Major Spatz, Chief of Plane That Holds World's Endurance Record, Plays Tribute to Dr. E. R. Townsend, His Friend in France During the Great War.

A friendship having its origin in France during the World War was renewed from the clouds here today when Major Carl Spatz, commander of the navy aeroplane. The Question Mark, circled the city enroute from San Diago, California, to Washington to report to the President the result of the plane's endurance test flight in California in which the world's record for endurance flights was broken.

Major Spat and Dr. Townsend became acquainted and their acquaintanceship ripened into friendship in France when the Major was in command of the First aviation center and Dr. Townsend was a surgeon in that organization.

Upon learning that Major Spatz was to fly through this section en his way Eastward, Dr. Townsend called him by telephone at Midland and invited him to fly over Eastland, Major Spatz was pleased by the invitation and assured Dr. Townsend that he and the citizenship of Eastland might expect to see the Question Mark.

Taking off at Midland at 9:35 o'clock this morning Major Spatz arrived over Eastland at 12:00 o'clock noon, circled the city and again headed towards Shreveport his next stop. Major Spatz told Dr. Townsend

#### A RISKY STEP FOR COM-MUNISM.

One of the most interesting news items of the day is the one that tells of two emissaries of lishment of American automobile factories in Russia.

Russia, it is said, presents an extremely attractive field for the auto men because, with its population of 150,000,000, it has but 22,000 automobiles and 40,000 tractors. And although its roads are, on the whole, far from good, experienced auto sales leaders have estimated that Russia could easily absorb 100,000 cars annually-and a campaign of road-building, how being begun, could easily expand this total.

Both Ford and General Motors are said to have satisfied themselves that Russia is worth taking a chance with. The soviet emissaries now en route to this country are believed to propose a defimitt plan, whereby American capital and Russian labor could co-operate to establish the automobile industry in the land of the com-

In all the world, there are probably not two greater foes of communism than Ford and Sloan, leaders of the two automobile giants. They do not oppose it with words, but with deeds. They lift workers out of the realm of drudgery into a condition where communism does not appeal. The doctrines of Lenin have tough sledding where unskilled workers can earn five dollars a day.

If these two men do establish factories in Russia the results will be worth watching. It will be a mighty good thing for Russia-but it may prove the beginning of the end for communism. Let the Rus sian peasant learn what mass production prosperity is like and bolshevism will decline rapidly.
