WHEELER MUSTANGS WIN GAME AGAINST McLEAN

The Wheeler Mustangs won their game with McLean Tuesday evening, Jan. 2. This was the first win of the season for the boys; their record is 1-4. Two games, though lost, are worth mentioning. In the game with White Deer Thursday evening, Dec. 28, seven overtimes were required to end the game; the final score was 62-55 in favor of White Deer. Time of play is the equivalent of 1 3/4 games; and may be a record for the number of overtimes required to finish a game. The Mustangs met Phillips and the game ended with the score 59-56; each team scored 22 field goals from the floor and the game was won with free-shots. Wheeler made 12 of 22 free shots while Phillips made 15 of 21 free shots.

The final scores of the other two games played were 74-53 in favor of Groom and 83-40 in favor of Miami. In the game with McLean, Myron Jolly was high point scorer with 16 points. Benny Baker earned 12 points for his team. Jolly was the leading rebounder with 15 rebounds. Baker recovered 9 rebounds. The Mustangs will play in the

Canadian Tournament this weekend. Both teams will play Darrouzette Thursday morning; the girls play at 9 and the boys at 10:30. The winner of these games will play the winners of the Follet and Childress games. District play begins Tuesday, January 9, for the Wheeler teams as they play Quail at Wheeler. Terry Simpson is the coach for the boys. Statistician for the team is Millissa Hill.

LESTER HALL HOME DESTROYED BY FIRE

The home of Mr. and Mrs. Lester Hall of Allison was destroyed by fire Sunday evening, December 31. Fire Departments from Allison, Briscoe and Wheeler were called. The family lost all their possessions with the exception of the clothes they had on and the family car which they got out of the garage. The water heater was believed to be the cause of the blaze.

The event will be at 8 at 7 P.M. The event will be at the school cafeteria. The couple has three children, a girl, 15, and two boys, age 13 and 10.

SHOWER PLANNED
A shower will honor the Lester Hall family Monday evening, Jan

SWORN IN: County officials elected in the November General Election took the oath of office Monday morning, January 1 at 10:00. The ceremony was held in the District Courtroom in Wheeler. First to take the oath of office was County Judge Wendell Morgan; (pictured below) the oath was administered by his secretary, Betty Hennard. Judge Morgan then administered the oath of the remainder of the newly elected county officials. Pictured above (left to right) are; Jerrie Moore, Treasurer; Paul Topper, District Clerk; Jerry Bob Jernigan, Constable, Precinct 3; M. D. Nobles, Justice of Peace, Precinct 3, place 1; Charlie Whitely, Justice of Peace; Bill Rushing, Justice of Peace, precinct 3, place 2; E. E. Henderson Commissioner, Precinct 4; Billie Atherton, Commissioner, Precinct 2; Neil Rogers, Constable, Precinct 1; Thomas Daughtry, County Clerk; Kent Sims, County Attorney, was not present Monday. (Top Photo, compliments of The Shamrock Texan.)

NORTH WHEELER COUNTY AMBULANCE CORP MEETS

The North Wheeler County Ambulance Corps met Tuesday evening at the Ambulance barn. The business at hand was the election of officers for the coming year. The slate of officers included two new names. After serving for the past year as vice president, Louis Stas automatically took office as president for 1979. David Cross was elected to serve the group as vice president. Mary Kay Christner will continue to serve as secretary-treasurer. Dwight Tipps will be the training officer for the year. In electing Mary Kay for a third term as secretary-treasurer, a vote of "thanks" was extended for all the hard work put forth by Mrs. Christner. She takes on many responsibilities beyond the duties of her office.

The group was informed of an extrication to be offered in Wheeler for the area firemen, ambulance personnel or interested individuals. The classes will begin Monday evening, January 8, at the Wheeler County Show Barn at 7:00 P.M. The remainder of the course will be Jan 9, 11, 15, 16 and 18. Cost of the school will be \$5 for each individual.

Dr. Hennard reported on a meeting attended in Amarillo December 28. State Legislation under consideration which may affect the Ambulance Corp was discussed. A bill presently being considered would by 1980 require all individuals on rescue squads be Emergency Medical Technicians.

Carl Knoll, Wheeler County Coordinator for the Ambulance Service, reported on the Emergency Care Attendant course being offered at Kelton. The holidays, ball games and other activities have caused a delay in the completion of the course, however he intends for the group to test by the end of the month. The group agreed to move the ambulance to the new barn as soon as possible. Keys to the

There was four grades in my room. We took turns with our classes. The teacher taught us, kept the fire hot; Swept the floor, and took out the ashes.

The little mules stayed near the school yard Until the school day was through. Then my brothers drove them home It became the natural thing to do.

It's a memory that I look back on, At the time, it was neat. It was a status of the times, I'm sure people will never repeat.

The country school was named 'Union'; We went there in the thirties by bus. We still had to walk a mile to catch it. But it was warmer, and without all that fuss.

Today we would look crude, With all of the cars, and airplanes that fly. Just like some day we will look crude In the distant by and by.

In my life we've advanced from the buggy To radio, television, and a man on the moon. This just might be the beginning. Future children might go to school by balloon.

By Wilma [Sims] Wood
Merced, California

Regular enrollment will be January 8. The admission office will remain open the first night of classes until 7:30 P.M. Numerous other night classes will be offered on Monday, Tuesday and Thursday. A complete listing can be obtained by calling the Admissions office 928-5533.

Here & There

January 1, 1979! A New Year. A new beginning. I feel I am not following very closely the admonition of Alex Clark when he said, "Let us watch well our beginnings, and results will manage themselves." I'm at a disadvantage today. The cold is intense, some water pipes are frozen, I've had plumbing problems for over a week, and my car won't start. But I can still walk, which I did to a friends house for New Year's feast. A group of friends managed to get to Mary Finsterwald's house, all bringing a dish of food. I contributed the blackeyed peas, for none of us would want to take chances of missing them on this occasion. Others there, and contributing delicious food, were Mary Wofford, Reba Wofford, Grace Porter and Vida Brown. Of course most everybody saw the TV football game. (I took a nap.) When I can't walk a friend picks me up. I worked at the Rogue last night, but Richard Nall, the manager, came for me. And in all that cold and snow and ice, we had a goodly number to see the movie. And that reminds me. There are a number of interesting movies coming up. It is relaxing to get away from the "Tube" for a while. You might try it. I know I not making a very good beginning this year. There are so many people I should have

mentioned last week, but time and circumstances took their toll. And I wasn't in touch with the New Year activities. So I apologize for not being alert. However Mr. Emerson said, "No sensible person ever made an apology." I'm not sure I know what he meant. The Steering Committee of The Wheeler County Republican Party met Thursday, Dec. 21, at the home of Mr. and Mrs. Bill George of Shamrock. Plans for the Lincoln Day Dinner in February and the Organizational meeting were discussed. The Committee selected January 8 for their organizational meeting to be held in the District Courtroom in Wheeler County Court House at 7:30 P.M. Officers will be elected. All Republicans are urged to attend.

Mother Of Local Resident Buried
Funeral Services were conducted for Mrs. Myrtle Dilday on Dec. 26, 1978 at Gatesville in the Gatesville Funeral chapel. Interment was made in the Ireland, Texas Cemetery. Mrs. Dilday had been in failing health the last few years and has been residing in the Rotunda Nursing Home in Gatesville. Formerly her home was in Hamilton Texas. Mrs. Dilday is the mother of Mrs. George Porter.

BLOOD PRESSURE CLINIC VISITORS
There will be a free Blood Pressure Clinic for all Wheeler County residents regardless of age, Thursday, January 4, 1979. It will take place in the South end of the Old Nicholson Memorial Hospital on Canadian Street from 9:30-12:00 A. M. This Clinic is sponsored by the Retired Senior Volunteer Program and the Texas Agricultural Extension Service. Those needing a ride can call Inez Wright at 826-3239.

Road Construction Plans At Kelton

Approximately 45 persons attended the public meeting conducted in the Kelton school gymnasium for the purpose of discussing the extension of F. M. 2697 planned by the State Department of Highways and Public Transportation (DHT). The DHT plans to construct a total of three miles of new road on F. M. 2697. A one mile section will extend from F. M. 592 in Kelton, west. The other section will extend F. M. 2697 eastward two miles, starting one mile east of Kelton. Childress District Engineer Lewis H. White and Wellington Resident Engineer O. V. Johnson discussed the planned improvements. Several local citizens voiced their support of the planned construction. There was some discussion concerning the possibility of a traffic signal in Kelton at the intersection of F. M. 592 and F. M. 2697. White stated that at the present time the traffic count is not high enough to justify a signal under current warrants. He also added that at the present time funds are not available to widen F. M. 592 thru Kelton. White said that the contract on F. M. 2697 could possibly be let as early as April, 1979.

GUESTS

Visiting Mr. and Mrs. P. A. Martin during the Christmas holidays were the following; Mr. and Mrs. Happy Martin of McAlester, Okla.; Mrs. Becky Sheppard, Steven & Kimberly of Sweetwater, Texas; Mr. and Mrs. Louis Martin, Amarillo; Mr. and Mrs. Joe Wayne Martin and two sons of Knoxville, Tenn.; Mrs. Gay Snowden and Eric of Abilene, Texas; Mr. and Mrs. Dub Goad, Wheeler; Mr. & Mrs. Mike Goad, Shane & Travis, Briscoe and Mr. and Mrs. Fred Goad, Mrs. Bob Martin, Teresa, Randy and Angie all of Wheeler.

Wagner Wins DQ Trip To Hawaii

Charlie Wagner of Canadian, Panhandle East supervisor for the Chapman Fast Foods Dairy Queens, has won a week-long vacation trip to Hawaii in a sales contest encompassing managers and supervisors of almost 50 Dairy Queen restaurants in the state. Wagner -- one of three in the CFF DQ organization to win a trip award in the contest -- left for Hawaii Tuesday, Dec. 26. He had his choice of a vacation in Italy or Hawaii as a reward for exceeding his goal for 1978 by more than 10 per cent.

One of the other winners -- Margie Hawkins of Muleshoe -- is also going to Hawaii as her prize. The third recipient of the vacation award -- Russ Bland of Post -- selected the Rome trip. Announcement of the prize winners was made by James L. Utley of Abilene, executive vice-president and chief operating officer of Dairy Queen of West Texas, Inc., the corporation that operates the Panhandle East stores supervised by Wagner in Borger, Canadian, Perryton and Shamrock, and by E.G. (Gene) Bland of Abilene, vice-president of operations for the company.

The West Texas corporation is one of four fast-food companies headed by I.B. (Barney) Chapman II of Fort Worth. Wagner and his wife, Jeanie, took their daughter, Dena, 14, and son David, 11, on the Hawaiian vacation with them. The family flew via Delta Airlines from Dallas/Fort Worth Airport to Los Angeles on Tuesday, Dec. 26, then took a Panam Flight from Los Angeles to Honolulu. The return trip also will be via Panam and Delta, arriving back in Dallas/Fort Worth on Wednesday, Jan. 3.

Sayre To Offer Night Courses

Sayre Junior College will offer a course in Medical Terminology on Monday nights beginning January 15th. The class will begin at 7:00 P.M. The instructor for this course will be C. E. Christian. Mr. Christian stated the course is designed for Medical office staff, Pre-Med Students, and other interested persons. Regular enrollment will be January 8. The admission office will remain open the first night of classes until 7:30 P.M. Numerous other night classes will be offered on Monday, Tuesday and Thursday. A complete listing can be obtained by calling the Admissions office 928-5533.

ENGAGEMENT ANNOUNCED: Wheeler High School Mr. Christner is a 1978 graduate of Wheeler High School and is a freshman at the University of Texas in Austin. The couple plans to be married after Cathi completes high school. The bride-elect is a junior at

DANA WALLS BECOMES BRIDE OF BILL McILHANY SATURDAY, DEC. 30

Dana Walls and Bill McIlhany, both of Abilene, were united in marriage in the First Central Presbyterian Church in Abilene at 7:30 P.M. on Saturday December 30th. The Rev. Richard Gilmer officiated at the ceremony.

The bride is the daughter of Mr. and Mrs. Edison J. Walls, 1534 Mockingbird Lane, Abilene, and the groom is the son of Judge and Mrs. Grainger McIlhany of Wheeler.

Wedding music was provided by Beverly Williams and Melinda McClure at the organ. Wendy Stewart played the flute and Jamie Horgus was the guitarist and soloist.

Attending the bride was Susan Bynum of Austin as maid of honor, and bridesmaids were Mrs. John Thompson, sister of the bride, Ft. Worth, and Mr. Dee Jay Walls of Dallas. Bridesmaids were Anne McIlhany of Austin, Eva Black of Baird, and Debbie Hall of Luling. Attending the groom were Tom McIlhany of Abilene as best man; Dee Jay Walls, brother of

the bride, of Dallas, John Leach of Abilene, Russ Shurbet of Petersburg, Fred Velasquez of Wheeler, and Von Chapman of Wheeler. Shannon Thompson of Ft. Worth served as ring-bearer.

The bride wore a gown of white guiana fashioned with full bishop's sleeves and sweetheart neckline. The bodice and sleeves were accented with appliques of alencon lace and seed pearls. The full pleated skirt ended in a chapel length train bordered with lace. Her veil of illusion was caught to a bandean of Alencon lace with pearls. She carried a shite bible topped with a bouquet

of white roses, mums, and baby breath, with a cascade of mums and seed pearls.

Bridal attendants wore identical gowns of emerald green guiana with tiexed skirts and capelet sleeves. Each carried a small bouquet of white roses and baby's breath. Headpieces for each were formed of baby's breath.

The groom was dressed in traditional white tuxedo with tails, and groomsman and fathers of the bride and groom wore black tuxedos with shirts of light green, carrying out the bride's chosen colors of light green and

emerald green.

The mother of the bride wore a long dress of plum colored polyester, with tiered skirt. The groom's mother wore a two piece dress of chocolate polyester with a jacket of silver and chocolate lurex. Each wore a corsage of

orchids.

The reception following the ceremony was held in the church parlor. The table was centered with a large silver epengne of green and shite carnations and white roses, centered with tapers of white. Mrs. Randy Pool of

Shamrock served the tiered cake, Connie Matney of Abilene served punch from a silver fountain, and guests were registered by Barbie Purnell of Abilene.

The rehearsal dinner, hosted by parents of the groom, was held at the Royal Inn in Abilene on

Friday night.

After a honeymoon trip to Cloudcroft, New Mexico, the couple will be at home at 1917 Estes in Abilene.

The bride attended Cisco Junior College and now attends McMurry College in Abilene.

She is a member of Delta Beta Epsilon social Club. The groom also is a student at McMurry College, where he is a member of Ko Sani Social Club, and Alpha Chi Honor Society. He is employed at First State Bank in Abilene.

Mrs. Bill McIlhany

Right Start For Beginning Shooter

Getting the beginning shooter off on the right foot will insure a lifetime of safe, enjoyable recreation.

Many youngsters and, most recently, adults gain valuable and practical experience with an air gun such as a BB gun or a pellet gun. These firearms come in a large variety of models, can be very accurate and are quite good for learning the basics. In addition to low purchase price, they are inexpensive to operate.

The .22 is usually the next step for a new shooter. These can be used in a variety of capacities from informal target practice to formal competition and small game hunting. As the equipment becomes more sophisticated, the greater the price of getting started.

The shotgun sports are gaining popularity with the new shooters. A 12- or 20- gauge shotgun is one of the most versatile of sporting arms, useful for clay target sports and most types of hunting. There is a variety of models to choose from, starting with the single-shot and ranging to expensive double barrels.

In general, shooting equipment is no more expensive than equipment necessary for other sports such as golf, tennis, or bowling. The shooting world welcomes new safe shooters and there is one thing about hunters and shooters, they are eager to help and to coach a beginning shooter.

A check with a local sporting goods dealer or an experienced hunter/shooter in your family will insure proper advise on a selection for the beginning shooter in your family.

But, before the gift of a gun to your youngster is considered complete, enroll the young shooter in a Texas hunter safety class. These courses will train the young shooter in the proper techniques of safe gun handling so essential at home, on the shooting range or in the field.

For more information on the hunter safety classes in your community, please contact the Texas Parks and Wildlife Department representative for the names of instructors and classes scheduled.

LINES from LINDA

CEA - Linda Daughtry

Today's fireside decor draws attention to the firebox itself rather than above it, but the romantic mood still prevails.

One way is by keeping above-the-fire decor simple.

Rather than using lots of objects above the mantel in a grouping, some designers are using a single large painting over the fireplace.

Tiles and large Tapestries are other ideas.

Large handicraft objects, such as weavings or macrame, also achieve the same effect.

Although fireplaces are not looked to for light or cooking energy by most people, their warmth and romantic mood make them still the most entrancing feature of many homes.

With today's new decorating focus, their attraction can have even greater variety.

CLEANING FIREPLACES

Fireplaces can look "Clean as new" again-- with a mild acid bleach wash.

Vinegar, Acidic Acid or detergent and water will clean minor soot and smoke stains from the fireplace.

Stubborn stains may need a mixture of one part muriatic acid (available at hardware, drug, or builder supply stores) to 10 parts of water. Apply this mixture with a household scrub brush to a thoroughly wet surface. Start at the top and work down. Rinse the brick with water right away.

Wear rubber gloves and eye protection. Take care not to get the mixture on skin or clothing.

The muriatic acid mixture shouldn't be used on stonework, buff or gray brick because it will discolor them. Test the acid on other bricks in an inconspicuous spot to see if the brick will discolor.

WOOD BURNING STOVES

Wood-burning stoves are safe—with safe construction, installation and use. Otherwise, they can "keep the home fires burning" literally.

In the first two months of 1978, more than 60 fires caused by wood-burning stoves were reported by the U.S. Consumer Product Safety Commission.

Follow these safety guidelines for buying, installation and use:

BUYING FOR SAFETY

* be sure the stove is made of sturdy, suitable material, such as cast iron or steel.

Look for stoves listed by Underwriters' Laboratories (UL) or other recognized testing laboratories.

* On "used" stoves, check for cracks or other defects. Also, check legs, hinges, grates and draft louvers.

INSTALL FOR SAFETY

* For installation, be sure to leave at least three feet clearance between the stove and any combustible material such as wall, ceiling, furniture or newspapers.

* Install a pad of non-combustible material under the stove

FARMERS TAX GUIDES

The 1979 Edition of the Farmers Tax Guide, published by the Internal Revenue Service, is now available in the county Extension office.

The Guide explains how the tax laws apply to farming and gives example of how various items should be reported. It also has a summary of changes in the tax law that may effect a farming operation.

FARMERS TAX DEADLINE APPROACHING

While most taxpayers have until April 15 (actually April 16) to file their 1978 income tax returns, farmers and ranchers face a much earlier filing date.

Agricultural producers who do not file an estimate of their income by January 15 and do not pay estimated taxes must file their tax returns and pay due taxes by March 1. However, if farmers file an estimate, they have until the April 16 deadline to file final returns, points out Ashley Lovell, economist in Management with the Texas Agricultural Extension Service.

Lovell notes several considerations for Texas farmers and ranchers as they prepare their 1978 income tax returns.

Filing requirements for 1978 are the same as in 1977. For example, an individual must file a return if his gross income is \$2,950 or more, and a married couple under 65 years of age must file if their joint gross income is more than \$4,700. If both are 65 or older, they may make \$6,200 before a return is required.

The Revenue Bill of 1978 specifies that for tax years ending after August 15, 1971, single purpose livestock, poultry or horticultural structures are eligible for investment credit. Examples of special purpose structures qualifying as livestock facilities include, those used to breed chickens or hogs, to produce milk from dairy cattle, and to produce feeder cattle or pigs, broiler chickens, or eggs. Facilities must include, as an integral part of the structure or enclosure, equipment to contain livestock and to provide water, feed and temperature control, if necessary.

Effective for sales after October 31, the amount of net capital gain a noncorporate taxpayer may deduct from gross income is increased from 50 to 60 percent. Thus, only 40 percent of net capital gain is to be included in gross income. For sales before November 1, the former deduction of 50 percent of net long-term capital gain over net short-term capital loss applies.

Another change concerns tax credit for energy-saving im-

provements and renewable energy equipment installed in home.

For information on other changes in the Revenue Bill of 1978 and for assistance in filing your income tax return, Lovell suggests several IRS publications (1979 editions)—"Your Federal Income Tax" and the "Farmer's Tax Guide."

TIME TO CONTROL CATTLE LICE

Lice cost U.S. cattlemen more than \$50 million annually, so it's important to control them.

Lice begin to reproduce rapidly with the onset of cool weather, so peak populations on cattle occur in late winter and early spring. Uncontrolled lice can soon infect a whole herd because with cold weather, cattle tend to bunch up more so that the pests can move easily from one animal to another. Heavy hair coats on animals during cold weather afford protection for the parasites and allow for increased reproduction.

Both types of lice—blood-sucking and biting—infect cattle. Sucking lice pierce the animal's skin and suck blood while biting lice feed on particles of hair, scale, scab and skin exudation.

Lice infestations irritate animals, causing itching, scratching and rubbing on fences or anything else available. This produces denuded areas, bruises and lacerations on the affected animal. Heavily infected animals will have an unthrifty appearance and will suffer weight reduction, decreased milk production, anemia or even death. Lice infestations often stunt calves.

Spraying or dipping infected animals with the proper insecticide is the most effective means of controlling lice. However, properly placed and maintained dust bags offer effective control and save both time and labor.

Position dust bags prior to lice buildup so that cattle can become accustomed to using the bags. A dust bag station should serve about 30 head, depending on cattle size, place the bags so they hang 18-24 inches above the ground. Forced-use of dust bags, where they are placed so that cattle must pass under them to get feed or water, time to control cattle lice begin sooner than those used free-choice. By allowing a two-to-three week adjustment period, free-choice bags can be about as effective as forced-use types.

In a spraying or dipping program an animal must receive a thorough soaking in each of two applications 14-18 days apart to effectively control lice. The second spray or dip will kill any lice hatching from eggs that were laid prior to the first spraying. When spraying, use a high pressure (250 pounds per square inch) and thoroughly wet animals to the skin.

For a list of effective insecticides for controlling lice can be

obtained at the county Extension office.

Check the label on the insecticide container and pay particular attention to warnings, restrictions and waiting periods, especially if some of the cattle are being prepared for slaughter.

Protect Landscape Plants From Freeze Damage

Homeowners can take certain steps to reduce or prevent freeze damage to landscape plants.

To reduce the likelihood of freeze damage, especially to the evergreen plants, be sure to mulch the root area to prevent low soil temperature. This allows continued up-take of moisture and less chance of dehydration. Do not allow the soil to become excessively dry. Water thoroughly before a freeze but do not water while ground is frozen.

WATERFOWL--DRESS, STORE, COOK SECRETS

For best flavor, eye appeal and high quality, waterfowl needs special care in field dressing and storage.

Hunters need to know how to field dress, cool, transport, age, pluck and prepare waterfowl for eating. Duck and Geese season for Wheeler County began October 31 and will end January 21.

PROPER FIELD CARE

Dress duck and goose immediately, since proper field care will prevent spoilage and off flavors.

Dress birds completely as soon as possible.

Remove the entrails by cutting a slit just below the breastbone, down to and across the vent. Remove all the contents.

Avoid breaking the gall bladder sac on the liver. Bile from it will alter the meat flavor.

Save the gizzard, heart and liver for eating. Place giblets in a plastic bag. Cut near the neck base and remove the crop.

Wipe the body cavity clean with a moist cloth. Moist cloth. Moisture spreads bacteria which cause spoilage.

Most hunters remove the two oil glands found on the upper surface of the tail--or they remove the entire tail structure.

Cool the bird by allowing air to circulate in the body cavity. Insert a small stick in the cavity to help hold it open and speed cooling.

Also, place birds in a cooler--if the outdoor temperature is not cold.

AGING DUCK AND GOOSE

Aging waterfowl will remove much of the gamey flavor and help develop tenderness.

To age a field dressed un-plucked bird, hang it at a temperature of 40-45 degrees F. For three to four days.

To age a fully dressed bird, place it in refrigeration at 35-40 degrees F. for three to four days.

REMOVING FEATHERS

Leaving a skin intact--plucking it--will result in more moisture and better flavor of waterfowl, although skinning may be easier.

To pluck, remove the wings at the joint nearest the body.

Cut off the feet at the first joint above them. Remove the head and most of the neck.

Most hunters prefer to pick ducks and geese dry--rather than wet.

Moisten the fingers occasionally to make plucking easier.

Use the thumb and index finger, holding the bird firmly with the other hand.

After "rough picking," the down feathers will come off by "skidding" or rubbing across the bird firmly with the thumb. Or singe the bird to remove down.

Use a knife blade and thumb as a stop--to pull pinfeathers.

another method of removing feathers is to partially dry pluck and then dip the bird in paraffin or duck wax--available at sporting goods stores.

Then dip the bird into cold water to quickly solidify the wax.

Repeat the dipping process until the bird is covered with a heavy coating of set wax.

Removing feathers and down on the bird will stick in the wax and come off with it.

If skinning is preferred, use bacon strips across the bird during cooking to add moisture. STORAGE

Freeze duck and goose immediately after packaging.

Keep at 0 degrees F. or lower until it is used.

Quality meat, correctly wrapped in moisture-vapor-proof freezing paper, will keep at this temperature from 9-10 months to a year. Use heart and liver within six months.

Thaw frozen fowl by placing the package in the refrigerator for 12-18 hours.

Slow thawing will tenderize the meat.

ROAST WILD DUCK

3-to 5-pound duck
salt and pepper
1 medium apple, sliced
1 small onion, sliced
wine or orange juice

Season duck inside and out with salt and pepper. Put onion and apple into cavity of duck. Place on rack of roasting pan. Do not cover. (Cover older birds for the last half of the cooking time.) Do not add water. Cook at 325 degrees F. for 2 to 3 hours or until tender. Baste occasionally with wine or orange juice. Remove apple and onion before serving. Serves six.

SAUCES FOR ROAST DUCK
SPANISH OR CREOLE SAUCE
2 tablespoons chopped onion
2 tablespoons fat
1 tablespoon flour

2 cups cooked tomatoes
1/2 cup chopped celery
1/4 cup chopped cooked ham or bacon

Chopped parsley
Salt and pepper to taste
Chili pepper, if desired
1 green pepper, minced

Cook the onion in the fat for a few minutes. Sprinkle the flour over the onion and quickly stir in the tomatoes, celery and green pepper. Simmer for about 20 minutes. Add the ham or bacon, parsley, salt and pepper and serve at once.

DUCK BARBECUE SAUCE

2 tablespoon chili sauce
1 tablespoon lemon juice

1 teaspoon hot sauce
1 teaspoon salt

1 teaspoon Worcestershire sauce
Blend well. Baste duck with sauce while baking.

DRESSING FOR WILD DUCK

3 cups bread crumbs, toasted
1/4 teaspoon pepper
1/4 cup melted fat
Milk to moisten

1 teaspoon ground sage
2 tablespoons minced onion
1 teaspoon salt

Mix ingredients well. Add milk if mixture seems dry.

Variations:

1. Moisten dressing with melted butter and hot water instead of milk. Cut slits in breast of duck and insert slices of bacon in slits.

2. Arrange slices of bacon and apple on duck; then roast.

3. Blend together grated rind and chopped sections of one orange and one cup of cooked

rice. This amount will stuff one duck.

4. For a tasty dressing combine 4 cups bread cubes, 1 teaspoon sage, 2 tablespoons butter, 1 minced onion, 1/2 cup chopped celery, 1/2 cup raisins and 1 tablespoon sugar.

5. Spread currant jelly over roasted duck when it is removed from oven.

6. Add beaten eggs, milk and chopped parsley to bread crumbs for a duck stuffing.

OTHER WATERFOWL RECIPES

For other recipes on preparing waterfowl, ask the County Extension Office for a copy of "Waterfowl Cooking, Care" (MP-1347).

Game Violations Draw Heavy Fines

Two men, one from Borger and one from Pampa, have been given heavy fines after pleading no contest to 18 counts of possession of wild turkey in closed season.

A Roberts county judge assessed fines totaling \$3,663.00 against the two panhandle residents.

While on patrol two days prior to the legal season for wild turkey, Texas game wardens James Wilson, Perryton, and Roland Williams, Pampa, observed the lights of a slow moving vehicle as it weaved and stopped several times on a local Roberts county ranch.

The wardens stopped the vehicle and blood was observed on both men's boots and hands. Both men were placed under arrest and transported to the Roberts county jail. The trunk of the vehicle contained nine wild turkey gobblers, two shotguns and a rifle.

Further investigations by the two wardens established evidence that the turkeys had been killed on a Hemphill county ranch.

In a separate incident, Texas game wardens Charles Cosper, Hereford, and Stanley Brooks, Dumas, arrested a Sunray couple and a Dumas couple on four counts of hunting deer in closed season and two counts of trespassing.

An Oldham county judge assessed fines of \$1,021 against the two men and two women after they plead guilty to the charges.

A spotlight working south of the Canadian river alerted the two officers to a possible game violation plus a shot was heard by the officers.

After stopping two women in a vehicle in the same area with no guns or game, the wardens decided to stay in the same area where the shot was heard. Eventually, the two game violators came up to the patrol vehicle without a gun, spotlight or game. The men were escorted to a Vega jail and the two officers remained near the same area on the river till 3 a.m.

A car drove by the officers and when it returned, the wardens stopped the vehicle which contained the two women previously contacted. The women told the officers that their husbands had shot a deer earlier in the night.

At dawn, the officers found a buck deer, a rifle and spotlight laying about ten yards from the road in high grass.

Not only were the couples fined for the game violations, but the two women hit a cow enroute to Dumas to change vehicles which totaled the vehicle used during the game violation.

Gun Safety

Although you might be the safest hunter in Texas, there is always the other guy that forgets the three primary rules of gun safety.

1. Treat every gun with the respect due a loaded gun.
2. Always point the muzzle in a safe direction.
3. Be sure of your target and beyond before you fire.

Gun safety starts at home prior to the hunt as you load your own ammo; clean the firearm; pick the correct gauge or caliber for the hunt and sight-in the rifle at the range or bust a few clay birds at the skeet or trap range.

Many shooters are injured as they travel to and from the hunting areas.

Always unload and case all firearms and store them in the trunk or box while traveling. Load your firearms after you have arrived at the hunting site and you have crossed the fence or gate.

Use god sportsmanship and self-control, respecting the rights of other hunters, hunting laws, wildlife and the landowner.

In other words, have a safe and good hunting season.

Wintertime Boating Dangerous

Acute hypothermia, usually associated with immersion in cold water, kills 40 to 50 Texans each year and waterfowl hunters, fishermen and other sportsmen should be aware of this element of danger this fall and winter.

Although Texas does not suffer as harsh winters as some of the other parts of the nation, the weather gets cold enough in northwest Texas to shorten survival time in case of a fall through the ice or overboard.

The shock of suddenly entering cold water can induce uncontrolled rapid breathing; cause intense physical pain, confusion and dizziness; and may stop the heart.

Wearing a PFD (personal flotation device) is the only known protection against this type of accident.

The key to survival in cold water is the conservation of body heat or body energy. Anyone not wearing a PFD must expend

some energy to stay afloat, which increases heat loss. Since the head is a high heat loss area, it is important to keep the head out of the water.

In 55-degree water, you can expect to survive for about 1 1/2 hours if you are swimming, floating still in a PFD, you may survive for 3 1/2 hours or longer depending upon body weight and clothing.

Wearing many layers of clothing helps reduce heat loss in much the same way as diver's wet suit. Wool and cotton help hold heat better than synthetics. However, the wearing of hip or chest waders can be dangerous if you are attempting to get out of the water or swim to shore.

The best method of eliminating hypothermia is not to get wet or fall overboard. Care should be taken not to overload boats with passengers or equipment on any trip.

While boating, be sure there is

a coast Guard approved PFD for each person on board and it is recommended that the passengers wear the PFD while on the water.

Avoid standing or balancing in the boat while trying to start a motor, put out decoys, pickup downed birds or net fish.

Most large lakes have updated weather reports and signals indicating the wind velocity. Listen to the local weather reports prior to boating and do not attempt to take a small boat on large open water lakes.

Safe boating, like all outdoor activities, is a matter of common sense and compliance with the Texas water safety regulations.

The Great Pyramid of Cheops in Egypt is so large that St. Peter's and Westminster Cathedral could both be tucked away in it with room to spare.

CITY/STATE/ZIP _____

I watched our savings go up in flames.

"Oh, no!"
Every one of my sports trophies had melted in the heat.

The smoke wisped its way under the door and into the kitchen, curling itself into a plume around the sleeping cat. She woke abruptly and fled. A few minutes later, I suddenly realized what was happening.

"It's a fire," I yelled. "We've got a fire!"

Fortunately, it was a small blaze and the damage was confined to one end of my den. After the firemen put out the flames, Helen and I picked our way through the rubble. The wood still steamed and hissed from the water.

I stopped, stunned. "Oh, no!" Every one of my sports trophies had warped and melted in the heat.

As I stood there, suffering incredible anguish, Helen plucked at my sleeve.

"Harry... what about the Savings Bonds? Weren't all the Bonds in your desk drawer?"

"Helen, how can you be so insensitive?"

The Savings Bonds we can replace. Look at my trophies!"

Which was true, of course. Even though our savings went up in flames, we didn't lose a cent. Bonds are guaranteed, even if they're destroyed.

I know Helen was really relieved about the Bonds. But I don't think she cared a hoot about my trophies. When I finally gave up and consigned the lumps of metal to the trash can, I could swear I saw her smiling.

Bonds are protected against fire, loss and theft. So if you lose a Bond, you don't lose your investment. Just write the Treasury Department, and replacement Bonds will be issued. (Recorded serial numbers speed replacement.)
