but not in football and Wheeler's Mustangs found this out the hard way last Friday as they came up on the short end of a 7-6 score against the Lefors Pirates in the season opener at

Not allowing a first down by the Pirates until the third quarter and holding the host to minus yardage until the fourth quarter, the Mustangs saw their slim six points marginevaporates as the Pirates put together an 80 yard march for the winning touchdown.

Dwight Keith split the uprights with his soccer style extra point boot with 2:04 left in the game and even though the Mustangs won the battle of statistics, the Pirates had a one point victory and their first

half three plays after Kent Ware fell on a Pirate fumble. Jim Verden's kick sailed wide to the left on the extra point try.

Wheeler missed a great opportunity to perhaps salt the game away early when Dale Helton pounced on the first of tour Mustang recoveries of Pirate fumbles at the Letors 13.

Facing fourth and two at the Pirate five: , Britt ran into a stonewall at right tackle and was stipped for no gain and bobbled the ball in the process and Leforx

recovered. Two big plays spelled doom for the Mustangs on the Pirates winning drive. Gifford broke off his right tackle on sec ,nd down from the Lefors 22 and a flag floated to the turf at the 29 and Whaeler drew a 15 yard penalty for a face mask violation to give the Pirates their second first down of

gainer out to the 44. Seven plays later, with the clock running in the Mustangs favor, the Pirates had a thirdand seven at the Wheeler 31. Randy Klein passed complete, which was the Pirates only completion of the night, to Keith on the Wheeler 20. Evading one Mustang there, Keith rambled

PAVING PROJECT IN CO. The Texas Highway Comof FM and RM roads promission today approved

HIGHWAY DEPT. PLANS

development of a 1.2 mile Farm to Market road in Wheeler County as a part of the 1973 Texas Farm to Market Road Program. District Engineer V.J.

McGeeof the the Texas Highway Department said estimated cost of the work in the county is \$70,000.

The approved project extends from F.M. Road 1046, 3.0 miles East of Briscoe, North to a proposed R.M. road at the Hemphill County line. This project is an extension of a Farm to Market road approved for Hemphill County and extends from F.M Road 277 in Hemphill County, south to F.M. Road 1046 in Wheeler Couty. Work will be under the supervision of O.V. Johnson, Supv. Resident Engineer, Wellington, Tex.

Work authorized for this county is part of the 559.4 miles of paved secondary roads statewide which will be developed in this pro-

A total of 261.6 miles will be newly designated roads. The remainder of the \$22.2 million program will develop Farm and Ranch to Market roads and recreational

roads which previously have been designated as part of the state-maintained highway network.

The additional mileage brings total mileage of the FM-RM system to almost 41 thousand miles. Much of this mileage represtents former county road routes which have been transferred to the state system. FM and RM projects are selected cooperatively by the Texas Highway Department and local coutny commissioners

The Farm to Market Road program orginially was conceived to "get the farmer out of the mud." On that score it has been successful by opening new economic, social and education opportunities to the millions of Texans who live in rural

gress. For example, of the newly disignated roads, 183.1 miles or 70 per cent are school bus routes and 168.3 miles or 64.3 per cent are rural

mail delviery routes. But FM and RM roads have benefited more than just those Texans who live in the country. Thousands of miles

vide primary access to the great outdoor recreational resources in the stat . The FM system also pro-

vides access to new industrial enterprise located insmaller Texas cities. Many employees at some plants enjoy both a good paying rindustrial job and the benefits of country living because of easy access affordedby the FM

Farm to Market Roads also serve as the framework for distribution of finished goods and supplies moving from commercial and industrial centers. In that sense, the Farm ti Market system also could be called the "Market to Farm' network.
