Relief from Gas Stomach Pains Dizziness

The doctors tell us that 90 per cent of all sickness is due to stom-ach and bowel troubles. You can't be well if your digestion is bad, you are likely to get sick unless you relish food and digest it properly.

Tanke has a wonderful record as a relief from digestive troubles even those of years' standing. Mr. James F. Campbell, of 1012 W. The World's Quality Oil made still better!

Leading lubrication specialists improve the quality of Mobiloil to meet today's demand for a superior lubricating oil

Today's high-speed driving conditions place a new burden upon lubrition. Your engine requires a better oil, especially adapted to these conditions.

This need is now met with the New Mobiloil, superior to anything produced before. At 35c a quart, you will find this Mobiloil the most economical oil you ever used.

MAKE THIS TEST

Drive to the nearest Mobiloil dealer . . . have him drain all the old oil from your crankcase and . . . fill it up with the correct grade of the New Mobiloil. You know from experience how your engine ran the last time fresh oil was put in the crankcase . . . Now--notice the difference!

Look for these results---

Increased Oil Mileage: Often 100 extra miles per quart from the New Mobiloil:
Increased Gasoline Mileage: Many tests show gasoline consumption reduced as much as 16%.

Faster Pick-Up—More Power: Quicker getaway, more "pep" on the road, less labor on

Smoother Operation: A quieter motor, a vel- > vety smoothness of acceleration, less vibration

-but did you know just how many days were colder than the same period last year?

THE WEATHER is the most universal topic of conversation. But few people really know anything about it. Feelings are so deceiving! If it's hot, most people say, "P-h-ë-w! this is the bottest weather I ever saw!"—if it's cold, they jump just as far the other way and say, "B-r-r-r! This is the coldest weather I ever saw!" They're probably wrong both times. It's so hard to remember what the temperature actually was at any given time. But those of you who said right

along, "This is the coldest February we've had for years," were correct! The mean temperature for the 31 day period from January 21 to February 20 was the lowest in fifteen years! Thera were more cold, disagreeable days in this climate than during any similar period for all that time. Here are the comparative figures for this year and last year, based on mean temperatures at Dallas, a more or less central point in Lone Star territory:

You will note that 26 days in the 31 day period had a lower mean temperature this year than last year, the average being 16.96 degrees lower. In one stretch, from February 1 to 14, inclusive, the mean temperature was an average of 21 degrees lower this year than last. Eight days this year show freezing, 32 degrees, or below freezing, as a mean average temperature, against no freezing mean temperatures for a like period last year. Such a long period of cold, disagreeable weather, with much sleet, ice and cold rain, means that gas neaters were worked considerably over time! All who could stay inside did, day and night. This meant larger gas con-

sumption. Naturally gas bills for this period will be somewhat higher than for the same period last year-and compared with the preceding 31 day period this season. Twenty live days in the 31 day period from January 21 to February 20 showed lower mean temperatures than the period from December 21 to January 20; an average of 13.64 degrees lower! When you compare gas bills, compare these terms perature figures. And, be thankful with us that Lone Star Gas Service was able to come through this unprecedented weather as efficiently as it did!

The reason Jackson and Ripon are still arguing the question on the eve of a 75th anniversary celebration of the birth is that a party

Few authorities have undertak-en arbitrarily to hand all the honors either to Ripon or Jackson. Dr. Edward Stanwood, in his wide-ly consulted History of the Presi-

and then says that "the next great step in the final organization of a new party, and the step usually accepted by historical judgment as being the actual beginning, was taken when a state organization was held a little over three months after the Ripon meeting, at Jackson, Mich., on July 6, 1854."

Myers draws largely from Henry Wilson's The Rise and Fall of the Slave Power and The Republican Party, by Francis Curtis.

The Kansas-Nebraska bill which renealed the Missouri Compromise split the Whig and Democratic parties wide open and furnished the big push for the new organization. The amalgamation of the antisslavery element was a "synchronous rising in many places."
