The representatives of the people today yield too readily to the spending demands of every pressure group. On every hand extravagance mounts and our taxes mount. As expedience becomes king, a ticking time bomb hangs over the financial security of the nation.

The rural areas development program is concerned with the plight of the Nation's underemloyed rural people-families who don't earn enough from farming or other work to obtain an adequate living. The plight of these people has caused growing concern in recent years and has received the active attention of Government leaders in the past sever-

America's Largest Independent Telephone System

Unseen people at work

What's behind your telephone?

Well, many things. Miles of wire, hundreds of poles, intricate equipment.

... and, unseen people.

Trained, experienced, dedicated people who work hard to provide good telephone service. People who are interested in you and in this community.

Yes, behind your telephone are people ... the people who are, in actual fact, your telephone company.
