Texas Lamb Crop Larger Than Usual

AUSTIN, July 28 (UP)—Due to an increase of 25 per cent over last year, Texas now has a lamb crop of 2,764,000 head, one of the largest crops on record, a United States Department of Agriculture bulletin released here today said. Statistics compiled by the division of crop and livestock estimates indicate an increase of 713,000 head over last year's crop.

The last increase was attributed chiefly to the increased number of ewes in the state. Grazing conditions are very good, the bulletin said, but deterioration because of sub-normal rainfall and hot weather is expected to lead to early and rapid movement of range lambs.

Tom Mooney Begins 16th Year In Prison

SAN QUENTIN PRISON, Calif., July 28 (UP)—Tom Mooney entered the 16th year of his life term in San Quentin today still determined to fight for a pardon on his conviction of murder in the San Francisco bomb outrage.

Working as usual over a hot kitchen stove, Mooney still found time to issue a statement on the 15th anniversary of his incarceration, a date no one could help him celebrate.

"I wonder how many more such anniversaries the world will charge against the state of California," the former labor leader's statement said. "Let it be remembered that my 15 years of unjust imprisonment signify 15 years of 10-punch for California."

The little town of Stratford has two concerns making planes and East Hartford, Naugatuck, Greenwich and New Haven have one each. Hartford has twenty-six concerns making airplane engines or parts.

When they are picked there should always be left enough of the flower to reseed itself.

They have grown on the salt lakes of Howard county since the memory of the oldest settlers, but not every year.

When they are picked there should always be left enough of the flower to reseed itself. The plants should never be pulled by the roots, if flower lovers want to continue enjoying them.

Wild Texas Bluebells Belong To Famous And Expensive Family

Hostesses who are decorating their homes with huge bouquets of Texas bluebells this summer, mostly at the cost of going after them, would have to pay from 13 to 25 a dozen for these very same flowers in New York City.

These lovely blue and purple bell-shaped blossoms are the true Texas bluebell and grow chiefly in the expanse of country from here south including Central Texas and reaching into Old Mexico. In no other part of the United States do they grow so well, although they are also native to the southern part of Siberia, in northern Asia.

Their botanical name, says Ribble, the florist, is Gentiana Critchei. The Gentian family is one of the largest and most important of the flower families and these Texas bluebells are one of its most desirable branches.

There are 56 varieties of the gentian family. The small blue gentian is famed in poetry and is a popular plant in English gardens.

These flowers are very hard to transplant. They are difficult to establish from seed and even if seed are planted, as soon as they are gathered and the plants grow, it will take three years, says Mr. Ribble, for them to reach blooming age.

When they are picked there should always be left enough of the flower to reseed itself. The plants should never be pulled by the roots, if flower lovers want to continue enjoying them.

SUMMER FASHIONS

For the Hot Days

The boutonnieres, bags, gloves and glamorous trinkets with which smart women accent their warm weather wardrobes are marked by simplicity and elegance designed to enhance chic.

Necklaces generally are eschewed for daytime wear by smart women although those who find costumes incomplete without a throat ornament may choose choker ropes of tiny china beads or silk chenille.

"It so happens I don't smoke..."

BUT I've noticed recently that more of my girl friends are smoking CHESTERFIELD, and I asked why.

"One of them said that CHESTERFIELDS really are milder and taste better—that there is nothing strong or sharp or bitter about them.

"Another one spoke up and said that she too liked the taste of CHESTERFIELDS; but that she was especially pleased with the package—so neat and attractive, Chesterfields—she added—are made right—properly filled—and burn evenly; and she thought possibly they were using a better cigarette paper.

"Still another one agreed with all we'd said. She'd been smoking CHESTERFIELDS for a long, long time, and had always liked them; but she also liked the way they were advertised. The advertising seemed to her to be the truth and the whole truth—it wasn't always knocking somebody or something!"
