursday and Friday and helped with the show and sale of the calves.

Bryan Swaim, county agent, said he thought the grading was much stiffer this year than last, but as a whole the county had better calves. He said they were graded this year on both fat and type and last year mostly on just finish, therefore it is very similar

RECORD YIELDS FOR TEXAS CROPS

The U. S. Department of Agriculture reported October 12 that record high yields per acre are now estimated for sorghum grain, peanuts, cotton, rice and sweet potatoes in Texas.

The agency said that as harvest moved forward, it has become "increasingly evident" that this has been a banner season for Texas farm production.

By far the largest sorghum grain crop in Texas history is being harvested. Cotton prospects have increased 50,000 bales over last month's estimate. The peanut prospects have improved to two and a half times as large as last year's short crop. And sweet potato production is nearly double last year's drought-short crop.

Wheeler Countians Buy \$250,000 Bonds

Sales of E and H Savings Bonds in Texas for September were \$14,626,577. This represents an increase over August sales of more than one million dollars. Nathan Adams, Chairman and Ed Gossett, Co-chairman of the State Savings Bonds committee announced today. Total sales for the first nine months of 1957 was \$127,489,977 or 66 per cent of the goal.

Sales in Wheeler County amounted to \$250,000.00 for the 9 month period, which was 49.4 per cent of the 1957 goal, according to R. J. Holt, Chairman of Wheeler County savings bonds committee. Seventeen counties have already attained their goal for the year.

"I am sure that if every citizen of Wheeler County will buy an extra savings bond during 1957 our county will reach its goal. There is no safer investment than U. S. Savings Bonds, since both the principal and interest are fully guaranteed by our Government," chairman Holt concluded.

HOG EXPERTS WORRIED PRICES BELOW ESTIMATES

A checkup of prices this week with those in effect a year ago, made in the files of the Weekly Livestock Reporter at Ft. Worth reveals prices about \$1.50 to \$1.75 higher this year than last.

In the week ending October 26, 1956, hogs topped at \$16 and \$16.10. The top Monday at Ft. Worth \$17.50, a few \$17.75.

Some of the so-called experts earlier this year had estimated swine prices would remain well ahead of last year throughout the Fall, and the current margin is too close for comfort.

SHEEP AND LAMB ACTIVE STRONG, TOP \$21.50

Opening trade Ft. Worth in the sheep yards Monday was a fully steady to strong affair, and high grades were again scarce. Fat lambs topped at \$21 and \$21.50, and some small lots of woolled feeders sold at \$20 and \$20.50 with shorn feeders at \$19 down.

Goats sold from \$5.50 to \$6.00

Wheeler Wheat Farmers Can Grow 30 Acres For Own Use

"General provisions of recent legislation permits farmers whose wheat acreage allotment is less than 30 acres to grow up to 30 acres of wheat for use exclusively on the farm where it is produced," stated Albert Marshall, office manager of the Wheeler County ASC.

The information was released in the October bulletin mailed from the ASC office to farmers in this county. The bulletin continued:

"This applies to the 1958 and future crops, and does not apply to 1957 or any prior crops. Producers signing MQ - 32 - Wheat forms may plant 30 acres of wheat on their farms and will be exempt from wheat marketing quota penalties provided:

"1. Producers must sign application form MQ-32-Wheat by October 15, 1957. Other persons interested in the wheat crop must sign this form as soon as possible, but the operator must sign by October 15. The feed wheat provisions will apply only to those who sign the application by this date.

"2. The total wheat acreage on the farm must not exceed 30 acres. (If more than 30 acres are planted for cover, the excess must be destroyed by May 10.

"3. The entire crop of wheat must be used on the farm where it is grown and cannot be removed to any other farm for any purpose. This wheat may be used for seed, human food, or feed for livestock, including poultry. The livestock to which the wheat is fed must be owned by the producer.

"None of the wheat planted under this provision will be eligible for price support. A wheat marketing card will not be issued for the farm exempt under the feed wheat provision.

LETTER TO THE EDITOR

Rep. Grainger McIlhany, who is in Austin attending the special session of Legislature, sends the Times the following letter:

WHEELER TIMES
 Wheeler, Texas
 Dear Mrs. Hopkins:

Our special session convened last Monday, Oct. 14, and Governor Daniel gave us an opening message in which he submitted the following items for study by the Legislature:

1. A bill recommended by a 150-member statewide advisory committee, to allocate \$1,020,000 of present appropriations for statewide water planning. To create a planning division in the Board of Water Engineers. To authorize the board to enter contracts with the United States for purchase of storage space in Federal reservoirs, transfer these rights to river au-

thorities and local districts when such agencies are able to make use of the water.

2. Registration of all persons, including lawmakers and state officials, who practice before state agencies.

3. Registration of lobbyists and regulation of lobbying practices.

4. Creation of a Crime Study Commission.
 So far, four separate bills have been introduced covering registration of lobbyists and regulation of lobbying practices. One of the three other subjects submitted by the Governor. The Conservation and Reclamation committee has started hearings this week on the water program bill, and the public hearings on the other subjects will begin next Monday, Oct. 21.

I attended the hearings on the water program, and I believe that the committee will be able to submit a plan to the House within the next few days.

As soon as these bills are approved by the respective committee, I will send copies of them to you.

Sincerely yours,
GRAINGER McILHANY

Her bouquet, mounted on her Bible was of white carnations and blue lace accenting a white gardenia. She was given in marriage by her father, Leonard Reich.

Mrs. Patricia Eads, aunt of the groom, served as matron of honor. She was dressed in blue embroidered taffeta with pink accessories and carried a bouquet of white asters.

Bobby Zyback, brother-in-law of the bride served as best man.

Mrs. Sylvia Lee played traditional wedding marches and "The Lord's Prayer" as a benediction.

Mrs. Reich chose for her daughter's wedding a navy-blue

linen dress with red accessories. Her corsage was of red carnations shaped in a half moon.

This charming lounging robe is an easy-to-care-for fashion of Everglaze cotton in an abstract print. Button-down front and push-up sleeves add to comfort of the robe.

HAVE FUN BUT BE SAFE

Roasting marshmallows over a bonfire, bobbing for apples in a tub of water, trick-or-treat in at the neighbor's house and hoping you won't be asked for the "pay" — a dance, a song or poem — for the treat.

All this is Halloween, a once-a-year occasion when Johnny and Mary can fill their paper sacks with a collection of goodies even the heartiest of appetites can barely dent.

Halloween... a night when bedtime is moved back an hour or two, if you protest enough) a night when small spooks slither through the streets of Pumpkin Center, Calif., Skull Creek, Colo., and Treat Ark., and most places in between.

The originators of the observance of All Saints Day probably never realized how the eve would be marked in the 20th Century.

And for sure, they never realized the dangers of Halloween hijinks.

Questions and Answers

Q.—My GI term insurance policy is nearing the end of its term. Will I have to take a physical examination to renew it for another five-year term?

A.—No physical examination is required. In fact, as long as your premiums are current at the end of the term period, you needn't take any steps to renew your policy.

Q.—I have a GI loan. Does the lender have a right to charge me a penalty for late payments?

A.—For any loan installments paid more than 15 days after its due-date, he may add a late charge that does not exceed four percent of the amount of the installment.

Q.—If I take a part-time course under the Korean GI Bill, will I be using up my entitlement on the same basis as if I were going to school full-time?

A.—No. If you take part-time GI training, you will use up your entitlement only on a part-time basis.

Q.—I am a young man of 22, eligible for War Orphans schooling.

Does my mother have to file an application in my behalf, or may I file one myself?

A.—Since you are over 21, you may file your own application. For young people under 21, however, their living parent or guardian must file the application.

Caravan For The Blind In Wheeler Oct. 26

"Caravan for the Blind" truck will be in Wheeler, Oct. 26. The local Kiwanis club is sponsoring the sale of merchandise made by blind people of Texas. They ask that all Wheeler people visit the truck and purchase their needs. The truck, loaded with mops of all kinds, brooms, brushes, foot scrapers and many other useful articles, will be parked near the intersection of Wheeler main streets all day Saturday the 26th.

The Caravan for the Blind is the only means the blind workers in Texas have for marketing their products so the Kiwanis want the people to visit this traveling market and buy all that they possibly can.

Proceeds of the sale going to the Kiwanis club will go into their Health and Welfare fund. This money is used to purchase glasses pay for dental work and other necessities for underprivileged children in this area.

DO YOU NEED CHIROPRACTIC ADJUSTINGS?

For example, such cases as these have shown that they had turned to the right art of healing when they put Chiropractic to the test:
Nervous prostration; nervous dyspepsia; neuralgia; kidney disorders; intestinal complaints; conditions that lead to diabetes; heart disorders; rheumatism of all kinds; lumbago; uterine and ovarian abnormalities.

Do not be so foolish as to say: "Well, I do not believe I am a Chiropractic case," without investigation, and possibly denying yourself the chance of being your normal self again. I will be glad

to give you an examination and advise, without cost or obligation. DR. C. C. MERRITT (Adv) 46-tfc

To The Busy Housewife . . .

YOUR HOMETOWN NEWSPAPER IS A REAL CONVENIENCE!

A wonderful way for a busy young mother to save countless hours is by shopping the ads in her hometown newspaper. By knowing, before she goes to town, which products she wants and where to buy them, she can do an efficient job of marketing. While the housewife spends her time becoming an expert nurse, laundress, cook, playmate, and bookkeeper, the local newspaper is bringing her the shopping news. It tells her about the latest products and services that will help her accomplish her work most efficiently. It tells her where to find the best prices offered on items she needs. It saves her many long hours of "shopping around".
