THOMAS B. LOVE IN THE PICTURE

Thomas B. Love is ever in the picture. He is cordially hated for his political flip flops by a vast army of regular democrats. He has lost and lost again as a national Napoleon of politics.

Yes, like him or dislike him; damn him or praise him, when he speaks concerning insurance and banking in Texas he speaks with the voice of a master who knows his subject and tells it regardless to men of all colors and creeds and conditions and political affiliation.

JOHN BULL AND HIS CHILDREN

John Bull and his children, meaning the British Isles and the far-flung dominions of the empire, have cemented a tariff agreement which should interest all the people of the United States.

Brother Jonathan built a tariff wall around the American world—meaning the United States. Now Brother Bull is going to build his wall around the British world, covering all the dominions of all the colonies and all the conquered land.

MAYOR CERMAK PREDICTS BEER FOR THE CHICAGO FAIR

Mayor Anton Cermak of Chicago went aboard for health reasons. He will return in September. Chicago will astonish all the nations with an international fair in 1933.

He visited Poland. He was made much of by the newspaper tribe at Warsaw. He granted an interview. He expressed the opinion that American prohibition would not last and the hope that visitors to the World's fair in Chicago in 1933 would be able to enjoy beer.

Norman Thomas of New York is the Socialist nominee for President. His latest is that Wall Street has bought and paid for the democratic as well as it has the republican party.

PEEPING THRU THE KNOTHOLE with BILL MAYES

A letter from Prexy Anderson, in which he gives the low down on the high ups on the Abilene Eagle squad, reads, in part as follows: Dear Bill:

Will you kindly peep through the knot holes at the Bulldogs' and Mavericks' stadiums, learn who their letter men and best new prospects are, and find out the schedules of both teams? I would like to have them as soon as you can collect them.

DID YOU EVER STOP TO THINK?

NORMAN R. HAMILTON, publisher of the Portsmouth (Va.) Star, says: THAT now, more so than in many years, newspapers are finding it necessary to fight harder for every dollar of their revenue, and are getting less in return for their efforts.

Newspapers are finding that competitive agencies, particularly the radio, are cutting into their revenue to a very great extent, so great, in fact, that many of them are finding it necessary to cut out the publication of all free radio broadcast programs, all of which is merely giving to a competitive advertising medium free advertising, and the funny part of it is that the merchant who buys space from newspapers and decides to use the radio instead is the one who kicks the hardest when newspapers discontinue the giving of free space to a competitive medium.

AND ANOTHER THING, newspapers are being bombarded by advertisers, large and small, for a reduction in their rate. They come to the newspaper and say, "We've got a depression story to tell you. Times are tight, and we've just got to get a reduction in our advertising rate or we will have to discontinue using your newspaper."

This is no time for advertisers to be making demands upon newspapers for rate decreases and this is no time for newspapers to be giving concessions along that line. If the newspapers are to keep going and maintain their prestige, they must keep turning out just as good a newspaper as they ever did, and that can't be done on decreased revenues.

When the tide turns, as it soon will, firms will be looking to the newspapers to act, as they always have in times of stress, as the medium for bringing back prosperity. My advice to advertisers is "Don't kill the goose that lays the golden eggs—for the advertisers!"

BEHIND THE SCENES IN WASHINGTON WITH RODNEY DUTCHER

BY RODNEY DUTCHER, NEA Service Writer. WASHINGTON — Hoover and Roosevelt are in the positions of a couple of medicine men, striving for the patronage of a wealthy patient and seeking to convince the public that the patient can't get well under the other medicine man's ministrations.

Recalls Former Healthy State

NEXT day Roosevelt points to the patient, howls in dismay at his condition, reviews the pains that he has suffered, recalls how healthy he used to be before his illness, and predicts a healthy and asks how anyone can still have faith in a healer who lets a subject get into such gosh-awful shape.

SISTER MARY'S KITCHEN

BY SISTER MARY NEA Service Writer PARTICULARLY in summer, delicious and inexpensive meals are possible. The August appetite demands less substantial food and the market offers vegetables and fruits at minimum prices.

Whatever is most seasonal should be the basis of the dinner. Plenty of vegetables, a little meat and a dessert--and the menu is complete.

Tomorrow's Menu BREAKFAST: Grapes, cereal, cream, waffles, syrup, milk, coffee. LUNCHEON: Stuffed baked cucumbers, banana and peanut salad, sliced peaches with custard sauce, lemonade.

The vegetable and meat casserole is another low-cost dish. The long, slow cooking develops a rich, blended flavor that is decidedly appetizing. For August meals, use carrots, lima beans, corn, tomatoes, onions, celery--any combination you have at hand with meat as a seasoning. Use bottled coloring to make it brown and season generously with dried herbs to give a pungent savoriness.

### County Meets

By ROY BEDICHEK,  
Chief Interscholastic League  
Bureau

Editor's Note: The following article is one of a series written by Mr. Bedichek on various aspects of the Interscholastic League work in Texas.

September is a significant month in American life for in this month, generally throughout the entire nation, "school begins." These magic words mobilize the boys and girls on a scale and with a thoroughness unparalleled in the recorded history of past centuries and unknown in any other country of the world today. The American free school is at once the inspiration and the despair of aspiring democracies throughout the world. It is the one distinctively American institution; it is the greatest step as yet made towards the great ideal of "equal opportunities for all and special privileges for none."

Associated in Texas with the work of the public schools, organized by them and largely conducted by public school teachers and officials is the Interscholastic League. Its organization for the current school year also begins in September. In counties where county teachers institutes are held before the classroom work of the schools begins, we usually find a period devoted to the organization of the county league. For many years the constitution and rules of this organization has contained the following paragraph:

"First of all, aim to secure a good live county organization . . . As the membership of the league increases, emphasis should be placed on county meets, since it is here that the serious as a whole receive the most benefits from the league activities."

The county organization is formed on a thoroughly democratic basis. The county executive committee (each member of which has specific duties assigned in connection with the different contests and features of the county meet) is elected by popular vote of the teachers assembled. There is one ex-officio officer in the person of the county superintendent of schools who looks after the interests of the rural schools in the meet.

A report of the election of officers in each county is sent to the state office of the league for record and in order that each officer may be placed on the mailing list of the state organization and receive bulletins and announcements which are frequently issued in the interests of the county organizations. Last year there were 220 of these county organizations formed which means that practically every county which contains any schools formed a county league organization.

All of the contests which are thus provided for are directly connected with the work of the schools and so planned that the schools may prepare for them and use them as a stimulus to better endeavor on the part of the pupils without encroaching to any measurable extent upon school time and unduly burdening any teacher with the work of preparation. We say "the schools may prepare for them" etc. with a mental reservation. This is not saying that "all schools do prepare for them" without encroaching to any measurable extent," etc. Some schools delay entry until the last minute and then are inclined to proceed by a process of cramming to make the preparation for the coming meet. This is a mistake. Again, the school authorities sometimes place upon one teacher an undue load of the preparation work, making it truly a burden instead of distributing the load so that it may be carried easily. However, we believe that these are the exceptions. As a general rule the league work fits into its routine of the school and re-enforces rather than hinders the regular activities.

The program of the county meet is meant to be broad enough to include the activities and enlist the interest of practically every pupil likes speech-making and desires to learn how to address public gatherings, there is a wide variety of contests in this field which he may enter. If he has a gift for spelling, a contest is provided in which he can show his proficiency and develop this ability. There are contests in music and art for the artistically inclined, a contest for the "wizard with figures," and so on.

On the athletic side, there are games to suit every type. There are group games and individual contests. There are games for girls and boys, all organized so as to bring up genuine competition, that is, "competition with a kick in it" for every school. Of course, it is necessary in order to insure effective competition to make many different divisions and classifications, both of schools and of the pupils themselves, but that is a technical matter to be described herein.

Beginning, then, in September, with the early county institutes, the leagues are formed, all pointing towards the great day of the annual meet which occurs in March, usually on Saturdays, in order to economize school time. Each school sends its best in the respective events to the county meets, and there under the supervision of the county committee and the individual members thereof, the county championships are determined. It is a great day for the schools and for the school children. It is an "exhibition" day in which the interest and attention of the whole community is centered upon the general welfare of the younger generation and upon their accomplishments.

### Where Bullets Halted March of Striking Illinois Miners

Illinois police are shown here looking over automobiles abandoned by striking miners when they were fired on by Franklin county officers near Duquoin, where, according to officers, they were trying to close miners now operating. Several miners were hit by buckshot, and dozens of others suffered minor injuries, inflicted by deputies. The strikers claim they were "lured" to the scene of the battle by deputies and fired upon without warning. Many abandoned their cars and ran when the clash came.

### Wichita Falls Golf Tourney To End Season

Special Correspondent.

WICHITA FALLS.—Texas' competitive golfing season comes to close with the staging of the fifth annual Wichita Falls Golf and Country club invitation tournament Sept. 2, 3, 4, 5, when more than 100 of the leading shot-makers of Northwest Texas gather here for their last fling of the long summer campaign.

Inaugurated five years ago, the Wichita Falls invitation has steadily grown to a place of importance on the state's golfing calendar, and this year's event, coming at the very end of the season and conflicting with no other tournament of consequence, is likely to be the largest and most successful of the five.

Visiting golfers are assured of at least two matches, besides the qualifying round in this tournament, as it has been patterned to appeal to the average player as well as to those who are capable of giving Old Man Par a run for his money. Flights of 32 players each will be formed to care for every player who enters, regardless of number, and every entry will play in at least two matches, even if defeated in the first round, as all flights include consolation for the losers. A handsome collection of silverware and trophies will be distributed among the winners and runners-up in all flights.

The tournament gets under way on Friday, Sept. 2, with an 18-hole qualifying round. However, the course will be thrown open for practice several days prior to the start and visiting players are invited to take advantage of the practice opportunities. Two rounds are to be played both on Saturday and Sunday, bringing the tourney to the championship final of 36 holes on Labor Day, Sept. 5. The chief entertainment feature will be a stag dinner and smoker following qualifying play Friday.

Winners of the first four tournaments, all of whom are expected to be in the thick of this year's competition, are Ed Stewart, Fort Worth, 1928; Gus Moreland, Dallas, 1929; Morris Norton, Wichita Falls, 1930; and James, Phillips, Ranger, 1931.

# TOMORROW

and its new ways . . . . .

What discoveries are around the corner—what things, undreamed of today, will be commonplaces tomorrow? The past has seen products once rare and unknown become widespread and familiar. The future will see the process repeated.

Advertising is the driving force which brings about these changes in your life. For when a new product is developed, its distribution is limited until the advertiser tells you about it. When the product is known, you and all your neighbors form a great potential market, permitting quantity production. Economics in manufacture result—and the article comes within the reach of everybody. It has happened before—and it will happen again in the same way.

Read the advertisements! They are of vital importance to you. Your homes and habits are changed by advertised goods. What things novel, interesting, modern—will be offered next? You will find new horizons in the advertising pages of this newspaper.

### IMPORTANT

When you ask for a product by name, as a result of advertising, do not accept a substitute—substitutes are offered not as a service to you, but for other reasons.

One feature of the visit impressed them as being quite a novelty, when they found the movie houses practice the habit of intermission and one can buy candy, popcorn and other confections, similar to carnival fashion. # A SIX IS MORE ECONOMIC

Thousands of tests have proved... engineers have established... owner experience has confirmed THIS FACT: For lowest, all-round motoring costs: **SIX CYLINDERS**. No more—No less!

With more, you sacrifice the economy for which Chevrolet is so famous. With less, you sacrifice the kind of maintenance cost that Chevrolet gives you—the lowest available in today's low-price market!

**SAVE WITH SIX CYLINDERS**

Why not strike a happy balance between "too many" and "too few"? Do as the majority of low-priced car buyers have done ever since January, 1931: **SAVE—with SIX CYLINDERS**. The Chevrolet six-cylinder engine gives you wonderful mileage on gasoline—and oil! Because its smoothness is built-in—the body, chassis and engine are spared the repair costs that result from constant, inherent vibration!

**STILL GOOD AFTER 150,000 MILES**  
And the Chevrolet Six... carries on—smoothly, economically.  
Moreover it has every feature you're entitled to: Free car is up-to-date with genuine Syncro-Mesh as General Motors. And mounted springs.  
Remember that you can get a 1932 Chevrolet for very little. In fact, you'll probably find it economical to buy a new Chevrolet than to worry along with an old one.
