Behind many "For Sale" signs there is a sad story: A family borrowed more than they could afford to pay for a home, or payments and interest rates were too high; the home had to be sold, often at a loss. Their medical needs are already being

Most of the aged in Texas who need help in meeting their medical care costs are now receiving it through the Old Age Assistance program. Independent surveys by a leading research organization, Belden Associates, have documented this fact.

Belden Associates recently made a detailed survey of all aged Texans who were NOT covered by Old Age Assistance and concluded that "There apparently remains approximately three per cent of all aged Texans who need and want outside help." A constitutional amendment passed by the 1963 session of the Texas Legislature, if approved by the voters of Texas this November, will make possible a medical care program for the needy aged who are not recipients of

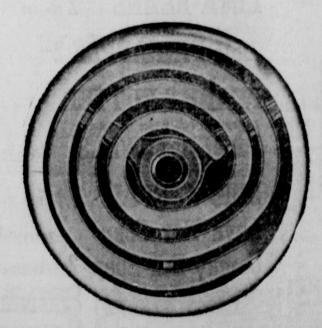

Old Age Assistance and who are una required medical services. With this (called Medical Aid to the Aged) in a Texans who want and need help in mee ical care costs will have it.

when you cook electrical

You'll be delighted to find out how little it costs to cook the modern electric way. Surface units cook by direct contact with utensil bottoms, use head thriftily. The electric oven, insulated all around including the bottom, keep heat inside where it belongs. And once the oven reaches the temperature you select, it uses electricity about one-fourth of the cooking time. It costs the average family only about 3¢ a meal to cook with flameless electricity. IT'S PREDICTION

One thing nobody predicted was that 1963 would break the all-time auto sales record set back in 1955. New car registrations hit 7,300,000! The boom also resulted in a record-breaking scrappage rate — 5,400,000 cars a year. Since the automobile industry is a good barometer of our economic climate, 1964 looks very promising, but the future belongs to those who prepare for it.

So we are preparing for it. The scrap Iron Market is continuing at a very strong pace. Some new orders are expected. In the meantime weare in the market for scrap Iron, Cast Iron, Oil Field Cable, Tin, (no whole bodies) Complete Cars, Copper Wire, Brass, Radiators, Aluminum, Batteries, Lead, Babbitt.

We did want you to have this information, to give you an idea of the trend in the Scrap Iron Business.

After all we have been in business for 38 years, and we value the many friendships this has brought us.
