

British Withdrawing From A Greek Front

MOSCOW PRODS FINNS TO YIELD NICKEL MINES

By United Press. STOCKHOLM.—A new Soviet request regarding the famed nickel mines of Petsamo, again may spell trouble for Finland.

Just how far Russia intends to go in this latest issue is a question. A non-Swedish and non-American source did not exclude the possibility that it might well represent the alleged cause for re-summing the invasion of Finland.

Several prominent Finns have said they suspected the Soviet request regarding Petsamo to have been timed strategically. In view of a probable German invasion of the British Isles, they thought the Kremlin considered this as the best moment to raise a new "case" with Finland.

The Russians have requested a "new deal" in the administration and output of the Petsamo nickel mines. In fact, one high source believes Moscow wants the outright concession of the mines.

It began some weeks ago with the Soviet government expressing the desire to the Finnish minister, Jukky K. Paasikivi in Moscow that a fresh settlement should be reached regarding the mines.

A few days after learning of this first desire, Paasikivi was invited to a new conference. This time he was informed that Russia desired the "outright concession of the Petsamo mines."

Reporting this additional request to his government, Paasikivi was told that several experts would leave immediately for Moscow. These did and discussions were inaugurated.

It is recalled that the majority of the Petsamo nickel shares are owned by the Canadian Mond Company. It is now reported that Mond has complied with a recent request to relinquish these shares, thus improving the Finn attitude in the Moscow negotiations.

One source declared it was believed at first the Soviet would be satisfied if the present terms of the Petsamo agreement were reversed. That is, Russia would obtain 60 per cent of the output instead of Germany and the latter to receive Russia's present 40 per cent cut. But the Soviet have now raised the ante to complete concession.

The Finnish government is doing its utmost to balk this Soviet request which, incidentally, signifies the creation of a mixed Russo-Finnish board to administer the mines. The hitch is that the Russians want the chairman of the board to be a fellow-citizen.

Furthermore, this source estimated that once the Russians obtained concession rights at Petsamo, they would rush some 400 persons there as experts, engineers and skilled workmen.

Tips On A Murder Are Lacking Logic

By United Press.

KANSAS CITY, Mo.—The murder of Leila Welch, attractive 24-year-old heiress, has brought scores of letters and other communications to the police department from persons who believe that they have unorthodox ways of locating murderers.

Miss Welch was beaten on the head with a hammer and her throat was slashed on March 9. In their investigation police followed countless tips and questioned hundreds of persons.

Letters have arrived at police headquarters from persons all over the country who believe that their method of crime detection is infallible. Others have telephoned police headquarters, and some have made personal visits.

One man, who said he was a doctor, wrote police that they should photograph the retina of the victim's eyes.

"The image of the killer probably will be found impressed there," the doctor said.

An Ohio woman who is a fortune teller wrote police: "I don't want any publicity, but if you care to send me expense money to make the trip to Kansas City I'm sure I can solve the crime."

An elderly man walked into headquarters with a box under his arm. He asked to see Chief L. B. Reed. In the chief's presence, the man removed the lid from the box. The bottom was covered with pebbles.

"Now I can tell you just where the killer went with this box," the man said. "I can shake this box and the pebbles will indicate to me the way the killer went. I can lead you to him."

Reed thanked the man but declined the offer.

One letter said: "I had a dream of seeing three initials, 'L.M.J.' It may be the slayer."

Another man wrote: "I listen to crime mysteries on the radio and I nearly always solve them before they are ended."

The city offered a \$500 reward for the murderer, and one letter closed with this question: "Do I get the reward when I help locate this man?"

Truck Growers Of Gorman Organize

Farmers and truck growers of the Gorman section of Eastland county have organized themselves into an association and have elected the following officers:

J. E. Smith, president; Dallas Jobe, vice president; Glen Kirk, secretary-treasurer. A board of directors composed of ten farmers and truck raisers from the various communities adjacent to Gorman, was named.

Farmers interested in the organization are urged to contact the officials of the organization. Members will be under no obligation to sell their produce through the association.

Two large warehouses of the Southwestern Peanut Growers' association at Gorman will be used as a market center, it is stated.

Reading from left to right: the Presidente Vargas, largest uncut diamond in existence, Miss Kay Hernan of New York holding three million dollars worth of gems, and the Jonker, third largest diamond ever discovered. Cutter soon goes to work on the Presidente Vargas, which was found in Brazil.

ARMY VISIONS 3 YEAR'S LEAD IN WAR PLANES

By United Press.

WRIGHT FIELD, Dayton, O.—Experimental engineers—or "idea men"—at the army air corps' important base at Wright Field have set a goal to be "three years ahead of the procession" in the perfection of fighting aircraft.

To help bolster the air arm, research men strive constantly to complete specifications for new war planes that will surpass those of any other nation three years hence.

The "idea men" are dreamers, men with imagination and vision. Back of all this, officials admit the men must have a "stabilizing background of the vast store of technical knowledge compiled in 23 years of air corps research and experimentation."

The army's newest models, even the "dream ships" now under construction, are not new "inventions." They are products of long years of development.

Most spectacular of the new American warplanes is the gigantic XB-19, huge 210-foot-winged bomber, now under construction at Santa Monica, Cal. The giant bomber, designed with an 8,000-mile range to enable it to fly to Europe and back nonstop, is an excellent example of long range planning and development.

The bomber, however, is an enlarged development of the biggest bomber the army now operates—the B-15, a 150-foot-winged, four engine plane that holds world records for load-carrying and long-range flying.

The B-15 in turn is one step in size and development beyond the first four-motor monoplane bombers of the army, the B-17 Flying Fortress, now in production on a large scale.

The "idea men" decide what top speed may be expected, what rate of climb the ship must have, how fast it may land with safety and how much space can be required to take off and land.

They set down estimates of the range a plane should have and the "ceiling" required. They determine the load a plane may carry, including the crew size, weight of fuel, oil, equipment, bomb load and armament.

A Grand "Upright" Piano Prized By Oklahoma Family

HUGO, Okla.—A concert grand "upright" piano is owned by a Hugo man, George Michie.

The piano is believed to be more than 90 years old and is valued at \$1,000 by its owner. It is taller than the ordinary upright model and its top follows the lines of the conventional concert grand piano. The strings are the same length as those in a 7-foot grand model.

The instrument has a cloth covered speaker opening into the tone compartment and the entire front is removable down to the keyboard. Keys for tuning are located at the bottom instead of the top as in most pianos.

Rare scroll work and intricate hand-carving cover the walnut case. The piano is in good condition and is still in use in the Michie home.

Michie said he acquired the piano three years ago from a family who had shipped it to Oklahoma from Kansas. The instrument was built by a firm no longer in existence. It bears the notation that "patents are being sought."

Olden Girl Weds Oklahoma Youth

Mr. and Mrs. J. A. Sulpurver of Olden announce the marriage of their daughter, Miss Norma Jeanne to Mr. Howard Gorman of Lawton, Okla., on Tuesday, April 8. The ceremony was performed in the Justice of Peace office in Cisco.

Mr. Gorman is an automobile mechanic at Lubbock, where the young couple plan to make their home. The bride attended school at Olden, and Draughton's Business College at Abilene.

Marines Are Landing—Or Are They?

Although apparently hooking navy blimp, this parachuting marine has situation well in hand at Lakehurst, N. J., naval air base. Blimp is far enough away for a miss.

PHILLIPS WINS CLUB TOURNEY FROM VAUGHN

James Phillips of Ranger repeated, Sunday afternoon, as the Ranger Country Club's golf champion, Phillips won over H. H. Vaughn, runner-up and a former club champion, 7-5, to take the title for the second consecutive year.

In going to the finals Phillips defeated E. L. Norris 6-5, and A. E. Norris, 4-3, before meeting Vaughn. Vaughn defeated Sam Conner of Eastland 3-1 and then won over Roy Trower 2-1 to go into the finals.

Second flight finals have not been played as yet, with W. R. Cole to play Glem West for the second flight honors. Cole has defeated Bob Earnest 4-3 and P. D. Ford 2-1 to go into the finals, while West has defeated C. L. Crews 3-1 and R. H. Snyder 6-5.

Rice Herrington won the third flight over Carl Heinlin by a score of 4-3. L. Latham won over Robert Jones in the fourth flight and Gene Vonker won over R. V. Galloway in the fifth. Arthur Williams won the fourth flight only on H. T. Schooley in the consolation playoff completed Sunday.

Cell Won't Open So Judge Moves Court

PHILADELPHIA.—The judge went to the criminal in the case of William Smith.

When Smith's case came up before Magistrate Jacob Dogole the regular turnkey was absent and his substitute couldn't open his cell.

Magistrate Dogole went to the prisoner's cell, heard testimony that he had carried a gun illegally and held him in \$1,500 bail.

Unable to raise bail, Smith was removed to Moyamensing prison—but not until the regular turnkey returned and opened his cell.

St. Louis Depositors Don't Claim Money

ST. LOUIS.—St. Louisans may be frugal with their money, but they also are forgetful about it. The annual report of unclaimed deposits to the state finance department—required by law each year—shows nearly \$100,000 lying unclaimed in St. Louis banks.

One bank reported \$50,111.99 unclaimed. Four deposits were for more than \$2,000 each.

WEST TEXAS—Cloudy, showers north tonight and northeast Tuesday.

Industry Mapping Scrap Salvage In Pittsburgh Sector

PITTSBURGH.—Industries in this area—many with their own salvaging programs—are making plans to cooperate with government officials in their drive to conserve metals and materials essential to defense production.

Local firms are expanding their research work to further aid the newly-formed conservation unit of the Office of Production Management, which has announced a salvage and substitution program to conserve vital materials.

Heading the list of materials specially affected by the OPM's action, and vital to Pittsburgh district industries, are aluminum, stainless steel, important steel alloys such as nickel and tungsten, zinc and magnesium.

Several firms have established special research departments to explore the possibilities of plastics as substitutes for strategic materials.

As possible substitutes for aluminum in civilian products, materials like synthetic rubber and copper are being tried.

The use of spiegel, an alloy containing about 20 per cent manganese, is being studied as a means of conserving the supply of manganese and other vital steel-making ingredients.

Marine Recruiter To Visit In Two Towns

Word has just been received here, that a recruiting officer of the United States Marine Corps will visit the post offices in Cleburne and Stephenville, for five days starting Monday, April 21st, to examine men in this vicinity for enlistment in the Marines.

He said that never before has the Marine Corps offered such a great opportunity for young men who wish to serve their country in one of the finest branches of service in the country. Young men should investigate these opportunities, he said, and find out for themselves just what the Marine Corps really is and what it has to offer them.

Only young men between the ages of 18 and 30 years, who are single, with no dependents and have completed grammar school, will be accepted for enlistment. Men who have registered for selective service, but who have not yet been called may still voluntarily enlist in the U. S. Marines.

ATTENDS BROTHER'S FUNERAL

Mr. and Mrs. W. H. Mullings of Eastland went to Austin over the week-end to attend the funeral of P. W. Mullings, a brother of Mr. Mullings, a former resident of Eastland county.

PATROL BOATS TO FORM NAVY IN PHILIPPINES

By United Press.

MANILA.—The Philippine Commonwealth, which has a regular army trained under American methods, has begun to create an air force and an offshore patrol force of small, speedy torpedo-boats.

The offshore patrol, like the air corps, is under the army, the Philippines having no navy. It has been nicknamed the "Philippine army on water," and at present counts with two boats, the Q-111 and the Q-112.

Philippine army authorities envisage a large-scale expansion of the O.S.P., as the patrol is called, into a force divided into three squadrons—one based at Manila, another somewhere in the Visayan Islands, and the third in Mindanao. Present plans call for the construction of 36 Q-boats 7 1946. Each vessel will cost approximately \$75,000.

Home Building Started

Difficulty in obtaining equipment abroad because of the war has caused a delay in the expansion of the O.S.P. The Philippine army, however, has adopted a plan to build the hulls of Q-boats locally and buy only engines abroad. The hull of a Q-boat is under construction in Manila now.

The O.S.P. was organized in January, 1939, and its two craft were purchased in that year. Painted dark gray, the two sleek boats have a maximum speed of 45 knots and carry not only torpedoes but also depth bombs, 50 caliber machine guns, and radio receiving and transmitting sets.

A graduate of the U. S. Naval Academy, Capt. Jose A. Andrada, is acting O.S.P. chief.

Philippine army authorities believe that a fleet of mosquito boats would be the best possible naval protection for a small nation unable to build a navy comparable to that of major power. A capital ship would cost approximately \$60,000,000, equivalent to the cost of about 1,000 mosquito boats. Experts believe that a well organized and well handled mosquito fleet, supported by an adequate air force, could give plenty of trouble to an invading force.

European war reports have mentioned successful operations in coastal areas of boats similar to those of the O.S.P. A new type torpedo boat was reported being used by the British navy, and two Nazi war vessels were reported to have been sunk off Norway by boats of this type.

The O.S.P. operates a school in Manila, which trains students in the handling of torpedoes and machine guns, navigation, radio communication, and other aspects of mosquito fleet work.

The Philippine army air corps, organized in 1935, is at present concentrating on the training of pilots, and hopes to have between 500 and 600 pilots by 1946. The air corps counts with only 41 planes, most of which are training craft. Twelve more planes are expected to be added to the force this year. The Philippine army is not exerting much effort to obtain fighting models in the belief that present models would be obsolete before the trained force could have an adequately trained force of pilots.

Philippine army air training is patterned after American methods, and graduates of the PA flying school are believed to compare favorably with those of the U. S. army air corps.

U. S. Warned About Going Into Red Sea

ROME, April 14.—An Italian spokesman informed the United States today that any American ships venturing into the Red Sea would be attacked by the Axis forces.

President Roosevelt has opened up the Red Sea route to the Suez Canal to American shipping, in an effort to take part of the burden of shipping supplies to Africa and Greece from the British.

LIBYAN FRONT, HOWEVER IS SAID TO BE UNCHANGED FROM LAST REPORTS OF NAZI DRIVE

SECOND DEFENSE LINES IN GREECE MAY BE NEXT POINT WHERE JOINT GRECO-BRITISH DEFENSE MAY ATTEMPT A STAND

British troops have been forced back along the Greek front, London admitted tonight, and Rome claimed the capture of strategic Corizza, which may open the route for flanking the Greco-British main defenses.

London was vague as to just where the British troops were being withdrawn, but there was mention of pressure on the eastern flank, southwest of Salonika, which may indicate it is the region of the retirement.

This report, and the Italian claim of recapture of Corizza, may indicate the Greco-British allies shortly will be forced to fall back upon the short secondary defense line in Mid-Greece.

Ranger Woman Will Be Buried Tuesday

Funeral services for Mrs. Sarah Isabell Atkins, 67, of Ranger, who died Monday, will be conducted from the Ranger Church of God Tuesday afternoon at 4:00 o'clock, with Rev. M. E. Drake in charge of the services. Interment will be in Evergreen Cemetery, with Killingsworth's in charge of arrangements.

The decedent was born in Texas County, Mo., May 3, 1874, and had lived in Ranger 17 years. She was a member of the Church of God.

Survivors include three sons, John A. Atkins, Strawn; Rev. J. C. Atkins, Nettleton, Ark., and Foy Atkins, Ranger; five daughters, Mrs. L. E. Kitchens, Strawn and Mrs. Dave Boney, Mrs. J. H. Gipson, Mrs. Ethel Stevens and Mrs. Leonard Shaw, all of Ranger; four brothers, C. C. Harmon, Washington, Ark.; W. F. Harmon, Mingo; R. F. Harmon, Bennett, N. M., and A. C. Harmon, Mingo; three sisters, Mrs. O. A. Harrison, Deseidema; Mrs. J. V. Harrell, Ranger, and Mrs. Mary Brock, Strawn, and 24 grandchildren.

In contrast to this dark picture of operations on the Greek front, London indicated the situation in Africa, where the Nazi panzer divisions were developing a serious thrust toward the Suez Canal, had not deteriorated appreciably during the day.

The British said they had beaten off a stiff German attack upon Tobruk, in which tanks and infantry were employed. Mention of Germans were following the fast-moving armored columns with rapid transit infantry units.

Around Solium the British said contact had been established by advance troops of each side, and that losses had been inflicted upon the Germans. The Axis claimed the British were attempting to evacuate men from Tobruk by sea and said that a British tank attempt to break the German ring of steel around the Libyan port had failed.

The Italian claim to reoccupation of Corizza appeared to be the most serious news of the day from the Greek front. Corizza lies over the Albanian border from Greece and was the scene of a great Greek victory against the Italians. A road leads from Corizza southeast 30 miles to Kastoria. An Axis drive along this road would make the Phlorina end of the line untenable. However the British announcement of withdrawal strongly hinted that the northern defense system already may be in the process of abandonment.

Occupation of Corizza would indicate that German and Italian troops drove southward swiftly between Lake Ochrida and Lake Prespa. This sector had been stubbornly held by the Greek troops against the Italians, but the Greeks may have been forced to retreat because of danger of German encirclement.

Sing Sing Convicts Caught After Break

OSHSING, N. Y., April 14.—Two prisoners who escaped from Sing Sing today and who fled across the Hudson River after killing a guard and a policeman, were captured about seven hours after the break.

The break was described as the first major escape from Sing Sing since Warden Lewis Lawes took over management of the prison in 1920.

Motorcade Is To Be Here on Wednesday

A motorcade of 50 Dublin citizens is due to visit Eastland and Ranger Wednesday, advertising the World's Championship Rodeo, to be held April 25, 26 and 27.

The group will visit first in Eastland during the afternoon, and from Eastland will continue on to Ranger, where another short stop will be made.

O'Daniel Undecided About Senate Race

AUSTIN, April 14.—Gov. W. Lee O'Daniel told the legislature today its action in five legislative topics submitted by him will "enable me to decide whether I should offer myself as a candidate for United States Senator."

Dove Lives Days In Heating Pipes

PRICE, Utah.—Ten days in a heating system and still alive. That was the experience of a dove.

Special services were being held in the Price Hellenic Orthodox church that called for the release of a dove to symbolize the descent of the Holy Ghost upon the Master. The dove was released, flew around the interior of the church—then flew into a heat vent near the ceiling.

Church members thought they could do little about it—the furnace was roaring away because the temperatures were below freezing outside.

But 10 days later, members of a church auxiliary were meeting in the basement. They heard a noise inside a heat register. The register was opened—and out fluttered the missing dove.

A few feathers were scorched—but the dove seemed little the worse for the experience.

BABY'S DOCTOR GET NICKELS

BERWICK, Pa.—Seven hundred nickels were given to Dr. Paul M. Szwetwicz of Berwick by Mr. and Mrs. Reuben Reader of Freeland following the birth of a daughter. The parents had saved the nickels from change during the past year.

## Something to Worry About

Do you suppose people would really like it if they had nothing to worry about?

Probably not. The fathers and grandfathers of the fellows who go around these days with their chin down to here, worried just the same. The fellow who moans continually about how things are going to the demition bow-wows is only carrying on a very old and very human custom.

You think grandfather or dad had nothing to worry about? Well, they did. Let's stop worrying about our own worries for a moment, and worry with dad:

Wonder whether I'd better put those savings into the bank and get only 4 per cent when that slick feller offers 8 per cent on his gilt-edged bonds?

Wonder whether there's really anything to this fool agitation for the eight-hour day?

Wonder whether doctors are really going to increase their charges? Great Jehoshaphat! They're charging \$1 for a nocifer call now, and \$2 if they come to the house!

Wonder what's come over that fellow, Ford? Must have a radical streak in him somewhere! Just think of a \$5 a day wage, when everybody knows \$1 a day is all a man's worth!

Wonder if those darn-fool women suffragets are going to keep on until they get the vote? Ruin the country, that's what!

Wonder if there's really any chance of that income tax thing being adopted? Plain socialism, that's what! Think of the government taking 1 per cent of all a fellow makes, just like that!

Wonder if that horseless carriage thing is really here to stay?

Dad, or granddad, worked up a really first rate worry about things like those, incredible as it seems to us today.

First point is, they DID worry. Second point is, they needn't have. Think of that the next time you get all bowed down with your own worries. Most of the generalities we worry about don't happen, and if they do, they turn out better than the crepe-hangers expected.

Some folks doubt if miners dig down as deep as the man who buys the coal.

All the people who don't fall for flattery could hold a convention in a telephone booth.

"Rouge Makers Hold Meeting"—headline. Regular Ladies' Aid Society.

Why can't the mailman bring us some bills whose first name is dollar?

A report says a 60-year-old man has a new tooth—but it may be false.

## THE PAY OFF

BY HARRY GRAYSON  
NEA Service Sports Editor

**JIMMY DYKES**, baseball's top jockey, obtained a flying start in the White Sox exhibition series with the Cubs this spring. The result is that writers with the Chicago clubs have put Ribber Dykes' words to music. The press version of "Jingle Bells," which undoubtedly will be heard in American League press coops:

Jingle jaw, jingle jaw, jingle all the day,  
Oh, what noise he can make as the White Sox play.  
Jingle jaw, jingle jaw, you've never heard the likes,  
Oh, what fun it would be if we could plug the Dykes.

Jingle jaw, jingle jaw, jingle all the day,  
For, oh, what fun the umps will have starting opening day.  
Jingle jaw, jingle jaw, howl so you'll be heard,  
As they thumb you toward the gate and the fans give you the bird.

**GEORGIE WOOLF** tells how Seabiscuit liked to hear his hoofs rattle, and how after dark he twice walked around the Pimlico strip to outfox the War Admiral camp.

"It had rained," relates Jockey Woolf. "The track was kinda bad.

"So the night before the race I stuck around the barn until it was dark. I took a pocket flashlight and went out on the track. I walked from the half mile pole to the head of the stretch, looking for holes.

"At the top of the straightaway I saw the track of a tractor . . . 10 feet from the rail. I found a hard spot almost a yard wide. Following it, I saw it formed a path all the way around the track. It was lightly covered with loose dirt from harrows and graders, but it was a good firm path. I walked around again, so I couldn't make a mistake.

"I flung Seabiscuit away from the break like he was a quarter horse . . . landed him on that lane. I didn't get off it.

"The Admiral—well, he was in the soft going."

**YALE** permits football broadcasting and bars whisky advertisements from programs.

Harvard accepts whisky advertising, but refuses to permit commercial broadcasting.

With the Harvard A. A. contemplating a \$40,000 reduction in expenditures next fall, the Student Council recommends the peddling of broadcasting rights as a means of balancing the budget.

When economic problems bob up at other schools operating major football teams, nothing is inconsistent with their amateur athletic standards.

## Cruise To Moon Is Easy In Fancy

NE WYORK—All aboard for the Sea of Conflicts.

That's not an invitation to cruise in the North Atlantic, where submarines lurk.

It's the departure signal for a non-stop rocket trip to the moon, with its so-called Marsh of Dreams, Sea of Conflicts, Sea of Tranquility, and Sea of Clouds.

The 240,000-mile trip is being made daily and nightly at the Hayden Planetarium by means of trick photography, lighting effects, reproduction of lunar landscapes, imagination, and the power of suggestion.

"Since there are no special limits to the imagination," Prof. William H. Barton, Jr., said, "it

takes the Planetarium space-ship only about a minute to bridge the quarter of a million miles to a moon landing in Mare Crisium, the Sea of Conflicts. But the moon explorers do not get wet, as there is no water in the moon seas.

"There are other advantages in visiting the moon the Planetarium way. An actual trip to the moon would involve complicated and yet-to-be-invented equipment and apparatus to enable earth tourists to breathe without air; to communicate where no sound can be heard; to withstand a sudden change from daytime heat of 203 degrees to night chills of minus 148 degrees; to ward off a continuous bombardment of millions of meteoric bullets."

Besides the seas, the visitors explore jagged, towering mountains, deep craters and valleys, and mysterious chasms.

The climax is an eclipse of the

## Aid Programs Are Worry To Quaker State Since 1935

By United Press

**HARRISBURG, Pa.**—Industrial Pennsylvania whose depression-bound industries put almost as many men on relief rolls as payrolls during the past decade, has found a new fiscal problem in study of last year's assistance rolls.

Coal mines, steel and concrete mills, iron foundries and heavy sun as seen from a moon bathed in the dull red glow cast by the broken-up light of the earth's atmosphere—the glow alluded to in the familiar expression, "There is blood on the moon."

manufacturing plants are booming under the growing defense program, promising higher tax returns and more employment. Through most of last year, even before the boom, industry picked up, tax returns rose and relief declined, a cycle harassed Pennsylvania governors had been trying to bring about for 10 years.

Now a study of 1940 assistance costs shows that while direct relief expenditures fell nearly \$31,000,000 during the year, costs of three minor relief programs rose astonishingly to a level of somewhat less than one-half the state's direct relief cost.

The unusual aspect of the increase was that it came in permanent programs—old age and blind pensions and children's aid—which probably will not decrease again with business improvement.

Indications that the state's complete relief picture is not so bright as direct relief expendi-

tures indicate is to be found in the ever-increasing flow of federal money into the state's aid programs. The federal government poured \$7,037,000 more relief money into the Commonwealth during 1940 than during 1937, both good industrial years.

How the state's minor-program costs have increased during the decade that saw Pennsylvania's governor struggle with the problem of relief financing is indicated by the blind pension and children's aid cost, the first entirely state financed, the second federal-state financed.

In 1935, blind pensions cost the state \$1,380,000. In 1940, they cost \$4,671,000, an increase of \$3,291,000.

In 1935, aid to dependent children cost \$1,739,000. Last year, the state paid its share of a \$16,589,000 children's bill, nearly six times as much as it did five years ago, or \$10,177,000.

Some of the state's saving on direct relief was eaten up by the heavy increase in these minor programs. Direct relief cost \$91,646,000 in 1939, and dropped \$30,723,000 to \$60,923,000 last year.

Meanwhile, Gov. Arthur H. James, who found the problem of relief financing as vexing in his first biennium, 1939-1941, as any governor since the start of the depression, spoke of establishing a "little WPA" to continue work projects in event that the federal government decides to abolish WPA.

Northwest enumerators in the 1940 Census found floating hotels on rivers, these hotels accommodating timber workers. Some of these accommodated 32 persons. They were built on stripped cedar poll rafts tied together with twisted chokecherry vines and were called "wannigans."

## To Determine His True Position A Shipmaster "Shoots" His Stars

● With a sextant, as pictured above, the shipmaster "shoots" his stars and finds his position but there is no single fixed star by which you or your electric service company can determine daily, exactly at noon, to what extent and in how many ways it is serving you today and will serve you tomorrow.

Operating such an investor-financed enterprise rendering such a vital public service is not like running a five-man ferry-boat over a familiar course between two always visible ports—or is it even as simple as navigating a giant liner, with a 1,000-man crew, on an uncharted sea.

To determine the true position of your electric service company in the development and betterment of the community requires four-fold measurement. Its past, present and future accomplishments must be measured (1) as an efficient and economical power-generating-and-distributing agency; (2) as a tax-paying, responsible, local citizen composed of your individual fellow-citizens; (3) as an employer giving steady employment under excellent working conditions and with good pay; and (4) as an investor-financed, free, American business enterprise—assuring exceptional safety of investment and paying reasonable wages on the investment to your fellow-Americans whose money has built and will build your electric service facilities.

Think of your electric service organization as your ally in all these ways. Treat it as you like to be treated. Enable it to serve you most economically by giving it more to do.

(Science admits the possibility that atomic power may be harnessed to run man's machines. When this is accomplished, by splitting atoms of U-235, found in the element Uranium, a vast source of energy will be released. This serial, "Love Power," anticipates that scientific feat, and while the background is based upon fact, all characters and incidents are entirely fictional. Any resemblance to actual persons, places or events is entirely coincidental.)

CHAPTER I

AWED by what he knew now to be true, Dr. Robert Hale backed slowly away from his observation chair, moving as if under a hypnotic spell. The sheer potency of what had occurred here seemed to have numbed him even though it was expected and planned.

He glanced once at Miss Sorni. She knew! She looked ghostly, her eyes wide as she waited there by the door, gazing back spell-bound at the great unit in full realization of what it contained. Neither spoke until they were outside.

"Robert!" She whispered it tremulously, and repeated, "Robert!"

Faces strained, they were still staring back in.

"Wait here," said he. "I'll go back and—"

"No! No, no!"

"Just to throw the switch, Leana. You know that must be done!"

The switch was a massive bar; Miss Sorni stood transfixed while he put both hands to it and pulled. The weird hum that had dominated their laboratory stopped instantly, as if genuinely glad of its own release, but the silence that followed was almost a tangible thing.

Robert glanced at the windows, verifying for the hundredth time that they were both high and barred. The steel door across the room he knew to be doubly locked. Back near Leana Sorni, he paused only to push a button that controlled the lights, then moved outside and locked the door. They walked a hundred yards toward the offices before either spoke again.

"Don't be uneasy," he labored to say it easily himself. "Go about your personal routine."

"Yes, Robert."

"Say nothing, of course. I—I shall take the precaution of setting an armed guard. A man, several men, with rifles."

"Rifles!" She spoke contemptuously.

Dr. Hale nodded, looking afar off. "I know. Impotent now, Leana. But only you and I know! You and I! The only two people in the world who do know! The only two people since—since Creation!"

He was literally shaking under the power of his thoughts.

"You and I," murmured Leana. "Two people. You and I."

FOR an eternity they stood there, a dark-haired, hatless young man and a blond woman in white, just thinking, trying to grasp it, striving to be sensible in the face of their achievement. A factual two minutes passed and he turned toward the office door. He inhaled deeply.

"There is no hurry," said he. "No hurry at all, Leana. We absolutely must be calm at this stage. The armed guard will serve as a precaution. It may be several days before we—before we can—well, everything must be re-

# LOVE POWER

BY OREN ARNOLD

Illustrated by Ed Gunder

Dr. Hale backed away slowly, as if hypnotized by the miracle of science that had occurred here. He knew the world's greatest secret. Miss Sorni knew. This was the discovery of centuries!

corded first, Leana! The records must be brought absolutely up to date and copies sent to the principal universities and commercial laboratories just as a safeguard. I told you I had advertised for a secretary. Stenographic help which I knew would be needed."

"Yes, Robert."

"They were to call at 4. It is past 3 now."

"The applicants. I advertised in the newspapers for applications by mail. A few wrote excellent letters with good references. I will go in now."

His study was down a hall and through an inner glass door with his name lettered on it, and as he approached the door, up four low steps, he gradually became conscious of a girl standing there. He paused and looked owl-eyed at her.

She was an extraordinarily pretty person. That much was instantly clear. She had a stature somewhat shorter than his own, and hair as dark as his. The hair fell to her shoulders and bounded part way up again in an orderly if oddly intricate set of curves and curls. Her eyes—most surprisingly—were as violet as Leana Sorni's, and her skin almost as fair. She wore a springish street costume of simple but highly becoming lines. Dr. Hale's mind, long trained for minute observations, quite automatically catalogued these pleasant details.

"How do you do?" she greeted him. "You must be Dr. Hale. My name is Carolyn Tyler and you wrote me to call."

"Oh," the day's work had been of transcendent import to Dr. Hale anyway, and now violet eyes were trained upon him. He repeated, "Oh."

cross, many of which show commercial possibilities.

He has made cloth, silk thread and rope from okra fiber and banana peels, and numerous other products from plants native to this section, much on the same order as Dr. George W. Carver, the famous Negro scientist of Tuskegee Institute.

An exhibit of May's research work was displayed during the annual chemistry day celebration at the university this spring.

Chemistry students say May is a wizard at chemical equations and formulas.

"Your advertisement said 'specialized secretary willing to face certain exceptional conditions at exceptional pay.' That interests me on both counts, sir, as I wrote you. I'm a bit early, but I am eager to start."

Dr. Hale swallowed. "Oh. Oh yes, Miss—Miss Tyler. I—you—"

Carolyn smiled at him, in slow amusement. So this was the renowned scientist, Dr. Hale! Not a cold, calculating freak or anything of the sort. Just a man. A youngish man at that, like somebody's brother. Ever so good looking in spite of tired eyes and tousled hair. Sensitive mouth. Slender but oddly powerful hands. And ill at ease with girls!

He didn't invite her in. He just stared and talked there in the hall.

"The pay—any price, any salary you need. I—I rather like you. Very much, in fact. Credentials were sound. And you had initiative enough to get here ahead of the others. But—Miss Tyler, you don't realize—you—what of secrecy—and danger? Danger, Miss Tyler! This is not—"

"But this isn't scary things! Not—snakes or ghosts or childish doings. I—I can't even phrase it! This is something that will revolutionize civilization itself!"

Carolyn began to sense the intensity of his feeling. Curiosity became tinged with a vague sense of alarm. Her lower lip tucked in and she gazed intently at him, trying to understand.

(To Be Continued)

Fishing Expected To Be Better In State This Season

AUSTIN, Tex.—Fishing is expected to be better in most bodies of water in Texas when the season opens May 1 than it has been for several seasons, according to reports from throughout the state received by the executive secretary of the Texas Game, Fish and Oyster Commission.

More than 7,000,000 fingerlings were placed in the waters of the

limit. Many, if allowed to grow until even June 1, would be keepers. As a result of the extremely early open season, while the adult fish are still spawning and many of last year's crop have yet to reach the legal size limit, many fish will be lost to Texas anglers. Thousands of fish which are under-sized will die as the result of mishandling by persons opening them after the season opens.

However, those same tests also disclose that more than half of the fish taken were under the size

### BRUCE CATTON IN WASHINGTON

IF THERE'S DIRTY WORK AT DEFENSE CROSSROADS, SHOW-ME SENATOR PLANS TO UNMASK VILLAIN

BY PETER EDSON, NEA Service Staff Correspondent

WASHINGTON.—An investigation of 40 billion dollars (you're supposed to genuflect whenever a sum that large is mentioned) will get going in Washington April 15.

It will be Senator Harry S. Truman's special 7-man committee to investigate national defense—where the money is going or has gone. If the serious, hard-working senator has his way, it will be neither a whitewash nor a smear of the defense machine. The chairman will always be from Missouri, and they'll have to show him—show him where the \$40 billion went, and how much of it went down the drain pipe.

That part of official Washington which has anything to do with national defense has been waiting with considerable trembling for the Truman show to open, fearing a witch hunt, hoping that the committee wouldn't "get anything on them." When the senator delivered his opening blast at defense extravagance, citing a number of contracts which looked funny, copies of his speech were carefully fled away. It looked as though he had the goods.

First witnesses to be called will be the secretaries of war and navy, then the heads of OPM. From there it is hoped to get general statements of the defense policies. Then will come the parade of assistants, executive officers and dollar-a-year men, the fellows who did the work, explaining why they made deals and how.

The seven senators, not too distinguished to begin with, will all be distinguished if they are able to unmask defense, though

The idea is that the committee shall report its findings back to the Senate, but as dirt is uncovered it may be turned over to the Department of Justice for prosecution. If the investigation strikes pay dirt, there is no question but that the Senate will grant it additional funds to keep going.

Senator Truman, who comes from Independence, Mo., was a field artillery officer in the 35th division during the war, and is now a colonel of field artillery reserve, as is his secretary, Colonel Vaughn, of St. Louis. Truman's interest in military affairs has struck with him, and his observance of the sloppy way in which contracts were let and handled for the construction of Ft. Leonard Wood, the seventh corps area training center near Rolla, Mo., was one of the things that first got him interested in waste of money on defense projects.

### Cabbage Is Found To Keep Trouble With Teeth Away

By United Press

CHICAGO—The cabbage head, long a subject of ridicule in literature and song, now may be held high. It has been crowned with laurels in the medical world.

Three Ohio State University scientists, R. C. Burrell, H. D. Brown and Virginia R. Ebright, reported in the magazine Food Research that fresh cabbage ranks high in the list of fruits and vegetables containing vitamin C which helps prevent tooth decay, bone softening, and muscle weakening.

The Journal of the American Medical Association, commenting on the findings of the Ohio chem-

ists, said, "The vitamin C requirements of the adult may be supplied by a small portion of co-cabbage." Hot cabbage, however, is not as rich because the cabbage loses its vitamin through cooking.

For those that don't like cabbage despite its vitamin value, it is reported by scientists of the University of North Carolina and Meredith College, Raleigh, N. C., that strawberries, too, are rich in vitamin C. Thirty or forty berries will provide the daily requirement for an adult.

GETS RARE MAP COPY

By United Press

ISTANBUL—Pope Pius has sent to Turkish Prime Minister Refik Saydam a gift consisting of a copy of a map made in 1546 by Giacomo Gastaldi showing the Ottoman Empire at the height of its power and the concepts of the day of the geography between Danzig and the Bosphorus.

### Society Club and Church Notes

**LILLIE MARIE SMITH WEDS RAYMOND G. PIPKIN SUNDAY**  
Miss Lillie Marie Smith of Sonora, became the bride of Raymond Grady Pipkin of Longview at twilight Sunday at the First Methodist Church in Sonora. The bride is the daughter of Mrs. Velma Lacey of Sonora and Mr. Pipkin is the son of Mr. and Mrs. Grady Pipkin of Eastland.

Dr. William Lacey Smith gave his sister in marriage. She wore a colonial costume gown of bridal blush pink mauveline de soie trimmed with bands of Chantilly lace. She carried a colonial bouquet of pink roses and ranunculus.

Miss Margaret Fay Smith attended her sister as maid of honor and the bridesmaids were Miss Nita Beth Hays, Teague; Miss Jean Stinson, Conroe; Miss Florence Aves, Galveston. There were colonial frocks of mellow pink marquisette trimmed with matching Chantilly lace and carried bouquets of pink gladioli.

Bruce Pipkin, Eastland, was best man, and the ushers were Wayne Harris and W. J. Butler, Longview, and J. Wayne Starke, San Angelo.

The Rev. Lawrence K. Brown performed the ceremony and the music was given by J. T. Houston, Mrs. Roy Clary, San Angelo, and Mrs. Preston Lightfoot, Sonora. Easter lilies, fern and white tapers decorated the church.

A reception was held at the ranch home of the bride's mother

### Is Asking Aid for British Children

R. L. THOMAS

The school children of Texas are asked to aid the school children of England, who are suffering sorely as the result of German bombing, by R. L. Thomas, Dallas banker and former school teacher. Mr. Thomas has been named chairman of the Young America Wants to Help Campaign by National Chairman Mrs. Kermit Roosevelt. Young America Wants to Help is a division of the British War Relief Society. Mr. Thomas is urging the school superintendents and teachers of Texas to take up collections of pennies, nickels, dimes or quarters from their pupils to be used in aiding homeless and suffering English youngsters who are undergoing the ordeal of intensive bombing. State Superintendent L. A. Woods is Chairman of the Executive Committee under Mr. Thomas and leading educators of the state are members. Money collected in the schools should be sent to Eugene McElvaney, treasurer, vice president of the First National Bank in Dallas.

After the ceremony, Easter lilies decorated the house.

For traveling Mrs. Pipkin selected a beige woolen cape suit with a brown and beige blouse. Mr. and Mrs. Pipkin will make their home in Longview.

The bride is a graduate of the University of Texas and is a member of Zeta Tau Alpha sorority. Mr. Pipkin is a graduate of Texas A. & M. College, where he was a member of the Ross Volunteers. Mrs. Smith was in Eastland several weeks prior to the marriage as honor guest for a number of pre-nuptial parties.

Mr. and Mrs. Grady Pipkin, Bruce Pipkin, Mr. and Mrs. James Pipkin, and Mr. and Mrs. Joseph M. Perkins, Bob Perkins, Miss Dorothy Perkins and Mrs. Keith Beyett of Fort Worth; Mr. and Mrs. Staaden Odell of Dallas, attended the wedding from Eastland.

Mr. and Mrs. Jess Pipkin and Miss Carolyn Pipkin of Breckenridge also attended.

### TUESDAY CLUB TO MEET

Mrs. Art Johnson will be hostess Tuesday for the Tuesday Luncheon Club which will meet at her house at one o'clock.

### Eastland Personals

Joe Hardin, student in Texas Military College at Terrell, Texas, was the house guest of Buck Perrin, student at East Texas State College of Commerce, in Eastland the past week.

Mr. and Mrs. Tommy Starke and son, and Mrs. Starke's father, W. B. Webb of Cisco, were Brownwood visitors Sunday.

When some women say "Can you keep a secret?" you know they can't.

### Jaycee Players To Rehearse At Church Tonight

Due to the fact that the Concellie Theatre, where the cast for the coming Junior Chamber of Commerce play has been rehearsing, is to be occupied tonight, the Jaycee players will hold their rehearsal at First Christian Church annex, Mrs. Maurene Johnson, who is directing the play, stated this morning.

Mrs. Johnson stated that the cast for the play, which is to be an all man blackface minstrel, would be completed tonight.

### Dance Tonight For Benefit of "Fighting Greeks"

Earrest Halkis of Eastland announces that there will be a dance at the Country Club and Lakeview Club at Cisco tonight from 9 'til. The entire proceeds, he states, will go to the Greek Relief fund.

The dance is being sponsored by the Cisco American Legion Post and Veterans of Foreign Wars organization. Admission will be \$1.00 per couple and tickets will be honored at either of the clubs mentioned above.

### Educators Joining Movement To Aid British Children

DALLAS, Texas—Leading educators of Texas, representing colleges, universities, city schools and county schools, are joining in an effort to help the school children and students of Texas aid the suffering school children of England. The campaign which is known as Young America Wants to Help is a division of the British War Relief Society. Mrs. Kermit Roosevelt of New York is national chairman and R. L. Thomas, vice president of the Dallas National Bank and a former school teacher, is state chairman.

Chairman Thomas is appealing to every school superintendent, college professor, principal and teacher in Texas to ask the boys and girls attending their classes to subscribe some small amount to aid the children of England who are suffering so severely as the result of indiscriminate Nazi bombing. This money will be sent directly overseas to bring aid to these young war victims, many of whom are homeless and orphaned. The Young America Wants to Help Campaign will culminate in the week of April 28th to May 2nd. Each teacher in Texas is asked to take up contributions in their class rooms and forward the total sums collected to Eugene McElvaney, Vice President First National Bank in Dallas, treasurer of the campaign. Serving with Chairman R. L. Thomas is an executive committee composed of many of the leaders in Texas educational circles. State Superintendent L. A. Woods is chairman of the committee, Dr. Homer P. Rainey, University of Texas, Dr. Umphrey Lee, Southern Methodist University and Dr. T. O. Walton of Texas A. & M. are vice chairmen.

### AUSTRALIA OUTLAWS SECT

CANBERRA, Australia.—The religious sect known as Jehovah's Witnesses has been outlawed under the National Security Regulations Act. The "Lighttray," a 60-foot ketch, used by the sect in the Pacific Islands, has been seized.

When some women say "Can you keep a secret?" you know they can't.

## MAKING AMERICA STRONG

THE INGENUITY AND VERSATILITY OF AMERICAN INDUSTRY ENABLED IT TO SHIFT FROM PEACE TIME TO DEFENSE PRODUCTION

**GASOLINE**

**SYNTHETIC RUBBER**

**AUTO WHEELS**

**SHELL CASES**

**LINOTYPE MACHINES**

**OPTICAL INSTRUMENTS**

**TYPEWRITERS**

**PISTOLS**

**SEWING MACHINES**

**MACHINE GUNS**

SOURCE: NATIONAL ASSOCIATION OF MANUFACTURERS

In a few short months, American industry has again demonstrated its amazing versatility.

Despite a variety of obstacles, it has swung from the normal manufacture of peacetime products to all-out defense. In the course of that transformation some remarkable things have happened, not the least important of which have been the numerous ways that specialized manufacturers have turned their talents

to making the instruments for American defense.

The examples are many. Some of the best will not come to light for some time, for industry is far too busy working to talk about its accomplishments.

Plants that were making wooden spindles are now turning out wooden "taps" for shells; makers of sewing machines now make pistols for the Army; gasoline processors are producing synthet-

ic rubber—possibly against a day when foreign supplies of petroleum might be cut off or drastically curtailed.

The makers of the ingenious linotype that converts "copy" into the type for your daily newspaper are turning their skills to defense work. The precision workers in that industry are making gun fire control and other delicate equipment for the American armed forces. The list runs on: a

### Fort Bliss Grows Into Large Post

FORT BLISS, Tex.—In 1893 this border military fort consisted of 1,000 acres.

Today Fort Bliss, the nation's largest cavalry post, has an area of more than 1,362,000 acres, almost twice that of Rhode Island.

The post's latest land acquisition netted a million leased acres for division maneuvers this summer in which 30,000 men probably will participate.

The leased acreage, north, east and west of the fort proper, is divided into a target range of 46,000 acres, an anti-aircraft range of 300,000 acres, and 1,100 acres for a new anti-aircraft cantonment center. The remaining acreage has not been allocated for use.

typewriter factory is producing arms; auto wheel makers are building shell cases. And a lipstick manufacturing firm is now putting out shell cases.

Here are a few more examples: Washing machines to shell points; compacto to shells; carpets to machine tool plants; lawn-mowers to fuses; tin cans to gas mask parts; watches to small arms parts.

These are the fruits of industrial skill and versatility.

These, too, are the forces that are making America strong.

### Tennessee Irked By Its Liquor Law

CHATTANOOGA, Tenn.—Tennessee's "bootleggers' paradise law" is embarrassing police here. Recently, Sheriff Payne's men watched a known bootlegger as he stored 700 pints of liquor in his "joint" which has no license to sell alcoholic beverages. The bottles were stamped with the state seal.
