#### **Motor Boats To Need New State** License April 1

AUSTIN-More than 200,000 motor boats subject to the new Texas Water Safety Act must be registered by April 1, State Highway Engineer D. Greer said today

The law gives the Motor Vehicle Division of the Texas Highway Department the task of issuing certificates of number for boats operating in Texas waters, just as the division administers issuing of licenses and titles to motor vehicles operating on Texas high

Renewal notices for boats now registered in Texas will go out starting January 3, along with a brochure outlining key features of the new act.

"This is a good time for Texas skippers to brush up on the law," Greer said, "to make certain their craft complies with the extensive changes in the new Water Safety

For the first time, state game wardens have full authority to enforce water safety statutes.

All current certificates of number for motorboats operating in Texas waters expire March 31, Greer said.

The new registrations will be valid for a 2-year period instead of the old 3-year registration period.

New fees are: Class boats (less than 16 feet), \$3; Class 1 boats (at least 16 feet long, but less than 26 feet), \$6; Class 2 boats (at least 26, but less than 40 feet long), \$9, and Class 3 boats (40 feet long and over), \$12.

As an example of the changes in equipment in the new act, Greer noted that under the old regulations a small Class A boat needed only to show a single white light for nighttime operation. Now, such craft cruising on Texas waters after sundown must have red portside and green starboard lights as well as a white light showing from the stern.

The regulations also require horns, bells, fire extinguisers, flame arresters and other equipment, depending on the class and type of boat.

It also requires a boat towing skiers to mount a 4-inch rear view mirror.

Details of the new regulations also are contained pooklets supplied by the Mo-

During 1965, the organization worked with local sources n the District and agencies concerned in developing an application for a Resource Conservation and Development Project. On this application, the District has pointed up the soil, water and plant problems, recreation and wildlife problems, upstream watershed possibilities and have listed project measures, activities and facilities believed to be needed in all parts of the Districts and counties concerned.

Future plans of the District include providing educational school systems; also, through work shops for teachers held by the Texas Education Agency, the State Soil Conservation Board, the local District and assisting agencies by furnishing books, lesson outlines and other teaching aids.

Expenses of four 4-H boys from Erath County to the state Round-up at College Station and one boy attending a special range school in Junction was paid this past year by the District.
