MUSTANGS MAKE LEFORS PIRATES FIRST 1975 VICTIM BY 27-0 COUNT

Wheeler's Mustangs used the big play on offense and a stout defense to record their initial win of the season last Friday night in the opener of the football campaign.

The Lefors Pirates were a 27-0 victim of the Mustangs and the score could have been worse as the Pirates were outmanned but they proved to be troublesome at times running out of the single wing.

Dan Helton put the Mustangs on the board at 11:03 with a 63 yard scoring jaunt through the left side and this run added greatly to his game leading rushing total of 101 yards.

The Mustangs had several question marks as to some areas of their play before the Lefors game and even with the comparatively easy win, some of the questions will remain.

One of the Mustangs scores came as the result of a drive that was given new life by a roughing the kicker fine against Lefors.

Bob Guthrie, Wheeler's No. 2 signal caller capped this 60 yard march with an untouched run of 13 yards to paydirt after a beautiful fake to his running back.

Jim Verden tacked on his third extra point of the night

LOVEGRASS HAY: Bill Watson, Soil Conservationist and Ben Westmoreland, Conservation Technician look at rolled lovegrass hay on the Hyland Weaver farm.

Lovegrass Can Be Cut for Hay
Weeping lovegrass as an improved pasture has done a tremendous amount for farmers and ranchers in Wheeler County. Lovegrass when properly fertilized and grazed will produce tremendous forage. This high production can be very beneficial, but can at times have its disadvantages also. For lovegrass to be properly managed, large numbers of cattle are needed at certain periods of the year. A large herd may have to be reduced when proper management heights of 5-6" of lovegrass are reached. An alternative to purchasing large numbers of cattle to harvest lovegrass properly can be that of haying. Lovegrass can be an excellent source of hay when properly managed. It should be cut in the boot stage to no closer than a 4" height. Haying is best done in July or early August. If more than 1 cutting is attempted, the last cutting should be early enough to provide sufficient cover for soil protection and food storage in roots. Additional information about lovegrass planting and haying can be obtained at the SCS office in Wheeler.

September Ideal For Hunting Teal

September is considered a hot, dry month reserved for dove hunting but the Texas Parks and Wildlife Department suggest that state gunners try their skill on another tough target as the annual teal season opens Sept. 20.

The teal season will continue through Sept. 28, 1975 with a daily limit of four birds and eight in possession after the first day.

Included in this species of duck are greenwing, bluewing and cinnamon teal. These small birds can best be identified by their rapid wingbeat.

The eating quality is excellent as many surprised cooks have found in the past.

Shooting hours are from sunrise to sunset daily. On Sept. 20, 1975, sunrise will occur at 7:34 DST at Lubbock. For teal hunters east or west of Lubbock, a calculation time is necessary. For points west of Lubbock, add one minute for every nine miles. Check local newspapers for the exact sunrise time daily.

A federal migratory waterfowl stamp will be required of all teal hunters and these can be bought at most U.S. post offices. These stamps may be affixed to the back of your new hunting license and must be signed in ink by the holder.

As teal are migratory birds federal law requires that all shotguns be plugged to hold no more than three shells including both the magazine and chamber. Only 10 gauge shotguns or smaller are legal for teal.

Teal hunters are reminded to identify legal ducks as the continuation of this animal teal season depends upon the sportsmen's cooperation and his ability to bag only teal. Several other species of duck will be in the same area mixed among the teal including mallard, gadwall, scaup and pintail. The possession of any of these other ducks will constitute a game violation.

If you need softened butter for baking in a hurry, shred it on a vegetable grater, using the larger holes.

Help a shut-in. Ask neighbor who is temporarily "grounded" if you can pick up any groceries for her.

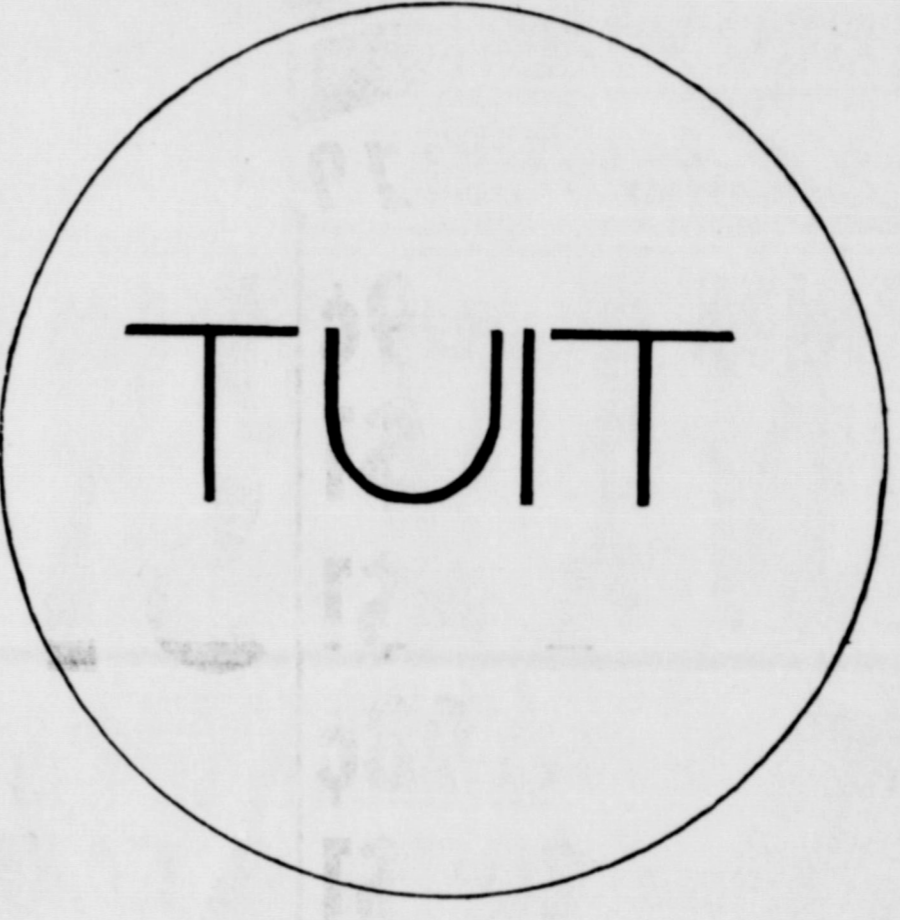

Your younger neighbor is one of the nation's greatest natural resources. The Teamsters Union suggests that you join many of the youth organizations in your neighborhood.

Let your neighbor put parking problem in your driveway. When he's planning a party and you're not in your car, offer the space to his company.

It is said that walrus thrive best if the nuts are beaten off with sticks, not gathered.

quarters.
The Mustangs third touch-

was a quick 95 yard drive
in just 5 plays.
A quick kick, which Lefors
employed with success all

killed at the Wheeler 10
with just over seven minutes
remaining in the half.
Helton was held to no

Sunflowers Boost Wildlife

Unfavorable cotton prices, heavy rains and large fields of commercial sunflowers could produce a bumper dove harvest in the South Plains and Panhandle of Texas.

This ready cash crop farmers could give the bird shooters a boost as dove, quail and pheasant move into the sunflower fields following the normal harvest in late August.

HERE'S YOUR HEALTH FROM
HYLAND WEAVER

In an injury emergency — call a doctor if possible, if not, get a trained first-aid. Keep the injured person lying down — cover to keep him warm. Don't move the injured person unless necessary to remove him from further danger. Moving can aggravate the injury — it is better for the untrained person to leave the injured alone.

TEXAS TALK
By George Richardson

Cattlemen are being outdone by prune producers. At least as far as product promotion is concerned. Paul Horn, writing in one of this summer's issues of THE CATTLEMAN, cites the fact that the prune growers association of California spends more total dollars pushing prunes than the entire cattle industry does in promoting beef. This latest wrinkle comes as a part of the continuing push for the Beef Development Plan which could provide as much as 40 million dollars a year for the promotion and development of beef markets. Hold up on the operation still involves composition of the 68 member "Beef Board" and the mechanics of operating the "beef check-off" system which would provide financing for the promotion by collecting three-tenths of one percent of the sales price of slaughter cattle. If the still lingering problems are ironed out, collections could begin as early as next year.
