Think I will complain about the price of gasoline - lot of good it will do me, but if you think of it, you may not travel as much as you did. Slowed us down some. To go to Amarillo from Allison and back, it cost us \$40.00 in our F 250 and that is one of the reasons we traded it in on the F 150. Big deal, it cost us \$36.00 to go to Amarillo and back in the new truck. Now the best of them, my Buick can do it for \$22.00. Now none of these gas prices for that trip are anything to brag about and it does make you make fewer trips anywhere. Now I feel a bit better.

Then there is the Greek Festival and everything is Greek food which I love, but I know I will never get Glenn to even try it. He did make an effort along with his brother, Curtis, to go to a Chinese buffet in Pampa. It was shear torture for them, but Lillian and I loved the food. So that we can see what we're doing right, as well as where we may need to improve, we continuously track patient satisfaction. Our patients help us do this by completing a survey each time they come to us for their medical care.

We are happy, of course, when we get high ratings. And we do whatever is necessary to resolve a complaint to the satisfaction of all concerned. We take the time spent surveying our patients, analyzing the results, and following up very seriously.

What we don't do enough of, though, is share our good news. While the national average for patient satisfaction in hospitals large and small is 82 percent, ours at GPRMC is 95 percent. Which means our patients rate us either Very Good or Excellent 95 percent of the time.

Our patients rely on GPRMC to provide them with the very highest quality health care. This makes us work extra hard to make sure their experiences here are positive ones.

CAR + DEER = DAMAGE

Deer Season Presenting Unique Challenges to Area Drivers

The nation's deer population is growing and each year car collisions with deer account for more than 150 human and nearly one and a half million deer fatalities. October through December is the highest season for the accidents, since it's a time for both wandering deer and holiday travelers.

Most collisions with a deer occur during this time of year when deer are mating and migrating. "Drivers need to be particularly cautious with the season's shortened daylight and deer foraging near roadsides. It's a very dangerous combination," cautioned Ray Palermo, Director of Public Relations for Response Insurance. "To compound it, more drivers are on the road at dawn and dusk, the very time of day when deer are most active."

swerve around the deer since the deer may move in the same direction. You may also inadvertently hit another vehicle, or go off onto a dangerous shoulder. Unless certain of those road factors, it is often best to simply brake and continue in your lane of traffic.

Be particularly careful at dawn and dusk and when driving either over a hill or around a curve, where visibility is limited. Use your high beams to give you a greater area of visibility and allows you to see the deers' eyes sooner.

* Scan a wide swath of the roadside. Slow down when approaching a deer standing near the side of a road and be prepared. If startled, the deer can bolt onto the roadway and into your path. If necessary, honk your horn and flash your lights to try to scare it away.

* Be alert for more deer than you may see at that moment. Where there's one deer, there are often more nearby.

* Deer whistles or ultrasonic deer avoidance systems attached to vehicles have never been proven to work by independent studies and may give drivers a false sense

have lunch with her. After lunch

Louise, Opal and Juanita loaded

her PT Cruiser and headed out for

Oklahoma City, Oklahoma where

they stayed the night in Mustang,

We had a wonderful time at the conference. Each service was power packed and a wonderfultime. Then we headed to Washington, D.C. to view the Capitol Building. We all enjoyed seeing the Capitol Build-
