Behind many "For Sale" signs there is a sad story: A family borrowed more than they could afford to pay for a home, or payments and interest rates were too high; the home had to be sold, often at a loss. This tragedy could often be avoided if the families would seek help from a home loan specialist, such as our Association.

A specialist called in from New York decided to wire the jaw bones together, but to his astonishment he found that they had already begun to knit. Instead of the nine pieces shown in the X-ray, Mrs. James said, the specialist found his skull splintered in "a thousand pieces." However, it appeared that a surgeon had been there before him, as the pieces were in place and had also begun to knit back together.

On Wednesday after the ac cident, Tex James, who had been blind in one eye before the accident, lost the sight of his other eye.
