To be sure, outbreaks of anti-Semitism in Germany are no new thing, these days. Perhaps we ought to be casehardened to them by now. And yet there is something appallingly reminiscent of Czarist Russia at its worst in these accounts of uniformed bands of Nazis roaming the streets, beating men and women, spreading terror and chanting bloodthirsty slogans.

The worst thing about an outbreak of this kind is not its brutality. That is something which this imperfectly civilized human race of ours never entirely succeeds in quelling. We are born to trouble as the sparks fly upward, and getting poked on the nose now and then by our brother man is just one of those things that go with human existence.

**Faces Final Proof** 

NEW YORK .- The scourage of infantile paralysis at last may be under control of science. In the New York City laboratories Rhesus monkeys are being killed at the rate of 500 a month in the manufacture of a vaccine which was tested in the Los Angeles epidemic of last summer and is being used in the current North

Carolina epidemic. If the North Carolina tests are extensive enough

it may be conclusive proof for the accine. None of the 2,000 children vaccinated in California contracted the disease, nor have any of the 500 similarly treated in New York and New Jersey. More than 500 doses were sent to North Carolina within 10 days after the outbreak there.

It requires thousands of tests in infected areas to be certain the vaccine immunizes, Dr. Maurice Brodie, discoverer of the new preventive, explained. He has been working with Dr. William H. Park in the laboratories here for two years developing the discovery he made while a professor at McGill University in Montreal, Canada.

Move Your Office to the Shore of a Lake

## with Air Conditioning

\*\* \*\*\*

50

How often have you wished that your office could be moved to the lake shore during these stifling hot summer days? It would be mighty fine and you could do twice as much work with far less effort than now.

In effect, it can be done. Air conditioning will bring to your office all of the cool comfort of the lake shore and more-it will rid the air you breathe of all impurities that cause many summer ailments and regulate the humidity at the proper point for good health.

Trained air conditioning experts on our staff will be glad to discuss your office or home air conditioning problems with you. You owe it to yourself to add the comfort of air conditioning in you: office this summor

# YOU, TOO, CAN BE A DUCHESS

In the grand old days of the drand dukes, Her Ladyship held a "little court" for tradespeople every morning in her own apartments.

It was usually while her hair was being powdered. In would troop lace-makers and portrait-painters, a poet with rolls of verses and a peasant who might offer anything from a yellow puppy to a pot of honey. All the wares of the realm were spread before the duchess for her disciminating purchase, and without her putting the toe of her shoe outside the door.

Have you ever thought how much like her you are?

Every day, as you linger over your newspaper, the wares of the world assemble before you in the advertisements. Exciting new fashions from your favorite small shop. Household essentials from the great department stores. Everything for the menu . . . the motor car . . . the mode in make-up, offered to you for your choosing and deciding.

And many of these purchases you'll negotiate with more satisfaction than the duchess enthroned at her dressing table. For, where the duchess had to judge of quality for herself, you have the word of the merchant and the word of the manufacturer for integrity, correctness and cost.
