BEGIN HERE TODAY

ANN HOLLISTER, pretty and 20, sells the family aptiques to pay debts of her father, now dead. On the day of the sale a young man, stopped by motor trouble, comes to her home to telephone. After he leaves Ann finds a blue vase missing and in its place a note signed "P.ik." and \$50.

Ann gets work as a librarian and becomes friendly with SARAH KENT, also employed at the library. She meets TONY MICKLE, commercial artist, and is attracted by him, though Sarah warns her that Tony is fickle and irresponsible.

When Sarah asks Ann to share her apartment Ann agrees. She spends the evening with Tony and it is near midnight when she re-members she does not have the address of the new apartment. NOW GO ON WITH THE STORY

CHAPTER I'' ONY said, "You'll have to come over to my place. I'll give you the guest room, which is all the room I have, and I'll fold up on

the rug outside the door."
"Gallant of you," said Ann. "but I have a better plan. Let's call information." "Bright gal. Now, why didn't 1

Citizens of June Asked to Give Thought to Heal

AUSTIN, Tex .- Dr. John Brown, State Health Officer, ha asked all citizens of Texas to giv some thought to health both pe sonal and public, on this Thank giving day. The original Thank giving was held by the Colonies fe the purpose of giving thanks f

Great advances in the treatmer and prevention of disease have been made since that first Thank giving. Yellow fever, plague, and cholera have practically ceased to exist. Smallpox, diphtheria, and typhoid can be eliminated as a cause of death if a person will have himself and children immunized. Malaria and many other diseases can be controlled if the public would demand that the government furnish such protection.

Due to the advancement in knowledge of disease, concerning its prevention and cure, fifteen years have been added to the expectation of life. This means that a child born now can be expected to live fifteen years longer than he would have if he had been born fifty years ago.

We have a great deal more to be thankful for now, even with a depression, than did our Pilgrim forefathers; so let each one in his Thanksgiving pledge to assist in furthering the work being done to improve health conditions in Tex-.... 84 82 1/2 82 5/8 83 5/8 as.

An unseen army helps Molly Malone serve your telephone

DARKNESS falls, and Molly Malone, telephone operator, goes on duty. Through the night she will keep the voice paths of the telephone system open.

But . . . she will not work unaided.

Back of her labors an unseen army, without whose help her job . . . and your telephone service . . . would become infinitely more difficult, more expensive and less satisfactory.

In a distant city a scientist bends over a delicate experiment. He is one of 4,000 workers at Bell Telephone Laboratories, research unit of the Bell System.

Workmen draw back from the glare of giant furnaces. They are a part of Western Electric, the organization which buys or manufactures the 100,000 parts needed in the telephone service...and sells them to the operating companies of the System at a cost in most cases below what

would have to be paid on the competitive m

A watcher keeps vigil at a lonely "repe station of the American Telephone and graph Company, parent company of the System, where weakening voice curren the long lines that bind together the ating companies of the System are streng and sent on their way.

Bell Laboratories, the research organ . Western Electric, the supply membe T. & T., the parent company of the Bell S ... every unit which makes up Bell Tele service has been made to contribute toward nishing you good service at low cost.

This is a fundamental, and enduring poli the telephone service. Behind it lies the that in an undertaking such as this, pl for the long run, what is best for you as phone user becomes in the end the cou will bring us the sounder, more enduring
