Missing Girl is Found After All Night Search

The following order from Adam R. Johnson, state relief director. has been sent out to all county pected to be approximately the ed from the relief rolls effective was approximately 7,000. Com- the United Press learned today. Harry Hopkins, federal relief di- 950.

"The following instructions have April 1, the deadline. been received from the FERA:

"You are hereby authorized to remove from the relief rolls of your state, effective Feb. 1, 1935, all unemployable persons. On and after that date funds made available to the states by the FERA cannot be used for the care and maintenance of those unemployables. The responsibility for the care of this group rests on the local city, county and state officials

"'An unemployable persons is one that is incapable of performage, or mental or physical disabilindividual to work.'

"The FERA is requiring a comload to be filed Jan. 15, 1935 house 500 families, You, therefore, will take imme-

"In making this analysis the following rules are laid down for

"1. A. Women eligible for Mother's Aid, under Article No. 6228, Chapter 256, Section 1, of the Acts of 1931, 42nd Legislature are not eligible for FERA relief.

"B. Persons over 65 years of FLEMINGTON, N. J., Dec. 29. as Relief Commission.

work are not eligible.

"D. Persons receiving allowances under the Pauper Fund are not eligible to FERA relief and city, county, or state,

"2. A. Persons suffering from chronic illness, who as a result of commission are declared able to perform a full day's work, ARE ELIGIBLE for federal relief.

"B. A temporarily disabled person who is otherwise normally employable shall be considered the responsibility of the FERA and shall receive direct relief from federal funds pending his recovery.

"C. If within the household of an unemployed person eligible for federal relief there is an aged, infirm or otherwise unemployable person or any dependent who normally was supported by the wage earner, work certification should be sufficient to provide for such person's care.

They go to Florida and are happy there. Then Peter is recalled home. His family snubs Ann and Valeria tries to make trouble between Ann and Peter. She succeeds and Ann goes away, leaving no hint of her whereabouts.

Peter is disconsolate, believing Ann has discovered his love for her and gone because she can not return it. His efforts to find her are fruitless.

Valeria, scheming to win Peter back, takes him to a party. There he hears a man commenting on Ann's flight. Peter knocks the man down.

CHRISTIAN SCIENCE SERVICES

"Christian Science" is the subject of the lesson-sermon which will be read in all Churches of Christ, Scientist, today.

The Golden Text is: "The Lord hath made bare his holy arm in the eyes of all the nations; and all the ends of the earth shall see the salvation of our God" (Isaiah 52:10). Among the citations which com-

prise the lesson-sermon is the folowing from the Bible: "And these signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues; They shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover (Mark 16:17, 18).

The lesson-sermon includes also the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "The necessity for uplifting the race is father to the fact that mind can do it; for mind can impart purity instead of impurity, strength instead of weakness, and health instead of disease. Truth is an alterative in the entire system, and can make it "every whit whole" (page 371).

the World War.

The New Ford V-8 for 1935 is a motor car designed for comfort as well as ficiency.

Three years ago, the Ford Motor Company brought a new standard of motor performance within reach of the average purchaser by introducing the Ford V-8. The outstanding reliability and economy of its V-8 engine have been proved in the service of more than a million motorists.

For 1935, the Ford Motor Company takes another pioneering step and gives you ease of riding to match that nodern engine performance.

This achievement is Center-Poise nental change in car design-with new, correct weight distribution, new seat position and new springing. The provement is especially noticeable in the back seat. You ride forward, toward the center of the car-away rom the rear axle and away from he bumps. Rear-seat passengers now have the comfort of a "front-

CORRECT WEIGHT DISTRIBUTION -SPRINGBASE OF 123 INCHES

cientific distribution of weight has been effected by completely redesigning the chassis. Engine, frame

DISTINCTIVE NEW LINES AND A NEW KIND OF RIDING COMFORT

and body are all so balanced that their weight is about equally distributed on all four wheels. This permits the use of longer, more flexible springs, both front and rear.

The springbase of the New Ford V-8 is 123 inches, eleven inches longer than the wheelbase. The front spring is mounted forward of the front axle, instead of over it. The rear spring is mounted eight inches behind the rear axle. This long springbase gives increased comfort without sacrificing ease of handling.

Spring leaves are tapered to insure quiet operation as well as greater flexibility.

The Ford policy of constant improvement is reflected also in the

anything you have ever seen in a low-price car. Other important 1935 features are

are richer and more luxurious than

the newly designed brakes and clutch, with softer action, requiring less foot pressure on the pedals, easier steering and new lower X-type frame. The front doors now open forward. There are two new body types -Touring Sedans, with built-in trunk. All 1935 Ford cars are equipped with Safety Glass throughout, at no additional cost.

1935 Fords Placed On Display At Connellee Hot

Hundreds of people flocked if the lobby of the Connellee he Saturday to get first-hand infimation and an eye-view of the n 1935 Ford V-8 which will be display there during the next days. This display was made p sible in Eastland through the operation of the Nance Motor co pany of Cisco and Mr. J. T. W son, zone manager of the Dal district. The model on display the de luxe coupe.

Mr. Watson states that in the near future that a permanent deer will be named for Eastland a one of the best Ford dealers quarters will be installed with coplete parts and garage service whe available.

Most striking feature of the near that in the service was a service when the service was a se

Most striking feature of the near is body lines which are distitively modern and a definite deputure from any previous Ford

The new car also embodies combination of major engineeri developments aimed at increas comfort—which has been call the "center-poise" ride.

Numerous improvements in ch

sis design to provide increased es of control also are included. Two important improveme have been made in the Ford V engine, of which more than 1,30

on are now on the road.

In addition Ford has develous a new type of body—the tour sedan, with unusually sleek light and embodying a fitted rear true compartment integral with body.

body.

Safety glass is standard equent not only in windshields, also in all doors and windows all body types.

In appearance, the new cars characterized by a freshness conception utilizing flowing cut to carry out the modern motif, a new treatment of interior appointments which sound an tirely new note in Ford body sing.

The engineering advances engine and chassis are compara in importance. Principal and these is the new "ride" effect the new spring suspension syste proper car weight balance and p senger weight distribution and location of the passenger closer the center of the car—so that the ride between the wheels.

Bodies are materially wides

Slanting vertical louvres with izontal stainless steel beading combined to form an attract hood-side adornment. The radia ornament is fixed in position, radiator filler cap being under hood.

Wheels are smaller, tires larg The hub caps are adorned with new and modern treatment of V-8 insignia. The result is an pression of mass and stability m pleasing to the eye.

Interiors are roomier, with wiseats—front and rear. Span of front seats has been increased to 5½ inches, providing room wout crowding for three persons bodies with full-width seats. Der's seat in all closed cars is justable. Upholstery and appoments harmonize with the remider of the design.

Better Brakes Are Ford V-8 Featu

Entirely new brakes, of time-tested Ford mechanical twhich provide more effect braking control—with less persure—are an important ture of the new Ford V-8 for 1 now on display at showroom local Ford dealer.

Design of the new brakes

greatly simplified, with less erating parts. They are of self-centering type, the brake sautomatically assuming the effective position within the drub to provide quickest and effective deceleration when sure is applied to the pedal.

A "floating wedge" is pathe new design. This aids in elicing the pressure applied to

the new design. This aids in izing the pressure applied two brake shoes and by the the hub. The fundamental of the brake mechanism a also equal distribution of beforce to each of the four vides a straight pull on the rods, reducing the effort new for operation.

To provide more powerful interest of each of the linings of each of the provide more powerful interest of the linings of each of the provide more powerful interest.

To provide more powerfuling effort, the linings of each are shorter and the shoes permitting full utilization available brake lining surfafectiveness is also increased larger area of contact without provided by the new larger tires.

Tendency of the drums

larger area of contact we wood provided by the new larger tires.

Tendency of the drums pand from heating resulting frequent use of the brakes inished by use of additionating r. bs which expand the area by 40 per cent.
