Last year, Kent was one of the Mustangs captains and gained over a 1000 yards running with the pigskin from his tailback spot.

Kent made the District 2-A all district second team at a linebacker position following his junior and senior seasons and was a first team selection this past year on offense at running back.

This fall, Kent will continue his education at Texas

Raymond is the 17 year old son of Mr. and Mrs. Frank Martin and this Mustang stalwart has been placed on the West squad which will be coached by the staff from Tarlton State College at Stephenville.

A versatile performer in the trenches for the Mustangs, Raymond saw duty last year as guard on offense and played at the no seguard position for a portion of the year on defense before being switched to a

defensive tackle post. Raymond was chosen on the all district honor teams as an offensive guard on the second team and was president of the Mustang Athletic Association his senior year.

Raymond will attend Texas Tech this fall to continue his education.

Newcomer to the crowd is the Zapper. The "crowd" is the continuing deluge of technological innovations being utilized by the American farmer. Among the observable effects of this wave of modernity are the following; the new commer-cial cotton flour processing plant at Lubbock, soybean cheese experiments at Iowa State University, new hybrid wheat developments, new farm equipment . . . and the Zapper. Testing is continuing, but the initial results are interesting if not down right exciting for the most unique system of weed control since the hoe. Emitting a high energy microwave transmission directly into the soil or Zapping it ...

proven in a variety of tests to be an effective control device for weeds. All the side effects seem to be beneficial. First there are no harmful environmental factors and those involved in testing the zapper report a definite improvement in crop performance in the zapped soil. Welcome to the crowd, Zapper.

back to see us. Gene Brewer tried to prove his pick-up was mightier than a locomotive this past week, near Sayre. It totally destroyed his pick-up and left him bruised and sore. As the report goes one broken rib. It could have been so much worse. Glad to see you up and about after an overnight stay in the hospital.

them the best and come

Willa Jean, Bill, Rusty, and Mark Shelton made sure Gene was alright then proceeded with their vacation to Six Flags where they were to meet the Dean Tipps' family.

Extension Agent To avoid dark or tloating fruit in home and canned products, consumers can follow definite precatuions. To predent dark fruit, the homemaker can try the following

-Process fruit correct length of time too short processing caused dark

-Keep temperature high enough. Water should boil at beginning of processing time ans stay at a boil during processing. -Count time of processing accurately. Starting time is counted at time rolling boil begins. Be sure to check time table, make any adjustments necessary for altitude.

-Boiling water level should be one inch above tops of the jars throughout entire processing time

-Treat raw packed fruits such as peaches or pears with an antioxidant before packing. Some ways to keep fruit

from floating during process--Use fruit in its prime, not overripe.

-Be sure fruit is packed closely. -Don't let syrup get too heavy.

-Process exactly the correct length of time. -Be sure temperature isn't too high.
