BLIZZARD IS MOVING OUT OF THE STATE

Slowly rising temperatures were forecast for Texas tonight and tomorrow as the high pressure area, bringing the second cold wave, moved east.

A raging blizzard bringing the heaviest snowfall of years, crippled cities of the eastern seaboard from Washington to Portland, Me., today, causing a heavy toll of deaths, injuries and suffering.

New York city, Boston, Philadelphia and other major cities were partly paralyzed. Smaller cities suffered even more.

Suburban areas were all but completely cut off from their cities. Thousands were unable to reach city offices and others were marooned in cities, unable to reach their homes.

OCCUPANTS OF TWO CARS ARE ALSO INJURED

M. C. Tucker of Carbon And Several Others In Cars Hurt.

ABILENE, Jan. 24.—M. C. Tucker, mayor of Carbon, and others were injured in a head-on collision at the Taylor-Callahan county line on the Bankhead highway early today.

Injuries of Tucker were a lacerated eyelid, left cheek slashed mouth to ear, bruises and concussion.

Mrs. M. C. Tucker, Jr., and her five-year-old son, Gray Lee, received scratches and bruises. The Tuckers, driving a 1934 Chevrolet coach were enroute to San Angelo to return Mrs. M. C. Tucker, Sr., of Carbon to her home after a week's visit there.

The car collided with one owned by Leland Jackson of Baird. He was driving a new model Ford. He was given first aid treatment for a mangled hand.

The machines met on a curve in the highway. So powerful was the impact that the motors of the automobiles were jammed together, the ears turning crosswise and forming a barrier to traffic the full width of the highway.

Mrs. J. M. Reynolds, long-time resident of Baird, is at the bedside of her son, Hubert Reynolds. Less than a year ago her husband, a Baird miner, was killed in an accident at his mine.

Mrs. E. Poe, daughter of the Carbon man and sister of the Cisco, a brother, R. L. Tucker, Mr. Poe and Mrs. R. O. Sutton, mother of Mrs. M. C. Tucker, Jr., came here from Cisco. Mrs. M. C. Tucker, Sr., came from San Angelo.

109 More Taking Marital Vows In 1934 Than 1933

An increase of 109 marriage licenses issued in 1934 over those issued in 1933 is revealed by records in the county clerk's office.

For 1934, 365 licenses were issued and in 1933 there were 256. The 1934 license issuances were greater than those of the past three years. In 1932, 205 were issued. In 1931, 218 couples were issued licenses to take the marital vows.

"June as the month for brides," proved to hold true in 1934 in licenses issued in Eastland county. The month in which 41 were issued was the high month of the year.

The license issuance by months in 1934 is as follows: January, 37; February, 38; March, 28; April, 27; May, 33; June, 41; July, 12; August, 36; September, 32; October, 28; November, 23; December, 30.

According to the present rate of license issuance, 1935 will fall below the mark of 1934. Up to Wednesday, 19 had been issued. In the corresponding period last year, 30 had been issued.

Democracy Has Faith In Man's Wisdom

Harvard's President James B. Conant tells a convocation at Amherst College that one of the great threats to human society today is a revival of "the ever-recurring suspicion of man's creative intelligence."

The scholar, says President Conant, has faith in the human mind—faith in its ability to solve any problem which human association can present.

Because of this faith, the scholar favors the freest kind of research into social problems, and the fullest kind of discussion of them—believing, as he does, that human intelligence is capable of finding the way out of it is just given the chance.

But today a distrust of this capability is growing. Some people are rising to protest against this kind of free inquiry. They call for closed minds, as if some questions were so dangerous that even to examine them from an unbiased viewpoint were to court grave danger.

"The universities and colleges, as focal points for speculation and research," says President Conant, "are the subject of hostile criticism, and in at least one country have suffered a devastating prosecution. Man's restless spirit of inquiry has always been disconcerting to those who demand a final and unchanging picture of the universe."

Now all this may seem rather remote and academic, to those of us whose daily routine is conducted far from the campus. But it is worth remembering that it is precisely this faith in man's creative intelligence—this faith which animates every college and university worthy of the name—which is the foundation stone of the democratic theory.

In other words, we live under a democracy for exactly the same reason that men like President Conant devote their lives to scholarly research: Because we believe that the race has the brains to find a way out of its troubles and the collective good will to follow such a way once it has found it.

This viewpoint is not popular in the world today. In nation after nation, men have abandoned this faith and have asked to be led by some autocratic power which will make all decisions for them.

Some of them have even proclaimed jubilantly that democracy is an out-of-date concept, and that only the authoritarian state can survive in the modern world.

For ourselves, we still believe in freedom—freedom in government, in academic research, and in all other forms of social activity. We hold that belief because we still have confidence in the power of human intelligence.

The Modern Seed Catalog

The seed catalog still functions as a stock joke for cartoonists and columnists, though it has been years since the catalogs stopped promising the miracles of which the horticulturists make fun. Watermelons large enough to fill a hay wagon, and vines whose growth rivals the fabled beanstalk of the fairy story are no longer pictured as possible to the purchaser of a favored brand of seeds.

"About why you left Paris." "But I told you I've given up studying. I told you I found out I never could be an artist." "But that's not true, Brian! Your pictures were gorgeous." The young man laughed—not a mirthful laugh. "Your opinion," he said, "does little credit to your ability as a critic. No, those pictures were pretty terrible."

# Huge Telescope May Explode Old Theories of Space

**By United Press**  
**ACUSE, N. Y.**—The Cyclo-  
 pean telescope "eye" now being  
 completed at the Corning Glass  
 Works, may prove or disprove  
 many of the theories regarding  
 the universe—including Prof. Al-  
 bert Einstein's latest belief that  
 space is curved and finite, in the  
 opinion of Dr. Harlow Shapley, fa-  
 mous scientist and head of the  
 Harvard Observatory.

Dr. Shapley expressed his op-  
 inions here before addressing the  
 Technology Club.

"Within six years after the  
 giant telescope has been set up,"  
 Dr. Shapley declared, "we may be  
 able to say accurately whether  
 space is curved and finite or open  
 and boundless."

"And this is only part of what  
 the telescope will do. Astronomers  
 will be able to analyze parts of  
 the universe millions of light  
 years away from us, bringing the  
 nebulae into sharper focus than  
 heretofore possible."

Dr. Shapley pictured verbally  
 the vast depths of the outer uni-  
 verse and told of thousands of  
 new island universes found in the  
 far reaches of space through his  
 survey of the Cosmos.

"We have in our survey of the  
 metagalaxy discovered and pho-  
 tographed about 130,000 new gal-  
 axies, many of them larger than  
 the earth's immediate universe, he  
 declared.

"Twenty years ago there was no  
 astronomical theory, as we know  
 it. Then the universe was a static  
 thing; today we consider it dynamic."

"Out of our research and the  
 work of mathematicians and phys-  
 icists has arisen a new picture of  
 the universe in which the laws of  
 cause and effect, once regarded  
 as rigid, no longer have the  
 same meaning."

The doctor told of an exhaustive  
 study he had made of the newly  
 discovered exploding star, Nova  
 Herculis.

"This star," he said, "has in-  
 creased its brightness more than  
 200,000 times. The usual exploding  
 star increases only 1,000  
 times."

# South Dakota May Revamp Its Income Tax Law

**By United Press**  
**PIERRE, S. D.**—South Dakota's  
 gross income tax, restricted in  
 scope by the State Supreme Court,  
 yielded \$3,000,000 during 1934,  
 according to State Tax Director  
 W. C. Welsh.

Welsh, however, is dissatisfied  
 with the present law which ex-  
 pires June 30, 1935. He is re-  
 writing it, hoping to extend its  
 scope and reach all possible in-  
 comes. In its present form it re-  
 duced the property tax levies 31.5  
 per cent in 1934 compared to  
 1933, Welsh said.

The gross income tax was de-  
 signed to tax every dollar of in-  
 come from any source. The State  
 Supreme Court, however, ruled  
 that it could only function as an  
 occupational or privilege tax. The  
 court excluded all receipts of in-  
 terstate transactions.

This permitted farmers and  
 others to evade the tax by selling  
 on foreign markets. It also made  
 it difficult for the tax depart-  
 ment to collect on private invest-  
 ments such as bonds, and real estate  
 rentals, Welsh said.

The largest items of gross in-  
 come tax revenue last year in-  
 cluded \$982,895 from a one per  
 cent levy on public utilities, com-  
 munication systems and mines,  
 and \$546,000 from a graduated  
 tax on salaries.

Welsh said he plans to advocate  
 no increase in rates but believes  
 that successful levying on receipts  
 now exempted by the Supreme  
 Court can be provided through  
 an occupational privilege tax in-  
 corporated in the present bill.  
 This, he said, would provide an  
 equitable and satisfactory pro-  
 gram.

 in their general operating fund at  
 the end of 1934, city officials here  
 claimed Mansfield's financial con-  
 ditions "probably the healthiest of

 Paul L. Kelley said the balance  
 was the largest in the city's his-  
 tory and is approximately \$75,000  
 higher than that for the boom  
 year, 1927. Strict economy in mu-  
 nicipal operations is given as the

# 'Dusting the Covers of Texas History' for The Texas Centennial Celebrations of 1936

The first issue of The Texas  
 Gazette was off the press. Wood-  
 en peg fastenings on front doors  
 were hurriedly pulled out as eager  
 Texans quickly to get their copies  
 of the newspaper. Goodwin Brown  
 Cotton remained at his print shop  
 all day to accept the congratula-  
 tions of his fellow-citizens. He had  
 been confident that his paper  
 would come up to their expecta-  
 tions, and he had not been disap-  
 pointed. Without a doubt he had  
 been rather elaborate in his praise  
 of the country, but it was well to  
 give the people back in the states  
 a good picture of Texas.

"We are here situated in an in-  
 teresting and highly favored por-  
 tion of the earth. The God of na-  
 ture has scattered choicest bless-  
 ings in rich profusion. A temper-  
 ate climate, salubrious atmos-  
 phere, and fertile soil, together  
 with its natural advantages for  
 commerce, all unite to render it  
 by nature one of the most delig-  
 htful and eligible situations in the  
 world and promise fair to reward  
 with in luxury of abundance the  
 tools of the enterprising and indus-  
 trious."

That was a good paragraph. Those skeptical relatives in Con-  
 necticut and Virginia could no

who laid the permanent founda-  
 tions for the state. Without their  
 courage and efforts to carry on  
 in spite of hardships, there could  
 have been no future "value and  
 usefulness of this country."

# Clean Out Kidney Poisons

**Wash Out Your 15 Miles of Kidney Tubes**  
 If kidneys don't pass 3 pints a day that  
 contains nearly 4 pounds of waste matter,  
 the 15 miles of kidney tubes and filters  
 become clogged with poisonous waste  
 products and the danger of acid poisoning is  
 greatly increased. Bladder passages are  
 difficult, which often smart and burn  
 like scalding water and cause discomfort.  
 This acid condition, brought about by  
 poor kidney functions is a danger signal  
 and may be the beginning of magnetic bac-  
 terial leg pains, loss of pep and vitality,  
 getting up nights, lumbago, swollen feet  
 and ankles, rheumatic pains and dizziness.  
 Most people watch their bowels, which  
 contain only 27 feet of intestine, but neglect  
 the kidneys which contain 15 miles of  
 tiny tubes and filters. If these tubes or  
 filters become clogged with poisons, it may  
 knock you out and lay you up for many  
 months. Don't run any risk. Make sure your  
 kidneys empty 3 pints a day.  
 Ask your druggist for DOAN'S PILLS,  
 an old prescription, which has been used  
 successfully by millions of kidney sufferers  
 for over 40 years. They give quick relief  
 and will help to wash out the 15 miles of  
 kidney tubes.  
 But don't take chances with strong drugs  
 or so-called "kidney cures" that claim to  
 fix you up in 15 minutes. Treatments of this  
 nature may seriously injure and irritate  
 delicate tissues. Insist on DOAN'S PILLS  
 the old reliable relief that contains no  
 "dope" or habit-forming drugs. Be sure you  
 get DOAN'S PILLS at your druggist.

Music Study Club
The Music Study club will present a wonderful program Friday afternoon at their regular club meeting, in community clubhouse, with Mrs. A. F. Taylor as program director.

Those appearing on the program will be Mrs. Arthur Vaughn, Mrs. Frank A. Jones, Mrs. Grady Pipkin and Miss Edith Meek.

Women's Missionary Society
The Women's Missionary society of the Methodist church, of which Mrs. L. N. Griffin is president, has within recent days reorganized the society formerly divided into three circles, and now organized into two circles.

Circles 1 will be hosted to Circle 2 at the Methodist church next Monday, opening at the usual hour, 3 o'clock.

Mrs. A. W. Hall of Weatherford and Mrs. McRae of Arkansas will be speakers Monday afternoon for the special hour of the Women's Missionary society.

Ladies' Auxiliary
The Ladies' Auxiliary were the acting hostesses to all those attending their 7 o'clock chili supper served in the city hall Tuesday night.

Everybody served themselves from the buffet laden with tamales, chili, catsup, cheese, wafers, and coffee. Tables were spread with red and white checked cloth, centered with white holders and red candles.

MENUS AND RECIPES
DENTON.—Car casses weighing less than 300 pounds are classified as veal. Veal is distinguished from beef by the color and grain of the lean and by the color of the fat, the lack of thick gristle and tendon, and by the size and color of the bones.

CLASSIFIED ADS

ELECTRICAL APPLIANCES
Texas Electric Service Co.

Dolly Garrett and Fred Garrett, played by the Jimmie Cheatham, but they are all there and then some.

Agnes Harwood Doyle makes a delightful dark-toned Miss Alvarez, and Karl Tanner is something to look up to as De Witt.

Mrs. Layton Eppler is a charming Marie, and who doesn't love Peggy McLaughlin in anything she plays, and the sinuous, Mrs. Art H. Johnson, in all she does.

Rehearsals are held nightly at the home of the president of the Little Theatre, Judge O. C. Funderburk, and are being kept pace with by the ticket sales under the chairmanship of Mrs. P. G. Russell.

Musical Programs To Be Presented
The Dragoo Studio announces the presentation of the Dragoo Ensemble, The Studio Chorus and the Dragoo Octet at 7:30 p. m., in the Methodist church on Thursday and Friday nights.

The public has been cordially invited to attend these concerts, which present the best violin musicians in this section of the state.

Rummage Sale
Martha Dorcas Class
The Martha Dorcas class is working hard to make their rummage sale of Friday and Saturday, Feb. 1 and 2, an unqualified success.

Civic League in Federation News
The following appears in the January issue of Texas Federation News, received Monday: "The Civic League and other women's clubs of Eastland, under the direction of Mrs. J. M. Perkins, and Mrs. W. K. Jackson, had a community Christmas tree on Dec. 21. Choral selections were rendered and toys distributed.

Finding Press Space Is Just Like Puzzle

AUSTIN, Tex.—There is a popular little puzzle in Austin consisting of a number of blocks in a box and one empty space the size of a block. The trick is to move the blocks around in a way to bring a particular block to a designated place, still leaving room for the other blocks.

Gov. Allred, House Speaker Coke Stevenson, the State Board of Control, the State Railroad Commission and the State Tax Commissioner R. W. Anderson helped capital correspondents work out a similar puzzle on a large scale. Together they solved it with the result that the Press now occupies adequate office space in the state capital.

California Tightens Auto Speed Laws
SACRAMENTO, Calif.—California's speed laws will be enforced almost to the letter in an attempt to curb the rapidly mounting fatalities on highways.

E. Raymond Cato, chief of the state highway patrol, has ordered all patrolmen to arrest any motorist traveling more than 50 miles an hour, regardless of circumstances. The speed limit is 45, and no more than a five-mile margin will be permitted.

Heretofore, fast drivers were warned, while speed on good highways where traffic was not congested received little attention.

Pastor Is Glad of Call to Church

A letter to H. C. Davis, Chamber of Commerce secretary, from Dr. Charles W. Estes, soon to be Presbyterian church pastor, reveals he is enthusiastic at the opportunity of coming to Eastland.

Denton, Texas, Jan. 21, 1935. Mr. H. C. Davis, Secretary Chamber of Commerce, Eastland, Texas. Dear Mr. Davis: I remember meeting you at the Lions club, one week ago tomorrow, and your special concern in the unlimited field you are now serving, and your cordial greeting to me while in your city.

As I stated to you and others, my plans are all about completed and I think my moving to Eastland is an assured fact, because I had a conference with our state board in Fort Worth, last Thursday, and it is now agreed that the move shall be made as soon as I am able to be released from my several obligations in Denton, and am working along the plan of moving to Eastland March 1, 1935.

Naturally I am concerned in the trade extension, larger business for the city where I reside as a Presbyterian minister, willing to give every interest possible to create a larger trade territory. Yes, the observance of the Fourth of July, an opportunity for the city and community to create and build a better idea of citizenship, so much needed at this time.

And, relative to the Eastland county annual fair, will say that this is a special concern of mine and I have had much happiness in the advancement of this line of county organization, closely associated with one of the best county fairs in the state, active in the growing of pure-bred Jerseys, and showing a number each year in the fair, and chairman of the county 4-H club activities, and with this have served four years as president of the Denton County Jersey Cattle club, with a number of the largest herds in the state and now I suppose the largest imported herd in the southwest.

In all other activities, and now

Housing Problem In City Getting Acute

HOUSTON, Tex.—Housing in this city has become a problem and the supply of vacancies will hold out less than four months if the present rate at which it is diminishing continues, a survey by B. C. Burchfield, real estate executive, revealed.

Burchfield said vacancies were disappearing at a much more rapid rate than new houses and apartments were being constructed, and added that Houston faces a housing shortage.

Germany will get the Saar on condition the territory is demilitarized, and Germany will see to it that if it takes a whole army to do so.

Theft and Light Don't Mix, Says Dallas Officer

DALLAS, Jan. 24.—As a means of crime prevention, citizens are warned they should leave a light burning inside their home when they leave for a few hours at night rather than leave only the porch light burning; Police Captain Newman D. Bailey, Dallas, newly appointed public relations officer of the department, said.

How Do You CHOOSE?

Every time you make a purchase you make a choice. Buying a certain product may be so much a matter of habit that you don't realize you are choosing. But the fact remains that in accepting one brand of goods you are always rejecting others; and the satisfaction you get from what you buy depends on the knowledge of quality and values that guides your selection.

How do you know which bed-sheets, or which roofing materials, or which radio will give you service you require? You can't personally test everything you buy and compare it with all the other products in its class. But there is a way to find out which brand fits your needs.

The people who are most successful in their buying—who achieve the highest percentage of satisfaction from the things they own and use—are those who consistently read the advertising columns, and buy consistently advertised goods.

Choosing isn't just "guessing" when you follow the guidance of the advertisements.

You can depend on advertised goods. It pays to read the advertisements.

There are many things you can depend on when you buy. You can depend on the quality of the goods you buy. You can depend on the service you get. You can depend on the value you get for your money.
