Lieut. Com. Donald B. MacMillan (above), noted explorer announced plans in Boston for his 16th Arctic expedition on June 19 aboard a racing schooner, with a party of scientists and college students. (Associated Press Photo)

Mildred Rehn (above), a Viennese girl, has just what is needed for the new standards for screen choruses, says Dave Gould, film dance director, who picks her as the ideal chorus girl. Miss Rehn, a golden blonde, is five feet, six. (Associated Press Photo)

An explosion in the boiler room of the power house in the South Chicago works of the Carnegie-Illinois steel corporation left this wreckage, toppled a 250-foot smokestack, killed two men and injured 10. A section of the stack can be seen in the center of the wreckage. Note the piece of corrugated steel at the left wrapped around a pipe by force of the blast. (Associated Press Photo)

Clad in baby bonnets, these quintuplet kids pose for their first picture since their birth on a goat farm at Tucson, Ariz. Ordinarily kids come in pairs, and multiple births as big as this one are reported very rare. (Associated Press Photo)

The role of "a hardy American pioneer" in a "western" picture will occupy Leu Gehrige's time after the present baseball season. Here's the New York Yankee "iron man" and holdout, shown with Sol Lesser, film producer, as he signed a contract in Hollywood to appear in the film. Gehrige flew to Hollywood for the screen test. (Associated Press Photo)

Mr. and Mrs. Joseph M. Stott are shown at their Independence, Mo., home as they were canceling funeral arrangements after they discovered that a body sent to them from Nashville was that of an elderly man, with the same name as their younger son. A daughter, Helen Stott, is between the two. The son for whom they had sorrowed was traveling in the South at the time they were notified of his "death." (Associated Press Photo)

Dr. William A. Wirt's position as superintendent of Gary, Ind., schools apparently was placed in jeopardy after the Indiana Senate passed a bill permitting mayors instead of city councils to name school boards. In 1934, Dr. Wirt testified before a congressional committee that he had heard talk at a capital party which caused him to believe President Roosevelt was a "Kerensky." (Associated Press Photo)

Irene Walters uses compressed air brush to tint hair of Genevieve Anderson in a demonstration of hair tinting at a Chicago beauty trade show. Hair hues to match dress colors are suggested as coming beauty hints. (Associated Press Photo)

William Green, American Federation of Labor chief, celebrated his 65th birthday at Coshocton, O., by declaring the steel agreement was no victory for John L. Lewis' Labor group. Green is shown with Nancy Jane, a grandchild. (Associated Press Photo)

At least two lives were lost in two New York tenement houses in the heart of an East Side slum district, when 200 thinly-clad residents were driven into the street early in the morning. Fifteen were injured. Firemen are shown on the fire-escapes in rescue work, with smoke pouring from upper floor windows. (Associated Press Photo)

Earl Pilkington, Cherryvale, Kas., restaurant proprietor, is shown with his wife after he was pronounced guilty of charges growing out of the death of Old Shep, the town's best known dog. Pilkington was fined \$25 and court costs. He said he would appeal. (Associated Press Photo)

Modestly of course—Max Baer, former heavyweight champion, admires himself in a mirror on his arrival in New York on his comeback trail. (Associated Press Photo)

More than 200 Chinese, mostly women and children, were burned to death when a carelessly placed candle on a stage started a theater fire in Antung, Manchukuo, destroying the limy building in 15 minutes. This shows the ice-caked ruins. The theater was jammed with 1,500 spectators when the fire broke out. (Associated Press Photo)

This Associated Press map shows the route of a proposed east to west flight around the world by Amelia Earhart Putnam, "as close to the equator as I can make it." The famous woman flier, conqueror of both the Atlantic and Pacific oceans, plans to start her flight at Oakland, Calif. Her route will include stops at Honolulu, Howland Island, New Guinea and Darwin, Australia. Then she plans to follow the England-Australia air route before cutting across Africa, where the exact route is yet to be determined, as indicated by broken lines. She may fly the last lap from Natal to Oakland either by way of Miami or Mexico.

George Whitney (left), and Thomas W. Lamont (right), came in for some good natured chiding from Senator Wheeler during a senate committee hearing because of whispers, conferences. Said Wheeler: "I bet the President got his ideas about the supreme court by attending some of these sessions and watching Mr. Whitney coach you." (Associated Press Photo)

SCURRY WILDCAT IS DRILLING BELOW 700

Barry county's wildest test, Bristol No. 1 W. H. Sterling, in the southeast quarter of section 130-97, H&TC, was drilling at 712 feet in red sand at the week-end.

S. "Blackie" Caprio No. 1 Post estate, Garza county western out-post to production south of town.

WILDCAT TESTS LOCATED ALONG N. MEXICO LINE

Yoakum, Cochran And Bailey Counties Share In New Development In Northern Sector

SAN ANGELO, Mar. 6—The staking of locations for one wildest each in Yoakum, Cochran and Bailey counties, all adjoining the New Mexico line, featured 68 locations listed in 18 counties this week to establish another record number for West Texas in a week. Interest in this trial and in one wildest each in Terry and Hockley counties, neither of which had shown anything, exceeded that in other developments.

Magnolia began digging cellar and pits for the Yoakum wildest, No. 1 M. Taylor, in the northeastern part of the county, 330 feet out of the northeast corner of section 203-D-John H. Gibson, about eight miles south of Honolulu-Cascade No. 1 Duggan, Cochran county's lone producer.

Cellar and pits also were being dug for the new Cochran county test, Bond & Harrison and others No. 1 Cameron Lumber company, 660 feet out of the northeast corner of labor 1, league 85, Greer county school land, about 14 miles north and slightly east of No. 1 Duggan.

The Bailey county test, farthest north of the three, will be drilled by E. L. Wilson of Dallas and associates, 660 feet out of the northeast corner of labor 4, Abner Taylor league 700, about 35 miles north and slightly east of the Cochran county discovery well.

Texas-Pacific No. 1 Bennett, Yoakum county's second well, a short distance northwest of the discovery, struck one-half barrel of salt water hourly from 5,301-05 feet and had plugged back to 5,297 feet for a shutoff. It showed no increase in production in deepening from 5,236 feet, where it was completed late in January for 570 barrels daily at 2,800 feet.

It was reported below 1,500 feet, running high. It is located in section 12-30, K. Aycock survey. For the second time Grisham & Hunter skidded to spud its No. 1 Post estate test in section 6-5, K. Aycock survey, after losing more than 1,100 feet of hole on the second attempt. First hole was lost below 2,800 feet.

Gauge Slated On New Well In Andrews Co.

Four Producers Completed In Extension To Goldsmith Pool

SAN ANGELO, Mar. 6—Shell No. 1 King, one mile west of Humble No. 1 Walker, a small producer in southern Andrews county, prepared this week-end to test through tubing with the total depth 4,471 feet. It showed 800 feet of gas cut oil and 90 feet of drilling mud on a 20-minute drill stem test from 4,270 to 4,471 feet, then cemented 7-inch casing at 4,256. Location is in the southeast quarter of section 10-A21-pal.

Humble No. 16 J. S. Means, in the south part of the Means field in north central Andrews county and in the northwest quarter of section 19-A25-pal, flowed 1,249 barrels of oil in 24 hours for completion at 4,528 feet after being treated with 5,000 gallons of acid.

Four producers were completed after shooting in the rapidly developing four-mile northwest extension to the Goldsmith pool in northwestern Ector county effected by Wm. H. Dunning, Jr., No. 1-A Cummins, Atlantic No. 1-T-P Land Trust, in the southeast quarter of section 35-45-in-T&P, rated 1,886 barrels daily at 4,265 feet, and Atlantic No. 1 Cowden, in the northwest quarter of section 30-44-in-T&P, flowed at a rate of 2,420 barrels daily, also at 4,205 feet.

Landreth No. 1 D Schrabauer, in the northwest corner of section 32-44-in-T&P, was completed at 4,225 feet with a daily potential of 2,082 barrels. Humble No. 2 Cowden, in the southwest quarter of section 30-44-in-T&P, flowed at a rate of 1,800 barrels daily at a plugged back depth of 4,275.

Clark, Cooper & Smith No. 1 Jordan, northern Crane county wildest, was swabbing to obtain an oil load for acidizing lime already shot with 100 quarts from 3,890 to 3,610 feet, total depth being 3,750. Only a small amount of oil was showing. The test is in the northeast corner of section 12-B22-pal, 3 1/2 miles south of the Penn pool in Ector county and five miles northwest of the Waddell field in Crane county.

W. E. Production Co. No. 1 Hughes, one mile southwest of the Crane Cowden pool and in the southwest corner of section 86-20-CCSD&RGNG, showed oil from 2,454 to 2,461 feet and was to be acidized after drilling plugs from 7-inch casing which had been cemented at 2,214 feet.

Chate & Hogan No. 1 Baker, between Henderson No. 1-A Baker an extensiver, and the old part of the McCamey pool in southeastern Crane county, filled 1,300 feet with oil in drilling to 2,272 feet and was scheduled to acidize. It is in the northwest part of section 7, block R, M. S. Denton survey.

Three tests drilled in southeastern Crane county by John D. Hertz, New York motor transportation magnate, Elliott Roosevelt, James Roosevelt and others proved failures during the week. No. 1-A Hughes, in section 101, B. L. Frost survey, struck three barrels of sulphur water in 12 hours from 2,645-06 feet. No. 1-B Hughes, in section 2, HO&E survey, plugged back from 2,129 to 2,121 feet to shut off sulphur water and was treated with 2,000 gallons of acid. It pumped 100 barrels of the oil

Guitar Pool In Jones Co. Is Extended

Possible Production From Deep Horizon Shown In Another Test

ABILENE, Mar. 6—Showing of the second Jones county wildest for possible production from the Swastika lime zone, deepest yet for the county, and striking of the best well in the Guitar pool for a west 440-foot extension, featured activity in this area as the week ended.

The Swastika oil showing was encountered in the Ungren & Frasier No. 1 J. J. Steele, about five miles north and slightly east of Hawley, at 2,460-85 feet. Owners reported it tested a bailer and a half on an hour's gauge.

Six-inch casing was cemented above the saturation late this week. Operators planned to treat with 2,000 gallons of acid Sunday or Monday. It was the original plan to plug back after reaching the 2,500-foot contract depth and treat with acid another lime showing of oil estimated at 15-20 barrels which was obtained at 2,130-37 feet.

The wildest is about four miles west of the Merry Bros. & Perin-Forest Development No. 2 J. H. White, first producer for the county from the Swastika zone.

It is in the northwest corner of the south half of the southeast quarter of section 11, block 15, T. & P. survey, in the center of a 965-acre block taken over from Shasheon Oil Co. of Abilene.

In the Guitar pool, the Danciger Oil & Refiners No. 2 Guitar trust estate was testing after treatment with 2,000 gallons of acid this week-end, with an estimate that the well would make between 700 and 800 barrels daily on gauge.

When cement plugs were drilled at 1,977 feet, the well headed several times over the rig under a gas flow estimated between a half and three-quarter million feet daily. In drilling to a total depth of 2,005 feet, best saturation was found at 1,989-90 feet. That zone was perforated with a Lane gun before acid treatment.

The well is a direct 440-foot offset to the Danciger No. 1 Guitar which made 416 barrels after acid treatment. It is in the northeast quarter of the southwest quarter of section 44, block 15, T&P survey, about a mile northeast of Hawley.

Another completion for the Guitar pool was gauged this week, the Farris, Fikes and Ungren & Frasier No. 4 Guitar making 315 barrels by pumping and agitation after treatment with 2,000 gallons of acid. Originally, owners thought the showing was good for about 15 to 20 barrels daily natural and drilled ahead to the Lower Hope zone where water was encountered at 2,186 feet. It was plugged back to the regular pay horizon at 1,991 to 2,001 feet and acidized. Location is a direct west offset to the

load in five hours, then went to water and was to be abandoned. No. 1-C Hughes, also in section 2, HO&E survey, struck sulphur water from 2,370-71 feet and was abandoned.

Flowing 672 barrels of oil during the last three hours of a six-hour production gauge, Gulf No. 7 Henderson on the northeast edge of the Waddell pool in northern Crane county, was completed at 3,575 feet with a daily potential of 5,377 barrels. It is in the southeast quarter of section 3-B23-pal, only one location south of Gulf No. 6 Henderson, which initially was pumped only 36 barrels of oil with 46 barrels of water daily.

discovery well for the pool, and is in the northeast corner of the south half of the southwest quarter of section 44-18-T&P. During the week, another Jones wildest obtained a good showing of oil, but struck water after drilling 14 feet of saturated sand.

First Showing SIMMONS New Tiltaway STUDIO COUCH

As Advertised in Saturday Evening Post Two easy motions turn it into a bed

OFFERED IN SMART NEW \$49.50 COVERS AT

Sensation of the Furniture Markets! The New Tiltaway Studio Couch! A gentle slight lift and the mechanical leg raises the front so inner section can be pulled out. Simple! Easy! Simmons inner-spring mattress. Convenient bedding compartment. Arms and back rest. Opens to double bed or twin beds. Come in and see it. You'll be thrilled with its many features and the wide selection of lovely new covers.

4 Locations In This Area During Week

1 Wildest Seeking Trend Between East Howard, Chalk Pools

Inactivity characterized oil developments in this area for the week, but new locations and near-completions in the East Howard area forecast a general upturn for the industry in this section.

Four new locations were listed during the week Brazos Production Co. will drill its No. 5 Kioh 1,640 feet from the south and 1,550 feet from the north line of section 3-32-2a, T&P. Sun Oil staked location for its No. 2 well on the Phillips lease in section 14-33-2a, T&P. Shell made location for its No. 3-A Roberts, 300 feet from the north and east lines of section 150-29, W&NW. Probably most interesting of the lot was that of Ajax Drilling Co. No. 1 Kioh, 330 feet from the east and 2,500 feet from the north line of section 3-32-2a, T&P. It is about half a mile north of production and is in the immediate vicinity of a hole drilled several years ago by the Louisiana Oil Refining Co. The well had a small show, considered insufficient for production before the days of acid treatment.

Cellar was dug and materials moved in during the week for the wildest Moore Bros. No. 1 T&P Land Trust, 330 feet from the north and east lines of section 33-30-1a, T&P, on a supposed trend between the East Howard and Chalk producing areas. In addition to being midway between the two fields, it is centered between three abandoned tests, all of which had good shows of oil, in the southwest quarter of section 28-30-1a, T&P, the northeast quarter section 27-30-1a, T&P, and 34-30-1a, T&P. It is to be spudded by March 15.

In the East Howard field, Eastbrook No. 11 Texas Land & Mortgage Co., section 4-30-1a, T&P, was cleaning out after a 740-quart shot with the test bottomed at 2,812 feet. The company's No. 12 Texas Land and Mortgage Co. in the same section was drilling at 2,750 feet with a hold full of oil and was to be shot Sunday. No. 13 Texas Land and Mortgage was completing cleaning out operations and preparing to run tubing for a test, probably this week. No. 14 Texas Land and Mortgage Co., also in the same section, was engaged in a fishing job at 1,506 feet.

Ambassador No. 5 Read, section 46-30-1a, T&P, was ready to test and Ambassador No. 4 Read, section 45-30-1a, T&P, was reported drilling below 2,320 feet.

On the western edge of production in Glasscock county Moore Bros. No. 2 McDowell, 991 feet from the east and 1,669 feet from the north lines of section 21-34-2a, T&P, was experiencing trouble in pulling 8-inch pipe. After pulling seven joints the pipe stuck. It was removed Wednesday but Thursday and Friday were lost due to adverse weather. The test had show at 2,428 feet indicating it would equal a nearby World Oil producer rated at 1,500 barrels.

Continental No. 25-S Settles, section 159-26, W&NW, Howard county, was running five and a half inch casing 1,150 feet. No. 26-S Settles was straightening a crooked hole at 115 feet in shell. Continental No. 1-C Chalk, section 134-29, W&NW, lost tools at 2,474 feet in hole.

CLUB CAFE "We Never Close" G. C. DUNHAM, Prop.

Reading AND Writing

By John Selby

At the end of this arduous week the desire to get away from it all is pretty strong. This may account for the appeal exerted by G. E. Collins' "East Monsoon," but for present purposes that attraction shall be attributed to Mr. Collins' smoothly flowing text, and to the excellent photographs he furnishes. It is too bad these so often are reproduced four to a page, for many are worth more space.

Mr. Collins, like so many of our young travel writers, is an Englishman. He was in business in Singapore, doing, one presumes as well as most clever young Englishmen in Singapore. But for some reason he wanted to wander, and unlike most young Englishmen in Singapore, he just up and wandered. Mr. Collins has none of the inhibitions which hold the many new to the grindstone. He elected to do his wandering by water. He made friends with the Bugi watermen, and having found one to his taste, he set out in the palm of Haji Badong to an accompaniment of beating gongs. The Bugi beat gongs and drums before they sail, and at sea too. There it is to trick sea monsters into thinking the land is near. If convenient, they also take a cock along, because his crowing, according to Mr. Collins, is believed to be dreaded by polyps.

Our young Englishman wandered for a long time among the lesser known islands of the Dutch East Indies. He learned to sail the palaris (he describes the technique of building and navigating these little vessels minutely). It seems that palaris are imitations of the ships the natives saw when centuries past the Portuguese visited these same islands. Today the natives build them with the high stern of the original models, and those of them sailing together look strangely like a Hollywood version of Christopher Columbus's

Embroidered Wall Painting

609

By PEGGY ROBERTS Pattern No. 609

"D'ye ken John Peel with his coat so gay?" We won't guarantee that this is John Peel himself, but his coat is certainly gay, as he sets out on the hunt, surrounded by his faithful dogs. He'll make a welcome addition to almost any room in your house, but would be especially suitable for a man's

Mrs. J. A. Casey and son, Charles, of Monahara, are the guests of her parents, Mr. and Mrs. Theo Andrews.

first voyage west. Mr. Collins, bless him, does not try to be learned. He tells of the sailors' life and their superstitions. He talked with the natives, and made magic for them, and they for him. He paints, with words, some magnificent sea-scapes, and turns up a deal of curious information. Finally he has the natives build him a boat, and there the book ends—the next one just around the corner. "East Monsoon" reads quickly, and the charm of its author is on every page. "East Monsoon," by G. E. P. Collins (Scribners; \$2).

library or den. The design measures about 12 by 20 inches, and requires only outline and straight stitches, so it will be a simple one to make up, in spite of the fact that it looks so well when completed. The pattern envelope contains a genuine hot-iron transfer pattern 12 by 19 1/2 inches; complete, easy-to-understand illustrated directions, with diagrams to aid you; also what material and how much you will need. To obtain this pattern, send for No. 609 and enclose 10 cents in stamps or coin (coin preferred) to cover service and postage. Facial Make-Up Makes Or Mars The Effect Of Easter Clothes

EFFECTIVE MAKEUP A smooth make-up foundation and powder, pencilled brows and softly rouged lips make this modern beauty's face as charming as her black taffeta dinner frock. With them she wears striking jewels—a coiffure clip, ring and necklace of diamonds and rubies.

By ADELAIDE KERR NEW YORK (AP)—Are you going to spoil the effect of your new spring clothes with the make-up you choose for your face? It can be done. Make-up can make or mar beauty and ruin or enhance the chic and color of a costume. Since Easter is just around the corner, it becomes a matter of prime importance, in order that faces may be as attractive as clothes. The Parisian knows the art of make-up to the nth degree. In the first place she gives time to it, for she knows that make-up, like making love, shouldn't be rushed through in a hurry. She spends a quarter of an hour in the application of her make-up and, when it is finished, she expects it to "stay put" for the day. It does—and one reason it does is that it rests on a firm foundation. Over her face and neck the Parisian smoothes a good powder base, either cream or liquid, and allows it to "set" for three minutes. Then she begins with her rouge—always a paste, never a cake—working it smoothly into her skin, generally over the cheek bones. She never smears it back to her hairline nor runs it too close to her nose, since her natural color is not found in either place. If her eyes are small and soft she uses little rouge; if they are large and brilliant, more. Apply Powder Smoothly Then comes her powder, applied smoothly with a pad of absorbent cotton, first on the neck, next on the chin and so on up to the hairline. She puts on more than she needs and brushes the surplus off with a camel's hair brush. With a small, stiff-bristled brush she removes all powder from eyebrows and lashes and, if necessary, outlines the natural line of her brows with a pencil which matches them in color. Her eye shadow is lightly applied, only on the lids. Instead of mascara, she often brushes her lashes with a cream which gives a soft dewy look. She adds her lipstick in a smooth even coat, painting it well inside her lips to avoid a broken line—and the work is done. Even an earthquake won't shake that make-up! The shade of powder used is extremely important. The smartest modern beauties choose theirs a shade darker than their skins because it gives a healthy look and makes their teeth seem whiter by contrast. The wisest mix their own, combining a creamy rose with a little powdered rouge until they have a tint which harmonizes

with their skins. They all have at least two powders—one for day and one for evening wear—and those with ruddy skins finish their evening make-up with a fine light coating of pale green powder, which gives a translucent look. What governs the color choice of rouge, lipstick and eyeshadow is still a controversial point, though many women achieve charming effects by selecting them to harmonize with their costumes. With browns, beiges and yellows they wear rouge and lipstick in which the red has a little yellow in it. With true reds and greens they prefer true red tones in make-up, and with blues, violets, mauves and pinks they select lipstick and rouge in which the red has a bit of blue in it. Blue and mauve eye shadows generally are worn with those colors and the new bronze shadows with brown hues.

Mrs. C. W. Rogers Named As President Of Club Reporters

Mrs. W. C. Rogers was elected secretary of the Howard County Reporters' Association, club formed by reporters from county home demonstration clubs, at a meeting Saturday in the offices of Miss Louisa Lipscomb, demonstration agent. Mrs. Duke Lipscomb was elected president of the group at the first meeting and presided at the Saturday session. The afternoon was spent in reading and discussing newspaper clippings from the standpoint of merits and mistakes. Members are Mrs. W. C. Rogers, R-Ear; Mrs. V. H. Wyatt, Coahoma; Mrs. J. W. Wooten, Fairview; Mrs. E. W. Love, Luther; Mrs. J. W. Milam, Highway, and Mrs. Duke Lipscomb, Elbow.

The association will hold the next meeting at 2 o'clock on May 1 in the home demonstration agent's office.

Parties For Friends Are Given By Misses Nolen And Collins

Miss Joyce Nolen and Miss Barbara Collins were hostesses to friends Friday evening for dancing that was followed by a slumber party. Miss Nolen entertained with a dance at the home of her sister, Mrs. Ralph La Londe, and served refreshments to Miss Cornelia Douglas, Miss Mary Beth Wren, Miss Lee Ida Pinkston, Miss Rozelle Stephens and Messrs. George Yates, Julius Neel Vick McCrary, Myron Gibson and John Coldiron. The young women then motored to the home of Miss Barbara Collins where they were her guests for a slumber party. They were also guests for breakfast Saturday.

Lone Star Lodge Has Business Session

Plans for future work in the Lone Star Lodge No. 375 were made at the business meeting Friday afternoon in the W. O. W. hall by the members with the vice-president, Mrs. W. O. Wason, presiding. Mrs. J. T. Allen and Mrs. S. L. Baker served refreshments to Mrs. S. R. Johnson, Mrs. L. E. Rice, Meador.

Attending were Miss Bobby Taylor, Miss Evelyn Clements, Miss Marguerite Reed, Miss Nancy Phillips, Miss Mary Louise Wood, Miss Camilla Koberg, Miss Clarinda Mary Sanders, Miss Jane Lee Hannah, Miss Mary Nell Edwards, Miss Dorothy Rae Wilkerson and Miss Knaus.

Business Week Much Brighter

Steel Leads In Pickup As Threat Of Strike Is Averted

By the Associated Press Freed of a steel strike threat, the nation's business quickened its steps along the recovery path last week. Steel, backbone of the machine age, held the financial and business spotlight. Mills raised operations to the highest since October, 1929 in a rush to fill heavy orders, feed the busy motor industry, supply material for expanding spring building and for revival in rail and public utility equipment demand. But overshadowing evidence of a mounting industrial tempo was the prospect of peace along the key steel front as result of an estimated \$100,000,000 wage boost, a 40-hour

Mrs. W. E. Rayburn, Mrs. Frank Powell, Mrs. C. A. Shaw, Mrs. W. W. McCormick, Mrs. W. O. Wason, Mrs. J. P. Meador, Mrs. E. O. Hicks, Mrs. M. C. Knowles, Mrs. Florence Douglas, Mrs. E. Frazier, Mrs. S. M. Stinson, Mrs. H. J. Petefish, Mrs. J. E. Hendricks, Mrs. Herbert Fox, Mrs. M. R. Smith, Mrs. W. E. Davis, Miss Myrtle Stamps, Miss Winnell Fischer and Miss Jamie Lee Meador.

week for steel workers and the agreement of United States Steel Corp., mammoth of the industry to bargain with John L. Lewis' CIO. The move of "big steel" to recognize the outside unionization movement, together with the wage and hour concessions, suddenly dispelled strike clouds which had been regarded in financial circles as the chief threat to spring and summer business prospects. A steel tie-up, it was noted, would hit motor, building and other industries dependent upon it for material. Gus Armstrong is visiting relatives in Colorado.

Sound Loaning and Investment Policies

constitute the fundamental means by which your bank keeps your deposits secure.

THEY enable your bank to keep its deposited funds helpfully and profitably employed, and at the same time constantly available to repay its depositors exactly in accordance with its promises.

They enable your bank also to cover the major part of operating costs of rendering services to customers and in addition to set aside reserves as increased protection for deposits.

Furthermore it is the aim of this bank, at all times, not only to find active employment for its loanable funds, but also to direct them thoughtfully and fairly into such channels as will best serve the public welfare.

ALL TOGETHER FOR BIG SPRING

Glen Buck declares: "I do not particularly want the greatest good for the greatest number. I want the greatest good for me. And to others I concede the same right."

He expressed the creed of every fighting American, for we are an intelligent people and we realize that we must look out for ourselves. It is not a selfish creed, for the greatest good for any one of us is likely to mean greatest good for all of us.

A prosperous community is generally a good place in which to live and work. Roger W. Babson points out in speaking of his own bleak Gloucester, "The spirit and thrift of a city are much greater factors in making prosperity than are natural resources."

Big Spring will go far, because it has both natural resources and the spirit of cooperation that makes for good towns. But while we all mean to pull together, we are sometimes a little thoughtless. We forget that Big Spring Stores are a vital factor in our success that twenty-five per cent of our people depend on Big Spring merchants for their livelihood.

A great man once wrote: "After the house in which he lives, nothing is more important

to man in the economy of life than the store from which he draws the supplies upon which he lives."

It certainly behooves every citizen, whether he thinks of the greatest good for himself or the greatest good for the greatest number, to buy from Big Spring stores, price and quality being equal. To do so guarantees a continued livelihood for twenty five per cent of our total population. It guarantees the continued prosperity of stores that do credit to our city—an annual payroll running into tens of thousands of dollars. It guarantees tens of thousands of dollars for taxes, licenses, rent and other items of overhead, all of which is placed into local circulation and becomes quick community assets in which we all share.

Let's stick shoulder to shoulder, then for Big Spring! All together for that spirit and thrift which Babson says "are much greater factors in making prosperity than are natural resources." A solid front against the temptation to buy in other cities the things that can be had equally well from Big Spring stores, remembering that if Big Spring merchants do not have it they will get it for us.
