Last week Virgil and Mae Helton spent three days in Amarillo to be near a cousin who was

having eye surgery. The Ambulance has been making a lot of emergency runs the last few days. We are so proud to have this service with its recommended equipment and the trained volunteers who are willing to serve on vital errands.

Watch the corner of Main and 5th. (The old National Bank Bldg.) There is something beaut-

iful going to happen there. Sally Harris has been on the go again. This time she says she has been in "search of Roots". She is doing a family tree which includes four families. Her neice, Helene Wale, of California, joined here. They made several points of contact in Oklahoma and Texas. After returning there Helene had to enter the hospital for a few days.

A cooperative agreement between the National Park Service and the Texas Parks and Wildlife Department is helping to improve the habitat around Lake Meredith in the Texas Pan-

At the present time, eight projects are being completed by members of the park service and the Young Adult Conservation Corp (YACC) at sites on park land around the huge lake.

"We have 110 members of the YACC presently repairing recreational facilities, landscaping, fencing native areas such as wild plum and planting trees and shrubs with technical assistance from the P&WD extension biologist Richard DeArment," said Ted Bedwell, camp director.

Over 11,000 plants including Russian olive, honeysuckle bush, buffalo berry and june berry, are being placed in areas either void of natural wildlife food and cover or areas which show promise as ideal habitat for deer, turkey, quail or other non-game species.

The TACC program initiated by the U. S. Interior Department is furnishing conservation projects for young people unfamiliar with outdoor jobs dealing with wildlife and habitat conservation. The goal of the program is to help protect and develop the natural resources of America while furnishing jobs to young Americans.

Results of the wildlife plantings whould become noticeable by next year as the various species of wildlife near Lake Meredith find and utilize the improved habitat sites.

'Ol' Mabel get va? Bet you accidentally took her nest egg.

He poked into the basket and drew out an egg. "This one here, see? It's china. Put it in there just for Mabel. Little something of her own so she's not sitting there all alone. Mighty comfortin' to a hen, boy. Nest egg can be mighty comfortin to some folks, too.

Later that day, Grandpa gave me my first Savings Bond. Said he'd planned to give me a lecture about saving, but Ol' Mabel had done it all for him. Told me that the Bond was my start

on a personal nest egg. A little something stashed away to keep me going.

Every year after that, Grandpa gave me another Bond. And every time I got a chance, I added a Bond of my own to the pile. Those Bonds grew up right along with me.

Today. I run one of the biggest ranches in the Southwest. And you know how it all got started? From a little bitty nest egg. Guess Lowe . a lot to Grandpa. And Ol Mabel.
