The group decided to meet on the second Monday of each month, rotating the site for each meeting. Officers will be elected, Department of Public Safety Sgt. Roger Sosebee said, and

# 4th Annual Peanut Bowl Called Complete Success

From every quarter, the Fourth Annual Peanut Bowl Festival in Eastland has been declared a success.

The attendance was record-breaking, and participation by county bands, twirlers, riding clubs and individuals was far above average. The Football game Saturday evening was a sell-out—as it traditionally is.

The color and excitement of the big day's activities was best described by an eight-year-old, route two youngster, when he said, "That's the most fun I've had since school started up."

Fancy and extra-fancy baton twirling began the day on the west side of the square, drawing entries from throughout the county and the area.

Gold medals were awarded winners. EHS Band director John Foster was in charge. The Peanut Bowl Parade got underway at 2:30 p. m. and forming about two blocks north of the square on Lamar St., began moving south, to

the square, where it turned west, went to Daugherty St. There it turned south again to Commerce St. and moved east along Commerce, to S. Seaman St. Turning north, the hour-long event made its way along the remaining side of the square and on along Seaman, breaking up near the depot.

Appearing in the parade were Miss Jan Taylor, reigning as Peanut Bowl Queen, Miss Abilene (runner-up in the Miss Texas contest), and Miss Texts herself. Bedecking floats too were princesses of the Peanut Bowl Pageant. Runner-Up Miss Kay Browning of Gorman; Miss Linda Kay Jackson of Carbon; Miss Sherri Heyser of Cisco; Miss Judy Clary of Cisco Junior College; Miss Joyce Rainey of Desdemona; Miss Verna Napier of Olden; Miss Linda Noth of Ranger; Miss Glenda Wilson of Ranger Junior Col- lege.

Among the many crowd

pleasers in the parade were the men of the Second Armored Division in precision drill. Covering about three times the length of the route by marching up and back in their slot, the chrome-domed troops brought "aws," and "ohs" all along the route with their routines with regulation bayonet-mounted M-1s.

The appearance in Eastland was the last public performance in the States before being shipped overseas, and the troops really knocked themselves out.

The Navy's model "Forrestal" was a favorite too with the square-packed crowd. In line too was the famous Nike Hercules anti-aircraft missile which surprised most by its size. An Atlas missile model and pictorial displays were also on exhibit throughout the day in the lobby of the court- house.

Live music and comedy on the stage of the Majestic Theater brought smiles and

laughter to a large crowd. It was the Army's Special Services review "Nothing Can Go Wrong."

The crack drill team did a turn again in pre-game activities at Maverick Stadium just before the introduction of the Queen royalty, and the 8 p. m. kick-off of the Classic Cisco Junior-Ranger Junior football tilt. The team used the entire field to step off in precision with daring and skill.

In two files across the center of the field, the team formed an entryway for the royalty as each girl was introduced to the capacity audience.

At half time former Eastland Band Master Phil Hewitt and his 105-member Paschal High School Band thrilled the crowd with exceptional marching and music. Each college had bands and drill teams too at half time.

The day was enough, most agreed, to do any eight year old — at least until it's "school's out" time again.

## Excess Wheat Acreage Not To Carry Penalties In 1964

Emmett E. Powell, secretary of the Agricultural Stabilization and Conservation office in Eastland County, has announced that there will be no marketing quota penalties for planting wheat in excess of acreage allotments for 1964. However, producers who overplant their 1964 allotments will receive history credit only in the amount of their allotments, so overplanting wheat allotments in 1964 may affect future years allotment, it was pointed out.

Overplanting cuts off soil bank payments, and the 1964 conservation reserve payments for the farm is dependent on keeping within the 1964 wheat acreage allotment or 15 acres, whichever is larger, Mr. Powell said.

Provisions have been made to continue in effect the opportunity for those producers who overplant their 1964 allotment to dispose of such excess wheat acreage 30 days before harvest, thus making them eligible for price support, he added.

A producer complying with the wheat allotment on one farm will not have to be in compliance with the wheat allotments on other farms in which he has an interest in order to be eligible for price support on the farm that is within its allotment, Mr. Powell said.

## TIDBITS—

(Continued from Page 1.) speaker at a special banquet, and cut the official ribbon later in the coliseum. Brownwood was complimented for its aggressiveness, forward-thinking and working people by the governor and other dignitaries.

It was interesting to note that Brownwood has an industrial development commission—at work—and the atmosphere radiated "We're going to progress."

In our opinion, the finest part of the Governor's talk was his "boastful, but not braggingly" description of the wonderful state of Texas.

The September issue of the "Texas Parade" has a lot of good reading including quite a bit about good old Eastland. There's a good editorial on "Texas and the ARA" (which we'll try to reprint for you soon. Then in an article entitled "West of Where the West Begins," the area 'just west of Fort Worth' is described in all its glory. There are good pictures including one of "Old Rip" and his tomb, the Hollywood - Vassarette plant and Romco Ceramics.

And toward the back there's a Caterpillar ad showing L. L. Collings, Eastland County Commissioner from Rising Star, and explaining why he chose that brand of equipment for county use.

## NEWSPAPERS ARE TOP SALESMEN

Television, like radio before it but to a far greater degree has brought about major changes in the advertising picture. It has been an aggressive competitor with the other media, its appetite for the advertising dollar, with the cost of producing even Grade B programs running to comparatively astronomical sums, seems insatiable.

But the power of the written word still gets top recognition. An announcement from Sears, Roebuck and Company interests those who like to read as well as to stare. Last year the figure was \$58 million, which represented 71.2 percent of Sears' total retail media expense. The balance went to advertising through circulars, magazines, radio and television and other media.

A spokesman tells the story: "This is tangible evidence of our continuing faith in the potency of newspaper advertising. From the day Sears opened its first retail store, the company has made greater and greater use of newspapers. It is obvious that Sears store managers continue to regard the newspaper as their major medium for more than historical reasons. This evaluation is based on the day-to-day results in their stores."

Television advertising is a catch-as-catch-can affair. You have to be looking at the set at the moment and it's gone in an instant. Print is durable and the prospective buyer can see and consider it at his leisure.

**Browsing With Bev**

Double knit fashions are all the rage for this fall and winter, but they do present a sewing problem.

Double knits for home sewing are relatively new, a 1-though jerseys are familiar to most women.

While no special skill is required to sew double knit fabrics, an understanding of their characteristics can simplify and speed the handling.

Select a pattern with few seams, a rather easy fit and no buttonholes. It is wise to avoid circular skirts and bias cuts. Weight of the double knit fabrics should be chosen to conform to the design of the pattern. If the knit fabric is "off grain" more than one inch, it should be straightened by pulling slightly on the bias while steam pressing it.

All knit fabrics should be shrunk before cutting, steam pressed at home or at the dry cleaners.

Double knits are made in tubular form and some are sold this way. Others are cut along the fold of the flattened tube and edges are overcast. The lengthwise edges should be examined before buying the fabric to see that they follow the grain line. In knits, the grain line is a continuous rib. In the finishing process, some tubular knits twist as much as four to six inches. This cutting along the fold cuts across the continuous ribs the depth of the twist. To straighten such fabric will cause some loss.

If the tubular knit has not been cut, baste along the rib the entire length of the fabric, refold on this baste line and pull the fabric into a flat shape as it is steam pressed.

**HOW TO MAKE LIGHT WORK IN THE KITCHEN**

Properly planned lighting in the kitchen makes meal preparation easier, more pleasant and more efficient. It helps eliminate little annoyances like misread recipes . . . dishes (or vegetables) that have to be washed twice. For a well-lighted kitchen you need two kinds of lighting:

**GENERAL LIGHTING**

. . . to provide a pleasant level of over-all room illumination without glare or shadowy areas. As a suggestion for the average rectangular kitchen, a 12-inch enclosed ceiling fixture with a 150-watt bulb, or a shielded fluorescent fixture with two 40-watt tubes usually will provide adequate light.

**LOCAL LIGHTING**

. . . to eliminate working in your own shadow at the sink, range or work counters. Use over the sink either incandescent or fluorescent lamps, shielded behind a facing board or recessed into the ceiling. A shielded fluorescent wall bracket is recommended over the range. Shielded fluorescent tubes under the cabinets will provide ample light on counter tops.

A Texas Electric lighting specialist will be glad to make specific recommendations for better light in your kitchen and elsewhere in your home.
