### President's Balls Slated In Big Spring Tonight

For the benefit of those unfortunates who cannot dance or even walk—residents of Big Spring and vicinity will dance in three charity balls here tonight.

A day behind most of the nation, Big Spring will hold three President's Birthday balls tonight for the benefit of infantile paralysis sufferers.

At the Settles hotel, Sandy Sanderson's orchestra will play. At the Crawford, it will be music by Gerald Liberty. At the Elks' club, square dancing will be the mode, with music furnished by Jimmie Winslow's string orchestra.

Tickets, costing \$1.50 for the couple, are good for admission to any or all balls.

At Least Half Dozen Plants Remain Idle

A strike which had held up work on a \$1,550,000 expansion program at Wright Field, Ohio, was settled but labor disputes continued to delay other defense projects today at various industrial centers.

Between 400 and 500 AFL building trades workers who walked off the Wright Field job Wednesday agreed to return to work after the war department suspended opera-tions on an electrical project where four CIO members had been work-ing. The strikers had protested the employment of non-AFL men. WASHINGTON, Jan. 31 (P) The administration's British-aid
bill was sent to the house floor today for a momentous debate starting Monday while Secretary Knox testified that the nazis were awaiting "good weather for a long enough time" to invade England.

After a brief hearing, the house rules committee gave the bill a legislative right-of-way under pro-cedure calling for three days of cedure calling for three days of general debate and permitting the unlimited offering of amendments.

Committee members said the action was by voice vote. Advocat-in such a course, Chairman Bloom (D-NY) of the foreign affairs committee had stated frankly that the United States was "not neutral" but "just as neutral as any other nation."

In answer to a question from Representative Cox (D-Ga) as to whether he thought "this country is neutral," Bloom asserted: "No, but we are just as neutral

as any other nation. Cox declared:

"The bill is a war measure, not a peace measure."

Meanwhile, Secretary Knox told the senate foreign relations com-mittee that this government had information that the Germans were scanning long-range weather forecasts for a period of expected good weatehr in which to start as invasion of England.

Tate opines that the outlook is ross, from the money angle as well as from the point of games to be won. He piloted Lamesa toward lucrative returns last year and didn't have the team he hopes to put on deck this summer.

Of course, Lamesa is a hot baseball town and believes in supporting its athletic endeavors, as was indicated by the manner in which it came through for its high school football crew last fall, but Big Spring should stack up as well.

Although the Big Bpring ball club was not what one could call a financial success last year, for reasons that are now a thing of the

easons that are now a thing of the past, Tate feels that he will be able to produce an aggregation of youngsters that will draw the customers down to the West Side any number of strong teams in

### State Playoff In Basketball Starts Soon

One more week of invitation tournaments remains before the Texas schoolboy basketball legions franchise last year, thus giving an turn their attention to qualifying rounds preparatory to the state championship play-off.

Some 15,000 youngsters roam the maples as the interscholastic league's twenty-first annual campaign nears the state where they begin playing for keeps.

County and city tournaments are

cheduled for Feb. 14 and 15. District tournaments will be held Feb. 21 and 22, regional playoffs March 1 and the state tournament—at which eight teams will compete—is set for March 7 and 8.

El Paso High's unbeaten Ti-gers, averaging, 56 points per-game in thirteen tests, and Odes-sa's undefeated Bronches, look like the kingpins of West Texas.

In North Texas it seems Graham's Steers are the boys to be

quintet that went to the state title last season and is back with an-

any number of strong teams in that area although some of them are playing in the newly-formed Lone Star league and will not compete for the interscholastic league crown. Among the clubs that withdrew from the loop to enter the Lone Star circuit are Cushing and Laneville, the former an ex-state champion and the latter always of high caliber.

There are 32 districts with centers at Canyon, Pampa, Lubbock, Childress, Sweetwater, Brocken-ridge, San Angelo, Brownwood, Wichita Falls, Fort Worth, Dallas, Waco, Commerce, Texarkana, Ty-ler, Nacogdoches, Bryan, Hunts-ville, Galveston, Beaumont, Uvalde, San Antonio, Georgetown, La-Grange, Victoria, Robstown, La-redo, McAllen, El Paso, Fort stockton and Van Horn.

WORK SHEET GUIDE

(for 1940 Returns)

#### Important! Recent Changes Affect

If you are single and your gross income averages over married and your gross income overage s over \$106.06 per month, regardless of the amount of your net income, you are required to file an income tax return for 1940 under the new tax laws. Heretofore you were not required to file a return where your gross income was under \$5,000 or, if single, your net income was under \$1,000 and, if married, your net income was under \$3,500.

Millions!

In addition to lowered exemptions, the tax rates are higher. These changes in the law will affect millions of persons in all walks of life!

Tax Savings Possible in Many Cases

Every taxpayer is required by law to file an accurate tax return. You should not Ignore the fact that the Govern ment requires you to pay the correct amount of tax due. In many cases, large savings may be made by taking advantage of all possible deductions and other legal and honest means. The Work Sheet Guide Will Coach You Step by Step

The Individual Income Tax Work Sheet Guide provides spaces for and guides you in computing each item of income and deductions. Each item of income and deduction and each achedule appearing on the return is explained. Non-taxable income and deductions which may be overlooked are covered. Salaried persons, business men and everyone required to file an individual income tax return will find the Guide invaluable.

Edited by Experienced Accountant

The Work Sheet Guide was edited by an accountant with twenty years' experience in public accounting. The most advantageous features of the Guide were based on the problems he has confronted in getting data together for filing out returns and in associating with each situation and each item of income and deduction the applicable provisions of the law, regulations, etc., with as little loss of time and effort as possible.

### Reapportionment Of Congress Must Be Made

Government is machinery. Naturally the purhoses for which the machinery is used come first. direction in which it is set going, the fuel and keep in the form of taxes and other support-all these are of first importance.

But there is another matter, less dramatic and interesting, but also important-the redesign and replacement of worn-out parts in the machine itself. That is the way you might describe the congressionreapportionment due in 1941.

The constitution provides that each 10 years, when the census is taken, the president shall report its results to congress, which shall then determine the umber of representatives each state shall have, ording to the respective numbers." The only restrictions are that each state must have at least one representative, and that their total shall not exceed one for every 30,000 people.

Obviously, if congress were to have one member for every 30,000 people today, it would have more than 4,300 members. To cut down the size of the house, the present arrangement is based on about one for every 250,000-435 members for something over 100,000,000 people.

The present census will show close to 132,000,000 people. If the same proportion of representatives to population were to be kept, it would mean a House of Representatives of more than 500 members. If the House is kept the same size, it would mean that each member will be representing more than 300,000

Certainly, the House of Representatives, with 435 members, is large enough-if anything, it is too large. Many students of government believe it would work better with fewer members, and that the quality of members would improve if each had to convince a larger block of district voters of his worth.

All this puts Congress in the unhappy position of a surgeon about to operate on himself. It always gets here." does this with reluctance. In fact, the reluctance was so great in 1921 that it violated the constitution by

Despite all the grave major problems that face congress in 1941, reapportionment must not be neglected. Congress must demonstrate that it can keep the machinery of government itself in repair; it the machinery of government itself in repair; it must have the courage to make an apportionment of got there he found Polly working its membership which will not increase the total, but in the front yard. decrease it if possible. Perhaps that is a good deal to expect, but there must surely at this time be no repetition of the failure of 1921 to carry out a clear constitutional mandate.

### Smithsonian Exhibit Gets One Away From War, Politics

I once knew a lad who always described as "golly-whopping" anything of such magnitude that it made the eyes bulge. I'm sure If he could come to Washington today and see the Smithsonian Institution's new exhibit, he would suck in a quick breath and say it was "the golly-whopping-est thing I ever saw."

For three months, behind locked doors, the men and women of the Smithsonian labored in the great exhibition hall. When the sed" sign was changed for one reading "Open to the Public' the other day, they had completed a task which probably will put the Smithsonian on more visitors' "must" lists than it ever has

Briefly, the exhibit is the story of life for the last half-billion years and, just as a fillip, a giance into the future. This peek at things to come is proof posi-tive that the men of the Smithsonian are far from unimaginative gray-beards. They may do a lot of poring over crushed skulls and fossils, but they also have a Wellesian flair that would put both H. G. and Orson to shame.

Bealstic Space Ship

They have cooked up a realistic space ship which appears to be zooming along some inter-planetary highway. As the pilot looks back, he can see the chang-ing scene of the earth as the linents and oceans revolve into the sunlight. Before him, brightly lighted, is a chart of his ourse. It is accurate It is accurate to an ians spent days in the realm of mathematics to produce The pilot is receiving televis-He carries in his holster a deadly gas gun "to rebandits." (Won't we ever get rid of those fellows?) The Smithsonian experts went the rocket ship better, for this one, I'm told, is powered by oxygen

By a series of scale-model diaramas, the Institution has traced the "Ascent of Man" from his man in his natural habitat, with the trees, grasses and animals of pre-historic times. All has been reconstructed on the latest scientific conclusions, with every thing as accurate as it possibly could be made. To give all possible be made. To give all possible credence, there are exhibits of e-historic skulls. The one of old Joe Cro-Magnon, who seems to have died with a toothy grin that the centuries haven't erased, should be labeled: "To be dreamed about only after Welsh rarebit and hot mince ple.

Meteorite In Color In the geological section, the exhibit has what it refers to as its great collection of meteorites. Not being geological, I couldn't get stirred up about these hunks fron and such that burned themselves out hombarding their way through the earth's atmosphere. But even this section is enlivened by a "color transparency" of a fiery meteorite plung-ing along where only space ship pilots ought to be. And here also are the world's largest topas and ne new minerals discovered in the gold and silver mines of Mex-

In its century of progress, the Smithsonian has unearthed something like a 100,000 new plants and animals and the gentlemen there know what they are drawing when they sketch a tree of life like the one which is the center of the biological exhibit. Here also are some of the Institution's rare specimens, like the fish that carries its eggs in proves that old one about "the fish out of water" by packing up frequently and taking long

junkets across dry land. Old And New

The exhibit has plenty of "first editions" in the machine age, too. These range from a working model of the Newcomen atmos-pheric steam engine, the first steam engine which, at two pla ton strokes a minute, was pump-ing water out of a flooded coal mine in England 200 years ago, to the "solar cooker," in which its inventor can-on a clear day -fry an egg in a jiffy or bake a

All in all, its a pretty fascinating exhibit and the one place in Washington where you can get away from war and politics.

roads and their building are always outdoor adventures; the lux-ury trains, whizzing smoothly on schedule as they must to avoid hurting any feelings, must be the background for conversational or drawing room drama in the main. Not much fence-leaping or tree-climbing can be done even in the luxurious drawing-room of a modern train.

A special train epic that gross ed plenty was Dietrich's "Shanghai Express"-but that was a Chinese train and as such could have plenty happen to it, including bandit raids, without offending any sensibilities other than Chinese. The Chinese, of course, are noted for being unruffled by trivalities.

Undeterred by these reflections, if he so reflected, Hal Roach is making "Broadway Limited," a comedy aboard a train. Victor McLaglen, who probably can climb trees or the equivalent even in a train drawing-room, is in it, along with ZaSu Pitts, Leonid Kinskey, and a new blonde named Marjorie Woodworth-a ocal girl who likes ice skating, was photographed for a maga-zine skating layout, and thus was 'discovered" for Roach movies

They're excited about Marjorie at Roach's, the producer himself considering her the sizzlingest find of his years. This is excite ment, lnasmuch as both Paulette Goddard and the late Jean Harlow (whom Marjorie resembles somewhat) began on the Roach lot Marjorie doesn't seem too excited herself; she's a pleasantly hearty girl with a sort of I'llwait-and-see attitude toward this

She seems pretty sore about the stories to that effect that are going about, and if you weren't such a flinty-hearted and hard-headed cuss, you'd come in and witness the big hit that Bonnie and Orrin Tucker are making in the Bowman Room. The critics say they go far better than at any previous appearance in New York.

"Tucker and his orchestra are the best dressed band outfit that has hit New York in a long time. They look like a college glee-club, all clean looking youngsters having, and giving, a good time.
